HALF HOUR CHAPTERS FOR FLOWER GROWERS

Freeseias.

The early bulbs of freeseias are now in and those who wish to have the flowers early ought to get busy and obtain their stock. The few bulbs we have seen thus far appear to be in very good condition, well ripened and heavy and this is the kind that should be chosen. Size counts, of course, in a freesia as in any other bulb, but size is only one consideration and a bulb that is heavy and solid for its size is far more likely to produce good flowers than a large, light, poorly cured one. Freeseias are among the most easily grown of bulbous plants and if a few minor details are attended to will generally be satisfactory and give very little trouble to the grower. As to whether they are profitable or not depends entirely upon what kind of demand exists. They do not pay to grow in small quantities for the wholesale market and the grower who only intends growing a few thousand and has no retail outlet for them should think several times before going in for them. But the man who has a retail store and grows a part at least of his stock will find freeseias a paying crop if ordinary skill and care are used. The freesia, it should be kept in mind, is practically a hardy plant, a native of the Cape of Good Hope like the ixia, gladiolus and other cape bulbs, though grown almost exclusively under glass for cutting. This being the case it does not relish hard forcing, so, if flowers are wanted for the Christmas trade, the bulbs should be potted or planted in flats directly they are received and set in a cool partially darkened or shaded position to get established before going into the greenhouses. A little heat may be necessary towards the last to bring the flowers in on time but the less they have the better by all odds. The flats or pots should be filled loosely with soil to the top and the bulbs gently pressed in to the depth of about an inch, or just so that the point of the bulb shows at the surface of the soil. By pressing the soil around them this will be reduced to the right level or about half an inch below the rims of the pots or boxes. Water thor-

oughly when they are placed in position, either in a cool greenhouse under the benches, in a cool shed or a shaded position outside, the latter being the best of all. They will probably need another watering or two—anyway keep the soil from drying out too much—and after a few weeks of this treatment they will be fit to go into the greenhouse for gentle forcing for Christmas. Later batches will, of course, be potted later, the freesia being a bulb that can be flowered over a very long season owing to its ability to rest for a long time if necessary.

Lilium Harrisii.

The arrival of the first cases of Lilium Harrisii means a busy time for the grower who forces this lily for extra early work, for considerable hustling has to be done to get the bulbs potted and grown on so as to flower by Thanksgiving. Even for Christmas flowering the bulbs should not be allowed to lay around for the earlier they are potted the less heat will be needed to bring them in for the great holiday. It is important for early forcing that the true Lilium Harrisii is procured and, as several well known firms are now advertising the new crop bulbs we strongly advise the beginner in their culture to obtain their supplies from such people and not to bother with firms of no repute in this respect. There is none too big a margin of profit in growing any of this class of stock, even when the bulbs are of the best and they are properly handled. When untrue or diseased bulbs are obtained and the risk of doing so is great when buying from unscrupulous dealers, then it is a dead loss to the grower, not only of the price of the bulbs but his season's work as well. As to the grade of stock purchased this will depend upon what is most in demand. If the choicest of lilies are wanted for a high class trade then buy the 7-9-inch bulbs, but if a lower grade is good enough then smaller bulbs can be purchased at a saving of from 20 to 40 per cent. For the smaller bulbs 5-inch pots are large enough, but for the largest 6 or even 7-inch will not be too big. T.

is not important; any good potting compost will do well. Pot the bulbs so only the extreme tip of each shows above the surface and stage them on a cool bottom of ashes in a frame or outside in a plant protector. Give one good watering to settle the soil around the bulbs and cover with a couple of inches of strong litter or decayed manure, to prevent the sun from scorching up the surface and to conserve the moisture in the soil. The pots must be examined occasionally and, if necessary, another watering or two should be given. While the soil must not be kept wet yet a reasonable amount of moisture must be present to feed the advancing growths which will soon be showing. When the growths push through remove the covering by degrees and select the forwardest, most likely looking plants for the earliest forcing and stand the remainder back for the second batch, others being potted in the meantime to carry on a succession. One thing should, however, be noted. It is not always the bulb with the best looking top that has the most roots, and as roots are what are needed for early forcing it may be advisable to turn one or two out of the pots and see how the roots are progressing. A bulb with small top growth and plenty of roots will force more easily and better than one with a good top and few or no roots. Always shade these early batches of lilies in the greenhouse and commence forcing with a night temperature of 65° after they have got used to the change from outdoors. Their subsequent treatment will be described later.

Sparaxis Pulcherrima.

Sparaxis pulcherrima is a native of the Cape of Good Hope and perhaps one of the most graceful and pretty of all the Cape bulbous plants. According to Luther Burbank it is easily raised from seed and flowers freely the second year all through the summer. The colors of the flowers are crimson, pink and white and the spikes are from six to seven feet high. It is related to the *ixias*, but is more difficult to handle than these and other Cape bulbs.

Burbank's Pink Flowering Chives.

The accompanying picture shows the free flowering nature of Burbank's pink-flowering chives. Chives are useful in the kitchen and a bed of them is a good addition to any vegetable garden but these have an ornamental as well as useful side. It is described as a wonderful bloomer, a character that it richly deserves, judging by the picture.

BRAMPTON, Ont.—W. G. Peacock of the Dale Estate reports having a good time in London, Eng., though for the first eight days in the big city he did not see the sun. He speaks very highly of the show of the Royal Horticultural Society at Holland House, on July 6. E. G. Hill, of Richmond, Ind., was among the visitors to the show. He says that most of the 6-inch carnations we hear so much about are wired but that they pay from 9s. to 15s. per dozen (\$2 to \$3.60) for them even in summer.

THE RETAIL TRADE

The Standing Wreath.

SEE SUPPLEMENT WITH THIS ISSUE.

Although opinions are somewhat divided as to the artistic value of the standing wreath, its popularity cannot be questioned and the nature of the design makes it possible to use a great variety of flowers, almost anything, in fact, that may happen to be in season. Just now, when all varieties of gladioli are extremely plentiful, these are excellent for the base of the design, arranged either with their own foliage or with leucothæ sprays. Easter lilies are elegant for the same purpose as are any others of the lily family such as *Lilium speciosum rubrum*, *L. speciosum album* or even *L. candidum*. In the chrysanthemum season a few fine specimens loosely arranged

Cross of Lily of the Valley on Galax. Base of Easter Lilies and Leucothæ.—By Young & Nugent, New York.

with suitable foliage make an elegant base and, in short, almost any bold and striking flower is suitable.

As to the wreath itself there are, of course, various methods of treatment, any flowers used in the ordinary wreath being just as suitable for a standing one. But care must be taken that the flowers do not clash in color with those of the flowers used in the base and an effort should be made to get away from the stereotyped round form by allowing a spray of fern or other greenery or a few flowers to escape from the wreath. Remember, too, that it is not the quantity of stock used in a wreath that gives it its value from an artistic standpoint. A wreath with a few flowers well placed, so that each shows its individuality and stands clear of its neighbors, is far prettier and far better in every way than one with a lot of valuable stock closely arranged so that it has a lumpy, heavy effect. Such a wreath may be made very attractive and show a fair profit at \$10 while higher prices will have to be charged for better work and the use of more valuable stock.

Store Wisdom.

Cleanliness should come first. The shop should be as bright and fresh and free from dust as that of the druggist across on the corner. At this time of year with the doors open the dust soon settles; go after it, chase it out. The stock must always look fresh if you want or expect it to attract attention.

This is inventory time; if you have not already done so take an account of your stock of baskets, pedestals, pot covers, wire work, pottery, etc. You may not think it worth while, but you will be surprised to see how it mounts up. At the same time sort out the poor truck that you have not had the courage to throw away. If a little gold or silver paint or gluing will make it presentable fix it up at once and if not throw it out and get the valuable room. Give the pedestals and pot covers a coat of paint and get them ready for the fall campaign. If the stock seems low go over the list of recent decorations and see if a lot cannot be rounded up.

We know of an order given where, after the arrangements were made, it was added: "You need not send any stands or baskets as there are plenty left here from the last time; my man put them in the cellar and says he phoned you to take them away but they are still there." Ever have anything like this in your experience? And the same is true of cut flower vases; a look over these once in a while in addition to the annual inventory is a great help to keeping the stock intact. Have the wire frames or designs been gone over lately? All sizes of wreaths, crosses and pillows should be on hand as well as easels, wooden and wire, and wire vases or stands to which wreaths and crosses can be attached quickly. There are many emergency cases when these auxiliaries can be used to good advantage, giving an ordinary piece a much more important appearance and greater value. The gates ajar, chair, column and lyre are staples of which a sample should be on hand. Don't get caught like a retailer in a country town we know of who was called upon by a committee to make them a vacant chair. He took the order and said to his man, "John get that chair mossed up," and he answered, "Why, it's out in the Jones lot; don't you mind we made it for the old man's funeral over six years ago?" "Well, jump in the wagon and go get it; these fellows want it early tomorrow."

By the way, what moss do you use for frames? I have seen and in fact have used the green clump moss, but it is much too heavy and when it gets old and dry and is moistened the odor is very unpleasant. Sphagnum is much better. As soon as a bale is opened have it teased out, removing all the sticks and roots and wet it and see that it is kept damp all the time as when handled dry there is a great deal of waste. Use wire bobbins for binding or wrapping on the moss; they are much better than string; number 27 wire is heavy enough. Break in one of the boys to do this work and have a few of the sizes most used always mossed up. It is a great help to have just the sized design wanted mossed up and ready for the flowers when there is a rush on. Do not use box

frames; wreaths, crosses and all flat designs are much better made on single frames. To cover the back wrap it with green foil before mossing, or, if mossed plain, it can be covered with dagger ferns when made up. Bright tin foil lining for frames is very objectionable as it is so conspicuous and always gives the pieces a very unfinished appearance.

Anything of this character to place on marble slabs in the cemetery at such times as Easter or Christmas should, however, be carefully wrap-

That International Delivery Concern.

For the information of the trade in other parts of the country it might be well to take note of an incident that occurred in Albany, N. Y., July 19 when one firm of florists came very near losing \$50. The circumstances attending the whole transaction certainly savor suspiciously and it might be well for all readers of THE FLORIST to be on the lookout for any similar proposition that might be brought to their attention.

representative, the most prominent florist, in each city. The "company" was to begin business August 1 and would have correspondents in New York, Boston, Buffalo, Washington, Baltimore, and other cities in the United States besides connections with prominent florists in Berlin, Paris, London, and other continental cities. Each member of the association was to deliver his orders in a distant city through the association's representative in that city. All the local florist had to do was to telegraph the order to the New York office which would send word to its member in the city concerned. Provision was made for the refunding of telegraph tolls at the end of the year, and certain other advantages were pointed out.

The man was anxious that the deal be closed at once and the money paid over, but Mr. Eyres was not willing to do business without first making a few inquiries. He told the representative to come back in a few hours when the conversation was renewed. He asked the stranger for his card. He had none. Sheet of his letter paper with officers? None. "Well," said Mr. Eyres, "I do not see how I can buy a pig in a bag. I will write first to W. J. Palmer & Son, Buffalo, who you say is your representative in that city, and find out if this proposition is all right." The stranger seemed to be taken back and said that he was not in the habit of waiting two or three days before closing a deal and that some one else in Albany would accept the offer. He then left the store. From Eyres he went to The Rosery, 76 Maiden lane, and there met one of the proprietors, E. P. Tracey. In flowing language he told him that he had heard that The Rosery is a young and enterprising firm and that the "association" he represented had selected that firm as its representative in Albany. He said that the "association" had among its members Galvin of Boston, Thorley of New York, and other prominent florists in other cities. The rate for service in Albany would be \$50 if taken this year and \$100 if delayed until 1911. The thing seemed plausible to Mr. Tracey who had the man draw up a contract to which was

SPARAXIS PULCHERRIMA.

A Graceful Cape Bulb Grown at Luther Burbank's.

ped with good foil before mossing, else the stone will become disfigured from the rust of the wire. Keep a good supply of the knockdown corrugated boxes for carrying and packing designs. It is very injurious to have to crowd a beautiful design into a box much too small for it. If sent by express there is no one to see that disarranged flowers are placed again and one hears little in praise of the work. If packed in a proper sized box it will nearly always arrive safely and give great satisfaction. If the flowers are being sent to persons who may not expect them, notify by mail or telegraph of their coming and this will often help their expeditious delivery. Many country express offices do not deliver, simply notifying by mail the persons to call for a package. Such delay often causes the flowers to arrive too late to be of use for the purpose intended. In these cases customers often refuse to pay for them or pay grudgingly. Mistakes in the addressing which will occur at times would often be straightened at the other end when parties called for a package of which they were notified but which did not bear their exact address. K.

NEW YORK.—One of the largest century plants (*Agave Americana*) in this part of the country is about to bloom in the court of conservatory ridge No. 1 of the Bronx Botanical Gardens. It is a part of the collection of American desert plants in the conservatory.

On the morning of the date named a prosperous looking man about five feet 10 inches tall, dressed in a dark suit, straw hat, with smooth shaven face, and wearing a Masonic blue lodge pin in the lapel of his coat called on H. G. Eyres, 11 North Pearl street. He said he represented the International Floral Association, Marbridge Building, 128 Broadway, New York, and that the company was seeking one repre-

BURBANK'S PINK FLOWERING CHIVES.

signed, as nearly as could be made out, the name "W. H. Eldridge," and Mr. Tracey handed over the firm's check, dated July 31.

After the man left Mr. Tracey called up Welch Bros., Boston, by telephone and asked a representative of that firm to go around to Galvin and ask him what he knew about the "International Floral Association." In a short time Mr. Tracey received from Boston a laconic telegram: "Don't know any such party here. Signed, Welch Bros." Mr. Tracey then telegraphed to Morris Cohen of Wertheimer Bros., ribbon men, New York, and asked him to go up to the Marbridge building, 1328 Broadway, and enquire there about the "association." In time a telegram came from New York: "Could find no such concern. Morris Cohen."

Mr. Tracey then reported the matter to the chief of police and notified his bank to stop payment on the check. On Friday morning, July 22, Mr. Tracey received a letter signed "C. H. Hartman" on a letterhead of the "International Floral Association," returning his check and informing him that the association would not be ready to do business on August 1 but that it might begin in September and would be pleased to receive his check again late in August. R. D.

ORCHID NOTES.

Odontoglossum Crispum.

There would be fewer complaints of this fine orchid being difficult to grow, if those who have it in charge would give a little more thought to the nature of the plant and the conditions under which it grows in its native forests. So different are these to the dry atmosphere they have to come through in their journey to our greenhouses, that the plants are shrivelled up and nearly dead when they arrive. This being so, they require very careful treatment the first season, and if they do not get it and take with a will to their new homes the first year, in all probability they never will.

Take the average shipment of plants that reaches the grower as an instance. There may be a few plants still bearing healthy leaves, but the majority will be found destitute of foliage or only carrying such leaves as have been produced on the trip home. These, it may be noted, have been produced at the expense of the preceding bulb; they have so weakened this that in all probability it will not break strongly again, yet they have not sufficient stamina in themselves, being produced under such unfavorable conditions, to develop into healthy growths and bulbs. For this reason, if the choice rests with the grower, he should in all cases select plants that have remained dormant on passage. But as a rule he has to take the plants as he finds them and to do the best he can to bring them back into shape.

Although it is impossible generally to keep odontoglossums too cool in an ordinary American summer, yet for the first season they are better in every case for a little more heat than usual. A night temperature of 60°, rising by day to 65° when dull, and by sun heat to 75° or 80°, with plenty

of air and a moist atmosphere is the proper place for newly imported *O. crispum*. The plants are usually spread out on sphagnum moss, but finely broken gravel or shingle, or even a latticed stage over a bed of coke or coal ashes is preferable to the moss. Here the plants dry more rapidly, and require more frequent spraying, but this is an advantage. Shade is very necessary, even for established plants; for those under notice it is even more so. No exact rule for spraying can be given. Everything depends upon the weather and the condition of the plants. An axiom to remember is, that no orchid was ever injured by being kept waiting a day for water but a constantly wet condition has killed more plants than any other detail of mistaken culture.

For some reason growers are always in a hurry to give the plants a lot of fiber and moss, either in pots

or around them on benches or shelves. Get some clean potsherds or crocks and either pot the plants in these or place them in whatever position they are to occupy, and leave the fiber and moss where it is for a time. Support the plants erect with the crocks, and a few stakes if these are required. Anyway fix them; for if the plants are in such a position that the least touch causes them to move they will never be satisfactory, being unable to obtain a hold. After a few weeks of this treatment the bulbs will plump up and probably either young roots or new growth will appear. Even then, if the season is late autumn, it is better not to place any compost about the plants; just water over the crocks two or three times daily when the weather is bright and let the roots cling to the crocks; they will be all right. But in spring a thin surfacing of peat or fern root and moss may be given. To prepare this pick out any dirt or insects from the moss, and if peat is used beat out the dust and use only the fiber.

Provided the plants were in a growing condition when this material was added, progress will now be rapid and the surface compost may be kept moist. *Odontoglossums* dislike heavy waterings over head, but the atmosphere about them must be kept moist and for this reason very light sprayings (mistings) are necessary several times daily. If the plants have gone on well up till now they are comparatively speaking safe and may be treated as established plants.

Remember before everything that it is in the atmospheric treatment of these beautiful cool orchids that most growers go wrong. It is to the atmosphere that they go for their sustenance chiefly; and if a suitable atmosphere is kept up in the growing quarters then any one with a little knowledge can keep orchids right. The kind of atmosphere *O. crispum* and nearly allied kinds like is a cool and moist one, but the air must not be stagnant; it has to be kept mov-

Odontoglossum Crispum.

ODONTOGLOSSUM CRISPUM.

ing or good results must not be looked for. Light in winter and shade in summer are absolutely necessary, so keep the glass clean at the first season, and keep the shades down, where these are provided, until all danger of burning or a rise in temperature is past for the day. For the summer it is useless to give temperatures, for they cannot be maintained as low as one would like. By shading, frequent dampening of floors and stages and the admission of plenty of fresh air keep the house or houses on a summer day so that a pleasant coolness is felt when entering from the external air. Do this and do not worry about looking at the thermometer. Bottom ventilation as well as top is necessary for these plants, and for this reason the houses where possible should stand alone, and vent holes be supplied below the stage or bench level. A lean-to house with a north aspect is usually advised for odontoglossums. It has the advantage of being more easily kept cool in summer, but the best plants of this class ever grown by the writer were arranged in a span roofed house running north and south with side benches and no central stage. This class of house is difficult to keep cool in summer but the fine light all around the plants in winter is a great help.

These orchids usually commence growing in early autumn and any necessary repairs to the compost or re-arrangement of the plants may be carried out then. Choose the time when the majority of the plants have started to grow freely but have not produced any young roots, usually around September. Then when these roots do occur they have new sweet material to run in and will rapidly re-establish the plants. The most suitable night-temperature for this orchid at all times except in the heat of summer is 50° rising five degrees by day in dull weather and proportionately more when bright. Various remedies are advised for getting rid of insects on odontoglossums, but the best advice is to keep them out. Healthy plants are not bothered much by insects, but should a few thrips or green fly put in appearance, light fumigation on three successive nights will usually clear them out. The vaporising methods of fumigating are not so likely to injure the plants as burning any of the tobacco preparations in a dry form. Insects of the scale family are frequently found on newly imported plants but these can easily be got rid of by sponging and seldom give much trouble afterwards. The value of *O. crispum* as a commercial flower depends largely upon the varieties grown. It is folly to keep any of the small starry forms that are sometimes seen; they take up the room of better plants and are just as much trouble to grow. These ought to be got rid of as soon as they flower and a good collection of varieties made, by selecting the best forms as they appear.

ORCHIS.

ATHENS, N. Y.—Edward Snow is in the Adirondacks camping for a couple of weeks with his grandson and friends.

PARTIAL VIEW OF THE PEONIES AT HIGHLAND PARK, ROCHESTER, N. Y.

(Courtesy of the Rochester Herald.)

THE PEONY.

Peonies at Highland Park, Rochester, N. Y.

The herbaceous peonies made a fine display this year. Owing to the cool weather that prevailed throughout May and the first week of June, they opened slowly. The extremely hot spell of weather that set in about June 10, and has prevailed since, rendered the duration of the blossoms very short. Occasionally we have a few late peonies in good condition July 4, but this season at the above date they were all entirely past. *Achille* is a variety we are much pleased with. The foliage is bold and deep green and the white flowers with a faint tinge of blush, stand upright above the leaves; it is fine for garden decoration. *Alice Crousse* has a somewhat anemone shaped blossom with a general pink effect, and the center shading to a delicate salmon pink. *Alfred de Musset* has well built flowers of a somewhat loose formation, with a white effect, but on close inspection has a tinge of pinkish salmon. The flowers droop over considerably, but it is a good peony for cutting. *Auguste Poitreau* has large, full, well built flowers which have a decidedly pink color.

It comes in the late flowering section and is a very valuable peony. *Artemise* is a most attractive peony. The floral guards stand out prominently with a pink color, and the center is salmon pink.

Avalanche has a fine bold upright habit. The flowers are pure white with streaks of carmine in the center, and the flowers on stout stems look at you straight in the face. *Berlioz* might be described as light red with a purplish tinge. The flowers are well formed and globular and it is a very attractive peony. *Charles Binder* is a fine type of pink peony. The blossoms are finely built and last well. It comes in bloom about the middle of the peony season, and even in a small selection of peonies this ought to be included. *Claire Dubois* is another fine pink peony. The blossom is globular, and well formed, clear pink, and has a remarkably glossy reflex. *Couronne d'Or* is a gem. This belongs to a type of growth in peonies of which the writer is particularly fond. That is the whole habit is erect, and the flowers are held upright on stout stems, no matter what the weather conditions may be. This variety comes late, and the finely formed flowers are creamy white, with

faint streaks of carmine, and when the flower is fully expanded the orange yellow stamens may be seen in the center. Delachei has a cup-shaped flower, large, well formed, and deep velvety crimson, and comes late. Duke of Wellington is a most distinct peony. The cream white flowers are supported on very long stems above the body of foliage. The blossoms have a very pronounced fragrance.

Docteur Bretonneau has guard petals quite prominent of a rosy pink color. The center of the blossom is full and a clear pink. It comes somewhat late, or after mid-season. Eugene Verdice is a great favorite with Charles Maloy, the manager of the Ellwanger & Barry nurseries. The flower is large, cup-shaped, clear pink, tinged with salmon and stands up well, and it is a fine form for garden decoration. Etienne Mechin might be described as violet red. The well shaped flowers have a particularly brilliant effect and the habit is compact and upright. Francois Ortegat has crimson, or amaranth red flowers, and has a good compact habit. It blossoms about mid-season. It is an important peony in the dark red color. Festiva Maxima, which is now well-known, and very extensively grown, has full, well developed flowers, which when opening have a faint blush tinge but turn immediately white. The center is always markedly streaked with carmine. It is the earliest of the peonies to flower. The flower stems droop over very much, and it is therefore not much use for garden decoration but it is excellent for cutting. General Bertrand has guard petals quite prominent, which are pink, tinged with violet, and the central petaloids are soft pink. The habit is very compact. Globosa has distinct globular flowers, pure white and tinged with flesh pink in center, and has a remarkably good habit. Henri Murger has well formed blossoms of a soft pink color, and flowers after mid-season. The habit is compact.

Jussieu has fine dark crimson flowers, large and well formed, blossoms after mid-season, and has a good compact habit. La Tendresse is a remarkably fine peony, with flowers large and spreading, creamy white at first, and turning to pure white. The reddish or carmine streaks which are noticeable in most of the white peonies are hardly noticeable in this one. La Rosiere has a very refined appearance, with semi-double flowers, distinctly yellowish white, with a yellowish tinge, markedly predominant in the center. Livingstone has large soft pink flowers, which shade to white and flowers about mid-season. Madame de Bollemont has immense blossoms, glossy pink, shading to silvery white, but it is unfortunate that they droop over considerably. Madame Emile Galle produces very large, cup-shaped flowers, soft lilac pink, which shades to flesh pink. A very beautiful and luxurious peony, but the flower stems droop over very much. It is a fine peony for cutting. Madame Forel might be described as a silvery pink, with a darker center. The flowers are large and well formed and come late. Madame Grissler is a very popular peony. The blossoms are borne on long stems, and are very large, full, glossy, silvery pink, and deep rose

pink at base of petals, and flowers early. It has, however, the habit of its flowers bending low down, and in wet weather they become much soiled, unless they are staked up, and the staking of peonies is not desirable. Marie Lemoine is a sister to Couronne d'Or. The large beautifully formed flowers stand straight up and are delicate sulphur white. It flowers late and is a most valuable peony. Madame Lebon has full, showy, cherry pink flowers, shading lightly into salmon and has a good habit. Marie Deroux has flowers somewhat cup-shaped, rosy pink, shading into blush pink, and flowers after mid-season. The habit is good.

Marie Jacquin is a great favorite with the writer. It is distinctly semi-double, with blush white flowers, and very prominent golden yellow anthers. The curving globular outlines of the blossoms is very noticeable, and when half open they are thoroughly suggestive of a tea rose. This is a most beautiful peony for lawn or garden decoration, as it is distinctly erect and the flowers never incline downwards. Modele de Perfection stands in the front rank. The flowers are very large and cup-shaped, light pink with rose impressions, and stands up fairly well. Monsieur Bouchardat Aine has a fine full flower. The blossoms are pink and markedly tinged with lilac and shade into a silvery border. In rich heavy soil the flower stems droop over somewhat. Monsieur Dupont has a flattish flower and is somewhat cup-shaped, white, and marked prominently with carmine streaks. It has a good compact habit. President Wilder bears a resemblance to the last, but we think the flowers are purer white, and fuller in the center. It has a good compact habit. Princess Golitzin has soft pink guard petals, and the center cream white. The flower stems stand up well. It is a good peony for garden decoration.

Paganini has handsome blush guards, and the center petals cream white with a tinge of salmon. The habit is fairly compact. Stanley has handsome well developed flowers, shading from light pink to deep pink and light sil-

very edging, and has good compact habit. Splendida is well named and is a magnificent peony. The blossoms are full with a high crown, and are white, deeply tinged pink, and when old turn to a deep rose pink. Solfatere is grown under several other names, and is well known in this country. The flowers are well formed, with white guards, and cream white center and have a good compact habit. A fine peony for garden decoration. Triomphe de l'Exposition de Lille is another particular favorite of the writer. The flowers are of large size, full, light pink, and marbled with rosy pink, and with a light silvery reflex, and stand up well. Zoe Callot has very large, full, globular flowers, delicate pink, shaded with lilac tints.

Paenonia lutea, a rare and new species recently introduced to cultivation, flowered quite freely this season. It was in full flower and about its best June 26. The blossoms are single deep yellow and somewhat concealed amongst the leaves. The glaucous leaves are much divided. Joseph Dauphin, the peony expert of the Cottage Garden nurseries, Queens county, Long Island, saw it in bloom with us, and it was the first time he had seen it. Mr. Dauphin expressed the opinion that it might prove useful in crossing with other peonies to introduce a race with varying shades of deep yellow colors, and we think this is quite likely.

JOHN DUNBAR.

MT. VERNON, N. Y.—The greenhouses of E. J. Nordman, 112 North Eighth avenue, have been purchased by S. J. Clark, South Fourth avenue and business will be conducted at both places.

SUMMIT, N. J.—Andrew Wilson disappeared from his home on July 22. This was the third mysterious departure within a few days, the others being that of Mrs. Ruth Wilson, and of Walter P. Shapter, city electrician. The destination of all three is unknown. When Wilson left he told several of his friends he was going to Niagara Falls. He did not say whether he expected to find his wife there. It was understood by some of his friends that Mrs. Wilson had gone to stay with an aunt in Brooklyn.

THE ROSE.

A LIGHT shade is necessary for Mme. Chatenay, Mrs. Jardine and other varieties with tender foliage.

Carrying Over the Indoor Stock.

Very often one has far better results (taking everything into consideration) the second season with rose plants than the first, especially when they have been carefully handled, pruned correctly, and at the proper time and watched carefully. When one hasn't considerable skill the results from carrying over may be rather disappointing. But again anyone with a fair amount of plant intelligence need not hesitate to give his plants a trial for another season and again if it happens to be the grower's first attempt he should at least try one or two benches or beds and keep an accurate account of the cut and running expenses compared to the same number of plants of the young stock of the same variety. In the writer's opinion when the plants to be carried over are in solid beds, or they have been removed from raised benches and planted in solid beds into a fresh lot of soil, the plants will be more profitable the second year. The advantages are better and longer stems, larger blooms and a much longer period of cutting. In fact, the

carried-over plants, with proper care, will bloom continuously and if they are of the tea varieties they will require very little resting. Below we give a general outline of the treatment we have found to give excellent results.

In the first place we will suppose there is to be a house of Bride, Bride-maid, Golden Gate or other teas to be carried over. They are on raised benches, and the grower wishes to let them remain for another season. All that is necessary is to withhold the water and keep up the spraying while they are being pruned, as the teas should not be allowed to get too dry. But perhaps it would be safest to suggest right here that only strong healthy plants should be carried over at any cost. We particularly referred to this earlier in the season. So in all probability this point, the most important one of all, has been borne in mind. But to come back to the work: prune carefully, thinning out all the turgid growth and heading back the heavier wood a little. If there is lack of head room bend the plants over and tie them to wires stretched about a foot or a little higher from the ground, placing a wire for each row of plants; distribute the wood evenly over these wires and bend the plants at as sharp an angle as they will stand without breaking. Having pruned and tied the

plants remove about half the soil from around the plants carefully, breaking as few roots as possible and fill in and around them with a compost of half good soil and half cow manure to which has been added a liberal sprinkling of bone meal. Pack this mulch firmly and give the beds a thorough watering. Be sure to push the work along rapidly so the roots will not be exposed for any length of time. After watering syringe frequently and do not let the soil get soggy; allow it to become fairly dry; stir it frequently and by keeping the soil in a condition where it will require some water every day it will be about right to induce new root action. We will now describe the method of handling the teas, removing them from the raised benches and transferring them to solid beds.

The plants will only require just enough drying so they can be lifted with good clumps of soil. They should be pruned as described above and if preferred the pruning can be left till later; after the plants have become established in their new quarters, lift them stakes and all. First prepare the solid beds, removing all the old soil and cleaning house generally. Be sure that the beds have good drainage and room enough above the drainage for six inches of good compost, the same as used for the young stock.

Fill the beds about even full of soil and take a brush and some paint and mark off the distance you wish to plant in the row at the top edge of the bed. This will save a lot of guess work. A stick just the width of the beds can be notched to plant by across the beds and can be carried along by the planters. Use enough help to have the plants handled as fast as they are lifted. The planters (a man at each side of the bed) should throw out or make a trench to receive them. Place them in position opposite the marks,

drop their foliage, making this drying process a gradual one requiring several weeks and syringing them meanwhile. We prefer to prune them about 18 inches from the soil, leaving in all the available strong wood, deferring the removal of undesirable wood till later. Remove the top of the old soil as prescribed for the teas, the treatment being practically the same with the exception of the resting and pruning.

Carrying over the Killarneys in the solid beds differs somewhat in treatment, as we have found that they do

left and carried over in the solid beds. Own root Richmond can be dried hard and pruned to within a foot of the soil, the treatment otherwise being the same as for Killarney, depending more on the surface feeding and liquid manure watering than the addition of more fresh soil, which would require too much root disturbance. Grafted Richmond should be pruned a little higher for reasons mentioned above for Killarney. My Maryland will respond to the same treatment as described for Killarney and Richmond, also American Beauty. Cultural notes will follow in due season. E.

British Roses.

During a somewhat hasty look round at the Temple show in London last May we made notes of a few of the more prominent varieties of roses shown there. Some were old favorites, or at least well known on this side, while others are not so well known and a line on them may be interesting. A lovely coral pink was found in Duchess of Westminster, a hybrid tea from those famous growers, the Dicksons of Newtownards, Ire. Both leaves and stems were exceedingly fine. Lady Hillingdon, a yellow tea in Geo. Mount & Sons' exhibit, looks as though it might be a good forcing rose. It is a bright rich yellow and has long pointed buds that should sell well in this country. Mrs. Jardine, now well known here, was well shown, as was White Dorothy Perkins. This is certainly one of the most beautiful of the rambler type and a magnificent rose. Portia is a rose of great substance nearly white in ground color prettily shaded with a bronzy yellow tint. Excelsa, one of M. H. Walsh's new ramblers of the Wichuraiana section, is a lovely thing with bright scarlet flowers produced on long pendulous racemes. This came in for much praise from all present and was greatly admired. It was shown by several exhibitors. Shower of Gold is not as free flowering as some others but is a magnificent color, a pure rich yellow. Geo. C. Wand is a most brilliant red, one of the finest colored hybrid teas in cultivation without a doubt. Lyon Rose, American Pillar, Orleans, Tausendschon and the "blue" rose, Veilchenblau, were also well shown.

CINCINNATI FLORISTS' SOCIETY OUTING AT CARTHAGE, O.

Watching the Egg Race.

pull the soil in and around them loosely, followed up by two men who should pack the soil firmly by treading it or tamping it firmly by hand, then leveling. Water thoroughly and water a section as planted every half hour, otherwise the plants will wilt badly. The success of the work depends largely on the rapidity with which it is accomplished and the care taken in handling the work throughout. For instance, spades should be used to cut out the plants on the tables, trimming off the surplus soil with the hands. The balls should be about 10 inches in diameter and must be handled carefully to avoid crushing them. If they are lifted and placed in flats and a piece of twine tied around the tops they will handle better.

They will require frequent spraying for a few days after planting, four or five times a day if necessary on hot days, using a fine spray nozzle. After they have taken hold and show some signs of starting into growth they can be pruned if this has not been done, removing any bruised growth injured in the act of handling them. Wires should be strung and the stalks fastened to them, the plants tied, and from then on with frequent cultivating and intelligent watering they will grow rapidly. Now we come to the hybrid teas. They require a little different treatment as they can be dried until they drop their foliage. Richmond perhaps will stand more drying than any other commercial hybrid tea and harder pruning. This at least is our experience. If Killarney or White Killarney is to be carried the second season on tables, dry the plants until they

not require much of a rest and we seldom remove any of the top soil from the solid beds if it is their second season, an inch being sufficient, pruning the plants lightly, only removing wood carrying worthless foliage, dead wood, etc. By putting on an inch of fresh soil and later on using full strength liquid manure, the second year solid bed as well as bench Killarney should give excellent returns. Another thing worth mentioning perhaps is that we usually prune own root stock back harder than grafted stock, owing to its tendency to send up strong canes from the soil. Richmond seems to do better transferred from the benches to solid beds or

CINCINNATI FLORISTS' SOCIETY OUTING AT CARTHAGE, O.

Before Dinner.

Society of American Florists.**SPECIAL RATES TO ROCHESTER.**

A rate of one and three-fifths, on the certificate plan, has been granted by the Trunk Line association, New England Passenger association, Central Passenger association and the Eastern Canadian association. Tickets may be secured not earlier than August 12 and not later than August 17 and will be good returning up to and including August 23. In securing your ticket purchase a full one-way first class fare and be sure to request a certificate. Inquire at your home station and ascertain whether certificates and through tickets can be obtained to the place of meeting. If not, purchase your ticket to the nearest point where they may be secured and there purchase a through ticket and certificate. No reduction of fare will be made unless a certificate be secured at the time of the purchase of the ticket. Be sure to ask for a certificate and not for a receipt.

Immediately upon your arrival at the convention hall, present your ticket and 25 cents to the secretary. A fee of 25 cents is charged for each ticket validated. An agent of the associations will be present at the office of the secretary on August 17 and 18 from 9 a. m. to 6 p. m. to validate certificates. No certificates will be signed before or after that date.

When returning present your certificate at the railway ticket office and a ticket at three-fifths of the regular fare will be furnished you. For those living west of the western boundary of the Central Passenger association, that is west of Chicago and St. Louis, summer tourist tickets may be purchased to Chicago or St. Louis from which point the reduced rates may be secured to the place of meeting. It will be well to confer with your local agent for full particulars regarding rates and routes. Special trains and special cars start from many of the larger centers. By joining one of these a very pleasant trip may be had.

HEADQUARTERS.

Headquarters for the convention will be at the Seneca hotel. Both the president's reception and the reception given by the Ladies' Society will be held here. It will also be headquarters for the ladies. Requests or inquiries for rooms should be addressed to the Seneca hotel, Rochester, N. Y. Other hotels in Rochester are Powers, Hotel Rochester, Whitcomb house, Osburn house, and Hotel Eggleston. The latter is for men only. The Osburn is on the American plan. It will be well to make application for rooms in advance and so prevent being disappointed on arrival by finding all the best rooms taken.

DUES.

All members should send in their dues in advance and have their certificates and badges mailed to them. In this way much delay may be avoided in the secretary's office. Dues cannot be paid while meetings are in progress. Remember that the secretary has other duties to perform. A badge and certificate of membership are absolutely necessary before any individual can sign the roll and receive invitation cards for any of the entertainments. Badges will also be necessary to get into the exhibition hall. All not having badges will be required to pay the admission fee.

ROCHESTER HOTELS.

I submit, for the information of those attending the convention, the following list of hotels, together with rates, etc. All these hotels, with the exception of the Bristol and Clinton, are first class, modern hotels:

Hotel Seneca, Clinton avenue, south, European plan; one person \$1.50 to \$3.50, two persons \$3.50 to \$5.

Hotel Rochester, Main street, west, European plan, \$1.50 to \$4.

Powers Hotel, Main street, west, European plan, \$1.50 to \$4.

Osburn house, 104 South avenue, American plan, \$1.50 to \$4.

Hotel Eggleston, 159 Main street, east, European plan, \$1 to \$2.

Whitcomb house, 209 Main street, east, European plan, \$1.50 to \$3, with bath; \$1 to \$2.50 without bath.

The Bristol, Central avenue, European plan.

The Clinton, South avenue, European plan.

H. B. STRINGER.

Secretary, Rochester Florists' Assn.

TRADE EXHIBITION.

All exhibitors who intend entering novelties and new devices, to be submitted for awards, for the S. A. F. trade exhibition, at Rochester, N. Y., August 16 to 19, please send entries at once. The list must be ready for the judges on the morning of the first day, Tuesday, August 16.

CHAS. H. VICK, SUPT.

191 Main street, Rochester, N. Y.

Chicago to Rochester.

The Chicago Florists' Club has arranged with the Lake Shore & Michigan Southern railroad for transportation to the Rochester convention as follows:

A special train will be provided, same to be counterpart of the Twentieth Century Limited and to consist of combination baggage and buffet car, one of the famous Lake Shore diners, as many as 12 sections and drawing room sleeping cars (compartment cars if desired) as may be required to properly take care of the party and give everyone plenty of room, the train to be finished off with either an open section or compartment observation end sleeping car. The train will leave Chicago at 5:30 p. m. Monday, August 15, arriving in Rochester at 9 a. m. Tuesday, August 16.

The rate authorized for this occasion is one and three-fifths fare on the certificate plan, \$13.38 going (passengers to be sure and ask for certificates in purchasing their tickets, for on same will depend their being able to secure the reduced rate returning) and three-fifths of that or \$8.10 returning, making a total of \$21.48 for the round trip. The Pullman rates are as follows: Double lower berth or upper berth, \$3; section, \$6; compartment, \$8.50; drawing room, \$11.

Delegates from St. Louis, Indianapolis, Louisville, Cincinnati, Columbus, etc., can join together and arrange for special sleepers to be attached to this special train at Cleveland, thus bringing all together at that point for the remainder of the journey, Cleveland to Rochester. As to the Detroit people, it would be a very easy matter for them to join the special train at Toledo. The St. Louis people could come via Chicago and join this special train if they so desired as the same rate would apply through Chicago as via the direct line.

G. K. Thompson, general agent passenger department, will accompany the party for the purpose of seeing that everything goes smoothly. For further information and reservations, address G. K. Thompson, 180 Clark street, corner Monroe (Telephone, Harrison 7600), or E. F. Winterson, 45 Wabash avenue (Telephone, Central 6004).

A cordial welcome is extended to any outside florists' clubs, who may wish to join the Chicago Florists' Club special train for the Rochester convention of the S. A. F. Those who wish to be requested to communicate with L. A. Winterson, secretary of the Chicago Florists' Club, 45 Wabash avenue, stating how many will join in order that proper accommodation may be provided.

European Horticulture.

Among new plants, M. Lemoine announces two "white" delphiniums, Jeanne Marni and Thiela, both creamy sulphur in color, the former semi-double, the latter double, also double delphiniums, Captain Fiegenschah, mauve, bordered cobalt blue, full and regular, fine in color and firm; Sergeant Beranger, semi-double, mauve and blue, enormous black centers, handsome stalks; Lieutenant Delacomme, broad semi-double flowers, mauve and ash-blue, brown center; Lieutenant Vasseur, perfect form, mauve bordered light blue. Also a collection of large-flowering pelargoniums.

We are told of a "flower lawn" in an Algerian estate, composed of verbenas, blooming throughout the season, and most acceptable for the delicate fragrance of the blue and white varieties.

The city of Brussels maintains this summer a decorative floral competition, divided into three classes: decorated balconies, decorated store fronts and window gardens. The prizes are medals, graded in value, but the recipient may choose their value in money. The committee in charge sent out circulars advising as to details of arrangement, culture, etc.

OBITUARY.**William Rennie.**

William Rennie, the well known seedsman of Toronto, Ont., died July 24 at his home residence. Mr. Rennie had been in poor health for some time past, and on May 23 had a stroke of paralysis after which he declined steadily. He was born in the vicinity of the above city in 1835, his parents having emigrated from Scotland a few years before, and his early days were spent on the farm. Many today are acquainted with the Rennie homestead in Scarboro which is known as the gold medal farm, of the province of Ontario. In 1870 he moved to Toronto and started the seed business which today has branch stores at Montreal, Winnipeg and Vancouver. Shortly after establishing the seed business Mr. Rennie found it necessary to grow many of his own varieties and again assumed charge of the farm and in 1884 had it in such perfect shape that in competition he was awarded the first silver medal. He retired from the business in 1889, leaving the now well known establishment to his three sons, Robert, John and Thomas. In 1893 he accepted the position of farm superintendent at the Ontario Agricultural College at Guelph, remaining six years, and upon his return to Toronto he put into book form his valuable information in a volume known as "Successful Farming," which has been read with interest and profit by many. Besides the three sons mentioned in Toronto, another, William, is connected with the agricultural college at Hakodate, Japan. H. G. D.

Coleman Muller.

Coleman Muller died at his home, Sixty-sixth street and Elmwood avenue, Philadelphia, July 12, and his funeral took place July 16. He was aged 26 years and was the son of August and Anastasia Muller of the above address. The family is well and favorably known to the trade of Philadelphia. The deceased was a promising young man but over a year ago was seized with serious illness and the efforts of the most skilful physicians could not stay its ravages.

JEAN SOUPERT, of Soupert & Notling, the well known rose specialists of Luxembourg, died July 17, age 77 years.

Exhibition of Forced Shrubs.

On the occasion of the fiftieth anniversary of the Pomological Society of Boskoop (Holland) the members of which formerly occupied themselves principally with the cultivation of fruit trees, but have now for years applied themselves almost exclusively to the growing of all sorts of forced shrubs and conifers, an exhibition of forced flowering and foliage shrubs will be held during the first half of the month of April, 1911. This will be highly interesting, for the great collaboration of the principal firms of Boskoop and its environs guarantee that a complete survey will be given of the height and many-sidedness which the cultivation of forced shrubs has reached in this well known center of nurseries. The exhibition building will occupy a space of 2,600 square meters.

ORDER coal now.

ROCHESTER.—That's where the gathering will be in two weeks.

THE AMERICAN FLORIST enters upon its twenty-sixth year with this issue.

OUR Convection Number goes to press August 10. Send your special advertisement now.

FLORIST KNIGHT TEMPLARS all over the country should keep Chicago in mind for the annual conclave August 8-13.

THE coal situation is very unsettled. It is certain, however, that freights have advanced 10 cents per ton and that miners will not be satisfied with less than 8 to 9 cents per ton additional. The coal dealers whose advertisements appear in this issue say they are now prepared to handle orders at lowest rates consistent with these advances.

Personal.

Wm. F. Kasting, Buffalo, N. Y., was 40 July 27.

Adam Graham, Sr., Cleveland, O., is expected home next week from his trip around the world.

E. G. Hill, who sailed for Europe June 22 on the S. S. Lusitania to see the new roses, will return on the S. S. Mauretania, leaving Liverpool July 30 and due at New York August 5.

Correction.

ED. AMERICAN FLORIST:—

In your issue of July 6 in Louisville news, you had a paragraph stating that H. Kleinstark had bought the Anchorage Rose Co.'s greenhouses. This is an error. Mr. Kleinstark bought the G. Thompson place. As this will injure the sale of the Anchorage Rose Co.'s place, please have it corrected if not already done. This is of importance to me as I have my interest still in the company and wish to sell to advantage. Thanking you in advance.

CHARLES RAYNER.

Seattle, Wash.

[The correction has been already made by our Louisville correspondent but we gladly give it this further publicity.—Ed.]

Society of American Florists.

AMENDMENTS TO CONSTITUTION.

Notice is hereby given to all members of the Society of American Florists that the following amendments have been received by the secretary and will be presented at the annual meeting to be held in Rochester on August 16-19, 1910.

Article V, Section 1, to be amended to read as follows: Section 1. Meetings.—The first annual meeting of the society shall be held at Buffalo, N. Y., on the first Tuesday of August, 1901. Subsequent meetings shall be held annually at such time and place as may be fixed by ballot at the morning session of the second day of each annual meeting and shall continue for at least three days. This provides for the selection, each year, of the time as well as the place of meeting.

Article IV, Section 2 to be amended by striking out the figures "25.00" and inserting in place thereof the figures "50.00," meaning to increase the life membership from \$25 to \$50.

Article II to be amended as follows: Section 2 (a). Strike out and substitute the following: "The president, vice-president and two directors shall be elected by ballot at the annual

meeting of the society and their term of office shall begin with the first day of January next succeeding the election; and the terms of the president and vice-president shall continue for one year or until their successors are duly elected and qualified; and the directors shall serve for three years from the first day of January following the election.

Section 2 (b). Strike out the words "two directors to serve for a term of three years. He shall also appoint at the same time."

Section 2 (c). Insert the words "and directors" after the word "officers" and before the word "shall."

Section 2 (d). Add the words "and directorships" after the word "offices" in the fourth line.

Section 2 (g). Add the words "or directorships" after the word "offices" in the first line.

Section 3 (a). Strike out the words "two directors to serve for a term of three years" after the word "appoint" and before the words "one botanist."

Section 3 (e). Add the following: "and they shall also at their annual meeting in January appoint a secretary and treasurer of the society for the ensuing year, whose term of office shall commence at such time as shall be then designated and continue until their successors are appointed."

The above amendments to Article II were presented at the twenty-fifth annual meeting. In case these pass the following amendments will also be presented:

Article II, Section 3 (d). Add to the end of the same "He shall attend all meetings of the executive board and shall be paid mileage as is allowed members of the board."

Article III. Strike out the word "Secretary" (page 13, second line) and the word "Treasurer" (page 13, third line). Strike out the words "a regular" (page 13, fifth line) and insert in place thereof "an annual." Strike out the word "mid-Lent" (sixth and seventh lines) and insert in place thereof the words "January 15." Insert after the word "audited" and before the word "appropriations" the words "appointments of a secretary and treasurer shall be made." Strike out the word "seven" (page 14, ninth line) and insert in place thereof the word "six."

These amendments to Article III are merely changes made necessary by the above amendments to Articles II and III.

H. B. DORNER, Sec'y.

Meetings Next Week.

Albany, N. Y., August 4, 8 p. m.—Albany Florists' Club, N. C. King's, 24 and 26 Steuben street.

GREENS

including the best in **Smilax**,
Asparagus and **Ferns**.

From the American Florist, July 16, 1910

A word is in order here as to the way the cut flowers are handled which probably accounts for the excellent manner in which the stock arrives at the store. The flowers are cut twice daily and are placed in the cooling rooms for about four hours, just long enough for them to lose the greenhouse heat. They are then packed expeditiously and shipped by express to the store where they arrive in the very best possible condition. Here John Poehlmann takes hold, and any long distance shipments that have to be made are packed at once and leave by the quickest route, insuring their arrival in good shape even in the hottest weather. The wonderful growth of this business is a great tribute to the skill and energy of the Poehlmann brothers, one and all, and shows what great things can be done when the facilities for doing business are there and plenty of the right kind of help to keep things moving.

Beauties

DEMAND KEEPS UP.

In a few of the larger houses there are big lots of roses to be seen and they clean up well, but in many of the smaller places good roses are conspicuously absent. Those growers who threw out early in the season and planted up early stock are now reaping the benefit in some small flowers that are useful in funeral work, but the majority of the stock coming in is from old plants or plants grown purposely for summer work. There are quite a number of good young Beauties at the principal houses with good stems and flowers. Killarney is better than it was and White Killarney continues in fair shape. My Maryland is small now but its good stems and handsome foliage help out a good deal. Richmond is still poor. Carnations are still coming in quantity but as to quality the less said the better. Asters and chrysanthemums will soon take their place. The asters to date have not been by any means encouraging either to the grower, commission man or retailer, for they are small and single and all the color burnt out of them with the hot sun. The present week a few better ones were to be seen but the supply of really good asters is likely to be light. Gladioli are here in enormous quantities and there are many wasted, though the demand is fair. Like other flowers the good stock sells while the poor is left. Easter lilies from being nearly a glut last week have come down to a more normal supply this. There appears to be plenty for everybody, but not any to spare. Valley is in somewhat the same condition and is not nearly as plentiful as it was. Orchids are decidedly scarce. A few Cattleya Gaskelliana are seen but not enough for the demand. However, it is nearly time for our old friend C. labiata and there will be no scarcity for a time when it starts to flower. The demand for cattleyas seems so well established that they are wanted every month in the

year and more C. Gaskelliana should be grown to fill the gap between C. Mossiae and C. labiata. Water lilies are still plentiful and the better class ones sell well. The native lotus has been seen in one or two retailers' windows of late; it is fine for decoration. Hardy flowers such as galliardias, Shasta daisies and others continue to arrive in quantity and give variety to the window displays. With the exception of a little transient trade, funeral work is about all that comes to the retailer now. This has been pretty heavy of late and some extra large orders have been booked at some of the stores.

NOTES.

At Vaughan & Sperry's we noted some of the finest asters yet seen on the market and as these are the first consignments from their grower good stock can probably be looked for here for some time to come. The pink and white varieties are best. L. A. Vaughan says that his trip north was a great success except that forest fires made it somewhat disagreeable for four or five days. He also says that fishermen, like politicians, meet strange bed fellows sometimes, and worst of all they are not allowed to forget them when they get back.

C. W. McKellar and Mrs. McKellar are still in the east and reports come from Portland, Me., and various other points enroute. They are evidently having a fine time and this week expect to take in New York and various Hudson river points. They will continue in the east until the convention and after attending this will make for home via Detroit. Orchids are scarce at the store and sell up close every day.

At Peter Reinberg's the run on good roses and carnations seems as heavy as ever and the shipments to out-of-town points are especially good for the season. Mr. Reinberg is still out west. T. Matchen took a flying trip to Milwaukee on Sunday, visiting Holton & Hunkel and several others.

H. C. Rowe says business is by no means rushing, though he is getting his share of funeral work. Philip Eichling, who has been with Mr. Rowe a number of years, has left him to go into the furniture business with his father-in-law at Evanston and all will wish him every success.

At Kennicott Bros. Co. a fine variety of hardy stock is shown, including tritomas, fine gladioli and a host of others. Dimorphotheca aurantiaca is shown here and called the African daisy, which comes a little nearer the truth than these names usually do.

Mrs. Horton is back at her desk at Bassett & Washburn's. E. Anderson of this firm has left for a two weeks' vacation. Fine stock of My Maryland, new Beauties and Kaiserin are among the principal arrivals in roses and trade is keeping up well.

C. M. Dickinson of E. H. Hunt left on Friday last for Pelican Lake, Wis., and on Monday he shipped home a 25-pound muscalonge that fell to his rod. The fish was sent to a friend in the city and cut up, W. Lynch and others coming in for a "chunk."

Trade is reported good at Wieter Bros., and the quality of the roses now coming in is very good for the season. New Beauties, Kaiserin and White Killarney are the best in roses and asters are in very fair shape.

At Zech & Mann's the force always appears to be busy and they are turning out a lot of good stock. Asters are improving here and we noted some good lilies including L. auratum.

Kyle & Foerster report business good and they have occasionally to buy stock to fill orders, outside of the big amount of fine flowers coming from their regular growers.

At Geo. Reinberg's sales keep up fairly well and keep the stock down. Robt. Northam is still away but is expected back at the end of the week.

J. B. Deamud, Miss Amy Forst, Harry Lubliner and wife, Archie Spencer and wife have all returned from their trips to Eagle Lake, Mich.

Summer Flowers

**New Beauties, Kaiserin, Rhea Reid,
Pink Killarney, Maryland, White Killarney**

These are the best roses for hot weather. We devote a whole range of glass to their growth and our plants are two to five years old, giving big, strong flowers.

Peter Reinberg, 35 Randolph St.,
CHICAGO.

The Ernst Wienhoeber Floral Co. is installing a new ice box at its store at 22 Elm street. It is rather remarkable that a firm that has handled such vast quantities of good stock for so many years should never have had an ice box, especially in such a high grade store, but it has always been the aim of the firm to give its patrons stock absolutely fresh and this is the reason the ice box has found no favor with Mr. Wienhoeber.

At the L. A. Budlong store good roses are coming in from young plants and they move out well. Planting carnations and roses is finished at the greenhouses. Bert Budlong, as well as his mother, spend their week-ends and as much more time as they can, at their summer homes at Lake Geneva, Wis.

At A. L. Randall's they are busy with inventory. Frank Johnson is on a trip east and T. Waters is taking a couple of weeks' vacation.

Theodore Callos, the White House florist, 193 Wabash avenue, has gone to Shawano, Wis., for a short vacation.

John Muir's mother-in-law, Mrs. Molar, died on Sunday last at the age of 84.

The Raedlein Basket Co., 713 Milwaukee avenue, is selling a large number of imported baskets. The factories are located at Weidhausen and Eben-dorf, Germany. Three brothers are at the head of the concern, and G. Raed-lein, one of the three, is in charge of the American office, which has its headquarters at 713 Milwaukee avenue. Baskets of all kinds are on sale here and are made of willow and rat-tan and have all the latest artistic colors. The new brown shade, the an-tique green and the natural willow col-ors add greatly to the appearance of flowers and plants. Everyone is in- vited to call at the storerooms and look over the stock while florists vis- iting the city should do likewise as here may be seen practically every- thing in the basket line.

The Pochlmann Bros. Co. is certainly keeping up its reputation this summer for quality of stock. The roses now arriving at the store are fine for the time of year and we noted this week especially good Beauties from young stock. The foliage is first class on stems a yard long and upwards, while the flowers are substantial and of good color and such stock is certainly a credit to the growers during this hot weather. Golden Glow chrysanthem- ums are in of good color and stiff stems thoroughly well grown. Good valley and Harrisii lilies are shown right along and such stock as this does not go begging even at this time of year and the flowers are cleared up well daily.

F. Corten, who is in charge at the Graceland cemetery, says: "Business has been fair, considering the dis- agreeable season." The 30 men em- ployed are busy weeding, trimming and watering, and propagating Vinca mi- nor. There is a steady demand for this plant and it seems as if enough cannot be grown to supply it. Mr. Corten has been in charge of the cem- etery for 28 years, and has been a subscriber to the AMERICAN FLORIST since its first issue, having subscribed at the first S. A. F. convention at Cincinnati in 1885.

J. Didier, 7539 Ridge avenue, has thrown out his old stock of carnations, and preparations for replanting have begun. Mr. Didier has 80,000 carnation plants, half of which he will keep for his own houses and wholesale the re- mainder. The asters are in fine shape, but these are sold mostly at whole- sale. Mr. Didier has charge of the greenhouses but the store at 6372 N. Clark street is in charge of his son and daughter.

J. Heimberger, 1443 N. Forty-third street, has sold out his stock of bed- ding plants and at present the green- houses are empty. Mr. Heimberger is in the employ of the railroad company and has been taking care of the houses during his spare moments. He stated that he intends to give up the busi- ness, being unable to take care of the houses and also hold his position on the rail- road.

The new store of O. J. Friedman, 226 Michigan avenue, will be ready for

business about August 5, and will be run under the name of the Congress Floral Co. with Wm. Graff in charge. Mr. Friedman has not decided who will take Mr. Graff's place in the store at 185 Michigan avenue, but he said he would probably place one of the men now employed in the store in charge.

Business has been good at the Chas. Grabig store, 1843 Irving Park boule- vard. The flower garden which is in front of the store is attracting the at- tention of all who pass by. A berberis hedge, 1½ feet high, surrounds the garden and adds greatly to its ap- pearance. Mr. Grabig was formerly in business with H. E. Scheffler at Bel- mont avenue.

A. Conarek, 1111 W. Chicago avenue, expects to make a change of location about August 1. Owing to an increase in business it was necessary to make the change, as the present quarters are too small to handle the business properly. In addition to carrying a full line of cut flowers, Mr. Conarek does a wholesale and retail business in arti- ficial flowers.

Peter Scroczyński, 1523 N. Harding avenue, has his greenhouses filled with chrysanthemums and Boston ferns. There is a retail store and 12,000 feet of glass on the premises. Mrs. Scroczyński and her 9-year-old son have been spending the past month on her sister's farm near Michigan City, Ind., and is expected home this week.

Thos. Fogarty of the Friedman firm and Ed. Enders of Samuelson's are en- joying a vacation among the lakes where fish are not plentiful but fe- male beauty reigns supreme. Ed. was up there but returned for Tom to help him out as he said rowing four in a boat is rather strenuous for vacation time.

Mrs. S. Cooper, 1005 Irving Park boulevard, reports doing a good busi- ness. She was formerly in business at North Clark street, near the Plaza ho- tel, the change having been made about three months ago.

Mrs. H. Lowe, 1943 N. Forty-third street, on July 25 bought the property which she is occupying for \$2,450. Mrs. Lowe has one greenhouse and does a retail business both in bedding plants and cut flowers.

A. Kunkel, 1058 Chicago avenue, has had a very busy season. Wedding and funeral work continues to come in, al- though there has been a slight falling off in the summer months.

J. E. Franke and family, 736 Mil- waukee avenue, will leave the first week in August for their summer home at Thunder Lake, Schoolcraft county, Michigan.

John Demund made a fine record on the Bloomingdale track last week. Watch him next time out.

Phil Schupp, of J. A. Budlong's, took a few days off this week, going to Lake Geneva, Wis.

O. P. Bassett and wife are in Berlin. Visitors: S. R. Lundy, representing W. A. Manda, South Orange, N. J.; Miss Helen Patten, Toledo, O.

St. Louis Florists' Club Picnic.

The seventeenth annual picnic of the St. Louis Florists' Club took place Thursday, July 21, at Ramona park. The weather was the best, clear and cool. Chas. Schoenle, Will Smith, J. J. Beneke and W. Pilcher looked handsome in their white hats and regalia specially ordered for the occasion. Ladies and children helped to swell the crowd. Good music and dancing attracted the younger folks. The games were interesting, taking the at- tention of the older folks as well as the young. Seed guessing contest, prize bird and cage, donated by the St. Louis Seed Co., attracted everybody. Geo. B. Windler, the worthy pres- ident, was out early and took a guess. Boat- ing and riding the ponies was indulged in to a great extent. Henry Hemmende, of Belle- ville, Ill., took in everything in sight.

B. Eschner, of the firm of M. Rice & Co., Philadelphia, Pa., was at the picnic and took supper with F. C. Weber and family.

Ed. Gerlach, formerly with C. A. Kuehn, took supper with C. C. Sanders and family. Ed, although now in a different line of busi- ness, does not forget his old friends.

Grandpapa Fillmore was as spry as ever and Frank was there, not forgetting to bring his jokes with him.

J. J. Beneke always wins the fat men's race. What is the use of him running anyway?

E. H. Weber, son of F. C. Weber and winner of the radish seed contest, arrived late and took about the last guess, 85,000. The jar was opened and the card read 88,000. He received at once an order on the St. Louis Seed Co. for bird and cage with \$20. Herman was delighted and set them up to the crowd. He will give the bird and cage to his mother.

What was the matter with John J. Bentzen? He appeared at the picnic with his hand bandaged and tied up. It is reported that Frank Windler had posted up his \$10 in that wrestling match and had been hunting up young Bentzen and they got mixed in a hurry.

Fred Ammann was out early.

All the Kirkwood boys were out in force. C. De Wever was talking bulletin. He ex- pects to have the first issue out shortly.

H. G. Berning and wife were not present, being tired and indisposed from traveling.

Chas. Kuehn and Geo. Angermueller were around taking in all the sights.

Will Smith attended to the ladies and Will Ossig, his partner, carried his young son around and seemed mighty proud of him.

Miss Ella Weber, niece of F. C. Weber, was voted to be the prettiest and most popular young lady at the picnic.

Miss May Burns spent most of her time on the lake.

Chas. Schoenle worked from early morning till night. He did not have time to eat but occasionally took a little Budweiser.

C. C. Sanders and our worthy president both took guesses at the radish seed contest but were away off.

Carl Beyer and wife were early arrivals and took in everything.

Jim Arado, manager of C. Young & Sons Co.'s cut flower department, was engaged at target practice, but failed to make a bull's eye.

The baseball game between the wholesalers and retailers resulted in a score of 8 to 2 in favor of the wholesalers. C. C. Sanders' team representing the wholesalers and the Bentzen team the retailers.

Al. Gumz and Frank Windler rooted hard for the wholesalers.

Awards.

Twenty-five yard dash, girls under 19 years.—Alice Jablonsky.

Egg and spoon race, married ladies.—Mrs. A. F. Jablonsky.

Fifty yard dash, boys under 16.—Harold Briggs.

Montreal.

Business is good for this time of the year; large quantities of cut flowers are handled, roses are sold very low and the quality is medium; carnations are very poor, asters are scarce and the quality is not up to much yet but will be better in another week. Sweet peas come in large quantities and find a ready sale. Some of the novelties have not come up to expectations, either in size or color, but it is early yet to condemn them; if they can prove better lasting qualities than the older varieties it will count a lot in their favor.

NOTES.

Owing to the trainmen's strike on the Grand Trunk railway, the picnic of the Gardeners' and Florists' Club had to be postponed; it was found impossible to secure a train to take the party to the picnic grounds. Although the committee in charge of the picnic did its utmost to notify everybody going, a good number could not be reached owing to the short notice given.

A large delegation will leave for St. Catharines next month to attend the convention of the Canadian Horticultural Association. Secretary Wm. C. Hall is sending out circulars to all the members about the tariff question which will be reopened again at the meetings of the convention.

The Horticultural Society will hold its annual exhibition, September 9-10. The judges for the garden competition made their first visit last Monday and the places were found to be in excellent condition. Another visit will have to be made next month before the final awards are given.

DEMAND BETTER.

The market, the past week, showed somewhat of an improvement. Stocks arrived in much smaller quantities and, there being several prominent funerals, it was an easy matter to dispose of anything saleable. Gladioli sold well. Quite a few Harrisii lilies were in and sold well. A few Maman Cochet roses are seen but they are not of good quality. A few more asters are in but the majority are as yet single and showing yellow centers. Some good Shasta daisies are seen and selling well. American Beauty roses are cleaned up pretty well.

NOTES.

Round trip tickets to Buffalo and Niagara Falls, N. Y., and Toronto, Ont., limit 30 days with stopovers at Chicago, Detroit, Cleveland, Niagara Falls and Buffalo can be obtained over the Wabash for \$20.40. To Detroit and return, either direct or via Chicago, with a 30-day limit, the fare is \$16. Particulars can be obtained at the Wabash ticket office, Eighth and Olive streets, or from J. D. McNamara, General Passenger association.

Advices from Otto G. Koenig, state vice-president of the S. A. F., advise those who are going to attend the convention that the Big Four Knickerbocker special will leave Union station, Monday, August 15, at 1 p. m. and reach Rochester 9.20 Tuesday. Sleepers, \$4 each way, 30-day stop-over fare, \$23.16. Those wishing to go will communicate with Otto G. Koenig, state vice-president.

John Seketer, well known as a wire worker and brother of Jim Seketer, also a wire worker, committed suicide by taking carbolic acid. He was buried last Thursday. The W. C. Smith Wholesale Floral Co. and other florists sent flowers. This was a great surprise as John was always known as a jolly fellow.

City Forester Andrew Meyer, Jr., has received numerous complaints from residents of Lindell boulevard of the invasion of bag worms devastating the trees to an alarming extent. A crew of men were at once sent out with spraying machines and they expect to kill off all the worms in a few days.

Philadelphia.

GOOD STOCK SCARCE.

The business of the past week was dull but that is what is expected at this season. Good stock, particularly roses and carnations, is scarce. In the case of carnations there is compensation in the fact that asters are now coming in to take their place. There are a few very good Killarney and My Maryland roses arriving but Kaiserin seems to be off crop. Gladioli in considerable quantities are arriving. There is a sprinkling of sweet peas but many of them are poor. There is a quantity of what may be called minor stocks about the stores but they do not form an important factor. A number of the dealers and their employees are taking vacations and as the weather is hot this is a favorable time.

NOTES.

Edward Reid, John McIntyre, George Faulkner and Gilbert Baker went on a fishing excursion in Mr. Reid's automobile to Lake Almonesson on July 24. In addition to catching a good bunch of fish they were instrumental in saving two lives. A party inexperienced in boating was out on the lake and upset their boat. Mr. Reid gallantly sprang out of his boat and rescued two who were in danger of drowning. On their return home they had another adventure. Another automobile struck a light wagon the driver of which was considerably shaken up. The party hurried him to a hospital.

Arrangements are completed for the opening of a store by the Pennock-Meehan Co., at 109 West Twenty-eighth street, New York, early in September. P. B. Rigby will be in charge, assisted by W. H. Moore. Both men are old and capable employees of the company. The Pennock-Meehan Co. has established a national reputation in the trade, doing a large business in this city, with a branch store in Washington, D. C. The New York venture is an interesting one as it is well known that competition in that great city is very close. Its progress will be watched with interest.

The range of the Robt. Craig Co. shows an immense amount of fine plant stock growing on, all in splendid condition. It would be impossible to find anywhere a better stock of cyclamens and Begonia Gloire de Lorraine. Of the cyclamens there are about 1,000 in 8-inch pans and about 25,000 in smaller sizes. There are two houses filled with the begonia. Other features are fine crotons, ferns, palms and Ficus pandurata.

John McIntyre is handling asters of good quality. He has a line of improved Semples that are very fine with two to three foot stems. He is now receiving new crop sweet peas. In the meantime Mr. McIntyre has been summoned to serve on the grand jury during August and is likely to have a strenuous summer.

Eugene Bernheimer has removed with his family to north Wales, where he takes an active interest in the affairs of the Florex Gardens Co., of which he is treasurer and a director. His store in this city is being conducted by old and trusted employees.

Leo. Niessen has taken a short vacation during the lull in business. His brother Arthur is still busy on the

job. The firm is handling very good My Maryland roses and the usual summer run of stock.

Berger Bros. are handling good roses, lilies and lily of the valley. Paul R. Kleinspahn, of their staff, is spending a vacation of two weeks at various summer resorts in New York state.

J. Max Nitzschke, manager of Habermehl's Bellevue-Stratford store, will spend a vacation of two weeks in Maine and New Hampshire.

John Westcott comes up occasionally to bowl with the boys, but hurries back to his cottage by the sea. Speaking of bowlers this city will send some good ones to Rochester. The following are the scores rolled, July 21:

Pawtucket, R. I.

The business here is quiet, although there is always good funeral business here as the florists of this city cover a very large territory. M. J. Leach & Sons' and William Hoffman's are the only stores here, consequently there is something doing at their stores most of the time. M. J. Leach & Sons have an up-to-date greenhouse concern of a dozen houses, 75,000 square feet in all, and grow about all kinds of flowers such as a retailer would need except roses. They also grow a large collection of bedding plants. This place is located in the town of Seekonk, Mass., three miles from this city, where their store is at 20 Broad street, conducted under the management of Mr. Leach's son Herbert. Thirty years ago Mr. Leach, Sr., built a small greenhouse 15x20 feet as an experiment in connection with his farming business.

William Hoffman's place is conducted under the management of the late Mr. Hoffman's son Fred, and is in one of the best residential sections on the principal street to Providence and Swan Point cemetery. This place at the present time is being rebuilt and at this writing nothing remains standing except the office. Mr. Hoffman is adding two new houses 28x125 feet by Lord & Burnham to the original size of the plant which, when completed, will consist of 35,000 square feet of glass. Mr. Hoffman grows a general line except roses and specializes in bulbous stock such as valley, lilies, tulips, narcissi, begonias and gloxinias. Mr. Hoffman has a modern store at 215 Main street, where they do an excellent business. Barnard Conroy is foreman at the store.

J. BRINTON.

NEW CASTLE, IND.—The Nip and Tuck club will have fried chicken for everybody August 2, when the past, present and future of the industrial growth of this city will be celebrated.

FINE

Asters and Gladioli

THE McCALLUM CO., Inc.,

937 Liberty Ave., PITTSBURGH, PA.

Pittsburgh Cut Flower Company

WHOLESALE GROWERS

222 Oliver Ave., PITTSBURGH, PA.

Asters, Gladioli, Beauties, Roses, Sweet Peas.

All seasonable flowers.

Pittsburg Florists' Exchange,
15 Diamond Square, PITTSBURGH, PA.

Baltimore.

We have had no more rain and the effects of the showers of a week or more ago are exhausted, the ground being thoroughly parched, on top at least, and almost all crops suffering. The truckers are being struck very hard, and outside things like asters threaten to be very much shortened. Added to the high temperature there have been strong winds which, while alleviating the effect of the extreme heat on humans, is making the drought more oppressive. Business continues very quiet, but there is, in truth, very little material with which to do business and the last days of the week but for gladioli and hardy stock there would not have been enough material to supply orders. Almost no asters are coming in, and the indications are that the supplies will be unusually short in quantity and poor in quality.

James Hamilton, of Mt. Washington, who already has one of the largest commercial places in the suburbs of this city, is adding two new houses this summer, designed for roses and greens. He reports a very large business this season in chrysanthemum and rose plants, his shipments extending from points as remote from each other as Canada and the extreme south. Chas. M. Wagner is his foreman and he has had his hands full of constructing and fitting the beds of the new places in the various settlements which surround the Hamilton place. He has a reputation for skill and taste in this work.

The giving of prizes for window boxes which was undertaken by the Municipal Art Society resulted in a great deal of interest. The city was divided into sections and series of prizes were distributed Saturday, the names of the winners being only of local interest.

S. B.

New York.

CONDITIONS BETTER.

Market conditions have shown a considerable improvement over those of last week and most stocks are coming in much lighter. Although the demand is not much greater there is an increase in price owing to scarcity. There is an abundance of asters and gladioli; the former, however, are arriving in poor condition owing to weather conditions and are not bringing any price. Not a drop of rain has fallen since June 21 in this section. American Beauties are still arriving in quantities and are about the only roses that are not holding their own in price, the very best specials bringing not more than 20 cents; quite a number are selling for a good deal less. Sweet peas cannot be quoted with any degree of accuracy; orchids are getting scarcer, and it is only the lack of demand that keeps the price down. Lilies are still arriving in quantities but are bringing a much better price than last week. Green goods are here in great quantities and are hard to dispose of at any figure.

NOTES.

Determined that he should not get away without interviewing the police Miss Mary Free, although injured herself, pluckily held a motorist until a policeman arrived. He had just wrecked her carriage, injured herself and sister and ruined the floral pieces she was delivering. While the Misses Mary and Georgiana Free, daughters of the late Mrs. Free, the well known Stamford, Conn. florist, were delivering some funeral pieces they were run into from behind by an auto which was apparently out for speed records. One of the ladies was thrown fully 25 feet, while the other was caught in the hood of the auto and both were badly bruised. As soon as Miss Free could extract herself from the wreck she jumped on the front of the auto and held the chauffeur until the arrival of the police. After returning to the store both young ladies were, of course, greatly excited and a lady friend volunteered to help them. Leaving her pocket book on the desk she turned away for a minute, and was very much put out on turning round to see two men walking off with it, both getting away in the excitement.

A delightful outing was enjoyed, July 22, by A. Funke and Theo. Hengensternberg, growers of Hempstead, L. I.; J. R. and F. Kervan, west Twenty-eighth court; A. L. Young, twenty-eighth street and W. Killian, retailer of West One Hundred and Forty-fifth street. The party boarded a motorboat at Canarsie, L. I., which had previously been well stocked with the things that make an afternoon on the ocean wave most enjoyable, spending a fine afternoon on Jamacia Bay, returning in the evening with the boat loaded not with refreshments, but a splendid catch of weak fish, estimated at about 400. As to refreshments they were not in the boat coming back.

Young & Nugent had quite a large funeral order last week; among the pieces was a large standing wreath, six feet high, made of lily of the valley, purple asters and lilies, designed by Wm. Hanft, the popular Twenty-eighth street artist.

Fred Kervan of Alabama, eldest son of the founder of the firm of Kervan & Co., dealers in palmetto leaves, southern smilax, etc., is spending a few weeks in this city with a view to locating permanently here.

F. D. Outerbridge of Sunny Lands, Bermuda, is spending a few days in this city investigating alleged customs over-charges. Mr. Outerbridge is a large shipper of cycas leaves.

A. J. Guttman reports his oil business is progressing nicely and expects to have a demonstration of paints mixed

with this oil at the Rochester convention.

The Growers' Cut Flower Co. is still receiving large shipments of sweet peas which, considering the dry spell, are arriving in fairly good condition.

Joe Levy, the well known wholesaler of West Twenty-sixth street, is spending two weeks at Pine Hill, Catskill mountains.

Arthur T. Boddington is now receiving large shipments of Lillium Harri-sii and freesia bulbs.

New York to Rochester.

TWENTY-SIXTH ANNUAL CONVENTION OF THE SOCIETY OF AMERICAN FLORISTS AT ROCHESTER, N. Y., AUGUST 16-19, 1910.

After due deliberation on the various routes to the convention city, your committee on transportation has selected the Lehigh Valley railroad as the official route of the New York Florists' Club, and heartily invite all members of the S. A. F. and their friends to travel as guests of the club and the transportation committee, on this important occasion.

Your committee has engaged the sixth floor of the Seneca hotel, Rochester, N. Y., for the accommodation of the members of the club and their friends. This hotel, the most modern and up-to-date hotel in the flower city, will be headquarters, and is within easy walking distance (about four blocks) of the convention hall and exhibition.

The transportation committee will have a diagram of the floor and rooms on the train, so that assignments can be made and reservations allotted, saving much time and worry on arrival at Rochester. Rates are from \$1.50 per day up, (European plan) according to location. All the members of the New York Florists' Club and S. A. F. and their friends who travel on this train are cordially invited to be the guests of the transportation committee for dinner at the Glen Summit Springs hotel, Glen Summit, Pa., where the train will stop for one hour at about 1.45 p. m.

It is advisable, and particularly requested that members, their friends and delegates, notify the committee as early as possible as to their intention and number of the party who will travel with us on this special train de luxe. Entertainment and refreshment will be a special feature on this train as usual.

ITINERARY.

Monday, August 15:—Leave New York, Penn. ferries, West Twenty-third street, 9.40 a. m.; Cortlandt and Desbrosses streets, and the Hudson terminal, 9.50 a. m. 1.45 dinner at Glen Summit Springs hotel, Glen Summit, Pa., as guests of the New York Florists' Club transportation committee. Arrive Rochester 7.45 p. m.

The regular authorized rate for this occasion is one and three-fifths fare on the certificate plan. The going fare, New York to Rochester via Lehigh Valley railroad, is \$7, obtaining certificate from ticket agent entitling holder to return at the rate of \$4.20, with payment of fee of 25 cents for vise of certificate. For tickets apply to ticket offices of the Lehigh Valley railroad, at 30 Flatbush avenue, Brooklyn, 140, 355 or 1460 Broadway, New York.

Tickets on certificate plan will be sold August 12-17, inclusive, returning, good until August 23. Representatives of the Lehigh Valley railroad will accompany the special train, and will assist in every way possible, in caring for the party. Please advise Frank H.

Traendly, 131 West Twenty-eighth street, New York, at the earliest moment, of your intention to take special train so that proper arrangements may be made for your comfort.

FRANK H. TRAENDLY,
(Chairman),

JOHN YOUNG,
HARRY A. BUNYARD,
Committee on Transportation.

Buffalo.

TRADE QUIET.

The weather is very warm and trade quiet. Very few weddings are on the calendar but many are away on their vacations. Gladioli, Roseum lilies and asters are welcome additions to our somewhat depleted stock. A large wedding in Tonawanda gave retailers a busy day on Tuesday.

NOTES.

When the addition to the park green-houses is completed the city will be able to grow almost all plants wanted for park purposes. Supt. Seymour is a great lover of flowers and wants as many small parks and triangles with flower beds as he can get. His predecessors had more thoughts for a smooth lawn, a roadway, but nothing to break the monotony.

The florists' picnic is uppermost in the minds of a great many now and from the programme issued a good time is promised.

Mrs. Jos. Sangster of Jefferson street is at Atlantic City. Joe is at the store. BISON.

Atlanta, Ga.

The weather the past week has been unsettled. Outside flowers, asters, gladioli and dahlias are coming in fine. Sweet peas are a thing of the past. Business reports from all stores are very good, everyone is being kept on the jump night and day, nobody gets a vacation yet. West View Floral Co. is remodeling its store, also putting in a new marble ice box.

Geo. F. Lampert, formerly with George & Allan of Cincinnati, O., has taken charge of R. F. Maddox's beautiful country place (Woodhaven), Atlanta Heights. Any visitors in the trade will find a welcome at this place; ask W. C. Lawrence.

Grant park is a place of beauty just at present after being regraded. The city has just opened the new Piedmont park playgrounds, the lake in which is a beauty and has the lion's share of attention.

Wachendorff Bros. are commencing to build two new houses, 135 feet long. These two brothers certainly deserve a lot of credit for the way they have built up their business. G. L.

The Seventeen-Year Locust Incubating.

A great 17-year locust plague in New Jersey is predicted for next year by the assistant curator at the Bronx Park Botanical Gardens, who says the soil of the state contains grubs that will be hatched next summer. The locust is a devouring insect that has wrought great destruction in the world and caused famines that swept away multitudes of humanity. Modern conditions are not such as to encourage locust life, and consequently the plagues are not so severe, but modern science has accomplished little in the way of prevention. There is no doubt that the Bronx Park scientist is correct in saying that the New Jersey soil is now a vast nursery of locust cones and that the grubs will attain their full growth next summer, which means that the state has a fight ahead to save its green things growing, its crops and forest foliage from being consumed. Perhaps the state entomologist will have plans prepared for the legislature to provide for.—Newark, N. J., Star.

V. S. DORVAL, Secretary.

Pittsburg.

The market is just about the same as reported last week. Carnations are getting fewer, valley is selling up very clean and sweet peas seem to be a thing of the past, those coming in being very poor. Greens of all kinds are very plentiful.

NOTES.

Burglars entered the office of the Elliott Nursery Co. at Springdale on Friday night, blew the safe door with nitroglycerine and made their escape with \$200 in cash, two valuable watches and \$8 in stamps. The theft was discovered Saturday morning by J. W. Elliott. The work appeared to be that of experts.

A very bad fire visited Oliver avenue, Sunday evening, in which the Pittsburg Cut Flower Co. was damaged to some extent.

Frank Faulk has purchased a new touring car and is planning a trip to the lakes in it.

Frank Johnson of the A. L. Randall Co., Chicago, is a visitor in town on his way east.

Miss Tillie Kyle of the McCallum Co. is spending a few weeks at Ligonier Springs.

National Florists' Board of Trade, 56 Pine St. NEW YORK

Boston.**STOCK POOR.**

The long continued drought and the extreme heat of the last two weeks have had a most deteriorating effect on the stock coming into this market both by reducing the quantity and lowering the quality. While the stores all report trade as very light, yet all the stock has been cleaned up in both markets the last few days of the week. There is scarcely anything left an hour after opening, and although the quality is poor, yet the growers have been unable to realize very good prices. Roses are quite short, even the summer blooming varieties, and some of the stock is exceedingly poor. Carnations are, in the majority of cases, very small and in the pink varieties are poor in color, yet they are finding a ready sale. Sweet peas are exceedingly poor for this season of the year. Lilies are very good and can be procured in fair quantities. Asters are small and poor, there being no really good ones yet on sale. Valley is in fair quantity and good. Gladioli are being brought in by some growers but show the effect of the dry weather and are far below the usual standard.

NOTES.

A trip around the different stores finds vacations in effect everywhere, some going and some returning. Julius Zinn has been spending the month of July at his summer home at Marshfield. P. Welch is enjoying the bathing at Old Orchard but expects to be with the boys on the Rochester trip. W. H. Elliott is spending a few days in Maine. William Penn is sojourning at Boothbay Harbor, Me. Henry Robinson is camping at Sunshine lake, N. H., but runs down for a day once in a while to see how the Hub rolls around. J. A. Cartwright, "Dell," starts Monday to spend a few days on the banks of the beautiful Charles. W. J. Thurston, the genial manager of the Park Street Market, returns Monday from Maine where he has enjoyed a well earned rest. G. R. Ludwig, McCarthy's hustling manager, is back at the store after a two weeks' vacation. S. J. Goddard is expected back from England the coming week and we will then know how well the American carnations are doing on the other side from an American point of view.

While the plans for the excursion of the contingent from this city to the convention of the Society of American Florists are not yet completed, a circular issued by the Gardeners' and Florists' Club informs its members that

DETROIT, MICH.

probably round trip rates between Boston and Rochester for \$13.40 will be secured. A special Pullman is being arranged for, seats in this to be \$2 extra, or, if the party travels at night, \$2.50 a berth. E. Allan Peirce has charge of the party and expects to complete all the arrangements this week, and all planning to take in the convention should notify him at Waltham. The circular ends with the following: "We want a delegation of 100 from Boston and outlying points; many are already enrolled and new names are coming in daily. Can you afford to stay at home? Let the Gardeners' and Florists' Club of Boston send a rousing delegation which will show to the outside world that our organization is one to be reckoned with." This has the right ring.

Everybody is looking forward to the annual picnic of the Gardeners' and Florists' Club which will be held at Pine Banks park, Malden, on Wednesday. An unusually attractive list of prizes has been donated for the various athletic events which it is hoped will bring out as usual some keen competition. A very efficient committee has the matter in charge and with hustling President Miller at the head and genial Tom Pegler as chairman of the committee and jovial Billie Kennedy as ringmaster, everyone can be assured of a royal good time if the weather man will only hand out the right brand.

Both flower markets after a year or more parleying have decided to close at 12 o'clock Saturdays, and the Waban Rose Conservatories, W. H. Elliott and J. A. Budlong Son & Co. close at the same hour. This is a move in the right direction and the wholesale stores would do well to begin now and next year join in the procession. And then, perhaps, some day the retailers would see that it was advisable to grant to their employees, after putting in the long hours that are required through the week, the privileges which the workers in other stores now universally enjoy.

The lawns throughout the suburbs are showing the drought badly and in some of the cities in this vicinity the hose privilege is being curtailed owing to the low condition of the reservoirs. A notable exception is the Common in this city where the installation last spring of a new water supply has given ample means to keep the grass in splendid condition. The new large rotary sprinklers supplied with a 3-inch hydrant hose watering a circle

Mention the American Florist when writing

fully 50 yards in diameter are daily attracting the attention of the crowds that frequent this beautiful park.

About 25 of the salesmen and growers of the Park Street Market and their friends spent Thursday on a fishing trip on the steamer Satellite. The well burnt arms and necks show the tribute paid to Old Sol and from the side remarks heard from the participants some of the party spent more time lying down in the boat than in fishing, but Neptune always claims his victims in a party of this kind. Seiter Mann won the pot for the first fish (a sculpin) and all report a most enjoyable time.

T. F. Galvin Co. at the Tremont street store had all hands busy putting up funeral work. Penn on Saturday had his hands full all the morning and Goode & Co. on Thursday had a very busy day. A beautiful casket cover of My Maryland roses flanked with wreaths of Killarney and Kaiserin roses, made a very handsome effect, but outside of work of this character there is nothing doing and everybody seems to be waiting for the grim reaper.

N. F. McCarthy & Co. are making extensive improvements in their store which will greatly add to the convenience and to the light in the basement. The store is all torn up at present and the new stairway well placarded. "Don't fall in the hole."

We extend our heartfelt sympathy to Geo. M. Anderson of Milton, whose wife passed away on Saturday, July 16, after an illness of six months. The funeral took place July 19.

N. M. Silvermann, Winter street, is the recipient of congratulations. The stork left a son and heir at his house a few days ago. E. A. W.

PHILADELPHIA, PA.—Jacob Becker has been granted a permit to remove his greenhouses from Forty-ninth and Chestnut streets to Fifty-second and Ludlow streets.

The past year in the business of the United States Cut Flower Co. has been very prosperous and many new orders have been declined because of the company's inability to grow enough flowers to fill its regular orders. Notwithstanding the addition of 59,000 square feet of glass since the original plant of the company was built, the demand for the output has been constantly growing. The company is now considering plans for a further enlargement of the growing department with from 25,000 to 50,000 square feet of glass, in time for its completion and planting so that the benefit of its operation may be derived during the fiscal year of 1912 and 1913.

The San Diego club house always looks its best when the Floral Association meets there, and the occasion of its third annual gathering was no exception. Being Flag day, the decorative scheme was carried out in red, white and blue, with the stars and stripes draped on the platform, reflecting great credit on the committee in charge. Members and friends turned out in good numbers. The election of a board of directors resulted in the choice of the following: L. A. Blochman, Hon. Lyman J. Gage, Mrs. T. Kneale, Alfred D. Robinson, Mrs. F. T. Scripps, Rodney Stokes and W. F. Vogt. A subsequent session of the board made Alfred D. Robinson, president, Hon. Lyman J. Gage, vice-president, L. A. Blochman, treasurer, the secretaryship being left open for the present, Rodney Stokes consenting to serve till the appointment of his successor. The musical programme alone was a full evening's entertainment, and the willingness of the artists to display their talents for the benefit of the association speaks much for the goodwill they hold towards their floral brethren.

CHOICE alfalfa seed is scarce.

THE potato crop is expected to be very short.

THE death of Wm. Rennie, Toronto, Ont., is recorded in our obituary column this week.

ALASKA PEAS are reported to have been sold at over \$5 per bushel for this season's crop.

VAUGHAN'S SEED STORE at Chicago expects to begin shipments of winter onion sets early in August.

CHICAGO.—Prices on the board of trade July 27 for grass seed were noted as follows: Timothy, \$5.50-\$6.50 per 100 pounds.

PEA canners who took contracts are reported advising customers of 75 per cent shortage in their pack of Alaskas and Extra Earlies.

SAGINAW, MICH.—W. H. Grenell has acquired the seed stocks and good will of Bromfield & Colvin, of Bay City, together with any surpluses they may have.

ONION SETS at Chicago are generally looking fair, the showers of the past 10 days, though uneven, have helped many fields; present hot weather should cause them to bottom fast.

ALL seedsmen should secure a copy of Bulletin 260, on "Seeds of Michigan Weeds," by W. J. Beal of the Michigan Experiment Station at East Lansing. The bulletin is profusely illustrated, with an extensive index.

A RE-ORGANIZATION of The Mangelsdorf Bros. Co., of Atchison, Kans., has just been completed, whereby Wm. Mangelsdorf and Henry D. Back assume the business at Ellinwood, Kans., and all real estate interests in Barton county, Kans. Aug. Mangelsdorf and his sons take over the entire Atchison business and the charter of the company. The officers of the re-organized company are: Aug. Mangelsdorf, president; Aug. F. Mangelsdorf, vice-president; Fred W. Mangelsdorf, secretary; Frank H. Mangelsdorf, treasurer. The capital stock of the company remains as before, \$100,000, fully paid, with a surplus of \$26,000.

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale
Trade Only.

SAN JOSE, CALIF.

REDTOP grass seed is firm in price and demand good.

A. T. FERRELL, wife and daughter, have returned from Europe and are at Atlantic City, N. J.

SWEET CORN seed is likely to be a short item, several growing sections having been hurt by the drought.

VISITED CHICAGO: Burnet Landreth, Jr., of the David Landreth Seed Co., Bristol, Pa., and Kirby B. White, of D. M. Ferry & Co., Detroit, Mich.

ROCKY FORD COLO.—Growing conditions here continue very favorable and, with a few exceptions, crops promise full delivery on contracts. Seed growing in this valley has extended very rapidly and the acreage this year is much larger than heretofore. D. V. B.

Onion Sets at Louisville.

Louisville, July 22.—Onion sets are a very good crop here with the exception that there are a great many picklers among them. This we suppose is due to the very favorable weather at the time the bulbs were forming, but the crop will be larger than last year as a whole. The incessant rain in the last two weeks has greatly augmented the grass in the different fields, which will make harvesting very slow.

California Conditions.

Hollister, July 19, 1910.—The extreme heat has injured onion to quite an extent with some growers during the last few days. We are not hurt seriously as yet. We are harvesting lettuce which promises a good crop. Radish is fair. Sweet peas, now all cut, will not average a full crop. Bloomsdale spinach will afford a good crop and the seed is very good. Salsify may be a little short of normal. W.

Wisconsin Seed Crops.

Sheboygan, July 20, 1910.—The extreme hot and dry weather still continues with us and has remained unbroken for two months and more, with the exception of a very light shower and the pea crop has been greatly damaged. From an anticipation of six weeks ago as having the best crop conditions that we had known since being in business we now have to report probably the greatest disaster to crops and the lightest possible deliveries that we have ever experienced and from all of the sources from which we are able to glean information we think that the general delivery in our

lines from growers throughout the country will be the lightest that has been made in this country to the seed trade and canners in many years, if not during the entire experience in seed growing.

Earlies and Alaskas have done better than other varieties and will probably give a much better delivery than almost any other variety this season, but the medium late peas used by canners have suffered more than any other varieties and the delivery of these varieties will be extremely light.

As to beans, we get better reports from Michigan than from Wisconsin and with good weather from now on it would make reasonable deliveries, but all depends upon what the weather shall be hereafter.

Pods on both peas and beans are very short with few peas to the pod and of an unusually small size, thus reducing the quantity in every possible way. JOHN H. ALLEN SEED CO.

Farm Weeds of Canada.

SECOND EDITION.

The first edition of "Farm Weeds of Canada" was distributed free to public libraries, schools and other institutions, being designed to stimulate interest in the subject of farm weeds and their destruction. The second edition is larger and illustrated with 76 splendid color plates, the great expense of preparing which has necessitated a charge of \$1, or at least this nominal charge has been fixed to prevent the book getting into the hands of those who make no use of it or would appreciate its value. It is not a botanical list of wild plants nor is it a highly scientific publication. It is simply a list of pernicious weeds that grow on Canadian farms most of the better known or commoner varieties being so plainly illustrated that no one could fail to recognize the plants.

But not only this—the book describes, in simple, easily understood language, how to exterminate them on lands that are infested, how to prevent their spreading—describes how they spread and the losses caused by allowing them to. The chapter on "Weed Seeds in the Soil" is well worth reading as it describes tests made by various authorities as to the vitality of weed seeds buried for different periods of time and gives inferences drawn from these tests. Rotation of crops, summer fallows and other methods of keeping weeds in check are fully described in the introductory chapters, after which the weeds are described and illustrated in separate families. Under each variety is given first the common name, then the botanical, followed by other English names and other Latin names. Its introduction (if not a native) is then given, its seed described (and illustrated), its time of flowering, propagation occurrence and the injury it does to crops by its persistence. Remedies follow and a list of allied species is given. We can hardly imagine a better arrangement and the book should be in the hands of every farmer, seed grower and horticulturist in the country for the nominal price charged has no relation to its intrinsic value. There is an excellent index. The book is published by the Canadian Department of Agriculture and can be obtained (single copies only) from the office of the Superintendent of Stationery, Government Printing Bureau, Ottawa.

CAMBRIDGE, N. Y.

CORRESPONDENCE INVITED.

GREENFIELD, MASS.—The gardens of the Specialty Floral Co. at 12 Power court present a fine showing of sweet peas just now.

PITTSBURG, PA.—The business heretofore conducted under the name of E. C. Ludwig is now known as the E. C. Ludwig Floral Co.

WEST CHESTER, PA.—Joseph Kift, florist and landscape gardener, has accepted the appointment as one of the tree commissioners in the city.

MILWAUKEE, WIS.—The Flora-Bon, corner of Third street and Grand avenue, will open up about August 1 with a good showing of cut flowers and will be out for design and funeral work. The location of the store is good, in the center of the business district, and D. van Engel, the manager, will put plenty of spirit into the undertaking and will doubtless make it a success.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;
Franklin DeKleine, Grand Rapids, Mich.,
Vice-President; S. W. Severance, 508 Illi-
nois Life Building, Louisville, Ky., Secre-
tary; M. L. Ruetenik, Cleveland, O., Treas.
Annual meeting at Grand Rapids, Mich.,
Sept. 27-29.

It is reported that the early potato crop in Michigan will only be about 50 per cent of the normal, owing to drought.

STERLING, ILL.—The R. R. Davis Greenhouse and Davis & Steiner have consolidated under the name of the R. R. Davis Co. The new company, in addition to its vegetable growing business, will deal in live stock, gravel and cement.

In an editorial in a recent issue the Produce News says that there was never a time when a standard package law was so badly needed as now and it urges all in the business, no matter whether shipper or receiver, to use their energies in securing such legislation.

DANIEL W. HOEGG, SR., said to be the oldest packer of canned goods and the only remaining pioneer who introduced the canning of fruit and vegetables into the United States, died at Portland, Me., June 28, aged 83. He was the first man to pack canned goods in Canada, and was interested in eight factories for canning lobsters, salmon and smoking herring in the provinces of Quebec and New Brunswick.

CHICAGO.—A. Breit and Mike Kloss, have leased the Peter Breit place, 7455 Ridge avenue, and will continue to grow vegetables. There are 12 greenhouses on the premises which gives them about an acre under glass. Mr. Kloss will occupy the new residence that is being built. Peter Breit will leave soon for Tennessee or Alabama where he will engage in truck farming.—H. Brandt, 7316 Parkhurst avenue, is very busy with his cucumber crop. Preparations will be made soon for the fall planting.—Chas. Hengerch, 7360 Murphy avenue, still realizes a neat profit from his cucumber crop. This crop will remain in the houses for another month, when it will be thrown out and preparations will be made for the fall planting. Mr. Hengerch has rented 17 of his houses and keeps the remaining five for his own use. The opening of the season looked bad, but in June and July more favorably. Mr. Hengerch is satisfied with the results of this season's growth, although it is less than last year.

Summer Seed Sowing.

Summer seed sowing presents difficulties not encountered in the spring. The main trouble is lack of subsoil moisture. Only too often summer showers do not penetrate deeply, thus encouraging seeds to germinate and be destroyed by a succeeding hot day. Another factor against success is loose soil. Generally late sowings are made to follow other crops. To prepare such land it is often necessary to plow it thereby destroying subsoil contact. When land must be plowed in the

summer, only small pieces should be handled at one time and each section rolled and harrowed until all hollow-ness is corrected.

Often the worst time to sow is after a rain, because the moisture may last long enough to sprout the seed and not long enough to establish the plant. This is especially true of quick germinating seeds like lettuce. It is often better to harrow land until all moisture has been evaporated out of the upper inch of soil and then sow the seeds, so they cannot sprout until a shower comes. Being ready for the moisture, the seed will get a hold before the moisture recedes. We often use wheel hoes to prepare seed beds. They give us an absolute uniform depth of loose soil and a solid subsoil, much better than any horse tool.

Another expedient is furrowing. We employ this for seeds which will not stand much covering. We mark out the rows with one plain cultivator tooth and then run the drill in these furrows, using no covering attachment. Thus the seeds are nearer to permanent moisture yet only lightly covered. During extremely dry spells we use our hotbed cloth covers to sprout seeds in the field. We give the drilled rows a good watering and cover with the hotbed cloth frames and as soon as up, move the covers to the next lot and so on. In this way we can get a stand of lettuce, onions or beets at a time nothing else would do it.

Sometimes it is advisable to rake the surface lightly with a hand rake just as soon as it can be done after a rain. This prevents baking and conserves moisture. To sum up, we often are compelled to use every possible scheme to get a stand in the summer. Spinach we broadcast and then top-dress with a manure spreader. We reduce the number of loads per acre to a low limit and put on two or three such light coats and find the more we run the machine over the ground the better the stand will be. The manure mulch keeps the moisture near the surface and protects the spinach in winter.

MARKETMAN.

Seattle, Wash.

The busy season is over and the growers are looking over stock preparing for the fall trade. A great many carnations are already benched and quite a few growers are going to carry over some benches of last year's planting, as they do well on the coast. Early chrysanthemums are just coming in at McCoy's. They will be cutting Golden Glow in about a week. Roses have been very fine this summer and plentiful. The first crop is gone and the second will be ready to start cutting in a few days. Sweet peas are a glut but they are exceptionally fine and extra large blooms. Business has been very quiet this summer. Last year we could not supply the demand, but this year there are more wanting to sell than to buy, all on account of the Alaska-Yukon exposition. There are many new greenhouses being added to some of the old plants and a few new ranges being started.

NOTES.

On July 8 about 35 amateurs of this city started a rose society to be known as the Seattle Rose Society, to meet in the chamber of commerce the sec-

Success In Market Gardening

REVISED AND ENLARGED EDITION.

A new and larger edition of this well known work on market gardening. It contains everything a market gardener wants to know, and in a form easily understood. It is an invaluable guide to any one in the business from the beginner to the most experienced.

ond Friday of each month. The object of the society is to hold a rose carnival and show every year to educate amateurs how to grow, trim and care for roses, the best varieties to plant and how to plant, the best soil and fertilizers and how to use the same and to encourage the growth of roses to beautify the city. The officers are all amateurs and are well posted on roses, better than a great many of the florists. A few of the florists have joined, others are a little narrow-minded, as it is not a florist society; but they are to blame that the city has no florists' society. This rose society will grow and be a benefit to the nurserymen if they will only encourage the amateurs.

A. L. Aabling, late of the Woodland Floral Co., has bought five acres near the Golf and Country club grounds and is starting to build greenhouses and will run fancy nursery stock in connection with his greenhouse plant. He expects to supply the clubhouse with vegetables and also the private people who are building some of the finest summer residences on the coast near the golf grounds.

Thomas Wiley has built two houses 25x150 feet on his place at Brighton Beach. He is going to grow carnations, chrysanthemums and bedding plants.

The Queen City Floral Co. has bought eight acres on the Everett interurban and intends building three houses 25x200 feet this summer.

Frank Bell of Brighton Beach is looking for 25 or 30 acres to give room for a large range, as he is cramped for room on his old place.

The Seattle Floral Co. is taking the roofs off some of their old houses and are going to rebuild and use larger glass.

The Hollywood Gardens have added three new greenhouses.

J. C. R.

Cincinnati.

TRADE FAIR.

Everything taken into consideration we have no complaint to make about business the past week as all the flowers received by the wholesalers were disposed of at fair prices and more carnations could have been used to advantage. Roses also were in good demand and several good-sized orders had to be turned down as the stock was not forthcoming. Lilies are fine, the quality is all that could be desired and they are the mainstay of the market at the present time. The supply of gladioli is steadily increasing with a large selection of colors. While the demand is satisfactory still they are not moving briskly enough to take up the supply and \$2 to \$3 buys a very nice 100 spikes. A few sales of America were reported at \$6 per 100. Green goods of all kinds are in good supply and the demand is satisfactory.

FLORISTS' SOCIETY OUTING.

Delightful weather, a large and enthusiastic crowd and a fine programme of sports all helped to make this year's outing of the Florists' Society one of the most enjoyable ever held by it. The country club grounds at Carthage is an ideal place to hold an affair of this kind and when Superintendent of Parks Herbert Greensmith, remarked on his way home that it was the happiest and most pleasant day he had spent in a long time, he echoed the sentiments of every one who attended this year's outing. The committee of arrangements consisted of Max Rudolph, C. E. Critchell, Gus. Adrian and Wm. Murphy. Frank Delar looked after every detail and nothing was left undone to give everybody a most enjoyable time. The following were the prize winners:

Boys' ball game.—Won by the store boys.
Men's ball game.—Won by the growers.
Boys' foot race, age limit 12 years.—Won by Master Kahn.
Boys' foot race, age limit 15 years.—Won by E. Davis.
Young men's foot race, age limit 19 years.—Won by Charles Windram.
Young ladies' foot race.—Won by Miss Pfeiffer.
Fat man's race.—Won by J. Conger.
Foot race, open to all.—Won by Al. Heckman, Jr.
Tug of war, ladies.—Won by Mrs. K. Zitscher's side.
Boys' sack race.—Won by W. Dellar.
Tug of war, men's.—(Box cigars.) Won by Wm. Murphy's side.
Young ladies' egg race.—Won by Miss Jennie Adrian.
Married ladies' egg race.—Won by Mrs. Ernst Manthey.
Boys' tug of war.—Won by Sidney George's side.
Swimming contest.—Won by Chas. Windram; D. Rusconi second.
Shooting contest.—Won by C. C. Murphy; Mr. Manthey, second; Fred Klinge, third.
At a special meeting of the Florists' Society, held on the day of the outing, July 21, a letter from F. Vick of the S. A. F. sports committee was read asking the local florists society to send a bowling team to Rochester and upon motion of J. A. Peterson was carried unanimously. Enough money was voted the bowling club to send a team to compete in the S. A. F. bowling tournament.

Last Saturday Wm. Gardner was given a farewell banquet by about 20 of his friends in this city at the Lathold and Newburgh cafe. A most enjoyable time was had and it was long past midnight before the happy gathering parted. Mr. Gardner is now a full fledged resident of New Castle, Ind.

Aleck Ostendarp of the J. M. McCullough's Sons Co. is on his vacation and H. B. McCullough has just returned from a business trip through the east.

J. A. Peterson has bought the material for two new houses and is installing a new steam boiler.

Mr. Winters of the Charleston Floral Co., Charleston, W. Va., was a caller this week.

Lilium Harrisii

Now Ready for Delivery.

Our first consignments have just reached us, and our advance orders are all filled. In view of the fact that crop is shorter than last year, we advise those who have not already ordered to lose no time doing so. Last year we were not able to meet the demand for our selected Harrisii on late orders. At present we have a good supply, and will be able to take care of early orders; but there should be no delay in ordering, as there is sure to be a scarcity of good stock, especially in the large sizes.

We offer selected stock of the original true Harrisii for early forcing, grown from the original true stock—splendid stock for early forcing, for which purpose Harrisii is so valuable. Our stock is not picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

THE Standard Orchard Co., at Scottsville, Texas, have shipped over 200 carloads of peaches this season, the company turning out 115 carloads in one week.

Nursery Shipments to China.

The following communication has been received by Ellwanger & Barry, the world-famed nurserymen of Rochester, N. Y., from Mukden, China:

"The shipment that you consigned to me under date of February 17 arrived here May 27. Long delays were caused by the avalanches on the Pacific coast and also in trans-shipment at Kobe. In spite of these delays the stock arrived in excellent condition and at the present time fully two-thirds have developed strong buds and shoots."

Prof. Craig at Binghamton, N. Y.

INTERESTING TREE REPORT.

Professor John Craig, of Cornell University, Ithaca, N. Y., was recently invited to examine and report on the conditions of the trees in the streets of Binghamton, N. Y., and a portion of his report is appended. After referring to the various trees grown, the report says:

ELMS.

White elm is especially adapted to valley lands, characteristic of the site of Binghamton. This tree is long-lived and healthy on land of this kind. In selecting elms for city planting, care should be taken to avoid the slippery or red elm, which does not succeed in dry soil. The cork elm, an upland tree, is well adapted for city planting, especially in locations which are apt to be dry, or upon gravelly soil. The elms, while somewhat objectionable on account of the amount of seed developed and distributed in early spring, are in the main healthy and stand as the most generally useful and perhaps the most beautiful of all our native trees for street planting.

SUGAR MAPLE.

This tree, unlike the white elm, is a native of uplands often found on dryish ridges in company with beech, white ash and basswood. As a street tree it is relatively short-lived, particularly if planted on low ground. The tree needs careful pruning. It is subject to borers and leaf blight, and it should never be planted on poorly drained soil; but of course in cities the drainage problem is ordinarily completely and thoroughly cared for by the sewerage and water systems.

BASSWOOD.

The comparatively few specimens of this fine native tree (often called linden) found in the city of Binghamton, are among the finest on the streets. It is a clean and fairly rapid growing tree and not easily injured by unfavorable soil conditions. Neither is it frequently or seriously attacked by insect or fungous enemies. In my judgment this tree is preferable to sugar maple and will bring more satisfaction than that variety.

OAK.

Fine specimens of both red and white oak are found in many places on the

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

S. A. VOSTERS & SONS,

RIEL, HOLLAND.

streets, while again there are many old veterans that are in various stages of debilitation. The roots of these trees suffer from grading in the establishment of sidewalks. The trees are naturally long-lived, but tend to become scrawny in old age. They are especially susceptible to fungous diseases of the trunk, which result in producing decay and destroying life and beauty. Among the best oaks for street planting are scarlet, a magnificent tree in autumn, and the northern pin oak, which is well adapted to street work on account of its upright form. The trees, then, recommended are white elm, cork elm, scarlet oak, northern pin oak, basswood and hard maple. Horse chestnut is a vigorous and healthy tree, with the exception of a marked susceptibility to a serious fungous disease, but causes a good deal of litter during the flowering and again during the fruiting period each season.

TREES CONDEMNED.

There are certain trees, the planting of which, in my judgment, should be prohibited by city ordinance. Prominent among these is the Carolina poplar, and included with it are other members of the poplar tribe. These poplars have the one virtue of growing with great vigor and rapidity, and bringing shade quickly; but this virtue is offset by many faults which are sufficient to condemn them for street purposes. The roots have tremendous penetrating power, and will force their way through retaining walls unless of solid concrete, will break into and clog water mains and sewers, and the female or pistillate trees develop and distribute cottony seed which, in early summer, is exceedingly objectionable.

Other cheap and poor trees, defective in various ways, which ought to be excluded from street planting, are silver poplar which sprouts very badly, soft maple which grows rapidly and breaks easily under stress of wind storms, and box elder, a western tree influenced in every way, and a score of our own native trees, but they have the virtue of growing with great rapidity. These trees may be planted to provide shade quickly if other enduring kinds are set between. The great danger, however, is that the temporary tree is not cut out when it ought to be and the net result is that the permanent tree is smothered and killed in the subsequent struggle which goes on. I believe that the four trees mentioned, viz., Carolina poplar, silver poplar, soft maple and

box elder ought to be put under the ban and their planting prohibited.

INSECTS.

The most serious insect on the elm is the European elm scale. This was found abundantly on elm trees in nearly all parts of the town. It is an imported insect, but is making itself very much at home in various parts of this country, although its first appearance was noted only as far back as 1884 at Rye, N. Y. Its distribution has been noted as far west as Spokane, Wash., and it is a serious enemy of elms in Nevada. This insect injures and kills trees by sucking their juices. If untreated, the tree either dies or takes on such a sickly and unhealthy appearance that it is neither useful nor ornamental.

The insect is always more abundant where the trees are crowded and where, by reason of this crowding, they lack vigor. It may be treated satisfactorily by spraying with kerosene emulsion of the strength of 10 per cent of kerosene. This should be applied to the tree with considerable force and in such a way that every insect is hit. It is a contact poison and only those insects which are covered with the oily mixture are affected. Among the proprietary oil mixtures which have been used satisfactorily in treating this insect is scalecide. This should only be applied during the dormant period in proportion of one part of scalecide to 10 parts of water.

THE APPLICATION OF WATER.

Experiments have shown that by using the garden hose and applying a stream of water with considerable force the insects may be washed from the twigs and branches. When this remedy is used, the water should be applied in April and again in June. There is only one generation of the insects each year, and if the April syringing is thoroughly done, then there ought to be little trouble afterwards; but, of course, this remedy is impractical in the case of large trees. However, in the case of young trees up to 15 or 20 feet in height it is entirely feasible. The hose should be fitted with a piece of gas pipe eight or 10 feet long, to which is attached a nozzle which will throw a solid stream. By using a step-ladder the operator can reach young trees and wash the limbs very thoroughly.

When trees are badly infested, it is most desirable that they be headed

When Traveling in Europe

Do not forget to inspect our nurseries. We grow immense quantities of Rhododendrons, Azaleas, Magnolias, Boxwood, Conifers, Pot-grown plants for forcing, Lily of the Valley, Evergreens, etc. of high grade and quality. Our nurseries are on sandy soil from which trees transplant readily. From Amsterdam to our nurseries it is only 25 minutes by rail and a train runs every hour.

back severely during the winter and that all the prunings be burned. If this is done and followed by the use of scalecide, kerosene emulsion or thorough washing, I have no doubt at all but that the trees can be cleaned up.

BOREES.

The most serious enemy of the maple tree is the borer, which works in the stems and main branches girdling the sapwood, causing the death of large branches and sometimes the entire tree. When the borer is at work, it should be dug out, the affected parts treated with an antiseptic, the cavities filled where necessary, and the wounds painted. There is a good deal of this injury wherever the maple tree is freely planted.

PRUNING.

A large portion of the street trees in Binghamton are in need of pruning. Some of these have been pruned in the past and not very wisely. A fundamental principle in pruning is to cut so that no stubs shall be left. The branch should be removed close to the stem from which it springs. In this way nature will heal the wound by covering it over with new tissue. All cut surfaces should be painted to keep out moisture and germs which bring decay. There is a good deal of this work to be done on the Binghamton street trees.

GILBERT H. WILD, Sarcoxie, Mo.

New Orleans.

For the last six weeks this section of the country has been "patria nimborum" for a certainty. Every day it has rained heavily until it seemed scarcely possible for the skies to weep more. The entire south has had practically the same watery conditions and considerable damage has been done to outdoor crops, especially asters and chrysanthemums where the natural drainage is deficient. While the aster plants are fine the flowers are lacking in substance owing to the absence of sun. Roses from the open are rather a minus quantity but tuberoses are plentiful and nice. A few bright days would restore things to normal, but the weather shows little sign of settling. The stores are doing very little business, cheap funeral work constituting the bulk of it.

NOTES.

The twenty-fifth annual meeting of the Horticultural Society was held at Gundolf's pavilion at West End July 21 with over 40 members present. The treasurer's financial statement was read and showed a very satisfactory state of affairs. The election of officers for the ensuing year was the big card of the evening. Richard Eichling and R. E. Simon were unanimously elected for president and vice president respectively. Both are hard workers and the interests of the society could not be in better hands. For secretary and treasurer C. R. Panter and John Eblen were re-elected by acclamation. H. Papworth brought before the meeting the desirability of inviting the S. A. F. to hold its convention in this city during the Panama exposition in 1915. It was unanimously agreed to invite the society here at that time and Mr. Papworth was deputed to properly present the invitation at the convention in Rochester. The meeting then adjourned to the banquet room where an elaborate menu was served and thoroughly enjoyed. Toastmaster Panter, who has few equals in this line, was in his happiest vein and was a regular Father O'Flynn the whole evening, "checking the crazy ones waxing on—aisy ones lifting the lazy ones on wld the stick." Pres. Eichling on being introduced made a forceful and thoughtful speech briefly outlining his policy for the ensuing year, asking the earnest support and attendance at all the monthly meetings, endorsing this city as the "logical point" for the Panama exposition and hoping for the acceptance by the S. A. F. of the invitation to hold the convention here then. He was given a rousing reception at its conclusion. Vice President Simon also made a short speech, pledging his best efforts. Ed. Baker, who was the first president of the society, was then called on and in a feeling speech presented to Mr. Eblen, who has held the position of treasurer since the society's inception, with a handsome umbrella to show their personal affection for him as well as their appreciation of his long and faithful service. Mr. Eblen was visibly surprised but managed to suitably express his thanks and gave some interesting reminiscences of the society's onward march. Ex-City Attorney J. F. C. Waldo made a witty and eloquent speech in speaking for the city and urged this society to its best efforts if it would land the Panama show for this city. The toastmaster here took up the subject of the exposition and handled it so skillfully that nearly \$1,000 was subscribed on the spot in addition to the large amount already pledged. H. Papworth, C. Eble, H. A. Despommier and Paul Abele, who each declined to be classed as "old" except in point of service, gave good advice to the younger members present showing how the future welfare of the society lay in their hands. P. A.

JOS. H. CUNNINGHAM, Delaware, O.

Chopin on the subject of "The Ladies" was naturally eloquent. Neat little compliments fell gracefully from his lips and pity it was so few of the fair sex were within hearing. H. Dressell returned thanks for the appreciation shown for his skill in rose growing and hoped to show something better in the future. Mr. Pfaff spoke for the honorary members, R. Lockerie for the trade papers and Mr. Taylor and Mr. Drum for the visitors. A vote of thanks to the hostess proposed by Dr. Jos. Stickland brought

the best annual meeting ever held by the society to a close.

B. M. Wichers of Gretna has gone into the raising of turtles as a side line and has thousands of eggs hatching.

C. W. Eichling is preparing to spend a few weeks in the mountains of North Carolina.

GEO. A. KUHL, Wholesale Grower, Pekin, Ill.

Albany, N. Y.

F. A. Danker has ordered a new
ice box (McCray) 7 feet, 6 inches by
14 feet to be installed in the rear of
his store about the end of August.
The box will be provided with plate
glass front, white enameled interior
with plate glass shelves, permanent
drainage equipment and other features
down to the minute. The improvement
will do away entirely with the pres-
ent office which will be removed to a
part which has been added to the
store, giving it now two street num-
bers, 40 and 42 Maiden lane. The
present salesroom will also be remod-
eled, making it a handsome place. Mr.
Danker's time is taken up largely
these days looking after the building
of a new residence which he has in
course of construction on the old
Danker homestead on Central avenue
not far from his greenhouses. He ex-
pects to be able to move into the
house late in the fall, although much
work remains yet to be done. Mr.
Danker is planning a trip for black
bass to North Hero, Lake Champlain,
with his brother-in-law and some
friends in August and will also attend
the annual convention of the S. A. F.
in Rochester with Fred Henkes and
E. P. Tracey.

John J. Berberick on Second avenue
is not saying much these days but is
quietly sawing wood. John lives
among the German element with
whom he is very popular and in the
years that he has been on the street
by careful attention to the wants of
his customers he has worked up an ex-
cellent business. As an evidence of
prosperity he is about to install a large
hot water heater which will heat both
the greenhouses adjacent to the store
and his dwelling in the winter. He
thinks also that he will do some re-
modeling to the large show window
which he installed last summer by re-
moving a door which has not proved
to be needed and substituting in its
place a sheet of plate glass the full
width and length of the window.

John G. Zimmerman of Watervliet is
rebuilding a house 20x200 feet.

R. D.

Worcester, Mass.

Business has been dull the past two
weeks. Nothing doing except an occa-
sional funeral order. The supply of
cut flowers is not anywhere near up to
the standard; roses are off crop and
carnations are gone by. Outdoor stock,
with the exception of sweet peas that
can be watered, is a sorry sight. With
no rain for five weeks everything is
about burnt up. Carnations are stand-
ing the drought fairly well but asters
are suffering badly as well as other
annuals. Shrubs, bedding plants,
lawns, vegetables, etc., are in a bad

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you
hear of **GODFREY ASCHMANN**, the great **Araucaria** Importer,
Grower and Shipper? These so well favored, everlasting green
decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and
Excelsa Glauca, are in favor more than ever this year.

This is our 25th anni-
versary since we began
importing Araucarias.
Watch! See us grow!
Beginning 25 years ago
with 100, our this year's
(1910) importation is
10,000, and
more are coming this
fall after I have made
my selection of the
choicest of the choice
on my trip to Belgium;
the growing district of
the world in Arauca-
rias and Azaleas. The
trade is well informed
that for many years
past I go personally to
Belgium to protect and select for my custom-
ers the best of **Araucarias**, **Azaleas**, **Palms**,
etc., that cash can buy there. Empty houses
won't pay. Now is the time to fill your empty
houses with something to grow into money while
you are asleep.

Remember, it is the wideawake man that is
not afraid to invest a dollar that makes the money.

Please look at our special low prices for
superior stock.

Araucaria Excelsa, raised from top cuttings, no
seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-
25-30 in. high. 3-4 5-6 tiers. 2-3-4-5 years old, 35c,
50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.

way and if rain does not come soon
florists and market gardeners will suf-
fer quite a loss.

The attendance at the weekly exhi-
bition of the Worcester Co. Horticul-
tural Society in Horticultural Hall,
July 14, was the largest of the season.
In spite of the extremely dry
weather for the past five weeks there
were some very good exhibits in some
classes while others had but one en-
try. Cut flowers were fairly good,
petunias were good and Mrs. G. W.
Knowlton had an excellent showing of
Japanese iris. The fruit and vegetable
exhibits were excellent. The awards
follow:

Cut flowers.—Allene W. Hixon, first; Mrs.
Percy G. Forbes, second; Mrs. Edward Warren,
third.

Basket.—Mrs. Percy G. Forbes, first; Mabel
Curtis, second; Mrs. Edward Warren, third;
Miss Lucy Coulson, fourth.

Petunia.—Leonard C. Midgley, first.

Allene W. Hixon, second; Mrs. Percy G.
Forbes, third; Mrs. Wesley Ward, fourth.

Japanese Iris.—W. Knowlton, first.
Hydrangea.—Mrs. Percy G. Forbes, first; Mrs.
A. E. Underwood, second; Allene W. Hixon,
third.

bers of the summer colony.

Vaughan's Giant Pansies

10 per cent special CASH DISCOUNT. On orders over \$2 for Flower Seeds if cash is enclosed, **10 per cent.** The discount does not apply to Asparagus Seed. Cash discount on this is 2 per cent.

VAUGHAN'S "GIANT PANSY MIXTURE."

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt., 25c; ¼ oz., 60c; oz., \$4.00; ¼ lb., \$14.00.

Our list of "Seeds for Summer Sowing" now ready; if you have not received a copy please write for same.

VAUGHAN'S "ELITE PANSIES."

This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures. Trade pkt., 50c, ¼ oz., \$1.00.

VAUGHAN'S PREMIUM PANSY MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past seventeen years, and it has given general satisfaction. Per pkt. 25c; ¼ oz., 75c; ½ oz., \$2.50; oz., \$5.00.

IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; ¼ oz., 20c; ½ oz., 30c; oz., \$1.00.

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1889. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; ¼ oz., \$1.50; ½ oz., \$5.00; oz., \$10.00.

VAUGHAN'S CUT FLOWER MIXTURE.

This mixture is put up by ourselves and contains mostly light colored sorts. We have sold this mixture for several seasons to some of our Chicago cut flower growers, who have realized big returns from the sale of the flowers. Pansies are as easily grown as violets, require less care and bring better returns. Trade pkt., 50c; ¼ oz., \$1.00; ½ oz., \$2.00; oz., \$8.00.

We extend a cordial invitation to members of the trade who visit Chicago to call and see us. We try to have things attractive and interesting at all times.

FRANK OECHSLIN,

4911 Quincy St., CHICAGO.

Indianapolis.

It has been long since flowers were as scarce here as they have been the past week. The funeral of a prominent business man occasioned a general cleaning up among all the wholesalers and retailers of the city and some of the growers scattered over the state as well. The flowers at this funeral represented an expenditure of almost \$1,000. Just a few days prior to the death of H. P. Wasson came the demise of a Mrs. Stalnaker, and, then also, flowers were in great demand.

Ed Bertermann is now on his vacation. He and his wife are taking a lake trip which will end at Chicago, where Bertermann will officiate as the "giver-away" at the wedding of his niece, Miss Atkinson.

A. J. Pittet is having some difficulty in securing extra help to work in the

Dreer's Special Offer of Fine Ferns

Nephrolepis Scholzei.

Mixed Ferns for Dishes.

We have at all time a good supply of these in good assortment
2½-in. pots. \$3.50 per 100; \$30.00 per 1000.

For a complete list of seasonable stock offered by us at this time see our current wholesale list. If you have not received a copy it will be mailed to you on application.

HENRY A. DREER, Inc., 714 Chestnut Street, Philadelphia, Pa.

Toronto.

SUMMER QUIET.

The usual summer quietness prevails; trade consisting of some funeral work and a few minor weddings. But if business is bad stock is worse, especially in the rose and carnation line. A few good Kaiserin roses are coming in but Bride and Bridesmaid are generally thrips eaten and covered with mildew and the flowers are small. Of carnations the less said the better. Longiflorum lilies, valley, centaurea, orchids and excellent sweet peas are about the only good stock at present; a few asters are being cut indoors but the flowers are small.

NOTES.

H. E. Philpott of Winnipeg is a visitor, having come via Chicago. As he is president of the C. H. A. he is here working hard for the coming convention and is trying to make it the banner convention; his enthusiasm will, no doubt, bring a large number of exhibits and a large attendance. All those who have made up their minds as to what they want regarding the question of tariff should drop a line to Secretary Hall of Montreal, and then attend the convention and fight it out. That there will be a difference of opinion is quite evident here as the majority wants the duty removed on plants, bulbs, cut flowers and even supplies. In the latter case the majority is of German origin and is purchased by us of the American supply houses. It can be easily figured out that we are paying considerable more than 100 per cent of the original value and that in our case, at least, it is not the public which pays the duty but the florists themselves.

Much of the stock is used in window and store decoration, at weddings, etc., and is never sold, so that if the article cost less the florist would be that much in, that is our opinion. Tell us yours at the C. H. A. convention.

The Horticultural Society held a show in Allan Gardens which was a great success and as the public was admitted free, the attendance was so large as to cause pangs of envy to those interested in the big chrysanthemum show. As the prizes to be awarded were for amateurs it would be interesting to some of our athletic associations to know where some of the staid and stately exhibitors received their status to qualify.

The Trethewey model farm will open a store on Yonge street, which will be used more as a show room to display the products of the firm. How this will apply to the flower section will be watched with interest.

Wm. Fendley, Brampton, is making a tour of western Canada, taking a carload of show horses with which he expects to clear up a few prizes. This is no new venture for Fendley, for it would take a hustling David Harum to beat him on a horse deal.

A. E. Moore, who has been on the sick list, is again back in harness. He lost 30 pounds at the rate of one pound a day.

H. G. D.

SPRINGFIELD, Mo.—The annual election of officers of the Pioneer Floral Co. was held July 18, the old officers being re-elected as follows: W. D. Murray, president; L. H. Murray, vice-president; R. R. Ricketts, secretary.

Nephrolepis Scholzei (Crested Scott Fern.)

A sport from Scottii, possessing all the merits of that most popular variety but with the pinnae sub-divided giving it a neat crested appearance. 2½ in. pots. \$1.25 per doz.; \$8.00 per 100; \$75.00 per 1000.

Nephrolepis Whitmanii.

(The Improved Ostrich Plume Fern.)

3-inch pots \$1.25 per dozen; \$8.00 per 100;

Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This is not only the best and most profitable Maiden hair to grow for cutting but it is also the best variety to recommend to the retail buyers for house culture, it standing the dry atmosphere of the room better than any variety we have yet tried.

Strong 3-in. pots \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

Asplenium Nidus Avis (The Bird Nest Fern.)

A nice thrifty lot in 3-in. pots, 30c each; \$3.00 per doz. 4-in. pots, 40c each; \$4.00 per doz.; 6-in. \$1.00 each.

Nephrolepis Glatrasii.

This variety, introduced last fall in a very limited way, has proven to be a gem—especially where a perfect specimen is required in a small size. It will develop beautifully in a three, four or five inch pot, making an ideal plant for many purposes where the other varieties of Nephrolepis are too coarse, and, it is also fine for fern dish work when grown in 2½-in. pots. \$2.00 per doz.; \$12.00 per 100; \$100.00 per 1000.

Ferns in Flats.

These flats contain about 200 plants each, only one variety being in a flat. We cannot supply less than a full flat of any one sort. Price \$2.00 per flat. Ready now.

Adiantum cuneatum.
Aspidium Tsussimense.
Aspidium Tsussimense cristata.
Cyrtomium falcatum.
Cyrtomium Fortunei.
Lastrea Chrysoloba.
Lastrea Aristata variegata.

Pteris adiantoides.
Pteris cretica magnifica.
Pteris cretica Wimsetti multiceps.
Pteris Wilsoni.
Pteris Ouwardi.
Lomaria ciliata.

Pochlmann Bros. Co., Morton Grove, Ill.

Wooster, O.

A voluntary petition in bankruptcy was filed, July 14, at Cleveland for F. H. De Witt & Co., florists, and Frank H. De Witt personally. The liabilities are estimated at \$10,000 and the assets at \$7,000. The firm is an old established one and although there were rumors of financial difficulties the bankruptcy proceedings came as a surprise as everyone thought Mr. De Witt was making money. A year ago the firm moved from its old location in Bever and Bowman streets to the present one on College avenue. The assets include the real estate and the greenhouse stock and \$6,000 of the liabilities are secured by mortgage. The matter is referred to W. F. Keen, referee in bankruptcy, and a trustee will be appointed.

EUGENE, ORE—W. O. Heckart is building a conservatory 40x130 feet for the Misses Ida and Harriet Patterson.

TRADE LIST

Clematis, paniculata, strong plants, \$10.00 per 100;

Passiflora coerulea, 3-in. pots \$5.00 per 100.

Rose Geraniums, 3-in. pots, \$4.00 per 100.

Plants from 2½-in. pots, \$3.00 per 100;

Chrysanthemums, White Cloud, Pacific Supreme, Golden Glow, Ivory, Bailey, Klondike, Lulu.

Asparagus Sprengeri, 2-in. pots, \$2.00 per 100; 2½-in. pots, \$3.00 per 100.

Salvia, Bonfire 3-in. pots, \$3.00 per 100.

Begonia Vernon in bloom, 3-in. pots, \$5.00 per 100.

Asparagus Sprengeri, strong plants from 3-in. pots, \$5.00 per 100.

Poinsettias, 3-in. pots, \$5.00 per 100.

C. EISELE,

11th and Westmoreland Sts. Philadelphia, Pa.

Lake Forest (Ill.) Sweet Pea Show.

The sweet pea exhibition given by the Horticultural Society of Lake Forest, July 23, was a decided success. The flowers exhibited were very good in quality considering the hot weather. One of the largest exhibits was that of A. M. Day, and great credit is due to J. L. Urdahl, his gardener. He exhibited 42 varieties of perennials and 67 of annuals, properly named with scientific and common names. A certificate of merit and first prize was given for this perfect collection.

Cyrus H. McCormick, E. O. Orpet, superintendent, was another exhibitor that deserves credit for his large collection of perennials and annuals which was artistically arranged on the stage. First and second prize was his reward. Frank Farwell, Sidney Beleb, gardener, had a fine collection of annual flowers. His were the most perfect to be seen among the exhibits. First prize was given this collection.

Ernest Hamill, Chris. Peterson, gardener, had a good collection of sweet peas artistically arranged. One novelty exhibited by Mr. Hamill, Sutton's Fairy Queen sweet pea, was one of the finest of its kind. It is of recent introduction and it alone was worth coming to the show to see. One of the best and largest collections of sweet peas was exhibited by D. H. Hanson of Prairie View, Max Zschan, gardener. First prize was given this splendid collection of 23 varieties and 13 varieties of novelties of recent introduction.

Mrs. D. M. Cumming's exhibit of sweet peas is worthy of special mention for its exquisite color in flowers and arrangement. Second prize was given this collection. Mrs. James Heyworth's (J. Peterson, gardener), exhibits of sweet peas entered in three classes, had the honor of receiving the most first prizes. Mrs. E. Russell's collection of sweet peas was fine and especially the new sweet pea, E. J. Deal. A prize for this flower offered by Vaughan's Seed Store, was awarded to Mrs. Russell. The first sweet corn of the season grown in Lake Forest was shown by Mrs. Russell, showing her ability as vegetable gardener as well as florist.

Other exhibitors were B. A. Eckhart, collection of perennials, Miss H. Underwood, collection of annuals and vase of flowers, and John Farwell, Jr. It is very much regretted that this exhibit given free to the public was not patronized as it should have been. Great credit should be given those gardeners that arranged the show.

TENAFLY, N. J.—G. W. Lounsbury and wife have just returned from a two months' trip through California and Colorado.

VAUGHAN'S Winter Flowering SWEET PEAS

New Seed Ready in August.

White Seeded Sweet Peas. Put seed in water over night, then put in box or flat and in a temperature of 60 degrees. Seed will germinate in two days and then can be sown.

	oz.	lb.		oz.	lb.
Angellino, Self pink.....	\$0 20	\$1 50	Mrs. Alexander Wallace, Lavender.....	15	1 00
Christmas Pink, Pink and white.....	10	1 00	Mrs. W. W. Smalley, A pleasing satin pink.,	20	1 50

Earliest of All, Pink and white.....	10	85	Mrs. William Sim, Salmon pink.....	20	1 50
Mont Blanc, White.....	10	60			

If sweet peas are wanted for Christmas, sow the seed in well-ventilated houses, not before August 15, nor after August 25. This sowing will bloom from November 1 until April. For the main crop in January or February, sow about September 15. If the best sweet pea flowers are wanted for Easter (April 16 in 1911), sow the first part of November.

Cleveland.

STOCK SCARCE.

From an abundance of stock to almost a scarcity is the way it now stands. Up to a week ago stock seemed quite plentiful, but the past week was just the reverse, with the exception of sweet peas, which still come in quantity, although mostly short in the stem. Asters are coming in but slowly, every grower praying for rain to help him save the crop. Roses of all kinds, but mostly short stem, and small flowers are just about equal to the demand. A few gladioli are arriving daily. Easter lilies meet with a fair demand. Candidum lilies are about done. Japanese lilies in pink and white are on the market, the demand fair.

King Iron Frame Greenhouses

"Ask the Man Who Has One."

Letter from W. J. Palmer & Son, two years after adopting the new construction:

We have now had our Iron Frame Construction in use in our new carnation range for two years, and have found it entirely satisfactory, ample strong, and at the same time casting the minimum amount of shade.

We have in the past largely used the flat rafter type of iron frame house, but adopted the King Type on its merits and not on the question of price, though quotations we received for the flat iron rafter houses were 40% higher than yours.

We consider the Iron Frame House the best and believe that you have promoted the best interests of growers by introducing a superior type of Iron Frame Construction, which is so reasonable in price that there is no longer any excuse for the building of either cheap wooden houses or expensive types of iron frame houses.

Wishing you every success, we remain,

Yours respectfully,

W. J. PALMER & SON.

Send for Bulletin No. 35, which describes the King Iron Frame Construction.

KING CONSTRUCTION CO.,

North Tonawanda, N. Y.

MR. FLORIST, IF YOU WERE SHOWN:

That by the installation of a good tilting steam trap you would effect a saving in fuel sufficient to pay for the trap in from three to six months.

That you would increase the efficiency of your steam lines by draining them of all condensation.

That this pure hot condensation could be returned to the boilers as feed water by means of this trap without the assistance of pump or injector.

Would it not be a matter of considerable import to you?

The MOREHEAD Tilting Return Steam Trap will do this and more.

WRITE FOR TRAP BOOK AND TRIAL OFFER PROPOSITION.

The Week's Steam Coal Developments.

Chicago.—Apropos of our outline of the steam coal situation of a week ago when our columns in this department presented conditions obtaining at the mines in Illinois, and in Indiana, West Virginia and in other coal producing territory east of the Illinois state line that looks for an outlet for its products to Chicago and territory tributary to Chicago through the Chicago gateway, it must now be added that the situation is considerably more strained than our report of last week would indicate.

While in previous years, under normal conditions, the Illinois mines were worked to capacity of their output during months of May, June, July and August, this year the shutdown was practically complete since the strike order of early spring went into effect, resulting in complete cleaning up of domestic coal in the coal yards of Chicago and adjacent points. To the layman this may appear of no moment, but to the florists, greenhouse and nurserymen it bears significance in that even if the Illinois coal mines do start producing coal sometime in August, which would bring into this market the first trainload of coal the latter part of August or fore part of September, the large coal yards will necessarily look to be protected, filling up their storage space as much as possible to meet the requirements made upon them during the coming fall, winter and spring.

Another factor to be considered are the carrier railroads. When they run short of fuel, as they surely will this season, they will confiscate coal in transit on their lines.

It must be borne in mind that all users of steam coal in this territory, whether manufacturers operating large plants, railroads, electric light or water works, apartment, flat or dwelling houses, during past four or five months were doled out their supply of steam coal in hand-to-mouth proportions.

To pile on more troubles for the steam coal trade reliable information from authoritative sources has reached us that in addition to the car shortage to be felt as soon as crops commence to move the further detrimental condition in the coal carrying phase is to be considered in the shape of broken down equipment of coal carriers. It

We Make a Specialty of Supplying the Florist Trade

CHICAGO.

is pointed out that the railroads did not make any attempt during past half year to bring their equipment to maximum repair point on account of scarcity of labor.

There is also to be considered in this summary the fact that freight rates have been advanced appreciably; also that coal miners this season, under the new scale now in course of being adopted, will receive something in the neighborhood of 10 cents more per ton this year than under previous agreements.

In view of the above conditions obtaining this season, the coal mine owners, operators, coal handlers and coal dealers are a unit in predicting that steam coal will bring higher figures this season than any period heretofore. This will be applicable to all kinds of coal entering this market.

Under date of July 24 press dispatches from Indianapolis, Ind., stated that after a week's deliberations the international executive board of the united mine workers of America decided upon the following compromise of the present coal strike which, it was believed, would be acceptable to

the Illinois operators and which, in due course, would be submitted to the referendum vote of Illinois miners:

1. That the mining rates in Illinois be advanced 3 cents a ton, mine run. That day labor, yardage, and dead work be advanced 5.55 per cent.

2. That the wages of the shot firers be paid by the operators at a rate not to exceed 1½ cents a ton produced at the mines where shot firers are employed. The shot firers shall be under the control and direction of the mine manager, both as to inspection and the shooting of shots. To enforce this provision a clause shall be written in the contract providing that when the miners in any mine interfere with the duties of the shot firers the miners in that mine shall be required to pay the wages of the shot firers during the unexpired portion of the contract.

3. That the mining rate in Williamson and Franklin counties be advanced 2 cents a ton above the regular advance.

4. That an agreement be made for the engineers, firemen, and pumpers as members of the united mine workers.

5. That the Illinois operators attend an interstate joint convention previous to the expiration of the present contract period.

6. That the clause be agreed to for the continuation of work pending negotiations at the end of the contract period.

7. That a clause be agreed upon that in case of dispute which cannot be settled by the operators and miners' representatives of Illinois the operators have a right to appeal to the international executive board and the mines continue in operation pending such appeal by the operators.

8. That engineers and such employees as are necessary to protect property under any and all circumstances shall not be subject to the direction or orders of the local unions or district officers, but shall be subject to the orders of the international executive board.

Under date of July 25, however, Springfield, Illinois, reports would indicate that the Indianapolis compromise is not to the liking of the Illinois union officials. That between the national and state officials of the miners' union friction became apparent.

From the preceding dispatches it is apparent that peace in the affected section is not yet definitely agreed upon.

HARRISBURG-FRANKLIN COAL CO.

Fisher Building, CHICAGO.

The Better Grades Only of

INDIANA AND ILLINOIS

COALS

Preparation and Quality as They Should Be.

The Chicago, Burlington & Quincy railroad has advanced freight rates 12 cents per ton on coal shipments to Western Springs and Hinsdale, Illinois.

R. C. Whitsett of the R. C. Whitsett Coal & Mining Co., 355 Dearborn street, Chicago, summed up the coal developments of the past few months as follows: "Owing to the long drawn out strike in the Illinois field there is practically no sulphur coal on the market. Ordinarily at this time of year the manufacturers are stocked heavily and considerable coal on the market is drawing car service. Conditions are entirely different this year. Manufacturers have been buying their coal from day to day as they needed it, therefore they will be in the market for their regular supply. The heavy demands for domestic purposes will set in by September 1. This, along with our usual fall car shortage when the crops begin to move, will have a tendency to create a shortage of coal. The immense tonnage from the Illinois field taken off the market for four or five months is bound to have its effect. There is no possible reason for coal to get cheaper this year, but there is every indication of higher prices and irregular shipments. Therefore, I would strongly advise the florist trade to lay in their stock during the month of August."

SCRANTON, PA.—The greenhouse in Nay Aug park, built for the city by John Cleland, is completed and will be turned over to the city soon.

The Coal Situation.

The following resume of conditions in the coal supply situation was given the AMERICAN FLORIST by A. B. Stefens, vice-president and one of the principal owners of T. C. Keller & Co. and Franklin County Collieries Co., heavy producers of coal at Sesser, Franklin county, Illinois. "After four months of a strike a settlement has been reached with the Illinois miners, subject to ratification by their local unions, and it is almost certain that the mines will resume operations shortly after August 1. The settlement involves a heavy sacrifice on the part of the mine owners, particularly those of Franklin and Williamson counties, which latter have been taxed two cents per ton extra in addition to the shot firers' expense and the regular advance granted by the other states. It was felt by the southern Illinois operators, however, that had they determined to resist further they would have been alone, as the other districts would in all probability have signed up with the miners.

"The cost of mining coal in Illinois is going to be considerably increased over that of last year, and a stiff market is expected from now on till the end of the season. In former years the coal dealers, as well as many consumers, have stocked up heavily with coal during the slack months of the coal season from May to July, but this year, owing to the strike, they have

not only been unable to stock up, but on the contrary the stock of coal that was remaining on May 1 has been depleted gradually until now there is practically not a ton of storage coal held by any one, not even excepting the railroads.

"August is usually the time when a good demand for coal sets in and from that time on the demand grows stronger every month until it reaches its maximum around November. It should not be forgotten, either, that during the four months' strike many of the idle miners left Illinois for other coal mining states where mines were in operation. Another large number, particularly of the Italians, went to Europe for summer vacations, until today there is hardly a single mine in Illinois that has even one-half of its regular number of men left. It will not be until winter time, and perhaps not then, that the Illinois mines will have a sufficient number of men to again produce their regular tonnage."

"After a week's trip through the coal fields," stated M. A. Rolfe, sales manager Black Gem Coal & Coke Co., Old Colony building, Chicago, "I believe that it would be wise on the part of the consumer to get his coal before September 1. The strike has created a large shortage. Sufficient coal cannot be procured today to fill orders. We are behind on our orders for block, which is our specialty. It will be exceedingly difficult to catch up, and everyone will have his troubles when the car shortage starts. This is the meat of the situation. Be safe, get in your coal, save all the annoyances of delay and money, as the prices will surely advance."

Rochester, N. Y.

CONVENTION NOTES.

A rate of one fare and one-third has been secured on the certificate plan for those attending the convention on the Trunk lines, New England, Eastern Canadian and Central associations. Passengers on purchasing their tickets must be sure and ask for these certificates. The executive committee of the Florists' Association has matters well in hand for the entertainment of the visitors, a few minor details only being left to make the arrangements complete so that the programmes will be in the printer's hands in a few days. The outing will be held on Friday at Manitou Beach. The ball game will also take place here, this being an ideal spot to hold a gathering of this kind; besides, the 10-mile ride on the shore of Lake Ontario is in itself a feature that the committee did not overlook in deciding to hold the outing at Manitou. The ladies' bowling will be held at the Elm alleys on Elm street. The men's bowling will take place at the Grand Central alleys on South avenue. These are considered to equal any in the city

It has no equals for simplicity or its working. Catalogue free.

E. HIPPARD, Youngstown, Ohio.

Knoxville, Tenn.

W. M. Goodman, director general of the Appalachian exposition, is making arrangements for some fast work on buildings and grounds with a view of having everything in readiness for the opening on September 12. A survey of the midway grounds was made July 13 and contracts for the grading are let. Work will begin at once on the archway at the entrance and on the woman's building. A force of men has been placed on the main building to finish the work of grading the walkways and sodding the grounds. Flower beds have been laid out and florists and nurserymen of the city will get busy right away setting out plants and shrubs of many varieties. A. H. Dailey is now at work on the beds at the south end of the main building. He will also place several beds around the fountain at north end. C. L. Baum and the Peters Nursery Co. will also contribute flowers and shrubs and set out and maintain a number of beds.

Too much cannot be said in praise of the florists and nurserymen, who are doing this work without cost to the exposition, solely with the view of aiding in this great movement to advertise their city and the Appalachian region, says the Sentinel. This display of public spirit and civic pride should call forth the highest praise on the part of the people. The arrangement of the forestry exhibit will be made by Don Carlos Ellis, who is in charge of education of the United States forestry service, and who will collect and arrange the government forest exhibit. He will be assisted by R. G. Burton, forestry engineer of this city. Mr. Burton will superintend the collection and cutting of samples of lumber trees in this region.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Mignonette

The first week in August is a good time to sow mignonette for pot plants for Christmas and later. We have tried many varieties but have come to the conclusion that a good strain of Machet is still the best for pot work. The habit is dwarf yet it is a free grower and it will stand the somewhat close pinching in the earlier stages of growth that is necessary to produce dwarf, bushy plants. The aim of the grower of pot plants is always a neat looking specimen, well leaved and with plenty of shoots and consequently flowers. For many years we have followed out the plan given below with this variety and have never failed to get good stock. Two or 2½-inch pots are filled firmly with a good loamy compost, consisting of loam and leaf mould with a little well dried cow manure and some sand or burnt refuse if the soil is inclined to be heavy. Although frequently decried as a waste of time we invariably drain the small pots by placing a crock, bottom side down, over the drainage hole and putting a little of the rougher compost over this. We are convinced that this is necessary and well worth the little trouble involved. Sow three or four seeds in the center of each pot after watering and cover only very lightly. Lay some newspapers over the pots to exclude light and in a few days the young plants will appear, when the paper must be removed. Very careful watering is necessary in the early stages and this is where the drained pots have the advantage. As soon as the plants are large enough to handle remove all but two and eventually all but one to form the plant. Keep them gently growing in a cool, well ventilated house with full light until about four or five good leaves have formed, then pinch the point out of each. This will result in the formation of three or four shoots which will be pinched again later. The young plants will be potted when they have filled the pots with roots and the young shoots pegged down. The sub-

sequent treatment consists of pinching and supporting the shoots and will be described later.

Pandanus Veitchii.

The weather of the present summer so far in the middle west has been all in favor of the growth of Pandanus Veitchii, the continued sunshine suiting this plant exactly. All young stock should by this time have been shifted and established in the pots and the brisk, moist atmosphere caused by frequent damping of the benches and floors in conjunction with the hot sunshine is exactly to the plants' liking. It brings out the fine variegation that is so much admired in this plant and gives a gloss to the foliage that is the unmistakable stamp of the well-grown specimen. While old plants that have become potbound may require a little feeding at the roots, the less feeding that is given young stock the better. Heavily fed plants never show so good a variegation as those that are watered with clear water only, the feeding increasing the chlorophyll or green coloring matter in the leaves. Feed only as much then as is necessary to keep the plants moving. While well rooted specimens need ample moisture to keep them moving, young plants repotted recently are easily overwatered and they should be allowed to get well on the dry side before giving any more. The pine family, to which this plant belongs, can all stand periodic droughts, but a constantly moist condition of the roots is bad for any of them.

Cyclamens.

The great heat of the past few weeks has necessitated frequent attention to damping in the frames where the young cyclamen stock is growing in order to keep insects, and especially the dreaded thrips, in subjection. Only by the closest possible attention to every detail of culture can these plants be brought to the perfection demanded of the market specimen of today, and unless the foliage is kept clean and in good condition there is no hope of attaining it. The earliest plants, those

sown in late August and September, 1909, are now well established in 4-inch pots with fine large foliage and will soon be ready for their final shift into the flowering pots. Later batches are not so well established, but are given the same treatment as regards atmospheric conditions. The little plants not having so great a command over the soil should not be so freely watered at the roots, but even more freely sprayed, not giving a heavy douche of water but a light misty spray caused by placing the finger on the end of the hose fitting or syringe and breaking up the flow of water into a fine spray. Keep a close lookout for turned leaves, which are sure to harbor green fly or other insects, and remove them on sight before the insects have a chance to spread to the healthy leaves. A little dry lime and soot scattered around the ground is of great help in creating a good atmosphere around the plants, generating a small amount of ammonia, which is very helpful to the plants. Should insects appear fumigate regularly until all are killed, for the plants must be kept absolutely clean if the best results are looked for.

Rubbers.

These plants are usually able to stand all the sun they are likely to get when growing outside in plant protectors, but the present summer is proving almost too hot and the dry winds under a hot sun is proving almost too much for them. Under such unusual conditions it is questionable whether a light shade would not be an advantage during the hottest part of the day. If they can be kept going by night and morning spraying and copious root moisture then all is well, but do not allow the foliage to suffer. A few branched plants are usually inquired for and it may be worth while pinching the points out of a few for this purpose. Occasionally an accident happens to a plant and the top is broken off. Such plants never regain the straight stem and may have three or four shoots taken up to form the branching specimens referred to.

Rambler Roses.

The pot grown stock of rambler roses being brought along for forcing should be especially well ripened and good for the purpose this year. The growth has been remarkably free and owing to the constant sunlight, is solid and in fine condition. A thing to guard against is careless help in watering. Men are often using the hose and looking anywhere except where the water is going, consequently the plunging material is washed up onto the surface of the pots, becoming hardened in the sun and consequently making it very difficult to determine the condition of the roots as to moisture or to properly water them if they are dry. From now on the roots will be needing plenty of water and occasional feeding with liquid manure and the tips of the shoots may be pinched in order to plump up the basal eyes of the earliest stock. It is just as well to try and induce the earliest plants to go to rest as soon as possible and they can be separated from the rest, kept well apart so that plenty of air and light play between them and kept a little drier at the root.

THE RETAIL TRADE

ATLANTA, GA.—An attractive window is that of the Atlanta Floral Co., in Peachtree street, decorated with a layout of rocks, ferns and flowers growing, while with these are a spring and a small pond with miniature children in the shape of dolls diving and swimming.

Standing Wreath of Roses and Hyacinths.

SEE SUPPLEMENT WITH THIS ISSUE.

There may be various opinions as to the artistic value of the standing wreath, but there is no doubt about its popularity and the nature of the design makes it possible to use a great variety of flowers, almost anything, in fact, that may happen to be in season. Just now, when all varieties of gladioli are extremely plentiful, these are excellent for the base of the design, arranged either with their own foliage or with leucothe sprays. Easter lilies are elegant for the same purpose and many others of the lily family, such as *Lilium speciosum rubrum*, *L. speciosum album* or even *L. candidum* can be used. In the chrysanthemum season a few fine specimens loosely arranged with suitable foliage make an elegant base and, in short, almost any bold and striking flower is suitable.

As to the wreath itself there are, of course, various methods of treatment, any flowers used in the ordinary wreath being just as suitable for a standing one. But care must be taken that the flowers do not clash in color with those of the flowers used in the base and an effort should be made to get away from the stereotyped round form by allowing a spray of fern or other greenery or a few flowers to escape from the wreath. Remember, too, that it is not the quantity of stock used in a wreath that gives it its value from an artistic standpoint. A wreath with a few flowers well placed, so that each shows its individuality and stands clear of its neighbors, is far prettier and far better in every way than one with a lot of valuable

stock closely arranged so that it has a lumpy, heavy effect. Such a wreath may be made very attractive and show a fair profit of \$10 while higher prices will have to be charged for better work and the use of more valuable stock.

Ventilating Flower Vault.

ED. AMERICAN FLORIST:—

I have a flower vault at my office and expect to build one on a larger scale at my greenhouses. We have had some trouble with the ventilation, and would like to know from some reader of THE FLORIST the correct principles for ventilating such a vault. The floor of same will be about 12 feet under ground, connected with the surface by a stairway, at the bottom of which we will build a closed vestibule leading into it.

AN OLD SUBSCRIBER.

We have a flower vault similar to the one described. It is about 12x16 feet, but only about nine feet deep. We have two of the common cellar windows hinged at the top, necessarily opening into the upper part of the cellar, each of which is about 16x28 inches. From the opposite corner of the cellar we ran up a wooden flue through the room above and as high above the roof as we could conveniently go; of course, the higher it is, the better the draft. This flue has an area of about 12x12 inches and we find that it is very effective, creating a strong upward suction whenever the windows are open and it seems to ventilate the cellar perfectly, all flowers, even carnations, keeping remarkably well without ice. "An Old Subscriber" should be cautioned to make absolutely certain that there is no possibility of sewer gas getting into the cellar as it is deadly for carnations. Illuminating gas is equally fatal, even when escaping in such small quantities that it can not be detected. It will, therefore, be advisable to cement the cellar both bottom and sides very carefully and unless it can be lighted by electricity, have no fixed lights in the cellar at all, depending on using a lantern when necessary. "An Old Subscriber" will also realize the import-

PHOENIX ROEBELENI.

Grown By Chas. Eble, New Orleans, La.

ance of keeping the flower cellar absolutely sweet and clean. A flower cellar should be kept as clean as the pantry where one stores the eatables. Any water spilled on the floor should immediately be wiped up as the atmosphere should be kept as dry as possible.

W. N. RUDD.

Store Wisdom.

It is now aster time and for the next six weeks these flowers will form a large part of the florists' stock. One of the objectionable features of this flower which is also common to most soft and leafy stemmed blossoms is that the stems become fouled over night. This can be avoided by adding a drop or two of formaldehyde to the water of the jar in which the flowers are placed; this stops all fermentation and the stems and foliage remain sweet and clean as long as the flowers ought to be kept. The best method of applying this is by having a bottle with a cork and tube similar to that used by barbers; one holding a pint is easy to handle, and into this place the water and tablespoonful of formaldehyde. When the jars are full of water a dash or two is sufficient to charge a jar holding a gallon or more so as to secure the results desired. Try a bunch of asters over night in the charged water and another in the plain and note the difference. Ten cents' worth of formaldehyde at any drug store is enough to last for quite a while. It is not to be regarded as a preservative of the life of flowers, simply preventing the fermentation of the soft foliage and stems which are often slimy and decayed while the flowers are still good enough for street sales or cheap work.

This is the time to bring out the talents of the young and growing help. The best designer was a green, inexperienced hand at one time, although to see his finished work it would seem as if he was born with this special gift, as it appears to come so natural to him. He just jabs the flowers in anywhere as fast as he can pick them up, and almost before you realize it there stands the finished design. A good thing to start on is the prepared magnolia leaves. This is the time to have them stemmed up; toothpicks and No. 27 wire are best. They should be stemmed singly and laid straight in baskets or boxes so as to be handled quickly when needed. The entire winter's supply can be got ready now when there is plenty of spare time. Magnolia leaves are rapidly replacing

galax, as they will last for years and look just as bright and fresh if kept clean as the day the cases were opened.

The making up of wreaths of these leaves forms good first lessons for beginners. The thing of great importance to be impressed is economy. A 14-inch wreath can be satisfactorily made with so many leaves and no more should be used. A 16, 18 or 20-inch require each an additional quantity in proportion, and this is all that should be used, and so on up into the larger sizes. The necessary quantity should be counted out and assorted, the smaller leaves being used for the beginning or narrow part of the form, presuming that crescent wreaths are used. I would recommend this style, as they are much more popular than the full, round kind, although very handsome designs are made in the larger sizes of this pattern, particularly when mounted on stands or bases. With a well-made wreath as a pattern and a little instruction, it does not take long before a willing hand can turn out a very fair piece of work and with experience soon becomes quite proficient. With one or two such experts the storage capacity is soon taxed and then a step farther is taken. The wreath is decorated with inexpensive summer flowers. As there are so many ways in which this work can be done, bringing out color effects and

graceful arrangement, the coming artist has an opportunity to show his aptitude and gets practice that could hardly be afforded him later in the season. Even in the dull season a finished piece that is presentable is often valuable to have for show to those who go about pricing, and orders are often secured that might have gone elsewhere.

K.

Can It Be Done.

ED. AMERICAN FLORIST:—

I have read your article on retail prices with a great deal of interest. The question, "Can It Be Done?" is of vital import to the florists of this vicinity. When the man calling himself the "leading florist," cuts his prices so that he sells at retail below what we can buy at wholesale, we must indeed ask the question: "Can it be done?"

Only last week a lady called our attention to the fact that she could purchase of him, for 50 cents, a larger bouquet than we furnished for \$1.50. Again, at Easter, this same party sold Easter lilies at 15 cents a bloom, and daffodils and carnations at 40 cents a dozen. This is done in our city, not by any foreign element, but an American who is trying in this way to hold the trade in his own hands, forgetting that in a growing city there is room for all who do business in a fair way. VICTORIOUS BALL TEAM AT BOSTON GARDENERS' AND FLORISTS' CLUB PICNIC.

GROUP AT THE PICNIC OF THE BOSTON GARDENERS' AND FLORISTS' CLUB, JULY 27.

CHRYSANTHEMUMS

Chrysanthemum Smith's Advance.

The flowers of this variety are pure white when fully expanded, showing a creamy center when semi-developed. This is the earliest large white variety known. Buds selected June 10 were cut July 25, 5½ inches in diameter with excellent stems and foliage and remarkable substance. The later buds for August and September flowering give promise of larger and finer blooms carried on stems three to 3½ feet long. This, like Golden Glow, will produce blooms at any season of the year, following an active period of growth. The lateral growths which follow the removal of early buds are not surmounted with terminal buds as is the case with Golden Glow, but push forward and produce another crown. This course is continued until the natural time for terminals to set in August or September.

Varieties or Late Planting.

It is rather late to write upon this subject as the planting is nearly at an end. Those who have space unoccupied may secure many blooms that can be used to advantage, by devoting space to such chrysanthemums. We have produced very satisfactory crops by planting as late as August 15. Blooms from stock planted after July 15 will not compare in size and finish with those planted in May or June, but those who have a constant demand for made-up work will realize well from such a venture. Any variety that will produce double flowers from late buds will be suitable. It matters little whether they are early, midseason or late kinds, as they must be late at best. Five to six inches apart each way is ample space and one bloom to each plant will be most satisfactory. Many of the late kinds when thus treated will extend the flowering season quite to Christmas.

We question the propriety of entering into such an undertaking on a large scale as it is doubtful if short stemmed and small flowers would bring returns equal to carnations or some other crops, but those who have a constant retail trade could use several thousand to good advantage.

ELMER D. SMITH.

Timely Suggestions.

The early planted stock being now well established in the soil and the roots pushing well up to the top of beds, it is time for a mulch to be put on the soil. Before putting on the mulch go over the bed and see that the surface is even and level; constant syringing and watering will wash some of the soil from the sides to the center of the bed; this should be scratched back. Loosen up the soil a little before the mulch goes on, being careful not to disturb the roots in doing it. The beds should be got into as even condition as possible as regards moisture, and if there are any dry spots these should be picked out and given a watering so that all parts of the bed are alike to receive the mulch.

The idea of the mulch is to give the young feeding roots extra nourishment and to protect them from the wind and hot sun, well rotted cow or

horse manure being the best material for the purpose. It must be in a medium dry condition to be able to handle it properly. If it is wet and sodden it will form a crust over the surface of bed, preventing the water from passing freely into the soil, also preventing the proper drying out of the soil. Another important point to look out for is not to put a very heavy mulch on at one time or a long jointed soft growth will follow. Half an inch or a little more is enough for any mulch. Directly after mulching, the suckers from the stools of the plants will quickly commence to cause trouble; these should be removed as soon as they can be handled properly, using a sharp knife to cut them out just below the soil, being careful not to damage the roots or main stem. Extra caution in watering directly after mulching must be exercised to keep the soil from becoming over wet.

Dense, heavy growth usually occurs following a mulching, thus preventing the drying out of the soil and foliage, and the time is close at hand for a let-up in late syringings so that the atmosphere is well dried up before nightfall. The hot weather being general throughout the country the routine of the work is about the same and the main thing about it just now is to syringe freely. The same can be said about the picking of the side shoots; look well to the tips of the plants to see that there are no thrips lurking there. Get a step ladder, if necessary, and get up high enough to syringe the top of the plants thoroughly every day. The late planted stock for late work will be now well established and growing rapidly. Do not let the weeds get too big before attending to them, also look out for the budding up and the side shoots.

C. W. JOHNSON.

Outdoor Chrysanthemums in the South.

The excessive rainfall the past six weeks has been unfavorable to the crop. Where a quick way of draining off the surplus water had not been provided many plants died and others were severely checked. Even where the drainage has been almost perfect the plants have made too quick a growth and are consequently drawn and spindly. About all that can be done at present is to remedy the defective drainage as far as possible and hand weed the plants. Work with the hoe is out of the question with the ground in such a soggy condition. Keep the plants regularly tied up to insure straight stems. Those plants grown to a single stem are making the first crown bud which should be pinched out and the strongest break taken. Curiously enough the second break is generally stronger than the leader, but whichever one is the strongest must be allowed to grow. Look over the plants at least twice a week and see that this work is carried out. The advance guard of the aphid is now on deck and the best time to control it is at the first appearance.

The presence of ants on the tops of the plants will positively prove that aphid or some other insect pest is around. Spray the plants lightly in the late afternoon and dust moderately with tobacco dust. If this is done regularly every week or 10 days the pest will be kept thoroughly in control. I would advise washing off the dust next morning with the hose before the sun gets too strong, otherwise the foliage is liable to get burned and discolored. As soon as the soil dries out and the plants show that healthy root action is again under way, a good mulch of cow manure may be spread on the beds. First, however, give a

CHRYSANTHEMUM SMITH'S ADVANCE.

top dressing of bone meal and give the beds a liberal sprinkling of lime. The lime makes the bone meal more quickly available for plant food, and beds treated in this way will require nothing more in the way of fertilizers.

WM. LEAR.

THE SWEET PEA.

Sweet Peas in Oregon.

If Oregon were not known as the favorite home of the rose, and Portland as the "Rose City," this state would be known as the sweet pea state, for this charming flower attains a perfection here that is believed to be equaled nowhere else. Oregon communities are going in this year to a great extent for sweet pea growing and are holding competitive shows where the prize flowers are exhibited. Portland's annual rose festival precludes the possibility of making any great fuss over any other flower here, but, despite that fact, suburban improvement associations have stimulated interest in sweet pea culture by holding exhibitions lately that have been very successful.

Such a show, held at Woodstock, a Portland suburb, recently, resulted in the formation of the Oregon Sweet Pea Association, which is to have a charter membership of 500. This will result, it is believed, in annual flower shows throughout the state and in a wider interest in sweet pea culture. The general display at the Woodstock show was said to be the best collection of sweet peas ever made in Oregon. There were 85 separate exhibits from amateur growers and one from a professional florist. A special juvenile exhibit was also made. A pleasant feature of the affair was that the entire exhibits were sent to the various hospitals of the city after the show was concluded.

It is planned to hold the next annual sweet pea show at some more centrally located point in this city, thereby arousing a greater interest in the culture of this beautiful flower. Under the auspices of the Woman's Club of Cottage Grove, the annual sweet pea show there has just been held. A beautiful display of choice sweet peas of all varieties was shown and many wild flowers were also entered by the children. One boy had 62 varieties entered and captured first prize in that department.

A big feature of the Cottage Grove show was a decorated parade, participated in by business houses of the place and individuals, the horses, teams and automobiles being elaborately decorated with sweet peas, after the fashion of the Portland rose festival parades. Boys and girls on foot and in drills and riding decorated horses and in gaily bedecked carts were very attractive. The climate of this state seems especially adapted to the best development of the sweet pea and each passing year sees a wider interest in its growth. There is hardly a home in Portland that has not a hedge of these beautiful flowers growing in the yard.

SWEET PEA SENATOR SPENCER.

Impressions of the Sweet Pea Show.

I am glad of the invitation to write under the above caption. The New York sweet pea show was carried through by the men who organized the National Sweet Pea Society, and I am in heartiest sympathy with them. The greatest credit is due to them, and all who were present felt like speaking in the kindest way of the display that was got together. The schedule of prizes was a remarkable one, and the secretary ruled that they should all be awarded to the best that was shown. It was a very hot spell, and some who would have exhibited could not for that reason. And those who did exhibit, said they could have made a better showing at an earlier date. On the whole it was what it pretended to be, a worthy representation of the sweet pea of today, and means that here in America this flower is to have its annual event.

But of course all will say: "Let it be judged by the highest standard of what the sweet pea of today really is at its best." Before King Edward died the sweet pea shows in England had excited his enthusiastic admiration. The reason they excite such interest there is that a large coterie of enthusiasts are doing original work in producing novelties and in carrying the finest varieties to their highest development. Flower shows cannot repeat their success by merely exhibiting again what

the public have already seen. The biggest chrysanthemum shows will go begging for public patronage if the same varieties and the same monstrous blooms have been shown before. The basis of popularity must be that a competition is on to produce something new or better. There must be a sensation of novelty, and a wonderment at the progress being made. In England they have for nearly a decade been having just this with the sweet pea. In their zeal they have been multiplying synonyms, and have been hungry to get awards of merit before they had got their novelties fixed; but it has made the show business lively. And it has been a work of genuine merit.

Was the New York show like this? No. It would be absurd to expect it. But you will allow me to put the standard where it is in England. We must keep the standard before us. If an exhibit could have been made of the seedling stock I have seen in California we could have had a show that would have rivalled the best that they have had in Great Britain. I felt like saying to their men who were opening up their boxes at New York, "You have done admirably." It was a brave thing to make an attempt to exhibit when almost a sirrocco of heat had conspired against them.

A good proportion of the vases were labeled as Spencers, but only a small

proportion of the blossoms registered the wavy character of the real Spencer type. A sweet pea expert would look in vain to find the size and quality that have been added to the flower since Mr. Eckford brought it to its grandiflora type. I am not going to turn this into a jeremiad. The purpose of this writing is simply to give an impression of the show. And at the present date I feel a good deal less disappointed than I did. Probably with a favorable season, and a right date for the show a display 100 per cent better can be made. It was very gratifying that in the New York neighborhood people like the Goulds and Seth Low, who can have fine places and give their gardeners every chance, contributed so much to the success of the show. I wish their example might be emulated by a large number. Not many amateurs can put a very strong effort in the Spencer problem just now. I think the seed and flower men both around New York and Boston feel that they are up against a duty to not let the Spencer sweet pea fail to show what it really is, here on the Atlantic coast.

I do not know of anyone in this part of the country who is doing original work on this flower. And that seems anomalous. I know of no legitimate reason why we are so far behind Great Britain in this particular. Evidently there are future chapters to be written on the sweet pea in America. I think this question comes back on the Cornell folks. Their locality is favorable for sweet peas. I felt sorry for Professor Craig and Mr. Beal, for they could contribute nothing to the quality of the exhibition, to show what the Spencer type is. They bravely brought what they had. If Cornell wants to promote floriculture now is an historic moment to take some initiative. I do not know of a flower of grander possibilities than the sweet pea. I wish some effectual hint might reach the right ones there to let this flower have sufficient appropriation of money to do justice to it at this critical time. With all my heart I say let us go on to another year.

W. T. HUTCHINS.

Trouble With Palms.

ED. AMERICAN FLORIST:

I enclose portion of a phoenix with a fungus growing on it. Can you tell me the cause of this growth and how to destroy it? I have two palms infested with it. Will it spread to others?

C. W.

This is the ordinary phoenix fungus, and while it is unsightly, it is not a very dangerous trouble. The fungus behaves somewhat like the rust fungus on carnations, in the fact that it germinates within the tissue of the leaf, ultimately breaks through the surface, and finally discharges its crop of minute spores on the leaf, some of these falling into the pores of the leaf and there germinating and proceeding as the parents did before them. The fungus is encouraged by keeping the plants too wet and cold during the winter, and spraying with solution of sulphide of potassium, one ounce to two gallons of water, will probably check it. Use the sulphide solution weekly for a time until the spread of the fungus is checked.

W. H. T.

THE GLADIOLUS.

Early and Late Flowering Gladioli.

It depends altogether on the season as to whether gladiolus bulbs bloom better in July or August. It very often happens that bulbs planted for August blooming will come into bloom in July and vice versa, but as a rule the following varieties are all inclined to bloom the earliest of any: America, Capt. C. B. Tanner, Morning Star, Marie Lemoine, Mme. Lemoine, Shakespeare and Brencleyensis. If these are planted about the first week in April they will quite likely bloom in July. For August blooming the following is a satisfactory and profitable list: Attraction, America, Augusta, Ceres, Brencleyensis, Mrs. Francis King, May, Mme. Moneret, Sulphur King, Wild Rose. Experience has led us to believe that it takes about 12 to 16 weeks for bulbs to produce a bloom, depending somewhat upon the variety and a great deal on weather conditions.

I. S. HENDRICKSON.

Gladiolus Jottings.

The formation of a gladiolus society that appears to be on a fair way to a successful career, the great interest taken in the flower by amateurs and professionals alike and its undoubted beauty, are all indications of a bril-

liant future for this gorgeous and beautiful plant and prompt a few jottings respecting it. We might have said a little about its history but all this was so well said in a recent issue of the AMERICAN FLORIST (June 11) by H. Youell of Syracuse, N. Y., that it leaves little for a newcomer to say. As an old cultivator and fancier of the gladiolus though, the writer would like to say that he was greatly interested in this excellent paper and hopes to see more from Mr. Youell's pen. Possibly a few lines on the method of cultivation and handling the flowers may be of interest to those starting in the culture of this popular and beautiful flower.

There is a great advantage in the culture of hybrid forms of any plant over that of original species or varieties. There is a strength of constitution and vigor about them that renders them able to take care of themselves under unsuitable or at least only partially suitable conditions of climate and soil that is not found in the species. This is as true of the gladiolus as of any other plant and as most of the fine kinds now grown for cut flowers are of hybrid origin it will be found that they will grow in practically any class of soil—or at least that almost any soil can be made suitable for them by the addition of lightening and aerating material to those that are too heavy and cooling or so-

SWEET PEA HELEN SCOTT.

ludifying material for light, loose soils. For several years we grew gladioli on a light sandy soil that was "hungry and thirsty all the time" to quote what an old gardener said about it. But the addition of clay, old lime rubbish and liberal amounts of cow manure so improved the staple of this soil that we were enabled to grow not only gladioli, which naturally like a light soil, but roses of the hybrid perpetual and tea sections that prefer a heavier one—and both to such perfection that the produce took high honors at exhibitions.

No matter what the class of soil then, growers need not fear failure if a few simple rules are kept in mind and it is judiciously treated. No one with any idea of the fitness of things would think of adding a lot of fresh manure to newly broken possibly rich soil for a plant that takes no more out of it than the gladiolus. On the other hand it will be useless to expect good flowers for a series of years from comparatively poor soils unless some at least of the fertilizing properties are returned to it annually. In fact, though evidence may be adduced of success by following the method, we do not advise the growing of any plant for many years in succession upon the same soil. There are places where the gladiolus must be planted in flower and herbaceous borders every year to help in the summer display but they will not fall in exactly the same place annually and, of course, suitable additions in the form of well decayed manure and composted soil are made each year for the other occupants of the border. Certainly we do not think it advisable for the grower of a number of bulbs for cut flower purposes to stick to the same quarters every year for soother or later the quality of the flowers will be poorer and he is more likely to propagate disease organisms that prey upon the plant than when an annual or less frequent change is made in the growing quarters.

And here it may be well to mention that very rank, succulent growth is not advisable and the corms or bulbs are probably no larger and certainly not so good for planting as those from solid more normal growths. The bulbs from the extra strong growth are also more likely to be attacked by disease. In dry seasons it is a great advantage to be able to irrigate freely as the water helps to put substance in the flowers and gives vigor to the plant generally. The best position is one well open to sun and air. In shaded places the growth is not so good while it is an easy matter to shade the flowers when they are opening and thus form a fine handsome spike with many flowers open at once. Mature bulbs must not be planted less than six inches apart or thereabout, and the rows should be at least one foot apart. Planting should be done at any time after the soil can be got into good condition after March 1. In heavy soil three inches is deep enough to plant the bulbs and a little sand and wood ashes, in the proportion of one to four is an excellent addition, throwing it around and beneath the bulbs when planting and covering with light loose soil first. In light soils the sand is not required but the wood ashes are useful, either dug into the

SWEET PEA E. J. DALE.

staple or placed around the bulbs.

Cultivation must not be given until the rows, clumps or whatever form the bulbs are planted in are easily seen. Otherwise the young shoots are very apt to be cut off and the flowering of that individual bulb is spoiled for the season. But when the young shoots can be distinctly seen frequent hoeing or cultivating is an advantage. Watering and feeding regularly are the most important cultural details after this until the flower spikes appear. If grown for exhibition shade must be given as soon as the earliest flowers on the bottom of the spikes begin to open. If they are to be cut for market shading is unnecessary, as the spikes are usually cut when the first flowers open and the other flowers open up in water. As a rule it is best to pinch out the end of the spike if growing for sale, but this must not be done with exhibition flowers, anything of this kind being termed—and rightly—mutilation and apt to lead to disqualification. No flowers cut in the heat of summer should be shipped until they have been in water in a cool place long enough to lose the heat that is in them when growing in the field or garden. If they have to be kept any length of time the ends of the spikes should be cut off an inch or so daily, making a diagonal or

slanting cut rather than straight across, as this exposes more of the stem to absorb the moisture. The water should also be renewed daily. With regard to the addition of chemicals and other things to the water we have never experimented sufficiently to form an opinion. By the above methods we have always been enabled to keep our flowers as long as we wished. Usually about four days from the time of cutting is needed to put the spikes in the best possible shape.

WITH THE GROWERS

Frank Oechslein, Chicago.

A recent visit to Frank Oechslein's fine plant growing establishment at 4911 Quincy street, Chicago, proved to the hilt what an expert plant grower Mr. Oechslein is. The thing that strikes the visitor most prominently is the marvelous way in which the whole of the benches in the greenhouses and the frames are always kept filled—yet never crowded—with fine growing stock. There never seems to be an inch of spare room anywhere yet every plant has as much as it wants to attain its full development. Perhaps just now the Boston ferns are the most attractive of all plants here. They are grown in

immense numbers and may be seen in all sizes from small ones just planted out on benches to thicken out a little and make good stock for potting later to immense specimens in large pots just ready for sale for decorative and similar work. Besides the Bostons there are numbers of Whitmani and other forms of *nephrolepis* and thousands of seedling ferns of the usual market kinds. *Pteris Wimsetti* and *Aspleniums* are largely grown, the stock numbering hundreds of thousands. *Asparagus plumosus* in small pots is also a leading feature.

Although, of course, not making any great show at this time of year cyclamens are one of Mr. Oechslin's specialties and it would be difficult to find a more promising lot of plants anywhere. The foliage is clean and good, stock sown in September being now in 4-inch pots and, apparently, about ready for a shift into the flowering size. Owing to the great heat and continued drought there has been considerable trouble in keeping the outdoor stock growing and many of the geraniums though looking healthy and clean are only now commencing to grow. But they will come rapidly now and as a big stock was planted out there is every prospect of a fine lot of cuttings. A fine batch of *Celosia pyramidalis* was noted, the plants strong and fine in color. These will be potted at once and they will make elegant stock for store decoration during a slack time for flowering plants.

In a span roofed house on the south side of the plant where they get every ray of sunshine possible are fine lots of *Pandanus Veitchii* and various crotons. There are large and small plants in plenty and all have the same fine color in the foliage and excellent health. The house suits them admirably and they are certainly finely grown. In the smaller dracenas we noted elegant little stock of *D. Sanderiana* and *D. Godseffiana*, just right for furnishing fern dishes and similar decorative work. In the larger growing species, *D. fragrans* and *D. Massangenana* were prominent and represented by many hundreds of choice specimens in the best possible condition. Another fine feat in culture is the magnificent batch of *Begonia Gloire de Lorraine*. The plants are in 4-inch pots just about ready for a

shift and are absolutely clean, no sign of spot or anything else to disfigure them. We have not the space to mention by any means all the fine stock to be seen here. There are fine lots of rambler roses, rubbers, palms and all classes of decorative stock and it is in the most interesting shape. We strongly advise any visitor to Chicago or any retailers or others interested in fine plant stock to pay Mr. Oechslin a visit. It will be well repaid.

London Letter.

Magnificent as were all the exhibits at the Holland House show the hardy flowers and roses were decidedly the most important. There were many novelties but none of sufficient merit to influence the judges sufficiently to gain awards or certificates. Many American varieties of roses were shown, White Killarney in Stuart Low & Co.'s exhibit being especially admired. Turner of Slough, Hobbies of Dereham and Frank Cant of Colchester all had fine exhibits of roses as had Harkness & Co., Hitchin, Paul & Son, Cheshunt, Jackman of Woking, the two Irish firms of Dickson and others. It was a great display. American carnations were effectively staged by many exhibitors while the Malmesbury varieties by Cutbush & Son show that this firm, so long prominent in carnations of this class, is keeping up its reputation. The veteran James Douglas of Edenside was also represented by a small but neat collection. The best varieties of American origin were shown by Stuart Low & Co., R. H. Bath, Bell of Guernsey, W. H. Page, A. F. Dutton, C. Engelman, H. Burnett and G. Lange. Chas. Blick is still working on his seedlings and showed a very promising lot as well as some fine varieties already in commerce.

Among the sweet pea exhibitors, Robt. Sydenham and Jarman & Co. were prominent, the latter showing their novelty, Mrs. Townsend. Miss Hemus was also there with her fine varieties staged in her own effective way, while the exhibits of Sutton & Sons, G. Stark & Son, King & Son, Breadmore of Winchester, Kelway & Son and other growers were all excellent. The hardy flowers were magnificent, the great bank put up by R. Wallace & Co. containing fine *eremuri*, *delphiniums*, *irises*, *lilies* and *tritomas*. A pool of water in this exhibit had its banks prettily planted with pink *spireas*, *bamboos* and *Iris Kaempferi*. There was such a number of other exhibitors that it is impossible to name them all but the splendid group of herbaceous subjects and water lilies by Cutbush was magnificent. Bees, Ltd., showed a

fine collection of primulas of their own raising, notably *P. Beesiana*, *P. Bulleyana* and *P. Littoniana*.

At Covent Garden trade is dull and prices low. Growers here do not seem to realize that unloading huge quantities of poor stock on an already weak market is poor policy. There is a lot of good stock in, but there is also such an amount of worthless material that the good flowers have to be sacrificed. Sweet peas are variable in quality, roses mostly bad. *Gladioli* are over plentiful and of very mixed quality. Carnations are plentiful and good as are Spanish irises.

The show of the National Rose Society was remarkably good, far better than could have been expected after the unpropitious weather of the previous weeks. The champion trophy for 72 blooms again goes to the Green Isle, Alex. Dickson & Sons winning somewhat easily. Victor Hugo, Killarney, Mrs. E. Mawley, Walter Speed and Ellen Drew were magnificent specimens. All the other prizes in this class were taken by growers from Colchester, D. Prior & Son, Ben and Frank Cant coming out in the order named. In the 40 triples Dicksons again won, the firsts for 48 and 24 singles going to the Oxford veterans, Geo. Prince and John Mattock respectively. The latter vigorous old campaigner won in the class for a group of cut blooms, which was very keenly contested. Brown's of Peterboro, and Geo. Mount & Son were equal seconds. All the other classes were well filled and the competition was keen. Sweet peas, hardy flowers and many sundries were shown by various exhibitors.

The tenth annual show of the National Sweet Pea Society proved of far better quality than could have been anticipated, the trade growers being in strong force. W. H. Unwin of Histon had a truly remarkable exhibit of novelties and tried varieties nicely colored, fresh and clean. Gold medals were awarded to E. W. King & Co., Sutton & Sons, C. W. Breadmore, R. Bolton and Dobbie & Co. Silver gilt medals went to W. E. Alsen, W. J. Unwin, Jones & Son and James Box. Jarman & Co., King & Sons, J. Stevenson, Robt. Sydenham, Kelway & Son, Miss Hemus, Stark & Son, W. Deal, L. Bide & Son, W. O. Cantley and G. & H. Clark were awarded silver medals. J. Agate was given a silver medal and first class certificate for Stirling Stent while awards of merit were given to Masterpiece Arthur Green and Mrs. Hugh Dickson, exhibited by Dobbie & Co., and to Cherry Ripe staged by Gilbert & Son. The Burpee cup was won for the third year in succession by Robt. Bolton and now becomes his property.

GROUP AT THE ST. LOUIS FLORISTS' CLUB PICNIC, JULY 21.

Society of American Florists.

AMENDMENTS TO CONSTITUTION.

Notice is hereby given to all members of the Society of American Florists that the following amendments have been received by the secretary and will be presented at the annual meeting to be held in Rochester on August 16-19, 1910.

Article V, Section 1, to be amended to read as follows: Section 1. Meetings.—The first annual meeting of the society shall be held at Buffalo, N. Y., on the first Tuesday of August, 1901. Subsequent meetings shall be held annually at such time and place as may be fixed by ballot at the morning session of the second day of each annual meeting and shall continue for at least three days. This provides for the selection, each year, of the time as well as the place of meeting.

Article IV, Section 2 to be amended by striking out the figures "25.00" and inserting in place thereof the figures "50.00," meaning to increase the life membership from \$25 to \$50.

Article II to be amended as follows: Section 2 (a). Strike out and substitute the following: "The president, vice-president and two directors shall be elected by ballot at the annual meeting of the society and their term of office shall begin with the first day of January next succeeding the election; and the terms of the president and vice-president shall continue for one year or until their successors are duly elected and qualified; and the directors shall serve for three years from the first day of January following the election.

Section 2 (b). Strike out the words "two directors to serve for a term of three years. He shall also appoint at the same time."

Section 2 (c). Insert the words "and directors" after the word "officers" and before the word "shall."

Section 2 (d). Add the words "and directorships" after the word "offices" in the fourth line.

Section 2 (g). Add the words "or directorships" after the word "offices" in the first line.

Section 3 (a). Strike out the words "two directors to serve for a term of three years" after the word "appoint" and before the words "one botanist."

Section 3 (e). Add the following: "and they shall also at their annual meeting in January appoint a secretary and treasurer of the society for the ensuing year, whose term of office shall commence at such time as shall be then designated and continue until their successors are appointed."

The above amendments to Article II were presented at the twenty-fifth annual meeting. In case these pass the following amendments will also be presented:

Article II, Section 3 (d). Add to the end of the same "He shall attend all meetings of the executive board and shall be paid mileage as is allowed members of the board."

Article III. Strike out the word "Secretary" (page 13, second line) and the word "Treasurer" (page 13, third line). Strike out the words "a regular" (page 13, fifth line) and insert in place thereof "an annual." Strike out the word "mid-Lent" (sixth and seventh lines) and insert in place thereof the words "January 15." Insert after the word "audited" and before the word "appropriations" the words "appointments of a secretary and treasurer shall be made." Strike out the word "seven" (page 14, ninth line) and insert in place thereof the word "six."

These amendments to Article III are merely changes made necessary by the above amendments to Articles II and III.

H. B. DORNER, Sec'y.

THE "SHOW ME" NINE OF ST. LOUIS.

Chicago to Rochester.

The Chicago Florists' Club has arranged with the Lake Shore & Michigan Southern railroad for transportation to the Rochester convention as follows:

A special train will be provided, same to be counterpart of the Twentieth Century Limited and to consist of combination baggage and buffet car, one of the famous Lake Shore diners, as many as 12 sections and drawing room sleeping cars (compartment cars if desired) as may be required to properly take care of the party and give everyone plenty of room, the train to be finished off with either an open section or compartment observation end sleeping car. The train will leave Chicago at 5:30 p. m. Monday, August 15, arriving in Rochester at 9 a. m. Tuesday, August 16.

The rate authorized for this occasion is one and three-fifths fare on the certificate plan, \$13.38 going (passengers to be sure and ask for certificates in purchasing their tickets, for on same will depend their being able to secure the reduced rate returning) and three-fifths of that or \$8.10 returning, making a total of \$21.48 for the round trip. The Pullman rates are as follows: Double lower berth or upper berth, \$3; section, \$6; compartment, \$8.50; drawing room, \$11.

Delegates from St. Louis, Indianapolis, Louisville, Cincinnati, Columbus, etc., can join together and arrange for special sleepers to be attached to this special train at Cleveland, thus bringing all together at that point for the remainder of the journey, Cleveland to Rochester. As to the Detroit people, it would be a very easy matter for them to join the special train at Toledo. The St. Louis people could come via Chicago and join this special train if they so desired, as the same rate would apply through Chicago as via the direct line.

G. K. Thompson, general agent passenger department, will accompany the party for the purpose of seeing that everything goes smoothly. For further information and reservation, address G. K. Thompson, 180 Clark street, corner Monroe (Telephone, Harrison 7600), or E. F. Winterson, 45 Wabash avenue (Telephone, Central 6004).

OBITUARY.

Henry J. Bowden.

Henry James Bowden, of Meigs street, Rochester, N. Y., died July 23. Mr. Bowden was born in Bedford, England, in 1848, his father, James Bowden, being an instructor in Modern school, where his brother now teaches, and came to this country to visit friends in 1871. After a short stay here he decided to remain, and entered into the nursery business with Chase Bros., with whom he remained 10 years before deciding to start a business of his own. He secured as a partner D. H. Patty, of Geneva, and the two men conducted a nursery business up to the present time. In 1873 Mr. Bowden married Elizabeth Jackson, of Auburn, and bought a home in Meigs street, where he lived for 37 years. His business associates knew him as a man whose fair dealing was not to be questioned and a person whose judgment was always to be relied upon. His success in business can be traced to his unswerving honesty and industry.

Miss Westman.

Miss Westman of the firm of Westman & Getz, Cleveland, O., died August 1. Miss Westman was at the store on Sunday morning, for the last time, and then only long enough to order some things for an early Monday morning job, as this firm never opened its store on Sunday. Her death was sudden and unexpected as she was feeling fine up to a very short time before she died. Miss Getz is in the east on her vacation, and was finally located and notified of the death of her friend and partner. C. B.

George H. Shepherd.

George H. Shepherd, Lamonte, Mo., widely known throughout the state as an authority on agriculture and horticulture, died July 20 at his home near here. He had been engaged in the nursery business here for 50 years. During the civil war he fought as a Union soldier.

The Late Jean Soupert.

In the death of Jean Soupert, noted in THE FLORIST last week, the rose world lost one of its leading lights, a man of sterling qualities, always kind and considerate and ever ready to advise those seeking such from him. His life work among roses has given us many excellent varieties to commemorate his name and has built up a worldwide reputation for the firm of which he was the head. Now that he has passed away, the rose lovers have not only lost one of their most gifted leaders, but one whose place it will be difficult to fill. His personality and valuable work will long be cherished by his many friends, especially those who have ever had the pleasure of a personal acquaintance. It is now over 44 years since I had the pleasure of meeting him, yet I have a very pleasant recollection of the hours we spent together at one of the international rose shows in London. Correspondence of later years has always been of the most pleasant nature and always enthusiastic over the queen of flowers.

JOHN N. MAY.

THE twenty-first annual banquet of gardeners, florists and nurserymen, provided for in the will of Henry Shaw, founder of the Missouri Botanical Gardens, will be given at the Southern hotel, St. Louis, August 11, at 7 p. m.

American Carnation Society.

DIRECTORS' MEETING.

There will be a meeting of our board of directors, held at Rochester, N. Y., August 19, 1910. The time is set for 9:30 a. m. Much important business is to come before this meeting, and it is hoped that a good attendance will be present. Any members of the A. C. S. who are attending the convention, will be welcome at this meeting, and are urged to be present promptly.

F. BURKE, Pres't.
A. F. J. BAUR, Sec'y.

Society of American Florists.

TO THE MEMBERS:—

It has been thought desirable by many members that the annual meeting of the S. A. F. should be held during some spring month instead of as at present, during August. There have been numerous arguments presented in favor of the spring meeting among which are:

"The meeting will come at a season when stock in greenhouses is at its best and many profitable excursions may be made to the establishments at the place of meeting. Most stock is in poor condition for inspection during August.

"The meeting will come during a season when it will be more pleasant to transact business.

"The growers and exhibitors will be able to present more varied and better stock for your inspection.

"The change in planting season from September and October to July and August would make it more convenient to attend a spring meeting when things are moving smoothly."

In order to get some consensus of opinion as to the desirability of a spring meeting, so that it may be presented to the society, the executive board request that you give the matter your attention and fill out the enclosed card (card enclosed) and return it to the secretary. Kindly give this your immediate attention so that data may be secured before the meeting. Do it now, it is important. Answer "YES" or "NO."

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the roses, Dark Pink Killarney and Lady Cromwell, by A. N. Pierson, Inc., Cromwell, Conn., and the rose, Purity, by Hoopes Bro. & Thomas Co., of West Chester, Pa., become complete.

H. B. DORNER Sec'y.

July 28, 1910.

THE CONVENTION.

The twenty-sixth annual convention promises to be the best meeting ever held by the Society of American Florists. Preparations for the meeting and exhibition are rapidly nearing completion. C. H. Vick, superintendent of the exhibition, reports that most of the exhibition space has been taken and that the large hall with over an acre of

floor space will be filled. The modification of the rules applying to the signs will do much to make the exhibition beautiful as well as instructive and profitable. The public will be admitted each evening and on Thursday afternoon. An admission fee will be charged.

The sports committee reports that arrangements for the bowling and shooting tournaments on Thursday afternoon are also nearing completion. In this connection attention should be called to the rule that only members in good standing will be allowed to participate.

Friday is in the hands of the Rochester Florists' Club and a general good time is promised. To those who have been at Rochester before nothing need be said about the royal welcome awaiting them. All others should come and see for themselves. Bring your certificates and pins and they will be the open sesame for everything at the convention.

HOTELS AND RATES.

The following rates have been furnished to the secretary by the hotels listed below:

Seneca hotel (Headquarters) European.—Single rooms, \$1.50; single rooms with shower, \$2; single rooms with bath, \$2.50; double rooms with bath, \$4.

Powers hotel, European.—Single room with or without shower, \$1.50 to \$3; single room with tub baths, \$2 to \$4. Two or more in room at reduced rates.

From the American Florist, July 16, 1910

A word is in order here as to the way the cut flowers are handled which probably accounts for the excellent manner in which the stock arrives at the store. The flowers are cut twice daily and are placed in the cooling rooms for about four hours, just long enough for them to lose the greenhouse heat. They are then packed expeditiously and shipped by express to the store where they arrive in the very best possible condition. Here John Poehlmann takes hold, and any long distance shipments that have to be made are packed at once and leave by the quickest route, insuring their arrival in good shape even in the hottest weather. The wonderful growth of this business is a great tribute to the skill and energy of the Poehlmann brothers, one and all, and shows what great things can be done when the facilities for doing business are there and plenty of the right kind of help to keep things moving.

TRADE ERRATIC.

"There is no knowing how business will be from day to day," was the way one of the prominent wholesalers sized up the situation at the latter part of last week. There are days that would be fairly good ones even in a busy season and stock of all kinds cleans up well, while possibly the next day stock will lay on hand. There is a disposition, both among growers and commission men, to clear out if anything like a fair offer is made for stock, and we think they are quite right. Roses and other flowers that look fairly well on the day they are cut, fly open and look very ragged if they have to be kept until the next day or the day after, and it is more satisfactory in every way to get rid of the flowers day by day than to keep them hanging around with the idea of getting a little more for them, only to be obliged to sacrifice them at the last or throw them away. In winter, when there is plenty of substance in the flowers and the weather is cool, a couple of days makes little difference in the quality of the best grades of stock, but now the weather is all against the stock in the greenhouses, making the flowers thin and with few petals and they do not last many hours. Shipping trade keeps up remarkably well and there have been several funerals of prominent people during the week that have caused quite an exceptional demand locally.

As to the quality of the roses and carnations this is at least as good as could have been expected when the great heat is taken into consideration. Killarney has been more plentiful again this week, while White Killarney, although plentiful, has shown too much color to be really satisfactory. We noted quite a few Brides from young stock, but the flowers are not so good as the growth would indicate, the great heat having rushed the flowers out too

rapidly. Beauties have been on the scarce side several days, while other days they have been plentiful. The young plants still produce finer flowers than old stock. Carnations are all out of character and but the shadow of what they are in their proper season, yet they sell up fairly clean and, owing to the scarcity of good asters, retailers are glad to get them. There are some good asters and their quality generally has improved this week. Hardy plants, such as coreopsis, gailardias, candytuft and others are in, but do not cause much enthusiasm. Orchids are still scarce. Easter lilies, Rubrums and Auratums are at least equal to the demand, as is valley. Gladioli are very plentiful and of varying quality, the amount of poor stock in the market having, unfortunately, the effect of lowering the price of the really good stock, of which quite a little is seen. Green goods are plentiful, common ferns improving right along, while there is enough of adiantum and the different varieties of asparagus to meet all demands.

NOTES.

One of the leaders at Poehlmann Bros. this week was a fine showing of indoor grown asters. The colors are rich and varied, the flowers good and altogether they formed a striking contrast to the stock that is shown at most places around the market. The Beauties still come remarkably fine here, indeed, all the roses are extra good for the season and there are plenty of them. We think we are quite safe in saying that there are no better carnations coming to this market now than those this firm is shipping from the greenhouses and they show the skill of the growers in being able to hold such quality through this tropical weather. Chrysanthemum Golden Glow is also a special line here.

The Fleischman Floral Co. is nothing if not progressive and another of the fine automobiles, built exactly the

same as the first, is now being used while others are under consideration. A new ice-box to cost \$1,500 is to be installed at once, the work of the Brunswick-Balke-Collender Co. of Wabash avenue. This will be 20 feet long and will be used for orchids, violets, valley and other corsage flowers entirely, the present box being retained for the ordinary rose, carnation and other stock. Funeral orders have been very heavy here of late.

The Geo. Wittbold Co. has extra fine stocks of Boston ferns just now and all the plant stock is in fine shape. Kentias and other palms are here in various sizes and there are big stocks of decorative subjects of all kinds. A new 1-ton automobile truck for delivery has been put on the road and Louis Wittbold is considering the installation of others. This firm is going more largely into orchids, big stocks of cattleyas, phalænopsis, dendrobiums and others being seen in the Buckingham place greenhouses.

John Zech of Zech & Mann has been getting a siege of rheumatism, but is sticking to work. Trade keeps up very well here and we noted exceptionally good stock of roses, lilies and gladioli. John is a hustler and his prompt personal attention to orders and the good stock handled have their reward in plentiful orders. Fred Ottenbacher of the staff here is on his vacation.

Hoerber Bros. are now receiving more stock from their Desplaines greenhouses, especially some fine Killarney roses. The new houses are nearly finished and plenty of water has been struck in the artesian well.

Robt. Northam of the Geo. Reinberg force has returned from his Michigan trip looking well. He says the fruit crops are very poor in the sections he visited.

John Staritt says that at least 1,500 guests are expected at the La Salle hotel next week and he is looking forward to a busy time.

Peter Reinberg, 35 Randolph St., CHICAGO.

Fred Sperry of Vaughan & Sperry is still away on his vacation, L. A. Vaughan being back at the seat of war. Orders are coming in freely and we noted some of the best outdoor asters we have yet seen at this store. Beauties and other roses, gladioli and lilies are other specialties here.

John Canger, of Canger & Gormley, is away in Colorado on his vacation, having started on Monday. He intends taking in all the principal western points before returning. The Kohl-saat wedding decorations recently carried out by this firm were a great success.

Peter Reinberg returned from his western trip on Friday looking as if it had done him good. Great quantities of stock continue to arrive here, the roses being exceptionally good for the season. John Loser of this firm's staff is away on a two weeks' vacation.

J. F. Risch is back from his vacation, which he spent in fishing, boating and other ways of resting up. He says he feels much better for the rest and he certainly looks fine.

A purple gladiolus, called Amethyst, is being handled exclusively by the J. B. Deamud Co. It is a pleasing

shade of purple and likely to become very popular.

Leopold Koropp, 4509 Evanston avenue, has been very busy with funeral work. On July 17, a number of designs were delivered to 965 Gault avenue, where the funeral of Miss Sedwick took place. Miss Sedwick was engaged to be married, and drowned while bathing a few days before the wedding was to take place. The flowers that were intended for the wedding were instead sent to the funeral, among which was a shower bouquet of lily of valley that was ordered by the intended husband. A casket piece of smilax, lily of valley and white sweet peas was delivered to the Middleton residence where the funeral of their 17-year-old son was held last week. This young man also drowned while bathing.

At the adjourned meeting of the Horticultural Society August 2, C. L. Hutchinson was elected president, taking the place of the late Wm. E. Kelley. The First Regiment Armory, Michigan avenue and Sixteenth street, has been favorably reported upon for the flower show next November, the Coliseum being taken for another event, and it is probable that the former building will be engaged. The armory is somewhat smaller than the Coliseum but in location and other respects it is a very desirable place for a flower show.

S. Dysinger, of Holm & Olson, St. Paul, Minn., was a visitor this week enroute to his old home at Lockport, N. Y., where he will spend a brief vacation and go on to the Rochester convention. Mr. Holm, of this firm, will also attend the convention and Mr. Olson will be in this city next week for the Knights Templar convclave.

The next regular meeting of the Florists' Club will be held at the Union Restaurant, Thursday, August 4, at 8 p. m. This will be the most important meeting held for a long time and every member should make a strenuous effort to attend as it means much to him either as employer or employee.

Bassett & Washburn continue to receive fine American Beauties and all the other summer roses are good, also lilies which are arriving in plenty. Mr. Washburn is very well pleased with the condition of business and says they clean up well daily.

Geo. Fisher, buyer for the H. A. Fisher Co., Kalamazoo and Battle Creek, Mich., and Rocklin & Lehman of Sioux City, Ia., has gone to Kalamazoo, his place being taken by his brother, Hermann.

At E. H. Hunt's stock is cleaning up regularly and the quality is very good for the season. We noted some fine lupins here in various colors which make a pleasing variety in the outdoor stock.

John Mangel has been extremely busy with funeral and other work, and it is a fairly good sign of the times when a retailer is looking for additional help in August which Mr. Mangel is doing.

Joe Craig started July 28 for an extended western trip accompanied by his

son and daughter. Vancouver, B. C., is the first coast point from which the party will go to many others.

Ed. Bertermann of Indianapolis, Ind., has been in town this week attending and superintending the wedding of his niece, Miss Bessie Atkinson, which took place on Tuesday.

At Kyle & Foerster's we noted some very distinct and good gladioli of the Lemoinei type (yellow ground), also extra fine Mrs. Francis King, America and others.

Business keeps up well at Wiator Bros. Nic Wiator, John Sinner and other friends are going to Wisconsin for a fishing trip, starting on Monday.

A. Miller, formerly with the W. W. Barnard Co., is now with S. S. Skidelsky of Philadelphia.

E. H. R. Green, son of Hetty Green, will reside in this city hereafter, according to report.

Visitors: Henry Gaethje, Rock Island; W. D. Wirt, Parsons, Kans.; Frank E. Rue, Peoria.

Pittsburg.

Business has picked up a little since last writing. Good stock is very scarce. Asters are coming in very plentifully but are of poor quality. If rain is delayed much longer, outdoor stock of all kinds will be a total loss. Quantities of fine lilies are seen.

At Randolph & McClement's stores, East End, we find novel window decorations. The Baum street store has a circular lily pond with spraying fountain in center, the outer edge forming an automobile speedway, lighted up with miniature electric lights. Eddie Weaver is responsible.

At the Penn avenue store the center of attraction is a self-feeding art glass fountain, the standard being lighted, reflecting the beauty of the glass, the center revolving while the water plays over it. The fountain is set in the center of a small lake of water lilies.

Norval Kiger and wife of Marietta, O., were visitors in town last week. They report business much better than last year at this time. Other visitors were M. Dilloff, of Schloss Bros., New York; S. Wertheimer, New York; W. A. Cogill, Salem, O.; John Weiner, Verona.

A. M. Murdoch, who has conducted a floral store on Fifth avenue for the past 15 years, has announced he has rented his building and is going to retire. Mr. Murdoch has been in the flower business in this city 36 years.

Chas. Erhardt, North Side, reports business a little slow in the market house.

Miss McKinley, of Randolph & McClement's, is spending her vacation in Ohio.

Edward Neigle, of the McCallum Co., is spending a couple of weeks at Mercer.

John Baldinger is said to be very ill.

Southern Illinois and Rochester.

The following letter has been sent out by F. J. Ammann, president for Illinois, south, of the Illinois State Florists' Association to members and others in northern Illinois:

EDWARDSVILLE, ILL., Aug. 1, '10.

As vice president for Illinois, south, I beg to invite you to join us on the delightful trip to the S. A. F. convention at Rochester, August 16 to 19. The official route will be the Big Four, leaving St. Louis, Union station, on the celebrated Knickerbocker special at 1 p. m., Monday, August 15. The special Pullman provided for the party will be fully equipped and arrive in Rochester at 9:20 Tuesday morning. The fare for the round trip from St. Louis to Rochester and return, including thirty (30) day stop-over when and where desired is \$23.16 aside from sleeper reservation, which is \$4 each way. For further information write or phone. J. F. AMMANN.

Detroit.

The regular meeting of the Florists' Club held on Monday evening, August 1 was fairly well attended though the night was stormy. The event of the meeting was the annual election of officers and resulted as follows:

George Browne, president.

Herman Knope, vice-president.

Hugo Schroeter, secretary.

Peter Rohaley, treasurer.

Vice-President-elect Herman Knope extended an invitation to the club, which was accepted, to hold the next meeting on the lawn adjoining his residence on Mock avenue. The date of this meeting is changed to Monday evening, August 29. Besides the installation of the new officers there will be many special features of interest at this meeting. State Vice-President M. Bloy of the S. A. F., urged the members to attend the annual convention at Rochester, N. Y. It was ascertained that quite a party will leave from here, and members from other parts are cordially invited to join the Detroit delegation, which will leave here Monday evening, August 15 at 5 o'clock on the boat Western States arriving at Buffalo at 9 o'clock next morning connecting with the N. Y. C. R. R. train leaving there at 10 o'clock arriving at Rochester 11:30. The fare one way including berth on boat is \$6.73. No advantage is given by purchasing return ticket. M. Bloy will secure berths on boat for all who elect to go by this route. His address is 880 Van Dyke avenue.

The club will hold its annual summer outing at Bois Blanc Island Friday, August 5. Boat leaves foot of Bates street at 8:45 a. m. The entertainment committee, J. K. Stock, chairman, is making efforts to provide an interesting and variable programme of events for the day including a ball game that will be most spirited. Many prizes are offered and a full attendance of club members is expected with their friends.

The Illinois State Fair.

Quite a number of excellent prizes for floricultural exhibits are again offered at the Illinois State Fair which will be held at Springfield, September 30 to October 8. Robt. O. Dwyer, Monroe and Desplaines streets, Chicago, is the superintendent of this section and will give all necessary particulars. In the open classes for professionals and amateurs \$240 are offered for premiums for a collection of stove and greenhouse plants to cover a space of 200 square feet and there are many prizes, proportionately good, for palms, cycads, araucarias, crotons, ferns and other decorative stock. The first prize for 50 American Beauty roses is \$40 while there are others ranging from \$35 to \$12 for other popular varieties. Dahlias, gladioli, hardy perennials, asters and miscellaneous flowers are well provided for and there are about a dozen good classes for carnations. The retail trade will be interested in the excellent prizes offered on Tuesday, October 4, for standing wreaths, wreath on easel, floral arrangements and dinner table decorations, all of which are well worth competing for and should bring out a strong competition. Then there are numerous classes for baskets of popular flowers such as roses and chrysanthemums, bouquets of various kinds and

STOCK SCARCE.

The past week flowers have been very scarce. On Sunday morning there was a demand and but little to fill it with. Carnations coming from the field are very small and those from inside are about done; nearly everybody has thrown them out. A few tuberose have appeared. Asters are improving. Roses are small. Some finely colored Killarneys are in but they open up quickly. White Killarney is bought up and used in funeral work. Some good Asparagus plumosus and A. Sprengerii are in and clean out well. American Beauty roses seem to be somewhat scarce, but the new summer crops are coming and these will be in most likely with enough to go around.

NOTES.

The W. C. Smith Wholesale Floral Co., has leased the entire building at 1316 Pine street, and after the removal of the other tenants, will start to pull down and entirely remodel the building. The ground floor will be occupied by the cut flower department, the second floor with florists' supplies and third floor with the wire department. When completed the store will be one of the best furnished in the city. This firm handles a very large portion of the flowers consigned by the Kirkwood contingent. Will Osseck and Will Smith comprise the firm. Courteous treatment and strict attention to business have put these boys where they now are.

Oscar C. Kuehn, official photographer and manager of the W. C. Smith Wholesale Floral Co.'s wire department, left Saturday for Detroit to visit his grandparents. He will go to Chicago and thence to Milwaukee, returning in 10 days. Frank Windler has gone to Arcadia where he will spend his vacation. Frank is head salesman here.

Geo. Madsen of Alton, Ill., was in the city this week buying supplies. He is building four new houses for roses, carnations and bedding stock.

H. G. Berning and wife, and Will Osseck will attend the Rochester convention.

demands that the Bentzen team show that they can first beat somebody.

The Kirkwood boys are coming in with gladioli and a few carnations. The greater portion, however, are resting some, taking care of their violet plants. Kirkwood is the violet belt, the winter supply coming almost entirely from this locality.

Fred Alves has been making frequent visits to Young & Sons Co.'s greenhouses lately. There surely must be something that attracts. Fred Young & Sons' matrimonial bureau is still open, a branch at the greenhouses.

Charlie Young, son of Jim Young, will take a vacation. He expects to go to the lakes. Charlie has worked steady and needs a rest. His wife and young son will accompany him.

Mrs. Ayres reports trade as very good for this time of year. She has built up a splendid trade and her motto has been quality at all times.

Will Dee, manager of the plant department of Young & Sons Co.'s retail store will go on his vacation next week.

TRADE SLOW.

The great heat and drought from which this city and vicinity have suffered for some weeks was, in a measure, broken on July 30. There was a heavy shower in the morning, but before noon the clouds broke away and humidity ran high. Late in the afternoon there was a sharp thunderstorm with heavy rain for about a quarter of an hour; after this passed, the air grew cooler, better conditions prevailing throughout the night and July 31. Throughout the week the cut flower trade was about as slow as it could be without coming to a complete standstill. Funeral work was about all that kept anything moving. The one desire of the great majority of the people was to try for relief from the heat. Practically all who could get away left the city, seeking seaside or mountain breezes, and this included a number of men in the trade. Much of what stock arrives is of indifferent quality, but there are some very fair roses and lilies. The rain will certainly improve the quality of asters and other outdoor stock.

FLORISTS' CLUB MEETING.

The monthly meeting of the Florists' Club held August 2 was fairly well attended. George C. Watson acted as secretary in the absence of David Rust, who had the misfortune to sprain his ankle. Convention matters came up for discussion and it was decided to go via the Lehigh Valley railroad, leaving the Reading terminal at 10:30 a. m., Monday, August 15. The round trip fare is \$13.65. Those intending to go should notify John Westcott at once and get the benefit of the private car without extra charge. Robert Kifts' address on "The Mission of the Trade Paper" was well received and he was given the thanks of the club. The subject for the next meeting will be

reports of the convention from those who were there.

NOTES.

At the W. K. Harris range there may now be seen a great display of fine plants. Noteworthy are several houses filled with Scottii ferns, a number being very large specimens. Another feature is large gardenia plants in 12-inch pots; crotons, Pandanus Veitchii and a good general line of foliage plants and hardy roses may also be enumerated.

New York.

TRADE FALLING OFF.

Market conditions for the past week were not quite as good as those of the previous one. The long drought is now becoming a serious menace in this section, all outdoor stock is suffering severely and if we do not get rain pretty soon there will be little stock left to ship to the city. Roses are coming in lighter every day and in very poor condition, and although scarcer than last week, are not bringing as much money, there being no demand for them. A few carnations are coming in, but so poor they are hardly worth mentioning. Asters can be had at buyers' prices and are very poor, while gladioli are bringing from 50 cents to \$2 per 100. A few chrysanthemums have been noticed already but are quite small yet. American Beauties, like other roses, are arriving in smaller quantities every day, while prices are not as high as the previous week. Orchids remain about the same, bringing from 35 to 65 cents each and in rare cases for exceptionally good ones 75 cents. The intense heat and long drought seems to have caused a general stagnation in the market particularly the last few days which is even worse than is to be expected at this season of the year.

NOTES.

Frank H. Traendly, chairman of the transportation committee of the Florists' Club, reports that the number of applicants for the special train to the Rochester convention by far exceeds that of any previous year. Quite a number of these have never, to his knowledge, attended an S. A. F. convention before. The trip promises to be a delightful one over the picturesque Lehigh Valley R. R. with a stop of about one hour at Glen Summit Springs, where as guests of the transportation committee a full course dinner will be served at the hotel. Advise Mr. Traendly, 131 West Twenty-eighth street, as soon as possible if you intend going so that provisions can be made for your comfort. Everybody who can possibly get away should take advantage of this splendid trip. A good time is promised.

The tranquility of Twenty-eighth street was again disturbed on Monday by a rather serious accident. A large scaffold in front of 45 West Twenty-eighth street which has been leased by the Russin & Hanfling Co., florists' supplies, and is undergoing extensive alterations gave way, falling over in the street and burying a horse and wagon and two men under it. Both men were badly bruised but the horse was uninjured.

A. Moltz & Co., Coogan building, are enlarging their place to accommodate their ever increasing business. This firm is strictly a jobber and does not receive any consignments from the growers, buying all stock and selling strictly to the retail florist trade. They are to be congratulated on their enterprise. Mr. Moltz having been in the florist business for the past 25 years.

Phil. Kessler and party of friends, namely John Donaldson, Wm. H. Siebrecht, Sr., Phil. Einsmann, John Mieser and H. Siebrecht will leave the Coogan building Saturday, August 13, at 9 a. m. for the convention, going all the way from this city to Rochester by automobile and expecting to arrive there Monday afternoon.

Andrew Wilson of Summit, N. J., whose domestic troubles have been exploited so much in the daily press, has sold his flower store in Summit, N. J., and will go on the road promoting the new Wilson, Hoyt & Co. patented concrete bench; he has the sympathy of the trade in his trouble.

The Smart Set Floral Co. reports an unusually busy week, having had over \$500 worth of work for one funeral.

This firm has secured the contract for planting the window boxes of the entire building and also palms, etc., for the interior of the Hotel Madrid.

Ralph Aims with Hoffman of Boston is making the best of his month's vacation, having spent one week at Atlantic City, N. J., and another at Philadelphia with relatives, and is winding up with a two weeks' stay in this city amongst old friends.

P. R. Quinlan, Syracuse, is spending a few days in this city, leaving Thursday night on an extended tour through the south and southwest as far as Oklahoma, and expects to be back in time for the convention at Rochester.

S. Lum, the rose grower of Chatham, N. J., was in this city Wednesday and states that he is going out of the growing business shortly to embark in a new enterprise in Virginia.

A. Beauplan, proprietor of the Forster & Mansfield Co., will entertain a party of friends for a week on Long Island Sound in his 35-foot auxiliary sloop yacht Chanticleer.

A. Moltz.

M. C. Ford has now completed the interior fittings of his new store, which if not the largest is certainly one of the most elaborately fitted up stores in the wholesale section.

Chas. Haberman, wife and family, 2668 Broadway, are spending the summer camping at Hick's beach, Clason Point.

Henshaw & Fenrich and party of friends will visit the convention, going from this city to Rochester in an auto.

Phil. Kessler is back after a combined business and pleasure tour through Massachusetts and Maine.

D. Lales, 2556 Broadway, is spending the summer in Greece, and will be back about September 1.

Moore, Hentz & Nash are receiving a number of cattleyas from Theo. Moore, Chatham, N. J.

P. Smith, John Raynor's successor, reports receiving as high as 9,000 lilies a day.

The following are the Long Island Florists' Club bowling scores July 26:

						Av'ge.
Donaldson	199	145	161	168	203	177
H. Siebrecht	122	181	155	138	161	151
Kessler	164	176	140	102	153	147
Wm. Siebrecht	113	146	148	141	122	132
Einsmann	135	141	128	154	136	138

DAYTON, O.—The Miami Floral Co. has increased its capital stock from \$50,000 to \$75,000.

Buffalo.

FUNERAL WORK PLENTIFUL.

The weather the past week was variable, the extremely warm weather cooled by a good rain, and now it is much cooler. Stock remains about the same as to quality and supply. Sweet peas are a little longer owing to the rain. Trade is as good as can be expected for now. Funeral work was quite good last week.

The event of the season was the annual outing of the Florists' Club, which took place at Fort Erie Grove, a delightful spot on the Canadian shore, which has been entirely changed the past year with improvements constantly being made. All sports were in the mammoth stadium which is as large as the one at the Pan-American.

Boy's race, 100 yards.—Jimmie Zimmerman, first; J. Sautner, second; J. Voll, third; Elmer Neber, fourth.

Young men's race, 100 yards.—R. Kinkel, first; Roeder Kinkel, second; T. Tobin, third; R. Klokow, fourth.

Quarter-mile walk.—Revere Kinkel, first; Arthur Hey, second; Russell Mark, third; E. Stuntz, fourth.

Ladies' race.—Miss Jensen, first; Mrs. Smith, second; Miss Berner, third.

Tug-of-war, Store vs. Greenhouse.—Won by the storemen after a hard pull.

Children's race, under 12 years.—Vertie Slattery, first; Bertha Slattery, second; Henry Longley, third; Lydia Forbach, fourth.

Men's race, those 40 years or thereabouts.—S. A. Anderson, first; E. Hock, second; E. Slattery, third.

Potato race.—E. Walter, first; R. Kinkel, No. 2, second; R. Kinkel, No. 1, third; E. Stuntz, fourth.

Three-legged race.—Grever and Walter, first; Kinkel brothers, second.

Hop, skip and jump.—D. J. Scott, 36 feet, two inches, first; R. E. Kinkel, 35 feet, six inches, second; W. Grever, 34 feet, nine inches, third.

A five-inning ball game was played between the Growers and Retailers, Retailers captained by E. Slattery, Growers captained by D. J. Scott. Batteries: Retailers, Kramer, pitcher; Kinkel, catcher; Growers, O. Scott, pitcher; Gittere, catcher. Growers winners, 8 to 1.

The judges in all events were L. H. Neubeck, W. A. Adams and H. Erchert. Chas. Reichert was official starter. The attendance was the largest in many years, about 115 sitting down to the dinner. The ladies were very conspicuous, showing that they like the outings as well as the men.

The merry-go-round did a good business, such children as Slattery, Adams, Sangster, President Streit ("and, oh, the ladies") were riding on the prancing steeds.

Slattery, Grever, Kinkel brothers, Walter, Stuntz and Tobin compose the Palmer athletic club, and they are some club.

The umpiring of L. H. Neubeck was very satisfactory, Louie having studied the latest rules for the past month.

There were just two Streits at the picnic, the President and Mrs. Streit. The little Streits were absent.

Chas. T. Guenther was there from Hamburg, while some that lived much nearer were absent.

The Cold Spring contingent was never larger, all the Scotts and many others were there.

It was good to have Rob Scott with us again after his long illness.

The Slattery family are athletes from father to the baby.

S. A. Anderson was easily the champion runner.

Grever is a good man with a megaphone.

Chas. Schoenhut, William street, was a busy man last week. He was chairman of the committee for the outing of the East Side Business Men's association of which he is president.

The Florists' bowling club will meet this (Monday) evening and perfect arrangements for Rochester.

Stock at L. H. Neubeck's new place in Williamsville is in good shape.

Mr. Breitmeyer, Jr., of Detroit, was a caller last week.

STOCK MORE PLENTIFUL.

The agreeable change in the weather conditions has made a great change for the better in all the stock now coming to the market. After one of the hottest Sundays ever experienced in New England, Monday brought forth a terrific thunder shower that extended all over this section and this has been followed by smaller showers throughout the week. The result has been that the supply is much more than the demand, and while last week saw all stock cleaned up early in the day, this week all lines have been slow and some, especially carnations, are a drug on the market, while prices have taken a drop. Roses are selling at about the same as last week. Carnations have improved in quality, but are cheaper. Sweet peas are still poor and find a very slow market. A trip around the stores and inquiries as to business, are immediately answered by, "Quiet, quiet." And in the Back Bay district general stagnation is the condition with a busy day once in a while and then a relapse. At Hoffman's, however, they report a very busy week. Down town things are a little livelier and some of the stores report more summer business than usual.

NOTES.

"A jolly good time" is the word passed around by those who attended the annual picnic of the Gardeners' and Florists' Club, which was held on Wednesday at Pine Banks Park, and certainly for those who attended, it was their own fault if they did not have a good time, for everything combined to bring about that result. The committee was very fortunate in selecting this beautiful place, so easy of access, with its fine grove to spread the lunch and the large open field for the games. The weather was all that could be expected, one of the brightest pleasantest days of summer. The attendance was a record breaker, over 500, counting the children—and there were lots of them. Thos. Pegler, J. P. A. Guérineau, H. E. Fiske and William E. Fischer, the committee in charge, worked like beavers and are entitled to great praise for the manner in which they performed their duties. Ringmaster William J. Kennedy and Secretary William W. Craig were certainly two overworked men, and they were always on deck and must have been glad when the day was finished, for the games started at 11 o'clock

Lilium Harrisii

Now Ready for Delivery.

Our first consignments have just reached us, and our advance orders are all filled. In view of the fact that crop is shorter than last year, we advise those who have not already ordered to lose no time doing so. Last year we were not able to meet the demand for our selected Harrisii on late orders. At present we have a good supply, and will be able to take care of early orders; but there should be no delay in ordering, as there is sure to be a scarcity of good stock, especially in the large sizes.

We offer selected stock of the original true Harrisii for early forcing, grown from the original true stock—splendid stock for early forcing, for which purpose Harrisii is so valuable. Our stock is not picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

DETROIT, MICH.

and it was after five when the last event, the tug-of-war, was decided, and everybody waited for this contest, which proved, as was expected, a strenuous struggle, in which the private gardeners wiped out their defeat of a year ago. The games started with the ball game, which attracted a great interest and was won by the commercial men, by the score of 5 to 2. The winning nine was composed of: Sim, c.; Solari, p.; Filson, 1st b.; O'Brien, 2nd b.; Kuer, 3rd b.; Aylward, ss.; Palmer, 1. f.; Walsh, c. f.; Ruane, r. f. The ball game for boys under 16 years was won by the team captained by Thomas Westwood.

The judges who officiated were: Kenneth Finlayson, A. E. Thatcher, Thomas H. Westwood and James Wheeler. Handicapper McGillivray had a difficult task which he performed to the credit of himself and the satisfaction of all. Miller and Holmes, who umpired the ball game, escaped any seri-

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

VISITED CHICAGO: B. E. Martin, Salem, Ill.

GLADIOLUS bulb crops are suffering from the prevailing drought both east and west.

ST. JOSEPH, MO.—The Farber Seed Co. will increase its capital stock from \$5,000 to \$10,000.

THE Azore islands may help out on the calla bulb shortage in California caused by the severe winter.

THE Louisville crop of onion sets is reported to have been badly injured by the heavy rains the past month.

REDTOP grass seed producing districts in Illinois have had too much rain, but the quality of the seed will be better than last year.

CHICAGO.—Prices on the board of trade August 3 for grass seed were noted as follows: Timothy, \$5.50-\$6.50 per 100 pounds. White clover from 20 cents to 25 cents.

FIRST estimates from California seed growers on their percentage of probable deliveries on 1910 contracts indicate that orders for most varieties of onion will be filled nearly in full.

CHINESE NARCISSUS bulbs are reported afloat in the China seas and are due in America rather earlier than usual. These bulbs enjoy a longer selling season than most kinds.

THE Department of Agriculture at Washington is out with a press notice urging farmers to grow vegetable seeds. There is nothing to indicate that this article was ever submitted to the expert seed growers of the department, otherwise the public would have been cautioned to procure their seed stocks from right sources and to make their preliminary ventures through the support of a definite contract for the crop with responsible seedsmen.

PHILADELPHIA, PA.—S. S. Skidelsky has returned from an extended western trip. Roman J. Irwin, his partner, has gone with his wife for a vacation of two weeks in Maine.—The Henry F. Mitchell Co. has taken about 400

square feet of space at the Rochester trade exhibition. Among many other exhibits they will show a number of electrical appliances. They are now busy handling their first shipment of Formosa lilies.—Patrick O'Mara of New York was a visitor July 29. He visited Dreer's, Riverton, N. J., and the ranges of the Robert Craig Co. and Wm. K. Harris.

Connecticut Seed Crops.

Orange, July 30.—Turnip and kale seed have now been harvested and the crop is a very good one, although the acreage was small. Present demand for both of these articles has taken up all the surplus in the hands of dealers. Showers have recently fallen, which have carried along the corn crop and the later seed, such as beet, carrot and parsnip, although we have not had a good rain for some six weeks, are looking as well as could be expected. Warm weather is helping the corn, and it is now looking better than it usually does at this season.

There is no question whatsoever but that the pea crop is going to be one of the very shortest on record. The writer has just returned from a thorough canvass of the pea growing sections of New York State, Canada and Michigan, and is convinced that famine prices for peas will prevail during the coming season.

S. D. WOODRUFF & SONS.

The Corn Crop.

Wakeman, O., July 30.—I have just returned from a 2,000-mile automobile trip through the east, via Canada. I found the corn crop from 10 days to two weeks late and a poor prospect. Our own contracted crops here in Ohio are at least two weeks late and a poor stand, due to the cold weather of May and early June. Many fields had to be replanted and some crops were entirely lost. From the middle of June to July 10 we had splendid corn weather and if we can get some rain from now on with a late fall we can then make a fair showing.

C. S. CLARK.

French Bulbs.

Consular Agent Francis M. Hansfield, of Toulon, furnishes the following information in reply to complaints which have appeared in American horticultural journals that some inferior narcissus and hyacinth bulbs have been exported from the Toulon district:

"No criticism is justified of the products of this part of France ob-

tained through responsible firms or of those growers who bring scientific methods to bear in their culture. Whatever unsound stock may go out must be through the small and irresponsible farmers, and the reputable growers and shippers with whom I have talked on this matter say they positively refuse to sell damaged or unsound stock to these small factors, believing that if such should be put on the market and proved faulty, as it obviously would be, it would injure the great industry of Ollioules and Hyeres, which have a reputation for bulbs of the highest quality. Such damaged or unsound stock is burned or otherwise destroyed by the growers and shippers who have their best interests and that of the region at heart, the irresponsible middleman not even being thought of as a possible customer.

"Unsound stock comes from three different causes: (1) From damaged stock, bruised or cut or rotted by damp; (2 and 3) from two well-known maladies, one resembling an interior rot of an enigmatic origin, and the other—seemingly attacking only the hyacinth—a tiny nematode which insinuates itself into the heart of the bulb through a hole which it makes at the base. These maladies are well known and recognized by experts, but to the non-expert it is conceivable that their presence might well be overlooked and possibly ignored by a careless shipper.

"If this unsound stock were allowed to propagate in the United States, it might indeed be a serious matter, and the way to avoid it seems to be for buyers to deal only with known and responsible houses rather than to attempt to develop new sources of supply. The United States has the reputation of taking the best of the stock produced here and, incidentally, paying the highest prices, but buyers can only be assured of this by drawing their supplies from houses of good repute. The market price (between grower and exporter) of the competitive White Roman hyacinth bulb has just been fixed for the present season by the Growers' Syndicate at 68 francs (\$13.12) per thousand of 1,050, the assortment to include the usual marketable sizes, from 4.7 to 5.9 inches. For extra sizes the members of the syndicate are at liberty to make their own prices."

To Stop Weed Seed Imports.

Washington, July 26.—Stimulating the government's country-wide anti-weed crusade, Acting Secretary of the Treasury Andrew has ordered all customs officers to take 2-ounce samples of all importations of grass, clover and forage plants and forward to the seed laboratory of the Department of Agriculture here. This action is to be in effect through the present fiscal year and is at the request of Secretary of Agriculture Wilson, who wants to stop weed seeds from continuing to come into this country. Canada has stringent laws against bringing in seeds of weeds and some of the foreign interests are said to have turned to the United States, as furnishing a less critical market.—New York Journal of Commerce.

Imports.

During the week ending July 23, imports were received at New York as follows:

Vaughan's Seed Store, 16 cases, 14 crates lily bulbs.

J. M. Thorburn & Co., 20 bags seed. M. C. Hutchinson & Co., five cases seed.

To others, 526 cases, 22 pkgs. lily bulbs, 52 cases plants, 276 bags clover seed, 43 bags grass seed, 30 bags, one pkg. seed.

Mignonette New York Market.

New Seed Now Ready.

This is an extra choice strain of Mignonette for
greenhouse culture. Our seed is greenhouse
grown, raised by a most careful grower. The
plants grow from two to three feet high, and pro-
duce flower spikes up to 20 inches long, according
to the quality of the soil, weather and treatment.
The seed is all saved from selected plants, grown
from three to five shoots to a plant, and was all
saved from the spikes measuring from ten to
eighteen inches long. Trade pkt. (about 1000
seeds). 50c; per oz., \$7.00; 1/4-oz., \$1.00.

Market Gardeners

Greenhouse Vegetable Growers and
Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;
Franklin DeKleine, Grand Rapids, Mich.,
Vice-President; S. W. Severance, 508 Illi-
nois Life Building, Louisville, Ky., Secre-
tary; M. L. Ruetenik, Cleveland, O., Treas.
Annual meeting at Grand Rapids, Mich.,
Sept. 27-29.

POTATO prospects are good in Marion county and other producing centers in Indiana.

MINNETONKA LAKE and vicinity was swept by a severe storm July 22, great damage being done to vegetable crops around St. Paul, also to greenhouse property in the neighborhood.

CHICAGO.—Kraus Bros., Seventy-eighth street and Jeffry avenue, will repair the five greenhouses which were damaged by a storm some time ago. Their crop consists of radishes, parsley, mint and tomatoes. Their tomato patch of 5,000 plants is in fine condition and picking will commence the latter part of this month. Kraus Bros. supply the grocers of Hyde Park and vicinity. They have 27,000 feet of glass.—P. M. Olsson, the big potato shipper of Wau-paca, Wis., was in the city this week, with L. Starks Co. He said that there was no telling what the potato crop would be on account of the prolonged drought. There has been no rain for over two months.—L. F. Case, the fruit broker, left this week on his annual trip to California to see his customers.—J. G. McNair, the big Arkansas peach grower, was here last week.

About Beans.

The bean that we eat in some form nearly every day, that almost everybody likes, is comparatively new as an edible. Our common, everyday bean is a native of South America and was introduced into Europe, whence it came to this country, during the sixteenth century, and now is represented by more than 150 cultivated varieties. The big, broad bean is the bean of history and its origin is so remote that it is doubtful. It is probably a native of southwestern Asia and northeastern Europe.

Columbia City, Ind.

The Northern Indiana Florists' Association met at Winona Lake for its annual meeting. At this meeting articles of incorporation were adopted and the following officers elected:

W. W. Dederick, Warsaw, Ind., president.

Harry White, No. Manchester, vice-president.

A. J. Wagoner, Columbia City, secretary and treasurer.

Directors.—One year: D. C. Noble and A. J. Wagoner, Columbia City; two years: Geo. Pastor, Huntington; J. H. Shelton, Rochester; three years: J. S. Stewart, Anderson, W. S. Kircher, Rochester.

Five new names were presented and duly elected as members, giving us a wide range of membership in the northern part of the state. A banquet was spread at the Otterbein hotel which was voted a great success by all the members and wives and visitors. After the yearly business was completed several very interesting discussions were enjoyed in which all took part

and it was declared the most interesting part of the meeting. A committee consisting of W. W. Dederick and A. J. Wagoner was appointed to prepare a programme for next meeting, which will be held the third Wednesday in October at South Bend. All who are interested in horticulture are urgently invited to be present and all parties wishing to become members can do so by addressing application to Secretary A. J. Wagoner, Columbia City, Ind., and inclosing \$1 with application. All new names will be taken up and voted on at next meeting. A. J. W.

Boston Notes.

The trip across the ocean and a visit to Europe seems to have an attraction this year for the florists in this vicinity. S. J. Goddard and Johnson of Nelson & Johnson of Framingham returned the early part of this week, and the latter part of the week David Welch of Welch Bros. appeared at the store, hale and hearty and with a color that would rival an ancient mariner. A. Leuthy and Joe Margolis of H. M. Robinson are roaming around the continent looking up good things. Sidney Hoffman is in Hamburg and writes that he is having a glorious time, and nothing that can be put to use in the Back Bay will escape his watchful eye. And now it is reported that William Malloy and Edward Welch are to sail next Saturday, which will make quite a representation of the profession in this city to the old world.

One of the young men who formerly had the respect of the trade has fallen from grace the last week. He started in business for himself in Somerville and using up his credit found that he had to purchase his goods C. O. D., but not having the wherewithal to pay, would give the boy who delivered the goods worthless checks. This week he tried the game on H. M. Robinson & Co.; the boy refused the check but went into the telephone booth at the Sullivan square terminal, where the young man was to meet him, and the latter then skipped with the box of flowers. He was later arrested and appeared in court on Friday to answer to the charge of larceny and was found guilty and fined \$15 and costs, which he appealed.

E. Allen Peirce has completed the arrangements for the Boston party to the convention at Rochester. The fare will be \$15.40 for the round trip, which is the regular fare out and three-fifths on the return by the certificate plan. A special car has been engaged and the charge will be \$2 per chair.

Seed Merchants
and Growers. 114 Chambers St., New York.

The party will leave on Monday, August 15, at 10 o'clock, having the day run through the Berkshire hills and the Mohawk valley, arriving at Rochester at 10 o'clock in the evening; and returning Saturday. Any one desiring to join this party will please notify E. Allen Peirce, Waltham, Mass., as early as possible. A good time is in store for any one who joins.

Mattie Ruane, Peirce's popular salesman, appeared at the market Monday brown as a berry and smiling as ever after an enjoyable vacation at York Beach. Fred Roberts, Doyle's busy manager, also came back to town the last of the week ready to start Monday morning.

H. M. Robinson starts Monday to spend a well earned vacation at Green Harbor. E. A. W.

WILMETTE, ILL.—The Northwestern Floral Co. will erect two greenhouses, 26x125. The company deals largely in carnations; 30,000 plants have already been put in the houses and 10,000 more will be added; 14,000 plants have been sold at wholesale during the past week.

Dreer's Convention Month Specials

AN INVITATION

All Florists attending the Rochester Convention are earnestly invited to stop over at Philadelphia and visit our Nurseries at Riverton N. J. We assure you a cordial reception and believe that you will find the visit both pleasant and profitable.

NEPHROLEPIS SCHOLZELI (Crested Scott Fern.)

FINE FERNS

Asplenium Nidus Avis—The Bird-Nest Fern.

A nice thrifty lot in 3-in. pots, 30c each; \$3.00 per doz. 4-in. pots, 40c each; \$4.00 per doz.; 6-in. pots, \$1.00 each.

Nephrolepis Giatrasii

This variety, introduced last fall in a very limited way, has proven to be a gem—especially where a perfect specimen is desired in a small size. It will develop beautifully in a three, four or five inch pot, making an ideal plant for many purposes where the other varieties of Nephrolepis are too coarse, and it is also fine for fern dish work when grown in 2 1/4 in. pots, \$2.00 per doz.; \$12.00 per 100; \$100.00 per 1000.

Mixed Ferns for Dishes

We have at all times a good supply of these.

2 1/4 in. pots.....	\$3.50 per 100; \$30.00 per 1000
---------------------	----------------------------------

For a complete list of seasonable stock offered by us at this time, see our current wholesale list. If you have not received a copy it will be mailed to you on application.—Our staff of travelers will be in attendance at the Rochester Convention, and will be pleased to show you samples of the above and many other specialties which we will exhibit.

PALMS Our Leading Specialty.

Cocos Weddelliana

We have nearly an acre of glass devoted to this most graceful of all Palms. Splendid, thrifty stock, of rich dark color.

Nephrolepis Scholzeli—Crested Scott Fern.

A sport from Scottii, possessing all the merits of that most popular variety but with the pinnae sub-divided giving it a neat crested appearance. 2 1/4 in. pots, \$1.25 per doz.; \$8.00 per 100; \$75.00 per 1000.

Ferns in Flats

These flats contain about 200 plants each, only one variety being in a flat, and we cannot supply less than a full flat of any one sort. Price, \$2.00 per flat.

Adiantum Cuneatum.	Lomaria Coliata.
Aspidium Tsussimense.	Pteris Adiantoides.
Aspidium Tsussimense Cristata.	Pteris Cretica Magnifica.
Cyrtomium Falcatum.	Pteris Cretica Wimsettii Multiceps.
Cyrtomium Fortunei.	Pteris Ouvardi.
Lastrea Chrysoloba.	Pteris Wilsoni.
Lastrea Aristata Variegata.	

HENRY A DREER, Inc., 714 Chestnut St., Philadelphia, Pa.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-Presi-
dent; John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

SPRINGDALE, PA.—The offices of the Elliott Nursery Co. were broken into July 22, the safe blown and \$200 in cash, two gold watches and \$8 worth of stamps extracted.

JERSEY CITY, N. J.—John T. Withers, having returned from his world tour, is busy planning for the improvement of the Fifth ward tract which the city is acquiring for park purposes.

MILLBRAE, CALIF.—F. Ludemann of Ludemann's Nursery has retired from business and the nursery will, in future, be carried on by his son, A. F. Ludemann who has had personal charge of the business under his father for the past 10 years.

MAKATO, MINN.—Announcement was made July 19, that the executive board of the State Horticultural Society has elected Senator Thomas E. Cashman of Owatonna as president of the association to fill out the unexpired term of Professor Samuel B. Green, who died July 11. Mr. Cashman is well known as a nurseryman, being president of the Clinton Falls Nursery Co. at Owatonna.

MILTON, ORE.—Members of the Northwest Nurserymen's Association were recently the guests of the retiring president, S. A. Miller, at the Milton Nursery, coming in a special car on the interurban, 125 strong. After an inspection of Miller & Sons' nursery dinner was served on the grounds of Aaron Miller, founder of the nursery and the pioneer nurseryman of eastern Oregon. William Ritz of Walla Walla acted as toastmaster and addresses were delivered by ex-Mayor Davis of this city, J. H. Hall and D. C. Sanderson of Freewater, J. L. Dumas, Roeding, C. L. Whitney and others.

New Roses at Hoopes Bro. & Thomas.

WICHURAIANA CROSSES

Considering the great and immediate results that have been obtained from crosses with Rosa Wichuraiana and the popular and well-known standard hybrid and tea roses in general cultivation, it seems strange that many more rose growers are not engaged in this fascinating work. That roses of this type are growing in popularity is evident with each recurring season. That sterling variety, Crimson Rambler, a pronounced favorite of this type, is now to be seen in all parts of the country, and as fast as it becomes known it is being followed by the magnificent pink, Dorothy Perkins, a cross between Wichuraiana and Mme. Gabriel Luizet, a climbing variety that should be in every grower's stock, as it is also one of the best plants for Easter forcing.

Some five years ago experiments were made with crosses of well-known hybrids and teas with Wichuraiana, at the nurseries of Hoopes Brother &

S. A. VOSTERS & SONS,

RIEL, HOLLAND.

Thomas, West Chester, Pa., the results of which were very gratifying, there being obtained several varieties that measure up to the standard of many sorts in commerce together with a number of others which have peculiarities in color, form of flower and foliage that mark them as being worthy of a trial and providing excellent material for future crosses.

A cross with Caroline Testout was very prolific, one pod of seed producing four fine varieties, of which the characteristics are quite different. Of this quartet probably Christine Wright is placed first. This is a strong, rampant grower with large, thick, leathery foliage; the flowers are a clear bright pink almost double, four inches in diameter, borne in clusters of from eight to 15 flowers and buds both of which are of beautiful formation. The foliage remains clean at all times. Flowers are also pro-

Azaleas, (hardy), Berried Plants, Bleeding Hearts, Blue Spruces, Boxwood, Clematis, Climbing Plants, Conifers, Evergreens, Funkias in sorts, Hydrangea P. G., Japan Maples, Peonies, Pot-grown Plants, (Lilacs a specialty), Rhododendrons, Roses, Spiraea, Valleys.

Price List Free on Demand.

duced at intervals in limited quantities later in the season. Another from the same seed pod is of the purest white, having a large flower with a double row of broad globular petals and is relieved in the center with a bunch of golden crested stamens. If it were more double it might be called a climbing Frau Karl Druschki, so closely does it resemble this famous sort in form and color. The foliage is a rich, glossy green, which makes it desirable as a climber the season through.

Peonies Wanted.

Peonies in large quantities, 3-5 eyes.

Officialis Alba and Rubra.

Only guaranteed true varieties wanted.
75 per cent cash; rest after first flower.

F. F. SCHEEL,

Nursery, Shermerville, Ill.

Crosses were also made with Crimson Rambler, of which there are several examples that are well worth trying out, being quite distinct and beautiful as pillar roses, the semi-double flowers being borne profusely in upright clusters. General Jacqueminot was also used to advantage, as was Clio and Helene, a pink climber. There are a lot of varieties held under number which are very interesting, all showing peculiarities of foliage, color or form of cluster on single flowers, that reveal the possibilities of this work. Of the varieties thought worthy of a place in their catalogue and in this way offered to the public, are the following: Christine Wright, described above; Columbia, pure salmon pink, strong climbing habit, foliage glossy, form of bud beautiful, size of flower four inches and very fragrant. Edwin Lonsdale, double, pale lemon white, delicate tea fragrance, flowers two to three inches, very profuse. Prof. C. S. Sargent, rich golden yellow in bud, opening out to a delicate buff flower, very double and fragrant, a cross with Souvenir d'Auguste Metrel. Robert Craig, yellow-shaded with apricot deepening in the center. This interesting work is still carried on by their superintendent, Mr. Farrell, who has secured some very promising seedlings by further crosses with Wichuraiana, using, as before, popular varieties and also the products of the first experiments. It is a work which every florist in the land could engage in with pleasure and profit, there being an almost certainty of good results to the careful hybridizer. K.

Condition of Nursery Stock.

The Brown Bros. Co., Rochester, N. Y., write as follows: "We have had an unusually good growing season in this vicinity. We had ideal weather all through planting time and have had plenty of showers and occasional good rains so that the ground has been kept in perfect condition, with the result that stock has done much better than usual."

Ellwanger & Barry, Rochester, N. Y., say that in a general way nursery stock looks very well, the month of July having afforded exceedingly good growing weather.

American Apple Growers Congress.

The seventh annual meeting of the American Apple Growers' Congress will be held at the Planters hotel, St. Louis, August 10-11. Many interesting and instructive papers on subjects pertaining to fruit growing are promised, some of the best informed men from experiment stations and other government institutions being down on the programme for talks on their various specialties. The director of the Missouri Botanical Garden has arranged for the Shaw annual banquet

GILBERT H. WILD,

Sargoxie, Mo.

Providence.

The condition of the business for the past week remains the same as it has been for the past month, excepting that first class stock is decidedly scarcer with no increase in the demand. There is no transient trade, but a very fair amount of funeral orders for this season of the year. Few roses of a first class quality are coming in. The supply of carnations is very small and the quality poor, and more good ones could be used. Asters are more plentiful, but there is not enough of a good quality coming in and what there is are soon bought up at good prices. Gladioli are fine and of a great selection of colors, they sell well but at a low figure when taking into consideration the grand display they make and their lasting qualities. Sweet peas are scarce. There is a sufficiency of orchids, lily of the valley, pink pond lilies and Easter lilies to supply all demands. Green goods are abundant, of good quality.

NOTES.

Many of the residents of Central Falls paid a visit to the gardens of the Field Naturalists' Society on Monday and expressed their pleasure at the conditions which have developed during the past few weeks in connection with the competition among the members for the Lawton silver cup, which is awarded annually to member having the neatest appearing bed in the garden. At the meeting of the society the committee which has charge of the arrangements for the annual flower show presented a report. Several of the members will attend the annual clam bake to be given by James Hawthorn on Sunday. The city tree warden, Alfred Clare, was present at the meeting and informed the members that he is negotiating with the state officials for help in the spraying of the trees of the city and expects that the work will begin in the near future.

F. Macrea & Sons' concern consists of 75,000 square feet of glass and is conducted by the sons of the late F. Macrea. They grow a general line of roses, carnations, violets and lilies; of the latter they intend to make a specialty the year around and have built a cold storage for the keeping of the bulbs. These enterprising brothers keep well abreast of the times and have one of the most up-to-date places here. Alex. Macrea is also interested in the firm of T. J. Johnston & Co. and they dispose of most of their stock at this store. Their chrysanthemums are in fine shape; the carnations and roses are also looking well.

The marriage of Edward Brook to Miss Edith Sims has been announced. Mr. Brook is managing owner of the firm of T. J. Johnston & Co. Miss Sims has been bookkeeper and confidential clerk here for the past year and was very popular with the trade and employees. The clerks in the store presented Mrs. Brooks with an elegant bookkeeper's desk and typewriter with equipment for the same. We all extend our best wishes.

The leopard moth has made its appearance here and City Forester Johnson is working hard to get an appropriation of money from our city fathers to fight this new pest as well as the older ones we have in great abundance and making some of the elm trees about this city look as though a charge of grape and canister had been shot through them.

Burke & Burns, successors to Wm. Hay, have incorporated their business under the style of the Burke Rose Co. The incorporators are John T. Burke, Robt. E. Burns, Isabelle G. Burns, all of this city. This concern is to grow and sell all kinds of flowers and plants with a capital stock of \$50,000 divided into 500 shares at \$100 per share.

lege at Kingston on Monday. A very fine repast was served and all returned home very much pleased with the outing.

John Macrae's chrysanthemums are a healthy looking lot. Mr. Macrae grows a limited number of the leading varieties and has put in a couple of benches of single varieties which are looking fine; these were very popular last season.

William Appleton reports landscape and forestry work very good for this season of the year. Mr. Appleton does an immense business at outside work in caring for places in connection with his florists business.

Wm. E. Chappell, John A. Macrae and Wm. B. Hazard were among the mason attendants at the annual outing of the Mason veteran association at the Warwick club, July 15.

GODFREY ASCHMANN'S SONG. Tune: "John Brown's Body."

In the early morning sunlight upon the sea I go
To search the lands of Europe for the finest plants that grow.
I only buy the very best; those only you must know
Are good enough for me.

In the towns of little Belgium there are Araucarias fair.
And Azaleas with their promise of enchanting beauty rare.
I mean to beat the world with my shipment over there.
Just good enough for me.

I leave at home in my house the loveliest Ferns on earth.
And mean to match them with tall Palms of quite transcendent worth.
My Cyclamen and Primroses I've tended from their birth.
All good enough for me.

When I come home I want you all to come and see my show:
The sight of my Lorraines will set your heart and eyes aglow:
The health and beauty bloom and leaf, then only will you know
What's good enough for me.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants 5-5½-6-7 in. pots. 12-15 18-20-25-30 in. high. 3-4 5-6 tiers. 2-3-4-5 years old. 35c. 50c. 60c. 75c. \$1.00. \$1.25 to \$1.50 each.

Robusta Compacta, Excelsa Glauca, 6 in. pots. \$1.00 to \$1.25 each.

Vaughan's Giant Pansies

10 per cent special CASH DISCOUNT. On orders over \$2 for Flower Seeds if cash is enclosed, **10 per cent.** The discount does not apply to Asparagus Seed. Cash discount on this is 2 per cent.

VAUGHAN'S "ELITE PANSIES."

This is not a complete mixture like our International; it does not contain any pure white, yellow or any self colors. It is comprised of the cream of four Pansy specialists' choicest and most expensive mixtures. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.00.

VAUGHAN'S PREMIUM PANSY MIXTURE.

Embraces all the varieties of the Fancy German Sorts. We have sold this mixture for the past seventeen years, and it has given general satisfaction. Per pkt., 25c; $\frac{1}{8}$ oz., 75c; $\frac{1}{2}$ oz., \$2.50; oz., \$5.00.

IMPROVED GERMAN MIXTURE.

This is a mixture of three strains from different German growers, and is made up mostly of separate colors, with a sufficiently large percentage of white and yellow. Per large pkt., 10c; $\frac{1}{8}$ oz., 20c; $\frac{1}{2}$ oz., 30c; oz., \$1.00.

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1889. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully, not alone as to quality, but in vitality and germination. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; $\frac{1}{8}$ oz., \$1.50; $\frac{1}{2}$ oz., \$5.00; oz., \$10.00.

VAUGHAN'S "GIANT PANSY MIXTURE."

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trinardeau, the splendid Cassier strain. Trade pkt., 25c; $\frac{1}{8}$ oz., 60c; oz., \$4.00; $\frac{1}{4}$ lb., \$14.00.

Our list of "Seeds for Summer Sowing" now ready; if you have not received a copy please write for same.

25 Barclay St., NEW YORK.

San Francisco. BUSINESS QUIET.

There is very little activity in either the wholesale or retail business in or around the city at present. However, after the passing of this month, it can be safely figured that there will be a constant improvement in business conditions. While there is plenty of stock in the market to meet the present demands good flowers are very scarce.

NOTES.

The Pacific Coast Horticultural Society desires to announce that it intends placing in the Admission Day parade, September 9, a very handsome and original float and will be pleased to receive suggestions from any one engaged in the flower business. The following cash prizes are offered for the most original design:—First prize, \$15; second prize, \$10. The judges appointed by the society to pass upon the designs submitted are Messrs. Pelicano, Baldocchi, Schlaushauser, Plath, and Kettlewell. The designs must be submitted on or before August 6, 1910.

J. F. Dayton, representing the Madison Basket-craft Co., was in the city for a few days of the past week. This was Mr. Dayton's first visit here for his firm, and he reports a very successful trip.

Arthur Zirkman, representing M. Rice & Co., Philadelphia, is at present here displaying many new novelties in the flower supply line.

W. Saakes, of Los Angeles, is stopping here for a few days on his return trip from Reno.

Mr. Martin, of Martin & Forbes, Portland, Ore., was a recent visitor in the city.

ARTUS.

BROOKLYN, N. Y.

Mention the American Florist when writing

We'll Help You Make Your Palm Department Pay.

Many florists neglect their Palm business because they think that other lines pay better. If you think that, we would like a chance to **prove** to you, by the experience and testimony of scores of our customers who have had long experience with Palms, and who therefore **know**, that few other departments of the retail florist's business can be made to show a steadier and more satisfactory profit than this one.

It's absolutely necessary, though, that you sell first-class stock, and this we are prepared to supply. Our Palms are all home-grown and are clean, vigorous and thrifty. We supply them in practically all the standard sizes and our prices are no higher than you would pay elsewhere as the following list will show.

Our interest in our customers doesn't end with the filling of an order, either; florists who want to build up a better Palm business will find many helpful suggestions in our summer booklet, just off the press, which contains, also, our price list for the coming season.

We want you to have a copy of this booklet—we know it will interest you and help your Palm business. Drop us a postal **now** and we will see that a copy comes to you by next mail.

And, as decisive proof, why not let us have a trial order, if you're not already acquainted with "Heacock Quality"? Here are our prices; your instructions will have our best attention and the Palms will be shipped without delay.

"When in Philadelphia be sure to look us up."

C. EISELE,

11th and Westmoreland Sts. Philadelphia, Pa.

Cincinnati.

TRADE HOLDING UP.

Business is holding up fairly well and we have no complaint about the way stock is selling. True there are a few too many *Hydrangea paniculata* on the market but these are moved at some price and they clean up even if at a sacrifice. Carnations are about over and we are anxiously awaiting the advent of the asters, which up to the present writing, are very poor in quality and hardly worth mentioning. Roses are improving in quality and last week some very good Beauties, Taft and Ivory were offered. Auratum and Longiflorum lilies are in active demand and the quality all that can be desired. Green goods of all descriptions are abundant with only a moderate call.

NOTES.

The next regular meeting of the Florists' Society will be held in the club rooms, Jabez Elliott Flower Market, on Monday evening, August 8, at 8 p. m. Applications for membership have been received from R. A. Kelly, C. J. Jones, Harry Moorman and Chas. McRea. President C. E. Critchell is getting on the right track in trying to induce the retailers to join the society, for membership from the retailers was lacking woefully, there being only about half a dozen on the roster.

There will be quite a party to the S. A. F. convention from this city. Thus far J. A. Peterson and wife, C. E. Critchell, Albert Sunderbruch, Albert Heckman, Ray Murphy and Frank Westrich have made up their minds and are going, and although not definitely settled, but at the last moment we will see Louis H. Kyrk and wife, Miss Edith F. Kyrk, Miss Laura Pfeiffer, Mrs. Gus Adrian and Miss Jennie Adrian board the sleeper for Rochester August 15.

Joe Maunder, Newport, Ky., was around the wholesale houses the other day telling the boys how he killed a big black snake while fishing along the Little Miami river during his vacation. As Joe is an absolute teetotaler undoubtedly it will be best not to question his story.

W. H. Gear and Wm. Murphy are the two disciples of Isaac Walton of the craft in this city and every week end you can find them at one of the numerous fishing camps within 25 miles of the city. The two Bills certainly know how to enjoy life.

A letter from Miss Adae Kresken, dated Rome, Italy, July 14, 1910, says that all is well and a postal from Arthur Becker at Los Angeles, Calif., states that he is having one good time and that he is anxious to book an order for a carload of callas.

VAUGHAN'S Winter Flowering SWEET PEAS

New Seed Ready in August.

White Seeded Sweet Peas. Put seed in water over night, then put in box or flat and in a temperature of 60 degrees. Seed will germinate in two days and then can be sown.

	oz.	lb.		oz.	lb.
Angelino, Self pink.....	\$0 20	\$1 50	Mrs. Alexander Wallace, Lavender.....	15	1 00
Christmas Pink, Pink and white.....	10	1 00	Mrs. W. W. Smalley, A pleasing satin pink.,	20	1 50
Christmas White,.....	10	1 00	Mrs. Geo. Lewis, Pure white.....	25	2 50
Earliest of All, Pink and white.....	10	85	Mrs. William Sim, Salmon pink.....	20	1 50
Mont Blanc, White.....	10	60			

If sweet peas are wanted for Christmas, sow the seed in well-ventilated houses, not before August 15, nor after August 25. This sowing will bloom from November 1 until April. For the main crop in January or February, sow about September 15. If the best sweet pea flowers are wanted for Easter (April 16 in 1911), sow the first part of November.

Wichita, Kans.

"Dry, drier, driest, describes the weather conditions for the past three weeks in Kansas, two good rains only since the heavy storm of May 1. The day temperatures range from 100° to 105° every day, with rather stiff wind blowing, hot as from a furnace, several of the days and a low degree of humidity taking the sap out of most vegetation. Summer flowering crops have suffered severely; sweet peas are ready to set fire to, asters barely pulling through, even with much watering, and the general run of stock in much the same condition. Carnations in the field are surely taking a rest, but are of sufficient size that even a few weeks of growing weather will in most cases put them in fair condition. Chrysanthemums in the greenhouses are looking well. Trade conditions are at low water mark; in fact there is no trade to stimulate, and the retailers trim their windows to amuse or interest by some unique attraction. Chas. P. Mueller has used water, sheet moss, etc., with good results. Some small ducklings have been especially amusing. W. H. Culp & Co. have displayed some exceptionally good gladioli, America showing up in especially fine form.

Ferdinand Kuechenmeister, in company with John Stamm, of Hutchinson, spent three weeks in the lake region of Wisconsin, with a short visit to Milwaukee and Chicago. He reports a fine time, and good luck angling for bass.

While wrting these lines a light shower is starting, and the weather indications are for a rain, thus allowing at least a temporary break in the dry spell.

W. I. CHITA.

Nashville.

The extremely hot weather has set in in earnest in this locality and the florists' windows indicate a scarcity of flowers and that dry dull look of mid-summer. At the greenhouses all are busy trying to keep something going with which to supply the summer demand. Asters are coming in well; gladioli hold on and the white hardy hydrangea serves many purposes. Trade continues fair and funeral work is still abundant.

SPECIAL LOW OFFER —of Freshly Imported— ORCHIDS

For Balance of Month Only.

Cattleya Trianae, in splendid condition, well leaved and plump, in cases of 400 bulbs, 40-50 plants, \$40.00 per case.

BYER BROS., Chambersburg, Pa.

The funeral of Mrs. James C. Warner created quite a large demand. The flowers were sent from several cities and were banked about the casket until it resembled a catafalque made of flowers. A remarkable feature of the flowers were the beautiful Harrisii lilies of which there was a great profusion. A handsome pall, made of lilies, purple asters and white roses, was bordered with lilies and asparagus. So many of the pieces were very large and were sent by friends in this and other cities, large gates ajar, upright crosses, enormous wreaths and innumerable bunches of lilies. Mrs. Warner was a great lover of flowers and her garden was one of the most beautiful around here. She had a small greenhouse, delighted in the culture of many rare plants and had great success with them. Her garden had all kinds of old fashioned flowers and was at all times a thing of beauty and a joy to her large circle of friends. M. C. D.

"GREENHOUSE MATERIAL"

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our **Special Heating Catalog**, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. **Ask for Booklet No. 47.**

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Marvelous bargains in **Greenhouse Sash and Building Material** of all kinds. **Corrugated Roofing and Siding, Structural Iron, Gutters, Eave Spouts, Hydrants and Valves, 10,000 feet Rubber Hose, Soil Pipe, Plumbing Material** of all kinds. **Boilers, Feed Pumps, Flower Pots, etc.** Thousands of other articles of interest to Florists or Greenhousemen. We can save you from 30% to 75%.

Send for our new **500-page Catalog No. 47. Free upon request.**

King Iron Frame Greenhouses

"Ask the Man Who Has One."

A Word From England---

HAMPTON-ON-THAMES, ENG., Aug. 31, 1909.

Gentlemen:—

With reference to your Trussed Iron Frame House, I am pleased to let you know that it is just finished. I am well satisfied with the general appearance of the structure and find it really imposing and every detail of the construction is well brought out. The trussed steel material makes the house wonderfully light and yet very rigid at the same time, especially when one considers a width of 42 feet without posts. The ventilating machinery is strong, neat and works easily. I am sure this style of a house will be the style of the structure for commercial horticulturists in this country as well as in America.

Wishing you every success, I remain

Yours sincerely,

(Signed,) E. VICTORS.

Send for Bulletin No. 35, which describes the King Iron Frame Construction.

Steam Coal Matters.

Chicago.—There is no change for the better to report pertaining to the Illinois steam coal mine tieup. The referendum vote taken recently on the Indianapolis compromise was decisively defeated by the Illinois miners. This stand was influenced by the attitude assumed by John H. Walker, president of the Illinois Mineworker's Union; his animosity to T. L. Lewis, president of the United Mine Workers of America, it is apparent, is the chief source of keeping the warring forces of Illinois coal operators and miners asunder.

While about 10 days ago the tentative agreement drawn up at Indianapolis was in a fair way to receive the approval of the Illinois miners, as indicated in dispatches, the friction between the national and state officials fomented to point of open break, as the following signed statement by T. L. Lewis promulgates:

"The vote taken in Illinois on the proposition submitted by the international executive board to the miners of that state will not be counted for the reason that the voting was not done in accordance with the rules governing the referendum.

"According to reports received from various sections of Illinois the terms of the proposition submitted to the miners were misrepresented by the district and subdistrict officials.

"Not only were the facts misrepresented, but the miners in many instances were bulldozed and intimidated and denied the right to express their honest convictions.

"The international executive board was of the opinion that a good proposition was submitted to the Illinois men, one they could have accepted with credit to themselves and honor to the United Mine Workers.

"There is no doubt but what the proposition would have been accepted by an overwhelming majority and the 50,000 idle miners of Illinois would be working the coming week were it not for the personal animosity of John Walker and his associates against the international officials.

"The treacherous and cowardly work of the men who are trying to tear this organization to pieces will be exposed, and when the mine workers of the country understand fully that their interests are being jeopardized and that their families are being made to suffer because of the duplicity of certain district leaders it will not take them long to remove the obstacles from the pathway of success.

"In the light of recent events we have a right to believe that John Walker would be willing to see men, women, and children suffer in order to boost his personal interests. The situation in Illinois and the action taken by the miners have temporarily delayed final negotiations for wage contracts in the southwest and Colorado, affecting over 30,000 men.

"T. L. LEWIS."

Meanwhile financial aid is coming to the fore for the Illinois miners through contributions from adjacent states in the shape of drafts for substantial amounts from miners' unions.

The situation east of the Illinois-Indiana line is daily becoming more strained owing to the increasing demands being made on that source of supply. Some of the operators are working their forces to utmost capacity, but are unable to cover their obligations in several instances.

A brisk demand for steam coal is noted by jobbers who have approached

the nursery, florists and seeds trade during the past few days. Prices obtained, while higher than in years past, are not out of proportion to present market conditions. If anything, higher figures will be paid from now on for this factor in hot house operation. Covering requirements for the ensuing year should be the order of the day.

W. F. Dunk, president of the Northern States Coal & Mining Co., 406 Fisher building, 277 Dearborn street, Chicago, who has developed his trade with florists to large proportions this

season, has the following to say covering the steam coal layout:

"When calling on the greenhouse trade the past three months, I have advised that they order their coal now, and to make every effort to fill up their coal bins as early as possible, as a good many found it hard to get their coal last winter and the conditions existing now will make the coming season more serious than ever, as there is no question but that coal will be high this coming winter, owing to the Illinois mines being closed down all summer, and the mines that are running today are unable to secure cars for a full week's run. This car question is getting to be the most serious proposition the operators have to contend with, if the consumers will stop long enough to think this matter over they will realize that the large number of consumers of Illinois coal must secure their fuel from Indiana and the eastern states, and that it creates a demand for these coals, and the demand for any article creates the price. In view of these facts all the coals being mined today are selling at a very reasonable figure and should be an inducement to the greenhouse trade, as well as all other consumers, to place their orders now and stock all the coal they can. There is no trade like the greenhouse trade that needs the shippers' attention more, as it is a very serious matter to them to run short of fuel during the winter season.

"Having been in close touch with the greenhouse business for a number of years, I feel that it is my duty to the trade to advise that they order their coal supply now and avoid all the rush and worry that is sure to come. As the movement of the grain trade increases the car shortage at the mines, it will not be a question of coal: it will be the lack of cars to load it in, and as the shipper has to depend on the railroads to furnish the cars and make the deliveries, the consumers should make every effort to keep a supply on hand at all times.

"Having just returned from the mines in Indiana I find there is not a single mine that is not behind their orders owing to having met with some serious breakdown of machinery, or being unable to secure men enough to operate the mines to their full capacity.

"When these are the true facts of the coal situation today, what may we expect within the next two months?"

Lenox, Mass.

The annual show of perennials and hardy annuals of the Horticultural Society was held in the town hall July 28. Although the entries fell rather short of those of last year, the high standard of all the exhibits was fully maintained, especially in sweet peas, something of a national sweet pea show on a smaller scale, but smaller only in number; not in up-to-date varieties or in excellence of blooms. The winner of the big class came from the High Lawn House gardens (Gardener G. Foulsham), but this exhibit wanted no judging, it stood out by itself. Length of stem, substance of flowers, purity of color, and in fact, all the points that go towards coming out on the top were there. The varieties were Florence Morse Spencer, Miss Wilmott, F. Dolby, John Ingham, Tennant Spencer, Othello, E. J. Castle, Helen Lewis, Helen Pierce, Queen Alexandra, Countess Spencer and Lord Nelson. Another display (not for competition) which was one of the features of the show was a collection of 34 varieties from Mrs. J. Sloane (Gardener A. J. Loveless). They were arranged with much taste in low bowls, and showed their beauty to full advan-

tage. Mr. Loveless was awarded a diploma of merit for this exhibit.

The hardy perennials staged by Mrs. J. E. Parsons (Gardener R. Spiears) and W. D. Sloane (Gardener F. Heeremans) would be difficult to equal anywhere; they stood for choice and quality right along the line. The same may be said of the annuals; they were first class. It was a hard tussle between J. E. Parsons and Mrs. J. E. Alexandra (Gardener W. Jack). They demonstrated in a practical way what beautiful results can be obtained with hardy annuals. Two exhibitors who did well in various classes were C. Carlquist and R. Bond. Lenox show holds a unique position to any the writer has ever had the pleasure of being associated with. The only prizes offered are cards, but it does not diminish the keenness of the competition one fraction. They ask no quarter, nor do they give any; but the society is looking forward to the time when it will have got beyond the pioneer stage of existence, when the work it is doing will be recognized in a substantial manner. And why not? One cannot help but admire this body of gardeners, who have worked unselfishly without remuneration in the hope that some time they will place the society on a sound financial basis. More power to them. Men who know the shows in this country well do not hesitate to say that those here have no rivals. John Lewis Childs of Floral Park, N. Y., had a great display of gladioli, the best of them being Wild Rose, Contrast, America, Sulphur King, Mrs. R. A. Goldsmith, Attraction, Princess of India, Harlequin, Ruby and Melrose. But special note should be made of a vase of Gladiolus Dawn, exhibited by F. Heeremans. It was a beauty. The judges were H. Allan, gardener to F. Vanderbilt, Hyde Park, N. Y., and J. R. Shields, Dalton, and they performed their duties to the satisfaction of all. The thanks of the society are due to J. Mac Connachie for the courteous and businesslike manner in which he managed the show. The following are the awards:

Collection of 18 varieties of perennials.—John E. Parsons (gardener, R. Spiears), first; Elm Court Farm (gardener, F. Heeremans), second.

Collection of 12 varieties of perennials.—J. E. Parsons, first; J. E. Alexandra (gardener, W. Jack), second.

Collection of six varieties of perennials.—Mrs. John Sloane (gardener, A. J. Loveless).

Collection of 18 varieties of annuals.—Miss H. Meyer, first; C. Lanier (gardener, A. H.

Wingett), second; J. E. Alexandra, third.
Collection 12 varieties annuals.—Elm Court Farm, first; Mrs. J. E. Parsons, second; Mrs. J. Sloane, third.

Collection six varieties annuals.—John E. Parsons.

Collection 12 varieties Phlox Decussata.—Mrs. J. E. Parsons, first.

Vase, 20 spikes of gladioli.—Elm Court Farm, first; G. H. Morgan (gardener, T. Page), second; J. E. Alexandra, third.

Six cactus dahlias.—J. E. Alexandra, first.

Collection of 12 vases sweet peas in 12 varieties.—High Lawn House (gardener, G. Foulsham), first; Mrs. J. Sloane, second; J. E. Alexandra, third.

Six vases sweet peas in six varieties.—J. E. Alexandra, first; Mrs. R. Winthrop (gardener, R. Carlquist), second; Mrs. S. Sloane, third.

Vase of salpiglossis, 24 sprays.—Mrs. J. E. Parsons, first; Mrs. M. K. Jessup, second; J. E. Alexandra, third.

Vase of pentstemons.—Mrs. R. Winthrop, first.

Vase of antirrhinums, 24 sprays.—Mrs. J. E. Parsons, first; Elm Court Farm, second; J. E. Alexandra, third.

Vase, 24 blooms, dahlias.—J. E. Parsons, first. Vase sweet peas, own foliage.—Mrs. J. S. Sloane, first; Elm Court Farm, second; Mrs. J. E. Parsons, third.

Six Begonia Rex.—Mrs. J. Sloane, first.
J. W. P.

New York to Rochester.

The time is very limited and in a few more days it will be train time and all aboard for Rochester. Our very much alive transportation committee (F. H. Traendly, John Young and H. A. Bunyard) have left nothing undone to give the party the greatest time of their lives enroute. It will be necessary for those intending to take this trip with us to notify F. H. Traendly, chairman, 131 E. Twenty-eighth street, New York, at once so that the necessary accommodations can be attended to.

I would like to state that the officers and transportation committee extend a cordial welcome to all friends to travel with the Florists' Club on this occasion and to be its guests at dinner, the arrangement being made to stop at Glen Summit Springs hotel for this repast. If you have never attended a convention now is your opportunity. Every florist is certainly entitled to a vacation and he could select no better time than this. Wake up now and join us, we will have the best make up of a train that ever left the Lehigh Valley R. R. station. Remember the time, August 15, 10 a. m., from Jersey City. With pleasant greetings and to greet you all at the depot,
A. L. MILLER.

President of the New York Florists' Club and state vice president of the S. A. F.

THE ALLIED TRADES

THE Greenhouse Construction Co., of Bloomfield, N. J., has been incorporated, with capital stock \$125,000 to engage in the building and designing of greenhouses. E. J. Forham, C. F. Martin and H. P. Jones are the incorporators.

PETER WEILER, who has been making boilers for the past 32 years, and who is the principal owner of the Superior Machine & Boiler Works, 840-850 Superior street, Chicago, reports business moving along briskly and inquiries reaching his office from all parts of America. His boilers make good wherever installed as evidenced by the large number in use by the nursery, greenhouse and florist trade.

Outlook for Glass.

Chicago.—Indications point to an advance in price for window glass. Stocks on hand are down to minimum, with the local dealers laying back awaiting developments and not very anxious to quote figures. Some business is moving, but this was placed long before in most instances. A. A. Lavaque, assistant to W. G. Kimball, local manager for Pittsburgh Plate Glass Co., outlined the present conditions as follows: "From present indications there is likely to be a delayed start on the part of the window glass manufacturers owing to the workmen asking for an advance of at least 25 per cent over and above the wage scale that was in use during this fire. The advance seems in a general way rather high, and there is no reason to doubt but what several conferences will be indulged in before a satisfactory settlement is arrived at. This naturally will mean that unless something unforeseen happens a general resumption on the part of the manufacturers will not take place until the latter part of October or the early part of November. In the meantime it is hard to tell how much higher glass is likely to go."

Sprague, Smith Co., 167-169 Randolph street, Chicago, report inquiries good, with little glass to offer.

Cement Benches.

ED. AMERICAN FLORIST:

Please answer these questions in the AMERICAN FLORIST: How much material will it take to make cement benches in two houses each 20x50 feet, no partition, gutter supported in center by single iron pipes? State also the proper thickness to make same and the cost. How best to support heating pipes under benches. Could cement bench legs be used for this purpose? Space to be planned as economically as possible for bench room, outside doors at either ends of houses. LINOLEUM.

"Linoleum" has asked several broad questions, the answers to which depend upon conditions. As to the amount of material and cost this depends largely upon the present price of cement, sand and labor, also the kind of concrete benches to be constructed. Six sacks of cement made up in the proportions of one part cement to four parts sand will make one cubic yard of concrete, which equals 27 cubic feet or 46,656 cubic inches. At \$1.20 per barrel or 30 cents per sack for cement and sand at \$1 per cubic yard the ma-

The Standard Steam Trap

Has established a record far above that of any other trap for florists; being very simple, durable and easily taken care of.

HITCHINGS & COMPANY,
ELIZABETH, N. J.

post or supports are apart and the strength of the reinforcing material. In the method we employ the side pieces, which are 54 inches long, reaching from post to post, are made similar in form to a capital letter L. These are reinforced with $\frac{3}{4}$ -inch cold drawn lug bars extending the entire length, being placed at the junction of the upright and horizontal parts, forming the right angle.

The upright serves the purpose of the edge board to a wooden bench; is $1\frac{1}{4}$ inches thick and the horizontal section extends beyond the upright $1\frac{1}{2}$ inches to receive and support the sections which form the bottom of the bench and is two inches thick. The bottom sections are $1\frac{1}{4}$ inches thick and eight inches wide, reinforced at the outer edges with $\frac{1}{4}$ -inch lug bars. The size of the reinforcing rods for the bottom sections depends upon the width of the bench, but when they do not exceed four feet a $\frac{1}{4}$ -inch bar will suffice.

We prefer concrete posts to those of any other material, which can be easily made in mold, either round or square and any length required. We make concrete blocks five inches square and long enough to receive the required number of steam pipes and place them on the ground at the proper grade, upon which the pipes are placed. If "Linoleum" has on file the FLORIST of April 17, 1909, he will find a detailed description of the parts used with illustrations of same as well as how the steam pipes are installed.

WASHINGTON, D. C.—The fourth annual outing of the Florists' Club was held at Great Falls, Va., July 27. About 300 members of the club and their friends made merry. The committee in charge consisted of George C. Shaffer, Elmer Mayberry, W. W. Kimmel, Otto Bauer, and A. C. Oehmüller, who left nothing undone in their efforts to make the day the most successful ever held. Two special trains were chartered on the Great Falls line. The party returned home at 9 o'clock. Athletics were the feature of the day and prizes were awarded in 17 events. A delegation of prominent Baltimore florists were present at the outing.

That Burnham and Its Workings.

Many boilers are built a good deal on the tea kettle plan, and use only such heat as comes in direct contact with the surfaces immediately over the fire—the rest of the heat shoots out the chimney in dollar bunches.

The Burnham has the tea kettle and other forms of Cast Iron Greenhouse Boilers "beaten to a stand still." In the first place the Burnham surfaces directly over the hottest part of the fire are not flat like a kettle, but made in a series of deep

waterways with fire channels on each side, making more than three times as much surface for the heat to strike.

Then after leaving the channels, the hot gases pass up the side flue openings and travel back and forth three times between still more waterways that grab practically all the heat that is left.

Such a boiler squeezes every available bit of heat out of every pound of coal burned. Where is there another such greenhouse boiler? Send for prices.

SOCIETY OF AMERICAN FLORISTS THOSE CONSTITUTIONAL AMENDMENTS

Notice has been sent to the members of the S. A. F. of a number of amend-
ments to be brought up for considera-
tion at the coming convention. The
most important of these are the series
intended to make the members of the
board of directors elective and to make
the office of the secretary and treas-
urer appointive by the board of direc-
tors.

The present conditions are that the
board of directors consist of 11 mem-
bers, namely, the president, first vice-
president, secretary and treasurer, who
are of course elected each year, and
the junior ex-president who was elected
the year before. Those five members
can be said to be elected by the direct
vote of the members of the society.
The other six, which is a majority of
the board, are appointed. They are the
personal appointees of the president,
each president having the privilege of
appointing two, so that the society is
in the somewhat anomalous position of
having a majority of its board of di-
rectors not elected by itself, but the
personal appointments of various pres-
idents. The amendments, if carried,
will reduce the board of directors from
11 to 9 and make them all strictly
elective.

Theoretically, at least, this seems
more in accord with the general cus-
toms of this country and is the practice
in nearly all corporations existing in
this country. Practically all ordinary
corporations are compelled to elect
their board of directors by the law
under which they exist.

It will be noted that the amendments
also take away the voting power in
the board of directors from the sec-
retary and the treasurer. If these offi-
cers are to be appointed by the board
of directors it would certainly be an
exceedingly bad proposition to give
them a vote in the deliberations of the
body which appoints them and which
can remove them. It seems to the
writer that so long as the present
close scrutiny of the handling of the
funds is carried out, and the heavy
bonds are required from the treasurer,
that it really makes very little differ-

ence whether he is elected or is ap-
pointed.

The office of secretary, however, it
would seem, could be most wisely taken
out of politics. The secretary is the
chief clerk of the society; he is the
only person expected to devote any
great amount of time to its work and
should be placed in position so that he
would be dependent for reappointment
on the directors who are closely asso-
ciated with him and have a thorough
knowledge as to the quality of his
work.

It seems to the writer that it should
be the policy of the society to get the
services of the best man obtainable
and to keep him in office continuously.
A new man in the secretary's office
can not possibly pick up all the details
and be in position to give the society
the best work of which he is capable,
until he has had one or more year's
experience. There are also many times
when, if he carries out his duties with
sole reference to the best interests of
the society, he must offend some of
the members. If he is subject to re-
election by popular vote, the tempta-
tion to the average man will be to let
the interests of the society "go hang"
when it is a case of securing the sup-
port of a possibly influential man for
his re-election, as against making that
same man an active worker against
him. It would seem a reasonable propo-
sition that the best service from a sec-
retary will be secured by removing any
temptation for him to mix up in poli-
tics or identify himself with political
factions, which will certainly be the
case if the office continues to be an
elective one and the incumbent wishes
to hold it for any length of time.

The president is frequently a new
man who has had no service on the
executive board and is entirely un-
familiar with the working machinery
of the society; he is compelled to rely
largely on the knowledge and experi-
ence of the secretary, and both are
handicapped when the secretary is a
new man and lacking in experience.
A good secretary is like certain spirit-
uous liquors; if not compelled to con-

**Turn Your Surplus
Stocks Into Cash
By Advertising in the
Ready Reference
Department.**

stantly play politics, he is sure to steadily grow better with age. I speak at the present time from personal experience knowing how much (although I had seen four years' service on the executive board) I was compelled to rely on the thorough knowledge of the society's conditions possessed by Wm. Stewart, not only by reason of his great ability, but also through his long service. The contrast was impressed upon me most forcibly when recently I came to fill the position of secretary under President Traendly and to realize how my lack of experience in the details of the office made me less helpful to President Traendly and less useful to the society.

The amendment to Article 5 is with the intent of giving the society the privilege of saying when it shall meet, as well as where. Under the present conditions no matter how necessary it might be for the interests of the society to change the date of the meeting for even one week, it could not be done unless a formal notice to change the by-laws had been got up some months in advance and all the rest of the red tape had been gone through. The argument has been advanced that we ought not to make this change because it had always been the other way. This seems to me about as poor an argument, either for or against any proposition, as one could possibly bring up. I can not see why we may not as safely trust ourselves, when we are assembled in annual convention, to decide what time we shall meet as to decide where we shall meet. There will be nothing to prevent our continuing to meet at the same time in August as heretofore unless the majority of the society wish to meet at another time, and whenever the majority of the society wishes to change the date it certainly seems that we should give ourselves the privilege of doing so.

The last amendment contemplates the changing of the fee for life membership from \$25 to \$50. This has been repeatedly thrashed out and voted down, but it still seems to me that \$25 is an absurdly small fee for life membership and I feel quite confident in looking over the present list of life members that there are but few of them who would not have taken the life membership just as willingly at a \$50 fee as at \$25. W. N. RUDD.

NORWOOD, R. I.—Nathan D. Pierce's place consists of 30,000 feet of glass and he grows principally carnations, green goods and a very extensive line of small ferns, suitable for ferneries. Mr. Pierce has an up-to-date nursery of 10 acres and does an extensive business in this line. He has installed a new gasoline pump at his greenhouses on Pawtuxet avenue upon which he will depend for his water supply. The new apparatus is a powerful one and draws the water out of a well 85 feet deep, carries it along the surface for a distance of 300 feet and then sends it up into a tank 33 feet high. The capacity of the pump is 24 gallons per minute. The installing of the new pump does away with an old windmill which has been a familiar sight in that section for the past 40 years.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Cut Flower Express of the French Riviera.

There is no possible doubt whatever but that Paris is the greatest known outlet in all the world for cut flowers. The municipal flower markets of Paris alone, chiefly provisioned during the winter months from the gardens of the French Riviera, sold, in 1909, roses to the value of 1,500,000 francs, carnations to the amount of 2,300,000 francs, 5,000,000 francs worth of violets and 300,000 francs worth of mimosa, not to mention countless millions of blooms of the Roman hyacinth and narcissus which made a large part of the 200,000 individual shipments for the six months' season from Ollioules, in southern France, alone.

Chiefly these cut flowers arrived at the Halles Centrales by the "Rapide des Fleurs," as the special cut flower express of the omnific Paris, Lyon and Mediterranean railway is known,

The Cut Flower Limited of the French Riviera

from the Mediterranean coast towns stretching from Ollioules (the greatest of bulb growing centers) in the Department of the Var, just west of Toulon, to Vintimille and the Italian frontier.

Actually this flower traffic of the Riviera sprang up with the advent of Alphonse Karr, the "ecrivain-jardinier" at Saint Raphael something more than a quarter of a century ago, and his beneficent desire to develop an infant industry, not necessarily in the modern, up-to-date, systematized and highly organized way of doing things, but in a certain enthusiastic and sincere way in which many a great industry has been born. His idea was to make the floral products of the Midi known among the flower lovers of the capital, and, indeed, if possible, throughout the markets of Europe. It was from this early enthusiasm of Karr that the Paris public really came to cultivate its taste for the violets of Hyeres and Nice, the roses of Nice and Grasse and the carnations of Antibes and Ollioules.

Since the dilettante days of the author of "Guepes" the cut flowers of the Riviera gardens are to be found in the winter markets of Paris, London, Berlin, Vienna and St. Peters-

burg even, and the most progressive of the growers are dreaming (and it is to American enterprise and foresight that we look to to demonstrate that it is nothing but a dream, a cauchemar, perhaps) of invading Broadway and State street, for American prices look very good to the narcissus grower of Antibes who is content with say three francs and a half for 600 blooms, whilst New York ruling prices in November are perhaps \$2 per 100 for the same article.

The cut flower express had been in service during the winter months for some years when the present season (commencing October 25, 1909) saw No. 3832, as the train is officially known, specially manned with a crew of 10 whose business it is to sort out the packages enroute that no delay may be suffered when it comes to transferring and delivering them at Paris. It is the same sort of service as is rendered by the traveling mail clerks of the "cannonballs" and the "flyers" of America, with this difference that it is all package mail.

From Vintimille to Ollioules this "Train Rapide des Fleurs" stops at every flower-growing center for a distance of over 200 kilometers—Menton, Nice, Antibes, Cannes, Toulon, etc., when it runs express to Paris on a schedule which in speed is a near approach to that of a New York and Chicago Limited. Three times a week it stops at La Blancard, just outside of Marseilles, to take on one or two cars of "primeurs" (early vegetables) which may have arrived by boat from Algeria and Tunisia, but otherwise it runs without a stop to Paris, save as it becomes necessary to take on coal or water or change locomotives. The trade in primeurs, like that of flowers, is an important one for the grower, the dealer and the consumer alike and, now that the truck farmers of Mediterranean Africa have learnt the trick, new potatoes in January are no more a novelty than in June.

In all interpretations of the words the service is that of a "fast freight" if there ever was one, and 12-15 hours from the time the "Narcisses vrais" and the "Narcisses Tazette" were growing in the sunlit fields of Le Pradet, Hyeres and Antibes on the shores of the Mediterranean they may be bought as fresh as when first picked from the flower women clustered on the steps of the Madeleine or behind the Palais de Justice at Paris.

It is the hyacinths, carnations and violets that make up the bulk of the cargo of this floral train, and while statistics of the separate species are lacking one may well judge of the volume of the business from the following figures, the last available. Antibes sent, in 1909, 42,585 separate shipments to Paris and nearly 50,000 to Germany. From Hyeres over 40,000 went to England and over 50,000 to Germany. Cannes sent nearly 50,000 to Paris, considerably over this amount to England and appreciably the same to Germany. These figures were even exceeded at Ollioules—where the bulbs come from—for the season of 1907-08, when 128,506 individual shipments were sent by rail to

OLLIOULES FRANCE, WHENCE 200,000 INDIVIDUAL SHIPMENTS OF CUT FLOWERS ARE MADE TO PARIS, ENGLAND AND GERMANY IN THE SEASON.

England and 31,551 to Germany. The season of 1908-09 showed a small falling off but this was due probably to temporary local conditions rather than diminution in the demand or any just reflection on the quality of the Ollioules product or the prices thereof.

In the Department of the Var, the chief agricultural department of southern France (here there is a United States consular agency at Toulon through which the great bulk of the American purchases of French flowering bulbs are legalized by the certification of their invoices) there were nearly a million individual shipments of cut flowers during the season of 1908-09, with Ollioules and Hyeres in the first rank with something like 200,000 shipments each to their credit, tailing off with Le Pradet and La Garde with from 10,000 to 15,000.

Much of this vast traffic in cut flowers at a distance is made possible by the cheap and efficient parcels post service of the French government, when frail delicate flowers packed in the flimsiest of straw panniers and the lightest of pasteboard boxes, at weights varying from three to 10 kilos, are delivered throughout France at a uniform rate of 60 to 80 centimes and one franc, 25 centimes, for three, five and 10 kilos respectively. This is not a heavy transport burden to fall on either buyer or seller. The special care given these floral products of southern France by all classes of rail-

way and postal employees practically assure their arrival at destination in good condition.

The same line of development is now being put into operation on the Italian Riviera, where the growers of the Ligurian littoral, between the French frontier and Genoa, have recently been granted special quick delivery of their products in Turin and Milan, with an extension to Vienna, and certain Swiss and German towns as well, in serious competition with the French grower, be it remarked. The markets of London, Berlin and even St. Petersburg are all reached by the special cut flower limited each day during the winter season via Paris.

The chief qualification on the part of the grower for controlling the cut flower trade in France (or elsewhere where the flowers are to be sold in far-away metropolitan markets) is that the horticulturist shall be sufficient of an expert in matters of transport and market conditions to be able to take advantage of the naturally higher prices obtaining before the height of the season which, with regard to most open air grown flowers, cannot be prolonged beyond a certain well recognized period. The question of market and transport thus comes very early into the project.

Co-operation, to a certain extent, on the part of certain neighborhood growers, or an alliance or syndicate of

some sort is indomitably imposed if best results are to be obtained, leaving the individual grower all freedom as to prices and the manner in which his product shall ultimately be put before the consumer. It has been by a concerted appeal to the French railway and postal authorities that the transport facilities northward from the Mediterranean shores have been brought to such a satisfactory state. It was thus in the inception of the projects and it was the present year when increased facilities were demanded and granted, in the first instance when traveling sorters were placed upon the train, and in the second place when the time schedule was cut something between an hour and an hour and a half, thus enabling the London market to be reached six hours earlier than formerly, a circumstance which was appreciated more particularly with respect to market conditions than for any difficulties which presented themselves in the transport of the flowers because of the increased distance which they had to be transported.

This same "push all together" by the growers of San Remo, Bordighera and elsewhere on the Italian coast has enabled them to reach hitherto unexploited markets by new means and concessions recently offered by the Italian government railways. The parcels post, the efficiency and simplicity of its service and the modesty of its

prices, has done the rest. That this cheap and efficient form of transport is one of the great blessings of the French flower grower is not to be denied.

In France still further projects are in the air. So long as cut flowers from southern France are not a drug on the markets of London, Paris and other northern cities, even at the prevailing cheap prices, the Riviera growers will ever seek additional means of furnishing a still further supply and thus meeting any reasonable conditions which may present themselves. The output will be increased by "forcage calorific" (forcing under glass) and by chloroformization and etherification and cold storage during the period of transport will be made use of if found necessary to better present the flowers upon their arrival; when perhaps it will not be such a great step after all to place the violets of Nice and Hyeres and the carnations and narcissi of Ollioules on the marble tables of the florists of the Great White Way.

M.

Casket Covers.

One of the most elaborate floral pieces that passes through the hands of the retailer is the blanket or cover for the casket. To the uninitiated such an order oftentimes looms up as a mountain of trouble, when in reality it is just as easy as going down hill. The first thing necessary is to get the size, the length and width of the top and depth of the sides. Have the wire worker make a firm but single thick frame with meshes about two inches, of light wire, arched to conform to the top of the casket. Rest this on two boxes a trifle higher than the depth required and it is ready for decoration. Cover the frame with asparagus or smilax; no more is necessary, and then wire on the flowers. When the top is finished, add side sprays of green the required length, attaching them to the outside edge of the wire frame, and placing them one after another at regular distances so as to present a comparatively even surface. These are then covered with flowers in a similar manner to the top. Such an arrangement as this is easily transported, the sprays being brought up and laid over the top.

A simpler method is to make strands of green, strings of smilax or asparagus which will reach the full width and depth of the casket. These should be arranged evenly crosswise over the frame and fastened at the edges. A few short strands are added to cover the head and foot. These are then covered with flowers as before described. There are innumerable ways in which the flowers may be arranged; it is best in placing roses to attach them starting at and facing the outer edge and finish in the center with a band of lily of the valley. A pretty finish around the bottom is a fringe of lily of the valley, a few sprays being tied to each hanging strand with baby ribbon. An effective and easily managed blanket is made without a frame. Strings of smilax or asparagus the proper length to reach from one bottom edge of the casket to the other are placed side by side crosswise of the casket. They are held together and

made into a green sheet by means of strands of 21 to 23 wires.

These are wrapped around each string, running lengthwise of the casket weave and holding them the proper distance from each other. These lengths of wire should be about six inches apart. The ends, or head and foot, will require small separate sprays attached to the two outer strands. Such an arrangement when covered with the necessary flowers is very pliable and adheres closely to the form on which it is placed. Blankets have been made of silkline on which roses without stems have been sewed so as to completely cover the material. Such an arrangement runs into money, as does one of all cattleyas or double violets which are occasionally ordered by those who can afford them. Wire gauze is often used as a foundation, to which is attached the green and flowers by needle and thread or short pieces of fine wire. Some wire workers keep in stock adjustable forms that can be easily fitted to any size casket. These are made with openings for the closed case with glass in the lid. Usually when the casket is not opened the blanket is put in place on arrival, but where the body is exposed to view, as at most ceremonies, it is laid on at the final closing and accompanies the body to the cemetery,

where after the interment is finished it forms a most suitable covering for the grave.

Floral Palls.

Some of the richest and best of the retailer's work goes out in the form of casket covers or palls, and, it must be said, some of the poorest also. Making a good cover is expensive work, and it should not be undertaken unless a good price is forthcoming. In the best work a silk net foundation is used in place of the stiff heavy wire foundations that have long been used for the purpose. Casket covers made from such material can be draped naturally and effectively over the casket, and when the latter has to be moved the hands of the bearers are not brought into connection with stiff unyielding wire, but the soft yielding silk which looks very much nicer and is better in every way. Of course, the question of expense comes in here as it does everywhere when good things are needed, but in all but cheap work the silk net as a foundation is the only thing for a good artist to use.

The flowers and greenery to be used depend entirely upon the taste of the friends or relatives ordering and the season. In winter and spring, violet

STEAMBOAT WALKING BEAM IN FLOWERS.

Executed by Malandre Bros., New York, for the Funeral of the Captain of a Large River Steamer.

CASKET COVER OF ORCHIDS AND LILY OF THE VALLEY BY THE ART FLORAL CO., SAN FRANCISCO, CALIF.

palls are very suitable when expense is not an object. It takes many thousands of violets to make a full-sized cover, and there is a lot of work wiring the little bunches, drawing them through and fastening them on the back, but there are frequent occasions in the best trade when such covers are ordered, and when the price is right the retailer may well advise their use, for they are unequalled for richness, and no flower is more suitable than the purple violet. Very beautiful effects can also be had by using violets for the ground work of the cover and making a design such as a cross or spray of lily of the valley, Easter lilies, white carnations or other flowers for the center and other prominent places on it.

Southern retailers, when flowers are scarce, make a cover by wiring galax leaves closely all over the surface, and arranging clusters of flowers in the center and at the corners, not hard bunches, but pretty, loosely arranged ones with sprays of lily of the valley, narcissi, hyacinths, or some such flowers leading from one to the other. But one of the most commonly used foundations or ground work for a pall is made by wiring on strings of *Asparagus plumosus* closely together. Nearly any flowers are suitable for use this way, anything in short that will lie flat and yet make a good showing. Again very nice effects are had by using crosses or other arrangements of flowers in the center and at the corners, and connecting these with tracery of smilax and small flowers, not in stiff lines but naturally and prettily arranged.

THE accompanying illustration of a pall of cattleyas and lily of the valley shows what superb effects can be secured by the use of these exquisite flowers in the hands of a skilful designer. This pall was the work of the Art Floral Co., San Francisco, Calif., and was made for a recent funeral.

The Mission of the Trade Paper.

A paper read by Robt. Kift at the monthly meeting of the Florists' Club of Philadelphia, August 2.

If an interesting event occurs and one cannot be there and see for themselves, the next best thing is to read about it. We put on our long distance glasses, so to speak, and are enabled through the written story to be almost present, to see in our mind's eye the important features, and in addition have a record that oft-times would escape us, or perhaps be entirely forgotten.

THE PIONEER.

The trade paper, published in and for the interests of the florists, and kindred industries, the medium that enables us to do all this and more, came into life with the advent of the Society of American Florists in Cincinnati, 26 years ago. The "Pioneer" was, at first, a small sheet, and appeared daily, containing the doings of the convention: it was afterwards issued as a semi-monthly journal, devoted to the various branches of the flower and plant raising industries. From the first it was successful and full of interest for the wide awake men of the business. They sought in its pages the best thoughts of those who were leaders in their special lines, and were not above giving their experiences and helping, in this way, to further the work of their fellow craftsmen. In a short time the semi-monthly became a weekly, with a circulation that reached to every part of the country.

In journalism, as in every other field of human endeavor, there is competition, and in time others came forward offering their services and asking for an opportunity to show what they could do toward advancing the good work. From time to time the number of these publications increased, until at this date there are five in this country and one in Canada, all exclusively for, and issued to, the trade only. All have but one object, or mission, that of

furthering the business of the florists and allied interests, and each hoping to obtain a share of the reward that comes to every well planned enterprise. Not only have these increased in number, but their growth in volume and efficiency as they have catered to and received the support of the craft, has been most gratifying. Able editors have systematized the work, providing departments over which preside men who are well known experts in their lines. The rose, the carnation, the orchid, palms, ferns and other plants are treated by these specialists, in their various sections, in the most thorough manner, imparting information to the average grower that is invaluable.

ALLIED TRADES.

The very important matters of greenhouse building and heating, are handled by men of large experience, and no undertaking in this line that shows an advance or possible improvement but is described in detail for the information of the trade. Many successful men, in all branches of the business, whether from diffidence, or lack of time, cannot be prevailed upon to prepare essays or papers, but in some instances will submit to an interview, and in this way much valuable information is obtained, and spread broadcast that could not reach the craft in any other way. There is no question but that their efforts in this line have a distinct uplifting tendency. They present everything interesting, of an educational nature, that has merit. The papers that are read before the various conventions at their annual meetings, and at the monthly gatherings of the florists' clubs and horticultural societies are all given, and in many cases reporters are present, even at the minor events, to see that nothing of importance transpires that is not recorded and written up for the benefit of their readers.

ILLUSTRATIONS.

Photography, which now plays such an important part in journalism, enables the writers to illustrate their articles, in addition to their word pictures, with an image so natural that it is at once satisfying. If a new greenhouse structure is described, the photograph, so real, shows more than a written story. Should the subject be a new rose or carnation, the intelligent grower will be able to judge at once of its merits, or demerits, from the photographic reproduction. Something extra fine appears in the market, the product of a modest grower; he is hunted up, the fact that such results may be obtained is given to the interested public with probably an illustration to prove it.

One of the strong features of the trade journal is to be found in its social columns. Here is a record of events of a more or less personal nature. "All work and no play makes Jack a dull boy" and here the "Boys" are followed in their various outings and social gatherings in a manner that makes very pleasant reading for all of us. The passing away of those whose life work has been one of devotion to their chosen profession, and who have been more or less a factor in its progress, is always fully chronicled and a record made of their achievements.

ADVERTISEMENTS.

Probably the most valued of all the features of the trade journal is its advertising columns. Here in an open market the best products of the country are displayed. Are you thinking of building? a dozen different firms are there with the materials, anxious to furnish plans and estimates, a selection is made and almost before you realize it the house is up. Your heating plant is defective, or worn out, the active boiler men are seen with generators of all sizes and patterns that are more than ample in their variety, and at such prices and terms that a bargain is soon made.

It will soon be time to plant; a new variety is to be tried, or there is not enough of your own stock of an old favorite to fill the houses. A glance over the market shows a surplus here and there, and enough is soon picked up for the work. Is it bulb time? The stalls are seen, piled high with fresh stock, just imported from the bulb growing centers of Europe and the orient. Quotations of prices and quality are fairly shouted by the eager tradesmen, so anxious are they for your valued order. The center of the market is taken up with palms and ferns. What a wonderful assortment is seen, all kinds, all sizes, at all prices, spread out before the buyer in such a competitive way that the wise man, picking out the bargains, jumps in quickly and makes a selection while the stock is full and complete.

The store-keeper is in need of supplies. He turns to the stalls in the market and just what he wants is seen displayed or is hurried to him from the factory by the first express. Has he a hurry up order for flowers, and nothing in sight around home, he is in a quandary, but a look shows him a score of men in this wonderful market standing, 'phone in hand, and the box of roses, that so much depends upon, is off to the depot in a jiffy. And so it goes, all along the line. The

hundred and one things are to be found in quantity in this greatest of all markets. There is no compulsion to buy, but if you see what you want and the price is right, you take it. Strange to say there are stall-holders in this market who declare it does not pay. Well, we have all seen stocks offered in such a way that attracted few, if any, buyers. Most goods have to have extraordinary merit to sell themselves. To secure attention the display must be bright and attractive, it must be changed frequently to catch the eye. Goods allowed to get dusty

Lilium Hansonii.

and shop worn are only bought by people who need them and cannot at the time get anything better. Few men will spend their money without being sure of receiving fair value in return, but many will eat up valuable advertising space and secure little or no nutriment whatever. Buying and selling in this market does pay, as is evidenced by the men who are seen there constantly and who are recognized as leaders in their special lines. My treatment of this subject may seem

a trifle too ideal, but the facts, as to the results, are not in the least exaggerated.

The publishing of a trade paper, like other ventures, requiring capital and good business management, depends for its success on the measure of its service. To get the best, the best must be given, and in the efforts to produce such results the standard is constantly being raised. Each achievement, however great it is considered at the time, but opens the way for something better. The work is never done. Each issue is complete in itself, and it requires more effort than the average reader realizes to have it on time and ready for his weekly mail. Every number received is a mental treat, to be read at the time and filed away for future reference. Unfortunately their value in some cases is not always appreciated, and we see them used to line boxes, wrap plants and put to other plebian purposes. Copies of the weekly issues bound in annual volumes present a history of the business of the country that is invaluable for reference and highly prized by those fortunate enough to have them. We can look back for 25 years and see the growth and expansion of the business, which has indeed been most wonderful, and when the various agencies that have contributed to this advancement are considered, we feel sure that the trade journal will be found to have been one of the most important factors.

Cyclamen Eileen Low.

Stuart Low & Co., Bush Hill Park, London, Eng., announce this very striking and beautiful novelty in cyclamens. Many years ago one of the growers of the old firm of Hugh Low & Co. found a cyclamen with crested petals and after considerable time and trouble had been spent in fixing this it was sent out under the name of Bush Hill Pioneer, the creasing having broken into several colors and shades. In Eileen Low another step forward has been made. The ground color of the petals is described as a lovely shade of "rose du Barri," but the great attraction lies in the distinct blush white margin of the petals and the blush white crest. Messrs. Low have long been aiming at this combination of white crest on colored petals and in Eileen Low, on which they have been working for many years, they have certainly succeeded beyond expectation, as they have it perfectly fixed. The crested cyclamen does not appear to have been much grown by our market plant men, but when the undoubted beauty of the flowers is taken into consideration and the fact that they last longer there would seem to be good reasons for taking it up. We know the class of flower that Messrs. Low & Co. have been working on for years and have no hesitation in recommending this newcomer.

COLUMBUS, O.—John C. Moninger & Co. of Chicago, have secured the contract for the construction of the greenhouse at the Ohio State School for the blind, after plans and specifications by architects Stribbling & Lum.

UTICA, N. Y.—The Crowe-Martin Co., has been incorporated, with capital stock, \$5,000, to grow flowers, shrubs, plants, etc. The incorporators are Peter Crowe, Henry G. Martin and Flora Martin, all of this city.

LILIUM TIGRINUM NATURALIZED BY THE ROADSIDE IN NEW YORK.

Notes on Lilies.

Lilies take first rank amongst the most noble and beautiful perennial flowers that decorate gardens. During recent years a number of new species have been discovered, and a succession of those handsome flowering plants can be had in bloom from about the middle of June to the end of September. It is true that a number of the different species are short-lived in cultivation, notwithstanding the most studied, careful treatment given them. In some gardens a number of species are observed to be much more lasting and persistent than the same species are in other gardens where the cultural conditions appear to be identical, so that it is frequently difficult to say why they are not similarly perpetuated.

The greatest bane to lily culture, however, is the lily disease, known to science as *Botritis cinerea*. In some sections of the country this disease is so bad that it has almost deterred cultivators from growing them. It usually manifests itself by a brown spotted condition of the leaves and the whole stem soon rots away. Sometimes this does not occur until the stem is fully developed and again it will appear when the stem is half grown, and decay soon follows. *Lilium candidum* seems to be the greatest sufferer from this disease and it frequently attacks *L. speciosum* and *L. auratum*. An English grower of lilies has stated, according to Miss Gertrude Jekyll, that he conquered this disease by digging up his bulbs when they had gone to rest and shak-

ing them up in a bag with flowers of sulphur. By this process, of course, the sulphur got in amongst the scales, and as the hostile action of sulphur on many fungoid diseases is well understood by most gardeners, it is quite likely this is a good remedy.

Nearly all lilies require a deep moist soil, and the ground shaded by mulching, or the overhanging branches of shrubs, to keep their roots cool. There is no better situation for growing lilies than peat or humus beds specially prepared for rhododendrons and azaleas. The effect of *L. speciosum*, *L. auratum*, *L. croceum* and *L. Humboldtii* in bloom amongst rhododendrons and azaleas is most satisfactory to the critical artistic eye. With the exception of *Lilium candidum*, which should be planted about the end of August, most lilies do well if planted late in the fall or in early winter. As it is frequently mid-winter before Japanese lilies can be obtained, we have excellent success by potting them, and placing them in a cold nursery cellar where the frost is excluded, or in a frostless sunken frame, where they fill the pots with roots and we plant them out about the end of April. The average depth for the crowns of most lilies to be planted beneath the soil should be about six inches and those that root on the stems above the bulbs should be planted deeper.

L. auratum, from Japan, is one of the most royal looking of all lilies. The wide spreading flowers, with the segments much reflexed, with white ground and splashed with rich deep yellow, and spots of purplish red are

exceedingly handsome. According to the size of the bulbs, the stems grow to a height of from three to ten feet surmounted with a raceme of from five to 30 flowers. They vary considerably in time of blooming, some plants flowering with us on July 11, but they are mostly in bloom about the middle of August, continuing to September 1.

L. Bolanderi, from California, has funnel or bell-shaped flowers about two inches across and two inches long, brownish red outside and deep red inside with maroon spots; it grows about two feet high. It is in full bloom about June 25.

L. Brownii (*L. Japonicum* var. *Brownii*) is a choice and beautiful flowering lily. The tubular flowers with wide spreading segments, and abruptly reflexed at the apex, are from four to five inches long, brownish red outside and white inside, and borne on stems three to four feet tall. It is in full flower here about June 18, and gives good promise of being a good garden plant.

L. Columbiana, also from California, is a small, slender growing lily one to two feet with nodding blossoms one and one-half inches long and wide, deep orange yellow, dotted with dark maroon spots and in full flower about July 1. An interesting lily, but perhaps of botanical interest chiefly.

L. croceum, from mountainous parts of Europe grows four to six feet and has flowers of the most intense orange red. The upright blossoms are produced in 8-15 dense racemed clusters, and it is in full flower about June 28. This beautiful lily is more virile and

Lilium Auratum.

Growing Among Rhododendrons at Highland Park, Rochester, N. Y.

persistent than a great many of its associates in cultivation. We have never seen it attacked by disease,

L. candidum, commonly known as the Madonna lily, with its large showy racemes of pure white flowers, is one of the most beautiful of lilies. But, as above stated, on account of its liability to disease, its cultivation has been much under the ban, which is very unfortunate. It was a common sight at one time to see glorious groups of it in bloom in cottage gardens. Barring its liability to disease, it is one of the most easily cultivated of lilies and is usually in full flower about the first week in July.

L. Canadense is a common native of damp, occasionally boggy land, in rich alluvial soil. The drooping flowers, with the segments recurved, are orange red. It is well worth cultivation and persists well in a peat bed amongst rhododendrons. It flowers in July. *L. elegans incomparabilis* is a handsome form of this species, and has upright dark and showy flowers and is in bloom about July 4. This species is from Japan and a great many forms of it are known under varietal names in gardens.

L. elegans Wallacei (*L. Wallacei*) is another handsome form of this species and has upright salmon orange blossoms and flowers about August 10. Both of these lilies do remarkably well in peat amongst ericaceous plants.

L. Grayi, from the middle southern states, is a small growing plant and produces a few terminal flowers about two inches long, dull orange yellow inside, and brownish red outside, and flowers about July 28. It has more botanical interest than garden value.

L. Japonicum roseum (*L. Kramerii*) is a very beautiful lily from Japan, with blush or pale rose colored blossoms, but in some forms they are whitish. It grows from two to three feet high and is usually in bloom about June 25. It does remarkably well in peat amongst azaleas, on a slope, where it is frequently watered, and where the drainage is naturally rapid.

L. Kelloggii, from California, grows about two feet tall. The flower seg-

ments are decidedly revolute, whitish pink inside, with numerous small maroon spots and yellowish towards the base, about two and one-half inches across and two inches deep. This is a most interesting lily, but perhaps will only appeal to connoisseurs.

L. maculatum (*L. Hansonii*) from Japan, grows from two and a half to three feet tall, but it is said to grow considerably taller in some situations. The segments are turned backwards, and are deep orange yellow, and prominently spotted with purplish maroon; the flowers are quite thick and fleshy. So far this lily has done very badly with us, where it has been growing in peat amongst rhododendrons. We expect to get a fresh supply, and will give them a little different treatment.

L. Parryi, from California, is a lily of much refined beauty. The trumpet shaped blossoms with the segments slightly reflexed at their terminals, might be described as lemon yellow and prominently spotted with chocolate-red. It grows with us from two to

Lilium Fortunei.

three feet, but it is said to grow much taller in California. It is in flower about July 3.

L. pardalinum, a Californian lily, known under the common name of leopard lily, is a fine all-round garden species, and responds remarkably well to cultivation. It usually grows about four feet, but where it is perfectly at home, it will attain a height of six to seven feet. The wide spreading flowers, with much reflexed segments, orange yellow, or deep orange, with numerous, conspicuous purplish crimson spots, with the stems often carrying from 15 to 20 flowers, render this lily a fine garden plant.

L. Philadelphicum, a common native of swamps or low moist lands in partial shade throughout the northeastern states and Canada, has upright wide spreading flowers; red to orange red, with purplish red spots. It grows from two to three feet tall. It responds easily to cultivation.

L. puberulum, from California (*L. Humboldtii*), is a lily of glorious

beauty. It varies in height from three to eight feet. The large flowers, when fully open, have the segments reflexed or turned backwards to the base of the blossoms, which is true of all the group of Martagon lilies, to which this belongs. The flowers are deep orange red, with prominent maroon spots. The stems usually carry 7-12 flowers which are much spread apart on long peduncles. It is in full bloom about July 7, and does well with us in peat amongst azaleas.

L. rubescens, from California (*L. Washingtonianum purpureum*) is slender in habit. The flowers in bud have a rose-tinted appearance and when open are rosy or pinkish purple. It is well worth cultivation and is in flower about June 28.

L. speciosum in its different forms is perhaps the best known lily in cultivation. It is probably the most lasting and persistent of Japanese lilies, excepting when attacked by disease, and does very well in rich, moist, deep soil. The three best varieties are Alba, with white flowers; Rubra, with pinkish red flowers, and Melpomene, with much redder flowers than the last. They come in bloom about the middle of August and continue to flower until towards the end of September. For cut flower decoration, they are well adapted, as few lilies can equal them in lasting qualities.

L. sulphureum, from Burma, has not been many years in cultivation, but it is most certainly an elegant species. The flowers are from six to seven inches long and from five to six inches across. The outside might be described as tinted brownish salmon; the inside creamy white. Three flowers are produced on the stem terminals. We have only a few bulbs of this beautiful lily, but we are immensely pleased with its promising behavior. It is in full bloom about August 12.

L. superbum, the well known Turk's cap lily, is not an uncommon native in rich swampy soils. The flowers, in which the segments are much reflexed, are quite typical of the Martagon group to which it belongs. The blossoms are reddish orange to orange crimson, and prominently dark spot-

Lilium Speciosum Præcox.

ted. A strong stem will carry from 25 to 30 flowers. This lily varies much in height, often not exceeding four feet, but under conditions that exactly suit it, will grow from eight to ten feet.

L. tenuifolium, the Siberian coral lily, is a dainty and pretty species. It is slender in habit and seldom ex-

Gardeners' Chronicle. However, it is now possible, by the retarding process, to have *Lilium longiflorum* and *L. speciosum* in bloom at the festive season, and a species that flowers naturally then does not gain special attention.

For many years *L. Neilgherense* was looked upon as supplying the last lily

first season, but not afterwards; in fact, *L. Neilgherense* never proved amenable to cultivation. It appears now to have become very scarce in its native habitat as bulbs are seldom imported.

L. sulphureum, however, may frequently be seen in a thriving condition. As might be expected from a native of Burmah, it is too tender for outdoor cultivation in most parts of the country, for even if the bulbs stand the winter, the flowers are developed so late that they do not expand properly. It is, therefore, as a greenhouse lily that this species must be recommended, as it responds readily to a little artificial heat during the flowering period. Though apparently the bulbs are collected and not cultivated specimens they are firm and compact, and they travel well. The large bulbils so freely produced in the axils of the leaves have, no doubt, a good deal to do with the regular supply of bulbs.

Nature's Planting.

When planting our flower gardens we rarely plant as thickly or mix things up as thoroughly, as nature does in her wild planting. A writer in the Garden Magazine notes that in a single square foot of prairie sod he found five shooting stars, one purple rudbeckia, six spikes of phlox, three wild hyacinths, one aster, five clumps of blue-eyed grass, two clumps of yellow star-grass and one clump of bird's-foot violet besides other unrecognized weeds. Certainly plants can grow and thrive under conditions that would be thought anything but ideal in a flower garden. From what we know of selective absorption by plants it seems likely that a variety of plants have a better chance of growing in close proximity than a pure stand of a single species. Possibly we could plant our flower gardens in this way with good results.

LILIUM AURATUM.

ceeds two feet in height. The blossoms are nodding, rich deep scarlet outside and inside. It is easily cultivated in any cool rich moist soil. It flowers about June 25.

L. testaceum, the Nankeen lily, is generally supposed to be of hybrid origin. This lily has long been a favorite in gardens, and its nodding, creamy white blossoms, on stout stems from four to six feet high are remarkably attractive. It unfortunately shows a marked tendency to be attacked by the dread lily disease with us, and a colony we had of it for a few years, gradually dwindled away until last year, when not a single one appeared. We shall, however, plant it again. Its cultural success is worth contending for.

L. tigrinum, the well known tiger lily, which has long been in cultivation, but originally came from Japan and China, is perhaps the most easily grown and persistent of the whole genus. We often see it in fine condition in cottage gardens in cities, and in farmer's gardens in the country. The nodding bright red flowers, on stems three to five feet high are very showy. There are several distinct forms of this lily; Fortunei is perhaps one of the most beautiful.

JOHN DUNBAR.

Lilium Sulphureum.

Large numbers of this striking lily are now being imported, and, in the days before the retarding of lily bulbs became general, the species would have been exceedingly valuable, owing to its late-flowering qualities. Its proper season of bloom is usually considered to be summer and late autumn, and I have had good flowers at Christmas, says a correspondent of the

flowers for the season, and in the period between 1880 and 1890 considerable importations reached this country. These imported bulbs met with a ready sale, for they could, as a rule, be depended upon to flower well the

ORCHID NOTES.

Seasonable Notes on Orchids.

Many engaged directly or indirectly in the florist business have a chance for a vacation from their labors during the heat of summer, but not so with the florist who has lately added orchids to his list and intends to look after the same himself. He must at least keep plodding on through heat and cold, for this is the season when the foundation is laid for good results to come later on. Cattleyas, being the most useful and prominent, will need much attention. The growth of *C. labiata* is about finished and it will pay to go through the batch and set the plants over, give them more room to admit air, and tie up all growths to small stakes or to the old bulbs. This gives the new bulbs a chance to ripen up well and will be the means of saving many flowers that might come deformed and therefore unsalable. As the days shorten less watering and syringing will be needed. Admit a trifle more air, and gradually lessen the amount of shading. Try to produce that light olive green on the foliage that is most essential to good flowering. The same treatment may be given *C. Trianae*, although this cattleya takes a few weeks longer to come to maturity. Avoid over crowding, as more money will be made at less expense by endeavoring to make every plant produce its full complement of flowers, a fact that is only too often overlooked in orchid growing. Naturally newly imported stock receives all thought for the time being and to make room the older plants are pushed up together when the reverse ought to be the case, and still the cry, "Orchids deteriorate." Have they a fair show? Indeed, no. *C. Schroderae*, *C. Mossiae* and *C. Mendellii* will still need a lot of water. These are growing very fast and will want spacing over; at the same time tie up all new growths. Often in going through the plants like this, one will be found to be affected with scale. It is a good plan to dip the head of the plant in water and, with a small paint brush, the scale will be found to rub off easily, while the leaves and bulbs are wet. *C. gigas* and *C. Gaskelliana* are now resting and will only

need syringing daily and watering once in a while, but if any plants need re-potting do it now just as the new roots are pushing from the last made bulb. It is unwise to pot all the plants the same year, for very often they do not bloom so well the first year after potting.

Dendrobium nobile and *D. Wardianum* will now need much more air and water, but *D. formosum* and *D. Phalaenopsis Schroderianum* need a sunny position in a warm house to grow them well. They all delight in syringing but none will stand to be in a saturated condition all the time. *Phalaenopsis* are now making their second leaf, which owing to the unusual hot weather is earlier than usual; many plants will doubtless make three leaves this year. While these plants delight in having lots of heat, shade, and moisture too much is bad for them, so during what is known as dog day weather it is always safe to keep them drier at the root. Twice a week is

often enough to look over them. *Oncidium varicosum* and *O. tigrinum* will soon be showing their spikes and will need watching for small snails which devour the spikes as soon as they appear. The only safe way to get rid of them is to hunt for them after dark with the aid of a lamp. These plants grow well with cattleyas, but if a place is at hand that can be kept cooler so much the better, but do not give them too much shade. *Oncidium splendidum* requires a warm house with plenty of sun and enjoys the syringe at least once a day, but see that the roots are not kept too wet or the new bulbs will rot off. *Cypripedium insigne* and *C. Leeanum* will very soon be pushing up the flower spikes and want attention. Yet these are often pushed away in frames or some odd corner where practically nothing else will grow for the summer. The results are short stems and flowers and the consequence poor sales. It pays to bestow some care on them, for they always come in useful after Christmas, their keeping qualities are so good. Give them plenty of light with shade from the sun, water thoroughly when needed, and a daily syringe, then good flowers with long stems will be the result.

W. DICHSOS.

Dendrobium Nobile.

There are a few species of orchids that might well be called standards for they are seen in practically every collection and are the most useful of their kind. *Dendrobium nobile* might well be cited as an instance of this. Let any orchid grower of experience look back over his career and it is probable that he will not be able to recall a single instance of an establishment where orchids were grown that *Dendrobium nobile* was absent from while, with the exception perhaps of a few *cypripediums*, it is often the only species cultivated. *D. nobile*, as a species, is very variable; there are some varieties that are far superior to the original type and inferior ones also turn up occasionally among importations, but in an experience of more years in orchid growing than we care to look back upon we have never come across a really poor *nobile* or one that was not worth growing. *D. nobile* has proven

Lilium Tenuifolium.

Grown by E. S. Miller, Wading River, N. Y.

HOLTON & HUNKEL'S GREENHOUSE PLANT AT BROWN DEER, MILWAUKEE, WIS.

FINE SPECIMEN DENDROBIUM NOBILE WITH 1,300 FLOWERS.

one of the most potent in the hands of the hybridists and nearly all of the finest of the early hybrids had it as one of the parents. Crossed with *D. aureum* it gave the beautiful *D. Ainsworthi*, one of the earliest if not the earliest of the English crosses and a free flowering beautiful plant of great value, while since then hybrids innumerable have been raised. Among the variations from the type we have such beautiful things as *D. nobile nobilius*, a deeply colored form with large showy flowers; *D. nobile Cooksonianum*, an extraordinary variety in which the color of the lip is reproduced on the petals, and the lovely albino *D. nobile virginalis*. These may be called the extremes of color variation in this species, but there are many intermediate forms and all are beautiful.

The culture of this fine old orchid is of the simplest kind. It must have plenty of heat and moisture while growing, a thorough ripening in late summer and fall and a decided rest in winter. In early spring growers sometimes make the mistake of trying to rush it along in heat and moisture, thinking to get the plants into flower early, but this usually results in the nodes that should have produced flowers getting away into growth with the consequence that no flowers are produced. A careful grower increases the heat in spring gradually after the winter's rest and holds back on the atmospheric moisture, consequently the nodes swell slowly and naturally and perfect flowers are produced instead of the abnormal ones or none at all that are induced by the forcing treatment.

Some of the finest plants of *Dendrobium nobile* ever grown have been

produced by what is termed the pruning system. After the flowers are past the whole of the growth is cut clean away, leaving the bare stems about an inch or so in length above the compost. The plants are then placed in a brisk moist heat and start to grow rapidly, finishing up their stems early, which are then ripened by exposure to sun and air, rested and flower freely, the pruning then being repeated. This plan is especially worthy of consideration by growers for cut flowers as the latter sell better when the growth is cut with them than if removed singly or on short stems. The wood growth cut away in pruning may be used for propagating by laying it in pans or flats of sphagnum moss and keeping these always moist in a warm house. After a few weeks young growths push from the joints all along the stems and later produce roots. When they commence to root they may be cut up, either singly or in short lengths containing three to five eyes, and potted singly. These, if grown on rapidly, will make nice plants the first year and arrive at flowering size the second. Incidentally it may be noted that plants produced this way are always healthier and stronger in growth than those produced by dividing up old stock. The other cultural details necessary for *D. nobile* do not differ much from those for other species and have frequently been referred to in these columns.

WHEELING, W. VA.—W. D. Mathews has purchased a plot of land on the south side and will erect new greenhouses thereon removing his business from North avenue to that location. Market Gardeners.

Cypripediums,

Cypripediums, taken as a whole, form probably the most distinct genus of orchids in existence and anyone with the merest smattering of orchid knowledge can easily pick them out from any other kinds. So very distinct from all others are they that Darwin in his "Fertilization of Orchids" wrote: "An enormous amount of extinction must have swept away a multitude of intermediate forms and left this single genus as a record of a former and more simple state of the great orchidean order." As a general rule they are easy of cultivation and present a flowering return that well repays the little trouble necessary in their cultivation. The flowers last an extraordinarily long time in good condition and it is possible to use some of them—notably the *insigne* and *barbatum* forms and their hybrids—again and again for table decoration and similar work. Their many good qualities, in short, render them extremely useful for cutting and they will doubtless be more grown for this purpose than they have been in the past. No other genus has so well repaid the hybridist for his labors and we have such an enormous number of hybrid forms artificially raised that they puzzle the most expert and nobody can be said to know them all.

Cypripediums as a general rule like a certain amount of loam in the potting compost and in this way come nearer in their likes and dislikes to the ordinary greenhouse plants than most orchids. As a general compost, two parts of loam to one part of peat

CYPRIPEDIUM SELLIGERUM MAJUS.

and one of chopped moss is suitable, the whole being lightened by the addition of finely broken crocks or charcoal. Some growers use sand and are successful with it, but we have never cared for this material for any orchids as it silts down through and clogs the drainage as well as fines the soil. If any is used it should be sharp, coarse sand, not the fine washed roadside, river or lake sand used for propagating. When potting is in progress the whole of the old compost should be shaken or washed out from among the roots and all old or decayed ones cut away. Those remaining should be well spread out when placing the compost so that this runs down between them. The crowns of the plants should be kept a little below the rim of the pot as in ordinary potting, not raised as is usual when potting epiphytal and pseudobulbous orchids generally. Again, when the potting is finished, the compost can be watered at once; there is no need of waiting as with orchids generally, as the root spongioles of cypripediums are stronger and not so easily damaged by moisture as those of epiphytal orchids. This ability to take up moisture at once rapidly re-establishes the plants in the new compost. As to temperature there are a few that require considerable heat to do them well, but as a general rule a shady position in the cattleya house will be the best and most suitable for them. The few kinds named below are among the best for cutting, but, as indicated above, there are great numbers of hybrids and varieties all of more or less value.

Cypripedium Argus is a native of Luzon in the Philippines and has beautiful tessellated foliage and flowers nearly three inches between the points of the upper and lower sepal. The dorsal is white with greenish lines and a purplish stain at the base, the lip brown streaked with greenish and

purple. It is a variable kind with regard to color. *C. barbatum* is one of the best known and more grown probably than any other species with the exception of *C. insigne*. The foliage is dull green, prettily marbled with a deeper green. The flowers stand well up and the lip is a deep port wine color. The dorsal is greenish at the base, white above with lines of deep purple. *C. barbatum nigrum*, is a very beautiful variety, darker in color than the type and usually slightly smaller. There are many

other varieties. *C. callosum* is a magnificent species with an immense dorsal sepal and, though larger than *C. barbatum*, a good deal like it in general appearance. There is a beautiful albino of this species, *C. callosum Sanderæ*, from which all tints save green and white have disappeared, but it is rare in cultivation. *E. Curtisii* is a fine cypripedium and has been used as a parent with excellent results, such beautiful hybrids as *C. Chapmani* and *magnificum* having sprung from it. Not unlike *C. superbiens* in general appearance it has a broader dorsal sepal, shorter petals and a longer lip.

C. insigne is certainly the best known and most widely grown cypripedium in existence and the most useful for cutting. It thrives in any ordinary greenhouse or frame if the atmosphere is moist, and flowers freely every year with very little attention. Besides the well known type, there are varieties with more white in the dorsal sepal, such as *Chantini* and *Maulei* while the most beautiful of all is the true *Sanderæ*, the flowers of which are a clear primrose yellow, with a white apex to the dorsal sepal. This fine variety was for years extremely rare but in recent years some plants of it have been imported and others raised from seed by skilled orchidists. *C. Lawrenceanum* is another showy and beautiful cypripede, the largest in this section of the genus and like a glorified *barbatum* in appearance. This too has a fine albino form, *Lawrenceanum Hyeanum*, of which the dorsal is the purest white with green veins running through it vertically; the lip is pale green with deeper green venations.

C. Spicerianum is a beautiful thing with a pure white dorsal sepal except

CYPRIPEDIUM LEEANUM.

for a median line of crimson purple and a green blotch at the base; the lip is brown tinged with purple. This too has been used with great success by hybridists, the beautiful *Leeanum*, a cross between *Spicerianum* and *insigne* being a case in point. *C. superbians* is a beautiful old species of the *barbatum* group and although well distributed through orchid collections, it was said that the whole of the plants in cultivation up to a few years ago were the progeny of two plants introduced into England away back in the fifties. Two other useful old species are *C. venustum* and *C. villosum* and with them our list may well close. We have mentioned none of the South American section of the genus which is sometimes called *selenipedium*. These have flowers that open successively along the spike, not single (rarely two) flowered stems as in those mentioned above. There are some very beautiful things among them but they are not much grown for cutting in this country.

Big Price Paid For An Orchid.

London, August 6.—If one morning the marriage columns of the daily papers had announced the wedding of *Crispo Harry Anum* to *Rossi Rubescens* no particular notice would have been taken of the event. Yet their offspring has been sold at the Royal Horticultural Society's show at Holland House, Kensington, for \$2,625.

The name of the promising child is *Odontoglossum Smithi*, and it is a particularly beautiful garden hybrid orchid. *Baby Odontoglossum Smithi* was surrounded by an admiring crowd. Its proud owners were almost tired of pointing out the expensive infant, with its long, slender stalk bowed and graceful lily-like blooms in shades of magenta. Another expensive orchid was *Cattleya Mendelli alba*, a pure white variety, with a throat splashed with gold. This was sold for \$1,300.—*New York American*.

Chrysanthemums and Geraniums Infested.

ED. AMERICAN FLORIST:—

Can you tell us the disease or insects which have infested our chrysanthemums? The chrysanthemums are indoors while the geraniums have only been infested since being planted outside. Also kindly tell us of an easy remedy to destroy the pest.

C. H. P.

The leaves on arrival were dead and dry and we found but one insect, the strawberry thrips, *Euthrips tritici*. This is not rare and attacks a great variety of plants. We are somewhat doubtful, however, if it is the real cause of injury, because of finding this single specimen. The same appearance of leaves of chrysanthemums might be due to the work of either red spider or aphides or plant-lice and we are inclined to believe that the main cause of the trouble is due to red spider. The geranium is perhaps injured by the same creature, but no specimens are present. The geraniums are also affected by disease. C.

CHICAGO HEIGHTS, ILL.—G. A. Weberg is building two new houses, each 25x150 feet, Foley material.

THE ROSE.

LOOK over benches newly planted with cut back stock and take out any dead plants, filling their places with others reserved for the purpose.

NOVA ZEMBLA is a beautiful new white sport from Conrad Ferdinand Meyer and, like its parent, is of the rambler type and should not be summer pruned. The tips of the shoots may be pinched in late September or October to plump up the eyes and insure a good break of young shoots.

Current Work.

The work in the rose houses from now until September 1 will be divided between cultivating, tying and disbudding. Cultivating must be done every week and before stirring the beds the plants should be cleaned carefully. When cleaning the plants remove all manetti growth as many of the shoots from the manetti may be overlooked when disbudding and it is always a good plan to systematise the work to save time and to be thorough. This can be accomplished by cleaning all the plants first, then go over them carefully and remove manetti growths

NEW TEA ROSE LADY HILLINGDON.

From the Gardeners' Magazine.

Go carefully over the grafted plants in the benches occasionally and rub out any shoots of manetti that may be starting before they get strong enough to need the knife. After cutting they almost invariably start again but if rubbed out when young that is the end of them.

Rose Lady Hillingdon.

The illustration herewith shows the new rose, *Lady Hillingdon*, which is highly thought of in England, as shown by its receiving an award of merit from the Royal Horticultural Society when exhibited by Lowe & Shawyer of Uxbridge on March 8. It is said to be very suitable for forcing and has long stems and handsome foliage. The flowers are large, full, with broad petals of a pretty shade of yellow.

if the plants are grafted; follow this by cultivating or disbudding and then make tying a special bit of work. Handling the work in rotation this way will be found a very satisfactory method.

A great deal of care should be taken when disbudding the young plants—merely snipping of the buds will only cause the plants to make a lot of undesirable twiggy growth, whereas if the buds are removed by cutting back to a firm eye the resulting growth will be clean and strong. The young stock should be gone over every week, removing the buds about the time they begin to show a little color or a day or two earlier. Old plants that have been pruned back for carrying over will have to be carefully disbudded also, especially *Richmond* and the *Killarneys*,

as they usually throw a number of short-stemmed flowers when they make their first growth. And, by the way, this first growth coming on the hybrid teas may look rather discouraging as it is usually rather spindly, but if the soil under them is good and they are watered carefully (care being taken not to drown them out) they will send out some fine growth later. It would be advisable to let the buds show considerable color on the old carried-over plants before removing them and as suggested above cut back to firm plump eyes always.

When tying either the young or old plants cut out any turgid growth or spidery foliage and tie each growth separately but do not draw the plants in too much so as to exclude a free circulation of air; by tying each growth separately one can thin out any undesirable growth later on without disturbing the rest of the plant. If the roofs need repairing do not delay attending to this work. Drips and leaks spoil many plants and by this time everything in and around the rose house should be in good repair as from now on to have the best results the plants will require constant attention. Do not disbud the Beauties until they show color, then do not be afraid to cut back to good eyes. Beauties planted in May should now be throwing up some good canes but for the benefit of the plants do not allow any more flowers to come in than can be readily sold. These early planted Beauties will be benefited perhaps by a light mulch of thoroughly rotted cow manure or half cow and horse manure well mixed. This should be applied after cultivating ceases, more to protect the roots than to furnish nutriment to the plants and should for this reason be used sparingly.

This is the correct time to prepare the manure for top dressings later on and many of the very hottest days the employes would welcome a few hours' outside work and as there are many little odd jobs that can be done outside, these breathing spells, so to speak, would be very much appreciated by the help. Syringing twice daily should be done in the houses containing the teas and hybrid teas excepting American Beauty. We have always advocated a dry, arid atmosphere for Beauties, also a thorough syringing as early as possible during the day. Any pot plants that have been left over that are in good shape should be repotted and kept going; some of them may be needed for replanting and the rest can be carried over (if not sold) in a cold frame. They will make excellent stock for next season's planting. To repeat, water carefully and apply it so that the soil will require a fair watering daily. At the same time this doesn't mean running them on the dry side. Strive to attain the happy medium.

E.

Rose Cuttings.

ED. AMERICAN FLORIST:—

I want to know what is the probable trouble with rose cuttings, nicely rooted, when I lose so many in transplanting them from the sand to pots. C. C.

There are many causes that may lead to loss in transferring rooted cuttings from the sand to pots. In the first place the cuttings may be left

TYPICAL BUDS, FLOWERS, SEED PODS AND LEAVES OF NELUMBIUM.

By Courtesy of H. A. Dreer Co., Philadelphia, Pa.

too long out of the sand before being potted and the roots so dried that they fail to carry the proper amount of sap to the growing plant. Again when coming out of the shaded benches they may be exposed too suddenly to drought or strong sunlight, this wilting the young growing shoot. Overwatering, too little water, carelessness in handling so that the roots are broken and quite a number of other defects of culture would cause the loss described and without knowing anything of the treatment followed by "C. C." we cannot say what the trouble is only pointing out the above as probable causes.

New Roses in England.

The Gardeners' Chronicle comments on the new roses exhibited at the National Rose Society's summer show at London, July 8, as follows:

GOLD MEDAL ROSES.

The society's gold medal was awarded to the four novelties following:

Lady Hillingdon.—A richly-colored yellow tea variety, of conical shape and with petals of good substance. Shown by Lowe & Shawyer.

Rayon d'Or.—A moderately-full flower of a canary-yellow color. Shown by Dr. A. R. Waddell, Baldock.

Edward Mawley.—A deep-crimson variety, possessing considerable frag-

rance. Shown by S. McGredy & Son, Portadown.

Joseph H. Welch.—A large flower of a deep-pink color, having a conical center. Shown by McGredy & Son.

OTHER NEW ROSES.

Lowe & Shawyer exhibited their seedling hybrid tea Mrs. George Shawyer. The flower has the color of the favorite "old rose" pink, has a long Niphetos-like shape, and appears to be fairly full of petals. (Silver-gilt medal.)

B. R. Cant & Sons, Colchester, showed Rose St. Helena, H. T., of their raising. The flower is of a delicate flesh color, tinted with yellow, somewhat pointed in shape before being fully expanded, and possesses a pleasing contour. (Silver-gilt medal.)

Messrs. Cant & Sons likewise showed a H. T. named Colcestria, a flower of a cerise tint, and possessing much substance in the petals and with sufficient of these to make a full flower. A card of commendation was awarded.

Alexander Dickson & Son, Newtownards, showed a new seedling rose, Mrs. Foley Hobbs, white with a faint flesh tinge. The flower is full and has a pointed center. (Silver-gilt medal.)

Messrs. Dickson & Son showed Rose Mrs. Gordon Sloan, of a charming flesh tint; the flower has a filbert-like centre and the color is more intense at this part than elsewhere. It received a card of commendation.

NYMPHÆAS OF THE MARLIACEA GROUP.

WATER GARDENS.

Nelumbiums.

Nelumbiums rank amongst the choicest of aquatic plants and should be cultivated wherever possible when aquatics are desired. They are of majestic appearance, their stately foliage often ranging from two to three feet across, and the bold massive flowers 10-12 inches across, standing above the foliage, which often rise five to six feet above the surface of the water; these must be seen to be appreciated. The illustration well represents the individual flowers, buds and seed pods, but only faintly as they possess delicious aromatic fragrance unequalled by any other flowers, together with their diversity of colors which range from pure white to deep rosy carmine; there are also single and double flowers. These are invaluable for cutting as they furnish bold flowers and foliage on stems four to five feet long. As decorative plants they are indispensable; the bold sub-tropical foliage and flowers add a touch to the landscape no other plant can supply.

They are of easy culture and well adapted for growing in tubs, pools, artificial and natural ponds, lakes, etc.

When grown in the same pond with nymphaeas they must be separated from them by a wall or partition of some kind as they are of rampant growth and a single plant will travel over 50 feet with numerous lateral growths in a single season. A small pond or pool may be devoted to nelumbiums only, one or more varieties, and the effect will be most enchanting. Many cultivators often fail to produce desired results, but although nelumbiums are perfectly hardy when established it is often difficult to establish them. They are impatient of removal and care is necessary in lifting and transplanting. They are susceptible of changes in temperature especially from warm to cold and roots received during a cold spell should not be planted in permanent quarters until warm weather is assured. Better start them indoors and plant out only when conditions are favorable for immediate and continued active growth. They will winter as easily as the hardy nymphaeas, that is provided the roots do not freeze, but nelumbiums will penetrate much deeper than nymphaeas and naturally there is less risk. Nelumbiums have an ancient history and are known as the sacred lotus and the Egyptian lotus. We are indebted to

the Japanese for almost all the varieties in commerce today with a notable exception, namely *N. luteum*, or water chinquapin, which is the American variety and found in quantities in several states, especially near the great lakes and southern states.

WM. TRICKER.

Nymphaea Marliacea Carneæ.

The illustration represents a type or group of water lilies generally well known in the United States and Europe where the renowned hybridist (wizard) Latour Marliac created this and several other varieties using the prefix Marliacea in designating the different varieties such as *Nymphaea Marliacea albida* (white), *N. Marliacea carneæ* (pink), *N. Marliacea chromatella* (yellow), *N. Marliacea flammea* (red), *N. Marliacea ignea* (carmine-red), *N. Marliacea rosea* (pure pink), *N. Marliacea rubra punctata* (rosy purple). Here is a grand collection by itself, embracing all the colors of the hardy nymphaeas, and the plants are much alike in habit of growth, etc. Like the European variety *N. alba* and *N. candida*, they have a thick rootstock or rhizome, leaves closely set, each plant being compact, not rambling in growth like *N. odorata* and *N. tuberosa*. When in moderately deep water the flowers are floating but when in shallow water or crowded both the leaves and flowers will stand above the water. The flower stems are stout and better adapted for cutting than others. They are also to be preferred when several varieties are desired in one collection. They will not ramble all over the pond, they will "stay put." They are all hybrids and do not produce seed or tubers to choke their growth or smother them out. There are numerous other varieties of recent introduction very similar to these but without the prefix Marliacea which should be grouped with these.

WM. TRICKER.

Plant Hairs and Nitrogen.

We have many theories and some facts to account for the uses of plant hairs, but nobody is sure that we have arrived at a correct solution of the problem. Plant hairs may prevent the clogging of stomata by rain or dew, or they may absorb water on occasion; they may protect from evaporation by shading the leaves, they may afford a partial defense against sudden changes of temperature and they may protect, in a measure, from the attacks of grazing animals, but whether these are their principal uses we cannot be sure. Recently botanists have been asserting that the epidermal hairs of many plants are useful in obtaining free nitrogen from the air. Up to very recent times we have been taught that practically all the nitrogen in plants is taken from the soil in the form of nitrates, but the investigations of several old world botanists put a new face on the matter. It has been known for some time that forest soils steadily gain in nitrogen content from the decay of the leaves of trees, which seems to give additional evidence in favor of the new theory, but further investigations must be made before the idea is likely to be accepted by botanists.—American Botanist.

WITH THE GROWERS

Charles D. Ball, Philadelphia, Pa.

Though the glass area of the country has been immensely increased within the past 10 years the growers of good stock have more than held their own. Though the word "specialist" is sometimes a misnomer, there are specialists who fully live up to the title. On a recent visit to the range of Charles D. Ball at Holmsburg, Philadelphia, we were more than ever impressed with the fact that after all the word specialist means something. Mr. Ball is a specialist in palms and after looking over his range we were convinced that he fully deserves the title. He has about 70,000 square feet of glass devoted almost entirely to the growth of palms, and has made his business a life study. He does not need to tell you what he has done or what he intends to do, for there before your eyes, to use a familiar expression, "are the goods." No better palms can anywhere be found than he offers.

He is particularly strong on kentias. All his stock is clean and in beautiful condition. In *K. Belmoreana* he has a large assortment of the finest stock we have ever seen. One of his ideas is to put two or three in a pot. This is not done immediately before selling, but they are potted and grown on for months, the result being a much more handsome and bushy effect than could possibly be obtained from single plants. His *K. Forsteriana* are equally as good and well arranged. However, for those who prefer single plants, he has plenty and fully as well grown as the combinations. *Areca lutescens* has long been recognized as one of the most graceful and beautiful of palms, and no real fancier can afford to ignore it. At this range this palm is grown to perfection, and, after a wide range of observation, we have never seen better. There is also a fine assortment of *Lantania Borbonica*, *Cocos Weddelliana*, *Phoenix Roebelenii* and *Dracæna Sanderiana*. Mr. Ball will exhibit at the Rochester convention and all visitors will have an opportunity to verify the foregoing statements.

Henry A. Dreer, Inc., Philadelphia, Pa.

The name and fame of this house is so well established and it is so well and favorably known that it would almost seem that nothing new could be written about it. If it plodded along in the beaten track that would be true, but it has the progressive habit. This firm is always planning something new and the plans made are intensely practical. Here is an instance: On a recent visit to Riverton we were informed by manager J. D. Eisele that 130 more acres of land had just been purchased and that work would begin this season on another range of greenhouses that will be thoroughly modern and up to date. Over at Riverton they do not figure glass by the foot but by the acre. As near as we can recall Mr. Eisele said: "We expect to erect an acre or two of glass this season on this land and we will follow it up with more next year and the year after." The newly acquired property has extensive frontage on the railroad and there will be ample opportunity for display pur-

poses, which will be taken advantage of.

It may be stated that all the features of the original range and grounds are now very noteworthy. There are at least six acres of glass devoted to the growth of palms, over 100,000 square feet covering young palms grown from seed. There is a wonderful display of *Cocos Weddelliana* of good size, there being at least one acre of these palms. These are merely mentioned as an incidental for there are all kinds of commercial palms. The ferns are another great feature. They are here in every known commercial variety and, aside from the larger plants, it is probable that over a million ferns in from 2-4 inch pots are annually sold. In the open everything that anybody is likely to want and plenty of it may be found. Mr. Eisele has taken a great interest in hardy roses and we predict that hereafter anybody can find the rose

Chas. H. Vick.

Superintendent of Trade Exhibition at Rochester.

they want at this place. They are also among the many different varieties, likely to find roses that they never heard of before. Practically all parts of the world, where roses grow, have been searched by the agents of this firm and the results will be astonishing to many fanciers. When we visited the place, July 26, though the weather was hot and dry, the fields of blooming cannas and phlox were a remarkable sight. They are there found in all varieties. About 2,000,000 perennials are annually grown.

A noteworthy feature is formed by the water gardens, filled with water lilies, lotus and other aquatics. There are about eight acres of these and the great variety of bloom renders them a most interesting and attractive spectacle. The lotuses in every shade of pink, interspersed with other colors, recall the stories of Egypt and the Nile. In reviewing the practical features of this place it may be stated that during the firing season, 18 boilers burn an average of 4,000 tons of coal and that an average of 175 men are employed on the place.

The Geo. Wittbold Co., Edgebrook, Ill.

Most visitors to Chicago are acquainted with the Lake View establishment of the Geo. Wittbold Co. at Buckingham place, but probably those who visit the Edgebrook plant, the place that feeds the home establishment, are greatly in the minority. Otto Wittbold is the presiding spirit here and, in addition to his skill as a plant grower, he has brought his inventive faculties to bear on the subject of improvements in concrete benches and other aids to intensive culture. The benches used for growing carnations, roses and other plants for cut flowers are made in sections that can easily be taken apart and have many advantages over others of this pattern we have seen, but those used for plant growing may be described as double-deckers, the lower portion being used for such purposes as starting palm and other seeds, starting or resting bulbs, resting poinsettias or any one of the hundred ways that such places can be used, the upper portion being used for plant growing. This double deck arrangement is made by extending a square post from the legs of the lower bench, all made in one piece. Concrete "boards" are laid on wherever they are needed and can be moved from place to place as desired.

Although a few houses are devoted to growing carnations, roses, chrysanthemums and others for cutting, the greater portion of the 70,000 square feet of glass here is devoted to the culture of high class plants for the furnishing and decorating department, for retailing at the store and for the immense mail order business done by the firm. Perhaps the most important are the palms. These are grown in immense numbers, about 100,000 seeds of kentias, cocos, phoenix and others having been sown within the last two months. They are sown on the lower deck of the benches as described above and as soon as they germinate they are potted singly, carefully retaining the tap root and potting with the seed, attached to the stem, just above the soil. Thousands upon thousands of these little plants are seen and many thousands more a little further advanced, while others are just showing the character leaves. From this up they are here in all sizes and varieties, neat little plants in small pots and big specimens ready for sale and all are in the best possible health and condition. On one bench there are 70,000 young kentias and other kinds, all grown in proportion to their popularity. *Lantania Borbonica*, although not as popular as formerly, is still largely grown and there are large numbers of well finished healthy plants now ready for disposal.

Pandanus utilis is evidently a great favorite here for it is seen in large numbers in all sizes from the tiny seedlings to mature plants ready for sale or for decoration work. *Dracænas* too are largely grown. A notable feature here is the system of rail tracks all through the houses and grounds whereby trucks are run all over for the removal of soil, plants, pots or whatever else is needed. This saves a good deal of handling and therefore expense. Steam fitting, blacksmithing, carpentering, painting and glazing are all done by the firm's own

men, who have every convenience found for them to carry on their work. Two wells are used for water supply, the water being pumped into a large tank, which is elevated and gives a good force everywhere. Besides the greenhouses there is a series of lath houses in which, during summer, araucarias, rubbers, rhododendrons and similar plants are grown. Besides these there are large plant protectors and frames outside, used for the culture of gladioli, Ismene calathina and other semi-hardy plants. Mr. Wittbold has evidently his charge well in hand and a very instructive and pleasant afternoon was spent looking over this and the nursery.

The Robt. Craig Co., Philadelphia, Pa.

This firm, always at the front with choice foliage and flowering plants, was never better prepared than now to serve its customers with the very best stock. At the Rochester convention they will make a splendid exhibit of samples of their stock, and it may be said in passing that, in their greenhouses they have thousands of other plants that are equally as good as those sent to Rochester.

Both at the Philadelphia and Norwood ranges, there is an immense stock of the finest crotons. We say finest because we have never seen a commercial collection that equalled it. Very notable are the varieties Edwin Lonsdale and Robert Craig. Both these originated with Mr. Lonsdale, the Craig Co., taking them later and working up the splendid stock that they now carry. Edwin Lonsdale is a brilliant red, just the kind of a plant that appeals to Christmas buyers. This plant is so attractive that one of the leading retailers of the country has made a very tempting offer to have a number of plants grown for him until they reach a height of four or five feet. The company has this propo-

sition under consideration, the only drawback being that there is such a demand for the plants, from 6-inch pots up, that it is hard to hold them. While we have laid stress on this variety, it may be well to state that, in the eyes of many fanciers, the variety Robert Craig is equally as good. It is not so highly colored as Lonsdale, but is very attractive and in substance and healthy growth is surpassed by none. The many other varieties are also very noteworthy for their splendid coloring. Time was when the croton was looked upon as a sort of an incubator baby, but that time has passed. The improved methods of growing and the hardening off process of these up-to-date growers has put them in the front rank of desirable foliage plants.

There are two 200-foot houses filled with Begonia Glory of Cincinnati and B. Gloire de Lorraine. The Lorraines are largely of the Lonsdale type and Mr. Craig says that is the only one that sells well in Philadelphia. He is, however, very enthusiastic over Glory of Cincinnati which he considers a very fine production. Two large houses filled with Dracena Massangeana are noteworthy features. They are all in useful sizes. The beauty of this plant cannot be gainsaid and its enduring qualities in the store or home are great arguments in its favor. Ten houses of ferns may seem like a large lot but they have them and are feeling no uneasiness about selling them. They comprise all the best varieties. Noteworthy are Elegantissima Improved and E. Compactum, Todeaoides, a good one from London, and Scholzei and Giatrasii. Both the last named are considered good ferns. Amerpohli is still grown, but mostly in small sizes, it being particularly useful in basket and similar work. There is a stock of 20,000 cyclamens of excellent quality and the usual stock of fine Ficus pandurata and other plants.

Cyclamen Culture.

ED. AMERICAN FLORIST:—

Please give me the culture of cyclamens and say how old the bulbs should be before they bloom.

H. C. G.

If "H. C. G." had followed closely the articles under the heading of "Half Hour Chapters for Plant Growers" he would have found a regular series of notes dealing with the subject of cyclamen culture. Briefly, the routine of culture from seed is as follows: Sow in August or early in September in well drained flats or seed pans. Dibble the seeds in at least one inch apart and place in a moist atmosphere and a temperature of 70° or thereabout. As soon as the seedlings appear place the flats well up to the light but shade from the brightest sunlight. Keep them growing along in a good light until the second leaves are forming, then put them singly in 2-inch pots and continue the same treatment, never letting them be checked. All through the winter keep them well up to the light and when the young plants have filled their pots with roots repot into the 4-inch size. The final potting should be in August and from then on the plants need the utmost care. A well-known English cultivator of this plant summed up its culture something along this line: "Light in winter, shade in summer, and constant attention at all times to keep the plants growing and free of insects is all that is necessary to grow cyclamens well." If "H. C. G." will do this he need have little fear of results and it will be well to watch the above mentioned columns for hints in season. The plants should be in good flower in about 15 months after sowing. G.

CLEVELAND, O.—A. A. Hart, Lake avenue, and daughter, Gertrude, sailed on the steamer Cincinnati July 16 for a three months' trip through Germany, Switzerland and France.

BLOCK OF ROSES AT W. & T. SMITH CO.'S, GENEVA, N. Y.

PHLOX AND AQUILEGIAS, TWO SPECIALTIES OF THE CHASE BROS. CO., ROCHESTER, N. Y.

Some Rochester and Vicinity Nurseries.

ELLWANGER & BARRY, ROCHESTER.

It is an historic fact in nursery annals that the late Patrick Barry, one of the founders of the famous nursery of Ellwanger & Barry, received his first training in the work at the oldest or rather the first commercial nursery in America, that established at Flushing by Wm. Prince in 1737. George Ellwanger, the other founder, was born in Wurtemberg, Germany, and came to this country in 1835, entering the employ of Reynolds & Bateham in 1839. Together they founded the business in 1840 and the partnership lasted for 50 years, or until after Mr. Barry's death. The firm is well known all over the world for the excellence of the stock sent out from its nurseries and this excellence is largely owing to the fact that experimental horticulture with a view to testing varieties of fruit trees as to their suitability for the climate has always been an important part of the work of the nursery.

In the early days planters were without knowledge or experience and the testing grounds of the firm may be said to have saved hundreds of thousands of dollars to its customers. They have also enabled the firm to send out accurate descriptions of the fruits handled as well as exhibit at all the principal shows the produce of its trees. But this is only one branch of its business. The great and increasing demand for all kinds of decorative shrubs, conifers and other trees used by the landscape gardener has led to an immense business in this and kindred departments. We need hardly enlarge on this or upon the acres of roses, peonies and perennials that are grown.

They are already well known as are the numberless varieties and species of stock of all kinds, hardy and semi-hardy, that are grown in the greenhouses. The whole place is kept with the most scrupulous care and should on no account be missed by visitors to the convention city.

JACKSON & PERKINS CO., NEWARK.

The fame of the Jackson & Perkins Co. of Newark, N. Y., is world wide and the firm specializes in ornamental trees and shrubs, grows roses for the trade and supplies all classes of forcing stock. Visitors to the Rochester convention should endeavor to take in this well known place where they will see half a million field grown roses, budded and on their own roots while the specimen grounds contain nearly 1,000 varieties including many new kinds and species not yet in commerce. Clematises, both large flowering and paniculata types are a great specialty and probably they are the largest growers in the world, having six acres devoted to this popular family. All the large flowering varieties are on their own roots these being more satisfactory and healthier than the imported grafted plants from Holland and other European countries.

Hydrangea paniculata grandiflora is largely grown here in standard trees. Jackson & Perkins being the first American nurserymen to grow it in this form. Lilacs in all the best named varieties are also grown this way and a block of 25,000 Hydrangea Otaksa in 6-inch pots plunged outdoors is a great sight. All classes of perennials have special attention, peonies, delphiniums, Shasta daisies and all the popular kinds being well represented. Besides all this there are many acres

of fruit trees, bush and small fruits making in all some 600 acres besides several hundred acres in California. Then the firm is agent for many foreign houses handling Dutch bulbs, lily of the valley, manetti rose stocks, plants of all kinds and practically everything that a florist needs. The nurseries are 30 miles east of Rochester on a first-class trolley line and the firm extends a hearty welcome to all visiting the convention to include them in their itinerary.

THE W. & T. SMITH CO., GENEVA.

We present here some views taken recently in the extensive nurseries of the W. & T. Smith Co. at Geneva, showing some of the blocks of two year roses, which they are offering for sale to the trade for the coming season. The plants are now in full bloom and it would repay any florists at the convention to visit these nurseries and inspect the growing stock. The variety list is unusually comprehensive and includes a large proportion of hybrid teas and teas, including such sorts as Killarney, Gruss an Teplitz, Etoile de France, My Maryland, American Beauty, La France, etc., which until now had to be imported, as they were not being produced in field grown plants in this country. Of course, roses form but a small part of the stock grown by this company whose plant covers over 700 acres, nearly all in one tract. Here can be seen great fields of conifers, ornamental trees, and shrubs, herbaceous plants and, especially noticeable, the blocks of all kinds of fruit trees and small fruits. A short ride of less than two hours from Rochester, on the Rochester and Eastern electric road, takes the visitor directly past the nurseries.

CHASE BROTHERS COMPANY, ROCHESTER.

The New England Nurseries of Chase Bros. Co. had their inception in 1857, and they were incorporated in 1887. Eaton R., Martin Van Buren, and Lewis Chase were the three brothers who started together. Eaton R. Chase withdrew from the firm a number of years since and established an important nursery in Riverside, Calif. Martin Van Buren Chase died a few years since. Lewis Chase is now the

where the stock is delivered from the nurseries and prepared for storage. The second division is the storage department, and the third is the packing department, which includes a railroad siding where the floor coincides with the floors of the cars. In this way the facilities for shipping stock of all kinds leave nothing to be desired. Lewis Chase and William Pitkin are well known in the business interests of the city of Rochester, and

New Sweet Peas in 1910.

An approximately complete list of the 1910 sweet pea novelties can be given. The Burpee novelties, all Spencers, were, Marie Corelli, an intense rose; Miriam Beaver, salmon-pink suffused with buff or apricot on a primrose ground; W. T. Hutchins, light apricot-buff with delicate pinkish effect. Henderson put out George Washington, only one entry of which was shown at the national show in New York. From Mr. Kirby's description it is a fine scarlet crimson, but has an overlay of deeper color. Martha Washington, a white ground with pink picotee edge. These originated in the locality where the Washington ancestry lived in England, hence the names adopted.

The following six sorts are regularly listed as 1910 Spencer novelties. Colleen (Deal) carmine standard, wings blush; Edrom Beauty (Dobbie) salmon orange; George Stark (Stark) an intense dazzling scarlet; Mrs. Hugh Dickson (Dobbie) rich apricot on cream ground, shaded pink. The 1910 Eckford set from Wem, are, Picotee, giant waved pure white with picotee edge of carmine, Viscomte De Janze, a deep bright rose of bold form; Mary Vipan, a bright almost self rose waved; Mrs. E. Gilman, creamy ground, suffused with bright rose, bold form. I see Mr. Eckford tells his customers frankly that these waved varieties are not entirely reliable.

At the Holland Park show the following novelties were shown: Isabel Malcolm, soft waved primrose. E. W. King & Co., Coggeshall, introduced Queen Mary, waved pink, cream ground; Anglian Pink, Anglian Orange, Anglian Crimson and Anglian Lavender. C. W. Breadmore, Winchester, introduced, Iris, pale salmon self; Dazzler, flame; Freda, a large extra waved white; Dusky Monarch, deep maroon. Miss Hemus introduced Cerise Paradise; Paradise Susiana, chocolate flaked; Guy Hemus, lavender; Farina, pink apricot; Shawondsee, deep lavender and Paradise Apple Blossom. S. Bide & Sons, Farnham, offered Mrs. W. T. Massey, bright old rose; The Sultan, rich mahogany;

The Late Geo. Ellwanger.

The Late Patrick Barry.

ESTABLISHED THE ELLWANGER & BARRY NURSERIES, ROCHESTER, N. Y.

president of the company, and William Pitkin is the secretary and treasurer.

Hardy fruits of all kinds, such as apples, pears, plums, cherries, peaches, grapes and the various small fruits were grown and sold extensively by the firm throughout the country, and its reputation for fine fruit stock has been well known in this country for many years, as they made it a special feature. During the past 10-12 years they have gone extensively into the growing of ornamental stock, and today they have an enormous quantity of deciduous trees, shrubs, evergreens and perennials. The aggregate of the different fruit and ornamental plantings for 1909 was 2,157,000.

About two years since they purchased a large farm at Honeoye Falls, 20 miles south of Rochester. With the land they now own in Pittsford, a few miles east of Rochester, they now have about 655 acres in nursery stock. They are preparing to go more extensively into the propagation of ornamental stock. Last year they erected a large propagating greenhouse at Honeoye Falls, and they intend to build three additional large greenhouses for propagation in the near future.

A few years since they moved their entire nursery cellar and packing establishment from East Rochester to East Brighton, and the new nursery cellar system and packing buildings are very extensive and complete and cover approximately about two acres. The buildings form a square of 300 feet on each side, and are in three divisions running across the square. The first division is the receiving department

are gentlemen of sterling integrity of character.

PROFESSOR R. S. Mackintosh, formerly professor of horticulture in Alabama, has accepted a position in the horticultural department of the Pennsylvania State College. His special work will be an investigation of the peach industry of that state. The horticultural work in Pennsylvania is developing very rapidly. At present there are 10 professors and assistants in the department.

Entrance to Grounds and Office.

John Charlton.

John Charlton & Sons, Rochester, N. Y.

John Dunbar.

Assistant Superintendent of Rochester Parks

J. B. Keller.

Founder of John B. Keller's Sons, Rochester.

Blue Belle, bright blue grandiflora; Robt. Sydenham offered, Sunproof Crimson, Wendoe, new waved purple and Prince of Orange, bright scarlet orange. A new shade of rosy purple was shown in William Engle, from Woburn Place, Addlestone.

Robt. Sydenham's latest book lists a good many others that would properly belong in this 1910 list if they were not synonyms. We might include Azure Fairy, light marbled blue; Commander Humphrey (Cole), a bright pure Countess of Spencer; Countess of Ancaster (Gilbert), rich dark plum color; Doris Burt (Unwin), a sunproof scarlet; Doris Usher (Usher), said to be very lovely; Eric Harvey (Unwin), white ground, back of standard heavily flushed with scarlet pink; Florence Wright, offered by Stark, as a wide open Etta Dyke; Glitters (Lumley), a waved Evelyn Byatt; Hereward (Stark), pale cerise Spencer; Lady Emily Dyke (Johnson), pinkish blue waved; Lizette Lumley (Lumley), a Spencer Jessie Cuthbertson; Mrs. Watson (Bolton), a very pretty coral pink Spencer; Mercia (Stark), spoken well of as a Spencer salmon.

W. T. HUTCHINS.

John Charlton, Rochester, N. Y.

John Charlton, founder of the well known firm of John Charlton & Sons, Rochester, N. Y., is a good specimen of the well trained gardener who has made a success in business. Mr. Charlton is an Englishman, a native of Wiltshire, a county famous for fine private estates with their noble gardens and fine game preserves. Early in life he showed a fondness for plants, flowers and fruits and at the age of 17 was apprenticed to the head gardener at Longleat, the country seat of the Marquis of Bath, then as now one of the show places of England and famous for its fruit, especially fine grapes. As is usual in English gardens (or rather as was usual) Mr. Charlton spent his first year among the hardy fruits and in the kitchen garden, the second in the flower garden and dressed grounds and the third

The Late James Vick.

Founder of the Vick Business, Rochester, N. Y.

under glass. He did not go the regular round of journeyman's and foreman's plans but at once took charge of a place in Guernsey. When he arrived at his majority he sailed for Canada, but on a Canadian winter was enough for him and he came to Rochester in the spring of 1857.

After a short stay with the late Geo. J. Whitney as gardener he took charge of the gardens of Joseph Hall, an agricultural implement maker and famous horseman, with whom he stayed six years or until the death of Mr. Hall. Then he resolved to go into business for himself, securing two acres of land upon which he built a greenhouse and dwelling house. This was the nucleus of his business which now extends to about 130 acres, all under cultivation. He is associated with his two sons under the firm name given above. Mr. Charlton introduced to this country the famous Boston ivy (*Ampelopsis Veitchii* or *Vitis incon-*

stans) and also raised Carnation Peter Henderson which he sold to Nanz & Neuner of Louisville, Ky., for \$650. Mr. Charlton has always been foremost in fruit growing, being the introducer of Pocklington grape and Golden Prolific gooseberry. Probably owing to his old experience in the west of England, always famous for its fuchsia growers, Mr. Charlton has always taken a great interest in this plant for which he has taken many prizes. He is 74 years of age but carries it well and is vigorous and active.

J. B. Keller, Rochester, N. Y.

J. B. Keller, of Rochester, N. Y., although getting well on in years, still takes a great interest in all horticultural matters. He is one of the best known men in Rochester and for years has been looked upon as an authority on hardy herbaceous plants. Mr. Keller was born at Mayence, in Germany, 72 years ago and served his apprenticeship with the then well known but now extinct firm of Mardner Bros., of azalea fame in that city. After a few years' travel in various European countries he came to America in 1860 and was employed in various places in New York, Brooklyn and Long Island. In 1870 he came with his family to Rochester and accepted a position at the Ellwanger & Barry nurseries where he remained for five years before starting in business for himself. He purchased several acres of land within the city limits, the same land whereon the greenhouses and grounds of the firm of J. B. Keller's Sons are still situated. From this small beginning sprang the fine business now operated by his three sons, F. J. Keller, J. M. Keller and William Keller. Mr. Keller, Sr., is not now actively engaged in the business, having retired some years ago, but he still takes a live interest in the great business which he founded and which he has watched grow from the small beginning to one of the largest in this city of nurseries. May he be spared for many more years and see its still further expansion under the capable management of his sons.

International Floral Service.

ED. AMERICAN FLORIST:—

I was rather astounded to see the article in your issue of July 30, page 3, under the heading of "International Delivery Concern." and I am only sorry that this communication will not reach you in time to refute the article written by one of your representatives without giving the matter proper investigation. The writer is the one who is mentioned in your article, and I can give you many references as to my integrity, as well as my financial standing, to disabuse the mind of the writer of this article that any harm was meant.

The sum and substance of the whole affair is that Mr. Nehring, who has secured his foreign connections for the floral service and who issued a circular some time ago, came to me with a request that I finance the American part of the organization. However, before doing so, I wished to thoroughly try out the plan myself, as well as to get the consensus of opinion of some of the leading men in the line. You, no doubt, will appreciate that the only real way to do this was to go out and secure the contracts, as I felt that if I would simply ask the florist his impressions and advice that he might say "that it would be good," but when it came to the time to pay for the service he might feel differently. Therefore, I felt that it was best to secure their membership then and there and let them pay at that time, as an experiment. In other words, I felt that if the florists thought enough of the plan to put their money into it, that it would be a success, as Mr. Nehring had stated to me it would be.

In accordance with the plans laid out, I did, as stated in your columns, go to Mr. Eyres, and while the conversation as stated in your issue is not entirely correct, the substance of the conversation was the same, as I tried to secure him in the regular salesmanship way. I then called on The Rosery and secured their check and then went to Schenectady and also secured a check there, and then returned to New York. I investigated further the next

day, then came to my office, as per this letter, and returned the checks to the parties. I did not wish to state to these florists that we were simply trying this out, I thought that unnecessary, and therefore stated that we herewith return the checks as we were not ready to start the service. The reason that your representative did not find us at 1328 Broadway was because the address given was the United Silver Co. But I understand that your representative did call upon Mr. Nehring, who advised him to call upon me personally, care of the above firm.

While I cannot censure any one directly for the article as written, at the same time I feel there has been a blunder made, which would, upon further investigation without undue haste, have been found to be unnecessary. I expect to put considerable money into the development of the American Service, and I believe that you will appreciate that it would not be proper business judgment to start off in the manner indicated in the article. Therefore, I wish to assure you that everything will be done in a most honorable, upright and straightforward business way. I have written personally to both Mr. Eyres and The Rosery in Albany explaining that I was only trying out the plan when I called upon them and that there is no cause for alarm.

I can refer you to one of the large banking institutions here as to my financial standing, the Commercial Trust Co., of this city, and if you will have your representative call, I will give him business references as to my integrity so he can call personally on my references. MORRIS H. ELVIDGE.

Aster Diseases.

Each year there are many inquiries for the best methods of combating aster diseases. To tell the truth we have no remedies in mind that are effective. The diseases most common are stem rot and yellows. The former attacks the plant much the same as soft stem rot on carnations. The first indication of its presene is given by the wilt-

ing of the plants, which never revive, but finally wither and turn brown. Upon examination it is found the stem or bark at the surface of the ground is affected with a dry rot, which encircles the stem and destroys the tissues of the bark, to such an extent, that the sap cannot be transferred to the leaves and consequently they wilt and die. It is our opinion that this is a fungus disease and its prevalence is largely due to conditions, either of the soil or climate.

This year we have yet to find the first plant that shows a trace of stem rot and as we have heretofore lost more or less plants from this cause we feel the health of our present crop sustains our belief that conditions are quite or wholly responsible for this malady or scourge which it becomes in some instances. One field has been planted to asters for three successive years and the other two seasons, which explodes the theory that stem rot is due to continuous croppings. We must admit the real cause is still obscure to us.

Yellows affect the plants at flowering time, the buds turning yellow and the petals failing to reach their normal length. This disease, like stem rot, is very hard to combat for the reason it is not apparent until too late to apply remedies. The tarnished plant bug (*Lygus pratensis*) is the worst enemy we have to contend with and we feel certain many growers attribute their depredations to disease. This little insect punctures the soft growing stems and extracts the sap, causing them to wilt and thus growth stops. The plant sends up lateral growths which, if unmolested, will give excellent returns, but should the attacks be continued the latter are ruined, resulting in a crop failure.

This little insect is so active that hand picking is of no avail and we have yet to learn of an application that will check its devastations. We now have one of the experiment stations interested in the work of securing a parasite fungus that will spread from one to another by contact and thus destroy them, the same as the chinch bug is being controlled in the western states.

AT THE INDIANAPOLIS FLORISTS' CLUB PICNIC, AUGUST 4.—See Page 150.

ASTER PLANTS.

The First Plant to the Left Shows an Aster in Normal Condition. The Second one, Which Was Stung Some Days Ago by the Tarnished Plant Bug is Now Producing Laterals. The Third Has Been Recently Stung Showing Center Growth Has Stopped.

What the results will be we are unable to predict, but it is to be hoped that success may crown these efforts. The first plant to the left in the accompanying illustration shows an aster in normal condition. The second one, which was stung some days ago by the tarnished plant bug, is now pushing laterals. The third has been recently stung, showing center growth has stopped.

ELMER D. SMITH.

Japanese Gardening.

The recent visit of the president and council of the Royal Horticultural Society to the Japan-British exhibition, and the awards of silver cups they have made to the makers of the two Japanese gardens, and the Japanese exhibitors of various horticultural products, have created some additional interest in Japanese gardening. The present time is therefore opportune for making a more detailed reference to the two gardens that so admirably represent Japanese taste and skill in garden design and construction, and contribute so largely to the manifold attractions at the white city. Lest there be any misapprehension upon the point we would mention that we have not been waiting for something to occur that would arouse additional interest in these gardens before giving a short description of them. What we have waited for has been a sufficient development of the growth of the trees, shrubs, and plants to enable us to have photographs taken that would give our readers an adequate idea of their distinctive character and great beauty, and do justice to the achieve-

ment of those by whom they have been designed and constructed. We have now the pleasure of giving two illustrations, one of each garden, which portrays aspects of great beauty. Both gardens have been designed by Keijiro Ozawa, of Tokyo, who may be heartily congratulated on the taste he has evinced, and they have both been constructed by Hanosuke Izawa, also of Tokyo, who, in carrying out the designs, has given ample proof of skill of a high order.

The two gardens differ considerably in style, and also in the appeal they make to the artistic perceptions, and, if one is regarded as possessing a greater charm than the other, the additional beauty is due more to environment than to a superiority of design. There are, as we have already stated, two distinct gardens, one known as "The Garden of Peace," and the other as "The Garden of Floating Islands." The first-mentioned of these is on the southern side of the court of honor, and is enclosed on the north side by the walls of stately buildings and tall, finely-branched elms, and on the south side and at the western end are skilfully devised scenic mountains, which, for the most part, have their sides or tops clothed with round-headed pines and other trees indigenous to Japan. These, with the walls of the buildings and the elms, completely shut out the garden from the outer world; and thus the visitor is able to enjoy its manifold charms without being constantly reminded of the strenuous endeavor and rush, with the attendant anxieties, of everyday life. The title that has been given this

garden, although most appropriate, is evidently liable to be misunderstood. "This," said a lady to her companion, when passing us while we were looking round, "is not a cemetery as I thought it was." "A cemetery!" replied the companion, "what gave you that idea?" The answer was quickly forthcoming. "It is called 'The Garden of Peace,' and where do we find peace except it be in a cemetery?" So much for the difference in the views held with regard to this point. But it may be that the lady had not had the opportunity that we, in common with our readers, have had of fully realizing the refreshment of mind and body that is to be obtained by those who love flowers from a pleasantly-situated and well-kept garden.

Along the south side and at the foot of the scenic mountains, low hills of varying height raise their heads, and, running the whole length of the garden, is a walk some five or six feet in width, flanked on the southern or mountainous side by small groups of birch and other elegant trees, and on the north side there are two broad walks which are separated by the line of elm trees, and a breadth of lawn with various trees and shrubs arranged thereon. The greater area of the walks on the north side is due to the fact that, owing to the proximity of some of the more important buildings, practically all the visitors pass along that side, whereas those only who make the circuit of the garden take the south walk.

The area between the north and south walks is, for the most part, occupied by a long winding lake, vary-

ing from about 20 to 40 feet in width, and, as a matter of course, is more or less irregular in outline, and embellished with islets, tea-houses, lanterns, and the various form of aborescent and other vegetation that find favor in Japanese gardens. The margin is formed with blocks of a crystalline rock of moderate size, and it is a point of some practical importance to mention that the rock is carried down below the water level and the blocks set in a bed of cement. Consequently, no soil is exposed at the sides above the water level, and the difficulty that is frequently experienced in keeping the lake watertight when puddled clay is used is wholly avoided. As pointed out in these pages by contributors experienced in the making of lakes and ponds, when the sides are formed with clay they are liable to crack during dry weather, and when this happens, much loss of water results. The rock, as might be expected, is naturally arranged; here it forms a belt just sufficient to keep the banks in place, yonder it rises and forms low mounds, and now and again may be seen comparatively large blocks cropping up among the shrubs that form so admirable a setting to the glistening water.

About midway the lake narrows, and a small islet has been formed, and this is connected with the mainland on either side by stepping-stones that are of large size and well above the water. Conspicuous on this islet among a few shrubs is a specimen of a cypress that is one of the finest examples of the dwarfing process that finds favor with Japanese cultivators. The tree, which is between six and seven feet in height, has been less severely restricted in growth than many of the dwarfed trees that have come under our notice, but the characteristic form has been fully maintained. The lake has been described as being surrounded by a border planted with trees and shrubs; and to those who take a superficial glance at the water and its surroundings, the area planted may appear to be a continuous border. But this is not the case, and neither Japanese nor British planters experienced in such work would make the mistake of surrounding an ornamental sheet of water with a continuous border. The trees and shrubs occupy a series of spaces that vary much in shape and size, and are separated by turf that extends to the waterside. A short distance westward the lake is again crossed, and this time by a substantial wooden bridge of characteristic design, and not far distant therefrom is a teahouse of handsome elevation, both contributing their full share to the general effect.

At the more prominent points on the margin of the lake are well-developed specimens of such coniferous trees as *Sciadopitys verticillata*, *Retinospora obtusa aurea*, and green cypresses in variety. The first-named, which is one of the most distinct of the coniferous trees introduced from Japan, is represented in surprising numbers. The procumbent form of what is commonly known as the Chinese juniper (*Juniperus Chinensis*), is freely used for trailing over the rocks on the margin of the water and elsewhere, with good effect. The presence of this juniper in a garden representative of

Japanese ideas is fully justified, for the specific form grows naturally, not in China, as its name suggests, but on the mountains of central Japan, and it has been cultivated by the Japanese for several centuries. Prominent among the shrubs that fringe the lake are such well-known subjects as *mollis* and other azaleas, the holly-leaved osmanthus, green and variegated aucubus, and rhododendrons. A touch of color is given here and there by the more brightly-colored red forms of the Japanese maples, and the charms of the garden are further enhanced by various weeping trees, which, it need hardly be said, are planted in positions specially suited to the display of their graceful outlines. At the western end of the lake is the rushing waterfall, which adds immensely to the charm of the scene, as will be seen from the illustration given herewith. Immediately beyond the waterfall is a pergola, over which the beautiful *Wistaria multijuga* is trained and making good growth.

The second of the two gardens is situated some distance from "The Garden of Peace," and occupies a prominent position in the western part of the exhibition grounds. The prominence of the site of "The Garden of the Floating Islands" is a disadvantage, for the environment is not what could be described as restful, and buildings of various kinds meet the

evergreen shrubs tastefully disposed. At intervals among the trees and shrubs are placed tea-houses, that serve the purpose of adding to the attractions of the garden and afford rest and shelter to visitors. The island, with its rocky promontory, is reached by means of a stone bridge of a design that is essentially Japanese, and on the island are bold masses of rock and grassy slopes. Arranged on the grass are specimens of *Sciadopitys verticillata*, weeping trees, and other choice subjects, and planted freely among the rocks is the dwarf-growing azalea, bearing salmon-red flowers, that is so freely used in both gardens. On the south side one of the Japanese maples, with crimson leafage, has been freely planted, and remarkably bright is the effect produced. There are also on this island tea and summer-houses and stone lanterns of varied designs, these and other accessories adding materially, as so admirably shown in the accompanying illustration, to the interest and attractiveness of the garden.—Gardeners' Magazine.

Canadian Horticultural Association.

The thirteenth annual convention of the Canadian Horticultural Association opened at St. Catharines, Ont., August 10, under very favorable conditions. The exhibits and session are being held in the Carnegie Library building and the delegates were given a very hearty

JAPANESE GARDENING.

Garden of the Floating Islands at the Japan-British Exhibition (After the Gardeners' Magazine).

eye when making a survey. The design of this garden comprises a broad lake with irregular margin, and having an island that is large in size and of bold character. The margin of the lake, as in the case of the garden previously described, is formed with rock embedded in cement, and is fringed with trees and shrubs such as have been already mentioned. Beyond this fringe are broad walks and breadths of turf on which cypresses and other coniferous trees are in association with deciduous trees and

reception by Mayor J. M. McBride, responded to by E. I. Mepstead. Secretary Hall and Treasurer Simmers both had favorable reports. The trade exhibition is a prominent feature and quite extensive. The Dale Estate of Brampton; H. L. Janzen, Berlin; the Cannon Floral Co., Hamilton; Thomas Manton, Toronto; R. H. Ellis, Leamington, and Campbell Bros., Simcoe, are all showing excellent stock, etc. Among the visitors are: E. I. Mepstead, Miss Flora Scrim, Ottawa; W. C. Hall, Geo. Robinson, Jas. McKenna, C. A. Flint, Mr. and Mrs. Hopton, Montreal; D. Cooper, E. A. Dale, H. Mul-

lins, Brampton; C. H. Janzen, Berlin; W. Hunt, Guelph; H. E. Philpott, Winnipeg; Thomas Manton, J. P. Iggott, A. Annandale, H. Simmers, W. E. Mackay, R. Guthrie, H. G. Dillenmuth, Toronto.

PRESIDENT PHILPOTT'S ADDRESS.

As president of the Canadian Horticultural Association, I extend a welcome and greet you to our convention and thirteenth annual session here in St. Catharines. We sincerely trust that every session may prove interesting enough to have you all present at each. The first thing, let us get acquainted with each other; the fault of these meetings to a great extent is that we do not extend to the strangers assembled with us the cordial greeting or friendly hand-clasp that would warrant them to feel at home like the rest of us who are better known to each other. Do not let any of us go home from these meetings without having become acquainted with each other, not only the members of our association, but our brothers who have become interested enough to visit and join us during this time; let us feel that they have not left us total strangers.

It would be a good idea to appoint a committee to take charge of this most essential feature, to introduce to each other the members and friends who are gathered with us. It may be that among us are one or more total strangers who having become interested in our aims and ambitions to progress in horticulture, and have taken this opportunity to meet us as a body in discussing and bettering the interests along this line; they may, just by the friendly clasp extended to them, be induced to become one of us. The object of this society is to lift and carry forward all and everything that tends to advance and perfect our work along all lines and in all branches of our profession, and to impart such knowledge as may be known to each, to all its members, so they can also share in the benefits of same.

While we are as yet practically a young organization, much is expected of us and the efforts of this society, and we want to do our best to instruct our members and educate the masses in all lines pertaining to horticulture. We want to widen and deepen the interest in our profession by increasing our membership to such an extent that we will embrace all the leading men of Canada who are interested in any lines in the calling of horticulture.

We want to make our meetings so interesting and of such value to members that they will look forward to each time of meeting. To do this we must all work together and those of us who are experienced in the work must be willing to impart their knowledge to the others to discuss the best methods of growing and treating the various plants and flowers that each is individually interested in, to show and explain to each other what we have found to be the most profitable methods of erecting and constructing greenhouses, the best way to heat, ventilate, and all points that will help to give us the best results in turning out and realizing to the greatest extent the products of same; the best kind of treatment, foods and nourishment, that we find most beneficial from our experiments along this line, the means that we have found best in getting rid of disease and insects that attack the different plants, and so try to help each other to our uttermost in making work less arduous and more profitable. By the practical experience of our brothers we can be enabled to prevent waste of time, waste of energy, waste of money, and a waste of hours that would be more beneficial to us if spent in recreation and amusement. It is only by our untiring efforts and working together along these lines that we

can hope to add to our list of members, and show them we are organized to further perfect and help along the interests of the florists in all lines and branches.

And while we know that our exhibitions and meetings will admit of many improvements to the public, we can but do our best to make them educative and instruct them on the lines we are working in, as nearly right as we

Canada, or will it be advisable to have it abolished on plants, or supplies, or insecticides only? I trust that during the sessions of our meetings our deliberations may be earnest, honest and decisive and that each one will express his own individual opinion either by speaking or voting on any subject that may be presented. Hoping for a continuance of the advancement and prosperity of this society, that we may ad-

JAPANESE GARDENING.

Waterfall in the Garden of Peace at the Japan-British Exhibition (After the Gardeners' Magazine).

know how. I feel that I can safely state that there is a grand future for us in this country, as the extensive building and erecting of greenhouses, and the nurseries starting up during the past year, convinces me that times are prosperous and if we work diligently together we should be able to add greatly to our list of members before we hold our next convention.

There is no reason why, as all are interested in the same pursuits and know that we really need at this advanced age a society like ours, where we can meet each year and come in personal contact with each other, for the comparing and discussions along the advancement and progression of everything in our line of business, we can not become one great body and embrace nearly all in the same calling throughout our country.

One principal subject, at this convention, that I wish to present to you and which will be brought up for discussion, is regarding the duty on plants, flowers, insecticides and supplies. Shall we petition to abolish the duty on plants and flowers coming into

vance along all lines regarding the interests and pursuits of horticulture. In closing I wish to state that I hope all members present will embrace the invitation extended by the city of St. Catharines to become their guests on Friday. Also that as many as possible will attend the convention of the S. A. F. that is being held in Rochester, N. Y., next week.

OBITUARY.

Luther R. Fuller.

Luther R. Fuller of Shelburne Falls, Mass., died at his home on Green street on August 1. Mr. Fuller had been in poor health for two years. He leaves his widow, one daughter and two sons. For the past 12 years he had run a greenhouse establishment on Green street. He married Mrs. Fuller, who was formerly Miss Mary Chapin, 41 years ago.

Rochester Florists' Association.

Sixty-five members were in attendance at the regular monthly meeting of this association and all showed keen interest in the preparations being made for the twenty-sixth annual convention of the S. A. F. Members of the local club will be given each two buttons and will be entitled to two tickets for the outing; if they wish extra tickets they can be purchased for \$1. Application for tickets and badges of the R. F. A. must be made to H. B. Stringer, secretary's office, convention hall. The rules of the national society governing the giving out of tickets will be strictly adhered to. A reception committee was appointed and parties will be stationed at all depots to welcome our guests, and to assist them in every way possible.

H. B. STRINGER, Sec'y.

Correction.

In the Joseph Heacock Co.'s palm advertisement on page 81 in our last issue 2½-inch Cocos Weddelliana was priced at \$10 each. This should have read \$10 per 100, while, at the end of the advertisement, the last size of Phoenix Roebelenii should have been 7-inch, not 6-inch as there printed.

Ladies' Society of American Florists.

Members will find the secretary at exhibition hall all day Tuesday, August 16. Please come and get your badges and tickets for reception and dance Wednesday evening, August 17. Directors' meeting at 9:30 a. m. August 17. Annual meeting at 10:30 a. m. August 17, at parlors of Hotel Seneca. Don't forget your badge pin.

MRS. CHAS. H. MAYNARD, Sec'y.

National Sweet Pea Society.

There will be a meeting of the National Sweet Pea Society of America at Rochester at 9 a. m. (place announced later) on August 18. This is in response to a request from the secretary of the S. A. F. to such societies who wish to hold a meeting at the annual convention in Rochester and is in accordance with the resolution passed by the executive committee of the S. A. F. at its spring meeting.

HARRY A. BUNYARD, Sec'y.

American Gladiolus Society.

A long list of good prizes is offered by the American Gladiolus Society at its exhibition in connection with the Society of American Florists at Rochester, August 16-19. Special prizes are offered by Vaughan's Seed Store, Peter Henderson & Co., W. W. Rawson & Co., Weeber & Don, A. L. Miller, E. H. Cushman, A. T. Boddington, John Lewis Childs, I. S. Hendrickson, Geo. B. Hart, Stumpp & Walter Co., F. R. Pierson, L. Merton Gage, J. M. Thorburn & Co., and Montague Chamberlain for various classes and varieties, several silver medals and cups being among the prizes. The competition is divided, there being 14 open classes and eight classes for amateurs. Exhibits by express should be addressed to American Gladiolus Society, Convention Hall, Rochester, N. Y.

Society of American Florists.

DEPARTMENT OF REGISTRATION

As no objections have been filed, public notice is hereby given that the registration of the fern, "Nephrolepis Dreyerii," by Kessler Bros., 52 W. Twenty-eighth street, New York, and G. Dreyer, Woodside, L. I., becomes complete.

REGISTRATION OF CARNATION.

Public notice is hereby given that Henry Eichholz, of Waynesboro, Pa., offers for registration the carnation described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Carnation—Christmas Cheer.—Alvina X Victory; of dwarf growth, forming quickly a very large plant in the field; will produce from early struck cut-

tings, plants furnishing 100 and more blooms per season; adapted as a pot plant for Christmas sales; color of the true poinsetta scarlet.

H. B. DORNER, Sec'y.

August 4, 1910.

CONVENTION NOTES.

The secretary has received notice from the St. Louis Florists' Club that an invitation will be extended the society to hold its 1911 meeting in St. Louis.

Badges have been mailed to all members who have paid their dues. Do not forget to bring them to the convention as two badges will not be issued on one receipt.

From the reports and letters received the attendance at the coming convention promises to be the largest in the history of the society.

A. L. Miller, vice-president, from eastern New York, says that about 200 from New York city will attend the meeting.

The executive board recommends that the society hold a special meeting at the time of the National Flower Show in Boston.

ENTERTAINMENTS.

The executive committee of the Rochester Floral Association met on Friday evening and settled all details pertaining to the programme of entertainment for those in attendance at the convention of the S. A. F. as follows:

TUESDAY, AUGUST 16.

Presidents reception Seneca hotel. 7:30 p. m. Band concert Fifty-fourth regiment band, Convention Hall, 8 p. m.

WEDNESDAY, AUGUST 17.

Ladies auto ride through the parks and principal residential districts of Rochester. Refreshments at the Genesee Driving park refectory. Starting from Seneca hotel at 2 p. m. Ladies reception Seneca hotel 8 p. m. Band concert Fifty-fourth regiment band, Convention Hall 8 p. m.

THURSDAY, AUGUST 18.

Ladies bowling Elm alleys 10 a. m. Men's bowling Grand Central alley 1 p. m. Men's shooting, Riverside Gun club, Genesee Valley park 3 p. m. Band Concert at Highland park by the park band, 3 p. m. Offered through the kindness and courtesy of William Barry, vice-president park board and chairman of the Highland park committee. Band concert Fifty-fourth regiment band, Convention Hall 8 p. m.

FRIDAY, AUGUST 19.

Outing to Manitou beach. Cars will leave Convention Hall at 11 a. m.; returning leave Manitou 7 p. m. to Ontario beach park. Baseball game, S. A. F. vs. Rochester Florists' Association 1:30 p. m.

SPORTS.

Snail race, backward running race, pipe race, elephant race, time race, blind man's race, three legged race, fat man's 200 pounds and over race. Ladies 50-yard dash, girls 50-yard dash, boys 50-yard dash, shoe race open.

Suitable prizes will be offered and as guests of the Rochester Florists' Association, we want as many as possible to attend and with us make this a continuous round of pleasure.

KNIGHTS TEMPLAR WEEK.

"The town is yours" reads the inscription on some of the badges of the chamber of commerce and other people who are helping to entertain the "stranger within the gates" this week, and this almost explains the situation. Probably never in her history has the city been so full of visitors. They have crowded the stores, the parks, the street cars and trains and are everywhere intent upon a good time, while, to the credit of all concerned in their reception, they certainly look as though they were having it. Everybody, from high officials downwards, have unbent, and even the street car conductor and the crossing policeman have lost just a trifle of their dignity. The immense stands erected on Michigan avenue have been crowded with eager sightseers and, to put it mildly, the city has on her carnival dress, for many thousands of dollars have been spent on the decorations, welcome signs and other evidences of good feeling to the visitors. It was freely prophesied that it was going to be a very big week in the flower business but no one who gave any thought to the matter expected it. It is true there have been many entertainments given and these have caused the use of quite a number of American Beauty and other roses, but there has been nothing like a rush anywhere. The principal retailers have probably spent a great deal more money in decorating their stores than they are likely to get out of their week's business and they are happy to have been able to have aided in showing they are not behind in public spirit.

Practically the market is unchanged from our last notes. Beauties are scarcer and although other roses are not much more plentiful the cool August nights have already shown their effect in stiffening up the quality and improving the color. The plants all around will take a brace now and we have probably seen the worst of the stock for the season. A few field carnations are in but they cut no figure and carnations generally will be poor until the new crop from plants kept inside all summer appears. Orchids are decidedly scarce and growers who have an early batch of *Cattleya labiata* will probably make good money of them this year, as the demand cannot now be filled. Easter lilies, *Lilium auratum* and a few of

the speciosum varieties continue to arrive and there is plenty of valley and smaller stocks generally. The gladiolus is everywhere, a vast amount of poor stock being on the market, as well as some good flowers. Hardy flowers still arrive in quantity but the demand is limited. Ferns and green goods generally are in very fair de-

THE FLORISTS' CLUB.

The principal business at the Florists' Club meeting August 4, President Asmus in the chair, was the discussion of the report of the committee on inviting the Society of American Florists to hold its convention of 1911 in this city. The committee was composed of August Poehlmann, J. C. Vaughan, W. N. Rudd and C. L. Washburn and reported in favor of the proposition. August Poehlmann was appointed representative of the club in extending this invitation to the national society at Rochester. Mr. Poehlmann has the unanimous support of the Florists' Club in presenting this invitation endorsed by the Commercial club and the Horticultural Society. Inquiry shows that the delegation from this city will be sufficiently large to require a special train and a substantial sum was appropriated for the entertainment of the party enroute to the convention city. Reservation should be made without delay, addressing G. K. Thompson, 180 Clark street, corner Monroe (Telephone, Harrison 7600), or E. F. Winterson, 45 Wabash avenue (Telephone, Central 6004).

Chairman Yarnall of the bowling committee said the club would be represented at Rochester by a team of five selected from the following: Leonard H. Vaughan, George Asmus, Ed. F. Winterson, William Graff, John Huebner and T. C. Yarnall. An appropriation was made toward the expenses for the bowlers who will represent the club in the national tournament. The following were elected members of the club: Alex Garland, Des Plaines; H. Yepson, 606 Oakton street, Evanston, and Herman C. Wendland, Elmhurst. Geo. H. Bancroft, Cedar Falls, Ia., addressed the club telling of prosperous conditions in his territory and Robert Newcomb, of Bisbee, Ariz., told of business conditions in the mining regions.

Vaughan's Seed Store exhibited some very promising new gladioli, including among others Elizabeth Kurz, a fine, robust white from Germany, which shows no trace of the disease to which White Lady and others of that section

are subject, Early Amethyst, a seedling, the flowers of which are now bringing nearly as high a price as America on this market, and an unnamed Princeps seedling, very vigorous, with bold spikes of handsome dark red flowers.

Vice-President Philpott's duties in connection with the annual convention of the Canadian Horticultural Association, of which he is president, prevented his attendance on this occasion.

NOTES.

A function that is causing much interest annually is the flower show and anniversary meeting of the Luxemburger brotherhood, which is to be held on Labor day and the Sunday preceding it. The show is held at Ebert's & Karthausers groves at 6656 Ridge avenue, and as the admission is only 25 cents there should be a big attendance. Flowers, vegetables and fruits are all exhibited and \$1,500 is offered in prizes. Alderman Reinberg, N. J. and Henry Wieter and other prominent growers of the north side are all interested in this affair and a good time is assured all who attend.

The roses now arriving at the Poehlmann Bros. Co.'s store are in excellent shape, the cool nights having improved their quality considerably and from now on there will be no trouble in obtaining stock with substance enough to ship as far as is necessary. There are also fine stocks of lilies and valley, carnations of fair quality and orchids. At the greenhouses *Cattleya labiata* looks well and there will be good cuts on in time for the fall weddings.

C. W. McKellar and wife are still away in the east but will return immediately after the convention, shipping their car from New York instead of driving home, as they first intended. Meanwhile the store is in charge of Frank Ayres, who reports the demand of orchids just now as above the supply. He leaves August 21, the day Mr. McKellar is expected home, for a month's vacation in Canada.

At Winterson's Seed Store we noted large quantities of *Amaryllis Johnstoni* offered, a showy lily from the Cape. Vacations are in order here, John Degnan being in Michigan, A. E. Bemish going to Algonquin, while Miss Irene Love is spending her vacation at South Haven, Mich. Louis Winterson intends taking a trip the end of the month.

Summer Flowers

New Beauties, Kaiserin, Rhea Reid, Pink Killarney, Maryland, White Killarney

These are the Best Roses for hot weather. We devote a whole range of glass to their growth, and our plants are two to five years old, giving big, strong flowers.

Bassett & Washburn

Store and Office: 76 Wabash Ave.,

CHICAGO

Greenhouses: HINSDALE, ILL.

Vaughan & Sperry keep busy all the time and are certainly moving a lot of stock. L. A. Vaughan has been suffering from a severe cold, but is sticking to business. Fred Sperry is still away on vacation. The asters now being handled here are remarkably fine and excellent gladioli, lilies and other flowers are seen here daily.

Zech & Mann are receiving fine stock from their greenhouses, where Matt Mann presides in person, John Zech taking charge of the store end. Besides their own stock they handle great quantities from other growers and just now are showing considerable hardy stock, such as phlox and other perennials.

Bassett & Washburn clean up their stock at the store every day, though the summer roses are coming in great quantities. They have not yet commenced to plant carnations from the field, the soil being too dry, but have the benches ready as soon as a rain comes.

Trade keeps up well at the Budlong store and the quality of the rose stock now arriving is very creditable to the growers. Phil Schupp is paying particular attention to the out-of-town shipping trade and the stock is fine for the purpose.

At E. H. Hunt's fine, well grown asters are leaders, the flowers being remarkably good for this dry season. Trade keeps up well here and the staff—lessened in number because of vacations—is kept pretty busy.

Good Beauties and other roses and carnations, far better than usually expected in August, may be seen at Peter Reinberg's. Shipping trade keeps up remarkably well here.

Michael & Bros., 7036 Cornell avenue, recently purchased a Fairbanks-Morse 3-h. p. gasoline engine, and will use same for watering in the greenhouses.

Geo. H. Bancroft, of Bancroft & Sons, Cedar Rapids, Ia., has been in town during the week, buying greenhouse material from the J. C. Moninger Co.

Vaughan's Seed Store is shipping Liliun formosum bulbs this week. Their French bulbs are enroute from New York and due here August 15.

The annual fall flower show will be held at the First Regiment Armory, Michigan avenue and Sixteenth street, November 7-12 inclusive.

Gustav Swenson of Elmhurst and E. T. Wanzer of Wheaton are installing the Skinner watering system.

A. E. Kunderd, of Goshen, Ind., was in town last week showing his new ruffled gladiolus to the trade.

Wendland & Keimel of Elmhurst have about completed their new \$900 brick chimney stack.

Paul Reith & Co., of Downers Grove, have started to rebuild their greenhouses.

Henry Seger of Washington Heights is extending his greenhouse plant.

Visitors: Thos. Chapman, Denver, Colo., on a vacation trip to Lake Superior; Geo. H. Bancroft, Cedar Rapids, Ia.; Robt. Newcomb, Bisbee, Ariz.; W. A. Bramley, of Bramley & Son, Cleveland, O., attending the Knights Templar conclave; O. J. Olson, St. Paul, Minn.; Mrs. Shoberg and L. Henderson and wife, Omaha, Neb.; N. Bommersbach, Decatur, attending the Knights Templar conclave; C. H. Hume, Memphis, Tenn.; W. W. Coles, Kokomo, Ind.; W. A. Reiman and wife, Vincennes, Ind.; J. Bland, Independence, Ia.; Chas. Brown, wife and son, Canton, O.; Grant Nash, Cobden; Harry Balsley, Detroit, Mich.; M. C. Kent, of Kent Bros., Newark, O.; Arthur Graves, Bloomington; L. P. Harley, Hartford, Mich.; G. R. Gause, Richmond, Ind.; F. H. Holton, Milwaukee, Wis.

Chicago to Rochester.

The Chicago Florists' Club has arranged with the Lake Shore & Michigan Southern railroad for transportation to the Rochester convention as follows:

A special train will be provided, same to be counterpart of the Twentieth Century Limited and to consist of combination baggage and buffet car, one of the famous Lake Shore diners, as many as 12 sections and drawing room sleeping cars (compartment cars if desired) as may be required to properly take care of the party and give everyone plenty of room, the train to be finished off with either an open section or compartment observation end sleeping car. The train will leave Chicago at 5:30 p. m. Monday, August 15, arriving in Rochester at 9 a. m. Tuesday, August 16.

The rate authorized for this occasion is one and three-fifths fare on the certificate plan, \$13.38 going (passengers to be sure and ask for certificates in purchasing their tickets, for on same will depend their being able to secure the reduced rate returning) and three-fifths of that or \$8.10 returning, making a total of \$21.48 for the round trip. The Pullman rates are as follows: Double lower berth or upper berth, \$3; section, \$6; compartment, \$8.50; drawing room, \$11.

Delegates from St. Louis, Indianapolis, Louisville, Cincinnati, Columbus, etc., can join together and arrange for special sleepers to be attached to this special train at Cleveland, thus bringing all together at that point for the remainder of the journey, Cleveland to Rochester. As to the Detroit people, it would be a very easy matter for them to join the special train at Toledo. The St. Louis people could come via Chicago and join this special train if they so desired, as the same rate

would apply through Chicago as via the direct line.

G. K. Thompson, general agent passenger department, will accompany the party for the purpose of seeing that everything goes smoothly. For further information and reservation, address G. K. Thompson, 180 Clark street, corner Monroe (Telephone, Harrison 7600), or E. F. Winterson, 45 Wabash avenue (Telephone, Central 6004).

A cordial welcome is extended to any outside florists' clubs, who may wish to join the Chicago Florists' Club special train for the Rochester convention of the S. A. F. Those who wish to be requested to communicate with L. A. Winterson, secretary of the Chicago Florists' Club, 45 Wabash avenue, stating how many will join, in order that proper accommodation may be provided.

St. Louis.

STOCK IN GOOD DEMAND.

In August business is not expected to cut much figure. The first of the down-town theatres opened up August 7, and every week will see the others getting into line. Of course this will help some. Many of the craft will be away on vacations and quite a few will attend the S. A. F. convention at Rochester. Many are cleaning, painting and improving their stores so they will bear a bright and new appearance when trade starts in next month. Stock has been in demand and there has not at any time this week been an over supply. Asters are getting more plentiful and much improved in quality. There are not many American Beauty roses, though there is always a demand for this rose. At the wholesale houses there is that dullness which shows itself in the absence of those regular buyers who never fail to make their daily rounds when the season is on. Some extra fine long dagger ferns are in and sell well on account of their keeping qualities. The damp cool weather experienced in early spring accounts more or less for the lateness of tuberose. Some good Asparagus plumosus and A. Sprengeri are in and selling well.

NOTES.

For several months past the Retail Florists' Association has had under consideration the opening of a co-operative wholesale flower store. At present the outlook is for an early adoption of the plan. The object is to furnish the retailers with a regular supply of stock at lowest cost to retailer which end will be attained by their pooling their interests.

C. G. Westman, formerly with Grimm & Gorly, is now with F. H. Weber. F. H. is getting ready for fall trade. He is a hustler and has been very prominent and successful of late years at our flower shows capturing many important prizes. He is painting and fixing up all around. He finds pleasure in his touring car in the evenings.

The Retailers' Association met last Thursday evening at the Knights of Columbus hall and had a lengthy meeting. Crepe-pulling methods were discussed and the best way to put a stop to them caused a long debate. These and other matters were laid over to next meeting which will be held in September.

Alex. P. Geranios, manager of the Metropolitan Floral Co., will open his new store about August 15; fixtures are being put in. He will handle the best stock the market affords and run a first-class store. Miss Hattie Kubisch, formerly with the Koenig Floral Co., will be the saleslady.

Mrs. Daniel S. Brown, of Kirkwood, wife of Daniel S. Brown, vice-president of the Coopersage Co. and celebrated orchid specialist, accidentally

CHAS. W. McKELLAR
51 Wabash Avenue.
CHICAGO.

threw a valuable pearl necklace into a log fire together with a paper napkin while at a bridge party. The necklace, valued at \$2,000, was totally destroyed.

At the W. C. Smith Wholesale Floral Co. everything is in a state of confusion. Alterations have commenced and tearing down walls and other improvements will take at least two months to complete, but when finished they certainly will have the place.

Otto Bruenig has returned and will have full charge while H. G. Berning and wife attend the S. A. F. convention. This firm has had a fine stock of asters, American Beauty and other roses all week and when there is anything doing Henry has his share of it.

The Burke Floral Co., under the management of John Burke, will open its new store in a few days. It is a pretty little place in a good location opposite the Rock church and the Central high school. Johnny was busy getting ready for the opening.

John Steidle is now cutting and sending to F. C. Weber a fine crop of Longiflorum lilies. His purple, white and pink asters are as clean and well grown as any coming in to the market, also his rose crop is coming on nicely.

C. A. Kuehn is getting some of the best looking stock coming into the market. Some extra fine lily of the valley is seen. Fancy asters, lilies and a fine crop of summer roses were to be seen on the counters.

Andrew Hoffmann, foreman at Geo. Waldbart's, is on his vacation. He has built himself a fine family residence and is moving into it during his vacation. Andrew has been a steady and faithful worker.

At Geo. Angermueller's a fine crop of asters and gladioli are in. Roses are arriving slowly. Good White Killarney and Killarney are cleaned up. American Beauties have been in demand.

Bassett & Washburn, Chicago, are shipping some good color American Beauties here. The buds are well shaped and show great vitality.

John Connon and wife, Webster Grove, are expected back this week from Canada where they have been spending a most delightful time.

Throughout the Kirkwood district violets in some places are looking poor. They attribute this to the very wet weather through June and July.

Jim Arado, manager of the cut flower department at C. Young & Sons

Co., has been indisposed and confined to his room all last week.

Charlie Steidle, son of John Steidle of Olivette, who is employed by Bassett & Washburn of Chicago, is on his vacation visiting his parents.

Dominic Bova, of the Red Bud Floral Co., is all smiles. A 9-pound girl has arrived and he is now a very proud papa.

David Geddis, formerly foreman at C. A. Samuelson's, Chicago, is now with F. C. Weber as designer and salesman.

Geo. Waldbart always has an attractive window. In middle of summer he always has the latest and best in the market.

R. J. Windler is home again and has fixed up his store. He has a fine stock of everything.

The Woodbine Floral Co., Kirkwood, is cutting some fairly good carnations.

Frank Windler has returned from his vacation. W. F.

PITTSBURG, PA.—A. W. Smith is installing raised cement benches in his greenhouses, using his own molds, which give excellent results.

AUGUST F. RICHTER Co., 455 W. Huron street, Chicago, manufactures an especially nice line of fern boxes. Inquiries will receive prompt attention.

M. J. RUPP, of the J. C. Moninger Co., 902 Blackhawk street, Chicago, will have charge of the exhibits at the Rochester convention. Among the exhibits will be sample boilers, greenhouse material and new features of construction. Mr. Rupp will leave August 14 and will have everything in readiness for the opening day. He will also take with him some plans, blue prints, etc.

DESLAINES, ILL.—A few of the Geo. M. Garland Co.'s exhibits at the Rochester convention will be: a sample house, 12x18 feet, of its latest construction, a soil conveyor, a greenhouse handy truck and a concrete post mould. H. S. Garland and H. Blume leave August 13 and will make the journey by boat, and will have everything in readiness for the opening day. B. J. Maynard of Cleveland, O., the eastern representative, will also be at the convention. Mr. Garland said he would like to have accompanied the crowd to the convention but it was necessary to go ahead to superintend the exhibit. The company has enjoyed a very good season and the end is not yet.

Chicago Notes.

C. Clemenson, 7801 Railroad avenue, is now occupying his new store and flat. Preparations for building were made last fall, but were not completed until spring. The fixtures, consisting of an icebox, counter and wall case were purchased from Paul J. Daemticke, 1336 Fullerton avenue. The fixtures are of solid oak and of a natural oak color. A fibre composition floor was laid by Demling & Wendt, 84 La Salle street. This floor is both fire and waterproof and is guaranteed for at least five years. These floors are used in nearly all the public buildings in Germany and have proved to be far superior to wood and other floors. Both electric and gas lights are used. A large workroom is in the rear of the store and a cold storage room in the basement. A Kewanee firebox steam boiler heats both the store and greenhouse. The greenhouse, 26x125 feet, is nearly completed, a few more benches will be put in. The house is of iron and concrete and was purchased from the J. C. Moninger Co. Cement walks are laid in the house and electric lights have been put in. Mr. Clemenson said his investment was about \$20,000. The location is an ideal one; five streets lead directly to the door. The greenhouses on Sherman avenue have been sold to Joe Michael, who will remove same to his place on Stony Island avenue. Without doubt, Mr. Clemenson has one of the most up-to-date places in the city, and we have to thank Mr. and Mrs. Clemenson for their kind hospitality on the occasion of our visit.

Luke Collins, 1441 E. Seventieth street, is making preparations for fall planting. Two greenhouses are devoted to ferns and one to carnations. The asters are in fine shape. Mr. Collins has charge of the flower beds and window boxes of the South Shore Country club and this keeps one man busy. William assists his father about the place and extra help is also needed. A large amount of funeral work is turned out and a good business done in the cut flower line.

Jas. Curran, 2909 Archer avenue, is having a cement walk laid in front of his store. Two designs, a 21-inch pillow, made of white and pink Killarney roses and asters, and a gates ajar of Killarney roses and lily of the valley were delivered at 3043 Lock street, July 29. Mr. Curran will take in the S. A. F. convention at Rochester.

Paul Paverlick, 3308 S. Hoyne avenue, will leave next week for Peoria

LODI, CALIF.—The thirty-seventh annual convention of the California Fruit Growers' Association will be held in San Joaquin county either in this place or Stockton in December.

MOORESTOWN, N. J.—The State Horticultural Society held its midsummer meeting July 28 at the home of Horace Roberts. An exhibit of the new Pan-American strawberry was made, which will bear fruit from June until late. Barton Bros., the Burlington county peach kings, who cleaned up \$20,000 alone on this crop last year, were prominent among the crowd. Several hundred attended the meeting.

BUSINESS CONTINUES DULL.

In the forenoons there is some show of activity about the stores but it usually drops back to a dead level of dullness in the afternoon. Good stock continues scarce. Quite a few tea roses are seen but generally they are short stemmed with small blooms. A few carnations are seen but they are scarcely a factor at present. The asters are now in quantity and the late rains have improved the quality. There is an abundant supply of very good lilies and lily of the valley. The retail stores are very quiet, funeral work being the main feature. At some stores advantage is being taken of the dullness to paint and redecorate.

NOTES.

M. J. Callahan is an enterprising young retailer with two stores on Market street, one at 3804, the other at 3924. In the latter store he is making extensive improvements and will erect a conservatory in the rear 19x85 feet. Mr. Callahan has only been in business for himself a little over three years and his success has been marked. Frank L. Polites has a very handsome display in the window of his Chestnut street store, a large aquarium with water lilies and gold fish as the attraction. His buyer, James Paul, has gone for a trip to Europe.

George Craig of 211 South Eleventh street is one of the retailers who takes the summer dullness philosophically. He has a nice store, with a

GEORGE B. HART,

**Wholesale Dealer in Cut Flowers, Plants,
Bulbs and Florists' Supplies.**

24 Stone St., Rochester, N. Y.

We extend a cordial invitation to all visiting Florists to pay us a visit during the Convention of the S. A. F. and O. H.

New York.

August being generally considered the dullest month of the year market conditions are just about what we generally expect at this time. The long drought has at last been broken and, although there has been very little rain in the city, the surrounding country is getting its share, consequently all outdoor stock is arriving in better condition. Asters and gladioli, while much better, are not moving any faster and are not bringing any better prices. Roses are arriving in poor condition and very small and are hard to move. While American Beauties are not as plentiful as the previous week, owing to lack of demand there is no increase in price. Lillies are not as plentiful this week and they also are lacking purchasers. Cattleyas are getting scarcer, while lily of the valley is bringing \$2.50 per 100 for the best. A great many of the wholesalers are taking advantage of the dull period to send their employes on well earned vacations and are going away themselves to recuperate their strength and be in readiness for what everyone expects will be an unusually busy season to come.

NOTES.

Mr. Reed of Reed & Keller has just returned from an extended tour of Europe having visited every European country except the British isles. Mr. Reed visited the exposition in Brussels but was particularly impressed with an exhibit in Hamburg of garden and farm products and agricultural implements. In describing the latter Mr. Reed stated that in his opinion Germany was equally as far advanced in the manufacture of these wares as America and that the day of exporting agricultural implements from this country there was practically over. He also purchased numerous novelties while abroad and will exhibit these at the convention.

A visit to Woodlawn cemetery section found conditions to be unusually bad this summer, the long drought and intense heat having badly scorched the bedding plants and grass and the surrounding florists who have care of the plots are having a hard time as every drop of water has to be hauled from outside the cemetery. Millson has his usual artistic carpet bedding display of a railroad engine and train of cars; last year his display consisted of the ship, Half Moon, and the steamers Claremont and Hendrick Hudson,

and this was greatly admired by the passing throngs on the railroad.

J. Grulich & Son, Hoboken, N. J., were fortunate in securing a large funeral order on Thursday which is particularly acceptable at this time of year. Among the pieces was a casket cover made of lavender asters—Lilium auratum and lily of the valley while the interior of the casket was trimmed with cattleyas; also a large cross made entirely of cattleyas and asparagus.

Chas. D. J. Noelke, Seventh avenue, Harlem, has returned from a two weeks' stay at Brielle on the Jersey coast. Mr. Noelke is a member of the Twenty-first district school board. Mrs. Noelke will leave shortly for a month's stay at the same place.

John Foley, with Lecakes & Co., spent a day fishing last week and reports "never again" for him; we surmise that he must have been sea sick.

Mr. Hanflin of Russin & Hanflin has just returned from Europe where he has been gathering novelties for two months for the coming season.

Wm. Ford, of the former firm of Ford Bros., has leased the store at 45 West Twenty-eighth street from Russin & Hanflin and will occupy same as soon as alterations are completed expecting to be open for business September 1.

Mr. Henshaw is back from a two weeks' tour through the New England states and has the appearance of having spent a month in the tropics, his complexion being pretty well tanned.

Rumor has it that there is to be a combine of three large growers and former commission men who will open shortly on Twenty-eighth street.

Harry Bunyard has gone to the Adirondack mountains for a much needed rest, but expects to be on deck at the convention.

Chas. Miller with Walter Sheridan is back from his vacation which was spent in Sullivan county.

Chas. Matthews, with E. C. Horan, is spending a two weeks' vacation in Sullivan county.

V. S. DORVAL, Secretary.

Albany, N. Y.

Louis Menand, Sr., Cemetery avenue, has decided to go into the growing of orchids for the local market. During the past three years the demand for cattleyas for decorative purposes and for corsage bouquets has been growing, as has also the use of cypripediums for funeral pieces. Mr. Menand has imported from London a consignment of cattleyas and dendrobiums of good commercial varieties. He has also received many plants from the G. L. Freeman Co., Fall River, Mass. On the afternoon of July 30 a hailstorm swept across the houses owned by Mr. Menand. The glass in two of the oldest houses was thoroughly riddled by the stones, which had no effect, however, on the double thick panes used in later years.

The August meeting of the Florists' Club was held at the establishment of Secretary F. A. Danker. President Goldring, who is chairman of the flower show committee, reported that everything had been done up to the present that can be accomplished and that the premium list is ready for the printer. The club will hold its second annual show in the state armory in

STOCK BETTER.

A general improvement in most of the stock being offered is very noticeable, the few rains that we have had showing their effect in the outside lines, with the exception of sweet peas, which, of course, the showers in many cases have almost spoiled, but a few days of pleasant weather will make them better than they have been for some time, for everything needed the rain badly. In fact, what moisture has fallen is only enough to tide over for a few days and we badly need two or three good rainy days for the benefit of all vegetation. The monthly rainfall for July is way below the average. Roses remain as they have been for the last few weeks; the quality of the cheap grades is far from good. The cut from the spring planted stock is being offered by some growers and is perhaps as good as can be expected, but they are yet small and lack body. There are some very good Kaiserins, Marylands and Carnots being offered and they are bringing fair summer prices. Beauties are far from good, while the stem is perhaps all that can be desired, the blooms are small and the color very light. Carnations are offered by some of the growers and show a decided improvement, but the majority of the stock is still very small. The quantity is now decreasing rapidly, as the replanting of the houses is now receiving the growers' attention. The prices remain about the same. Asters are much better and show the most improvement of any of the stock on the market, and the best are bringing good prices. Some beautiful gladioli are now to be procured and they are very effective in the window displays of the different stores. Lilies are still plentiful and good. The first chrysanthemums made their appearance this week, some Golden Glow, a little too early to be appreciated.

The retailers are busy and slack by turns, about as they expect during the summer months, but in some cases the busy days outnumber the poor ones. Galvin's Tremont street store the early part of the week had enough on hand to keep the help going overtime. While there is scarcely any effort to make great window displays and in the up-town stores the decorations consist of decorative plants, down-town some one flower is made the important feature and is displayed in a manner to catch the eyes of the passer-by. In Penn's window was a handsome row of cen-

Lilium Harrisii

Now Ready for Delivery.

Our first consignments have just reached us, and our advance orders are all filled. In view of the fact that crop is shorter than last year, we advise those who have not already ordered to lose no time doing so. Last year we were not able to meet the demand for our selected Harrisii on late orders. At present we have a good supply, and will be able to take care of early orders; but there should be no delay in ordering, as there is sure to be a scarcity of good stock, especially in the large sizes.

We offer selected stock of the original true Harrisii for early forcing, grown from the original true stock—splendid stock for early forcing, for which purpose Harrisii is so valuable. Our stock is not picked up indiscriminately from different sources, but is grown from one stock, and will be found very superior to the ordinary Harrisii usually offered, both in regard to freedom from disease and purity, and not the late type now so often furnished.

INTERNATIONAL FLORAL ASSOCIATION

We are now ready to contract for the American memberships to the International Floral Service for prompt delivery to any part of the globe.

DELIVERED ANYWHERE, FOREIGN OR DOMESTIC.

WE have contracted for our European connections and are in a position to deliver flowers promptly in Canada, England, Germany, Ireland, Scotland, Austria, Hungary, Belgium, Denmark, France, Italy, Luxemburg, Netherlands, Norway, Sweden and Switzerland, China and Japan, and other countries where there are florists.

WE will shortly inaugurate a publicity campaign advising the public that the service is ready and that they can have prompt deliveries through their local florists for weddings, funerals, parties and birthdays, or for any occasion where flowers are to be delivered to any part of this country or Europe.

AN Interstate service for America is now in process of organization.

The membership will be limited to a reputable florist in each locality; those desiring membership should write at once, to address below, with enclosures of five good references as to their *business integrity*, not financial standing. This is to insure promptness as well as to guarantee that *full value will be given for every dollar received*.

We will not consider an application for territory without the above references.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L.H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

SWEET CORN prospects are said to have improved.

THE Mississippi river at Burlington has touched the low water mark established in 1864.

CHICAGO onion sets will be of very fine quality in size and condition if rains do not interfere soon.

WINTER VETCH seed has advanced \$1 per 100 pounds; it is a great winter cover crop.

CARLOAD lots of *Lilium formosum* from Japan have arrived at Chicago in good order—the date is early.

THE general outlook for the tuberose crop may be said to be fairly good, although there has been too much rain the first part of the season.

NEW YORK.—H. Frank Darrow will return from Europe about August 20. —Geo. Stumpp, of Stumpp & Walter, is away on a short vacation.

VISITED CHICAGO.—J. A. Goodyear, Michigan state representative of Iron Age goods; Arthur B. Clark, Milford, Conn., returning to the east after a protracted stay in the pea and bean districts; W. B. Stubbs of Wood Stubbs & Co., Louisville, Ky.; M. C. Kent of Kent Bros., Newark, O.

CHICAGO.—Prices on the board of trade August 10 for grass seed were noted as follows: Timothy, \$5.50-\$6.50 per 100 pounds. White clover from 20 cents to 25 cents. Leonard H. Vaughan is on an eastern trip.—Winter or tree onions sets are arriving and in demand, price about three cents per pound to dealers in moderate lots.

The Advance In Peas.

The Jerome B. Rice Seed Co., of Cambridge, N. Y., has furnished the following table of comparative prices of the leading canners' varieties of peas, August, 1909, and August, 1910.

	Aug., 1909	Aug., 1910.
Advancer	\$4.00	\$5.00
Alaska	4.00	5.00
Extra Earlyies ..	3.75	5.00
Gradus.	6.00	8.00
Horsfords	4.00	5.00
Telephone	4.50	6.00

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

Louisville Onion Sets.

Louisville, August 4.—We have not made any estimate that we would consider as thoroughly reliable regarding the damage done to onion sets in this district, but we find the acreage pretty large and the general size of the sets slightly above an average. This will have a tendency to make an increased yield over the district.

Some of the sets are being sold to jobbers at the present time on the basis of 50 to 55 cents per bushel of 32 pounds to the grower for Yellow Danvers and about 20 cents per bushel advance over this price for White. The market will scarcely be established, however, for at least 30 days, until the general qualities can be obtained as the harvest has been considerably delayed by rains. J. W. J.

Chinese Red Tuberoses.

PRODUCED BY ARTIFICIAL MEANS.

In regard to the allegation published in the United States some time since, that the Chinese florists of Tientsin grow tuberoses of a red color, and perhaps of other shades, Consul-General Samuel S. Knabenshue makes the following report:

Some time since, this consulate received a letter from a florist in the United States, inclosing a sum of money, with the request that he be furnished with its value in red tuberose bulbs. He stated that he had been informed by a gentleman who had traveled in China that he had seen red tuberoses grown by native florists in Tientsin.

Inquiry was made of a German florist here, a resident for many years, who stated that there is no natural red tuberose, but that the flowers are artificially colored. As the tuberose of the ordinary white variety is near flowering, the flower stalks are cut off close to the ground and are placed in water in which is dissolved a red earth, of whose composition he is ignorant. The coloring matter is drawn up into the flowers, tinting them red—the first that appear being very slightly tinged, but the color becoming more pronounced in those which open later. He also stated that the red color can be produced in this way by using aniline colors, not only red, but any other aniline color which may be desired. Native gardeners, however, insisted that natural red tuberoses were grown, but declined to sell bulbs of the alleged red variety with a guarantee that the bulbs would produce red flowers, the payment to be withheld until the bulbs were tested.

Finally a native gardener admitted that these are bulbs of the ordinary white tuberose, reared in ordinary flower-pots in this way: The opening in the bottom of the pot is closed with

a cork; the pot is filled with earth mixed to a mud with water in which the coloring matter has been dissolved; the bulbs are planted in this after a number of small incisions have been made in the lower half of the bulb above the roots; a thin covering of uncolored earth is placed over the earth in the pot to conceal the colored portion below; and the plant is supplied with water in which the coloring matter has been dissolved. The resulting flowers have the tint of the coloring matter used.

Imports.

During the week ending July 30, imports were received at New York as follows:

F. R. Pierson Co., 46 cases bulbs.
Schultz & Ruckgaber, 39 cases bulbs.
W. Hagemann & Co., 28 cases bulbs.
Amermann & Patterson, 18 cases bulbs.

Henry & Lee, one case bulbs.
J. Munroe & Co., 150 bags seed.
To others, 601 cases bulbs, 58 cases plants, 135 bags, 87 bls. seed, 10 bls. poppy seed.

During the week ending August 6, imports were received at New York as follows:

H. Nungesser & Co., 650 bls. clover seed.

J. M. Thorburn & Co., 15 bags seed.
H. F. Darrow, eight cases seed.

P. Henderson & Co., seven cases bulbs.

McHutchison & Co., two cases bulbs.
F. R. Pierson Co., two cases bulbs.

To others: 372 cases, three bbls. lily bulbs. 125 bags, 18 cases, 16 pkgs., seed. 200 lbs., 50 bags, clover seed. One case plants.

Bean Anthracnose.

The bean anthracnose is known to growers under a number of different names, depending largely upon the locality. Perhaps the most common one applied to this malady is "rust." As a matter of fact the disease is not rust at all, though the spots do have a reddish yellow color in their early stages. There is a true rust of beans which is rarely met with in ordinary bean fields. Pod-spot is a name which is frequently applied to the disease, as it appears in the pods. Blight is also commonly used, but incorrectly so, as we have a true bacterial blight of beans, which is not only very common, but frequently quite destructive. The general characters of these three most common diseases of beans are set forth in Bulletin 239 of the Michigan Experiment Station, and accompanied with figures which show clearly their respective characters. The disease is readily recognized by the appearance which it gives to the infected pods, and it is here that the trouble is usually first recognized. The disease may and usually does occur, however, on all parts of the plant except the roots. It is caused by a fungus known to botanists as *Colletotrichum Lindemuthianum*, which lives as a parasite in the tissues of the bean. This fungus is a plant, as much a plant as the bean on which it lives. It has a thread-like mycelium that grows into the tissue of the bean to obtain food for its growth and development and it produces spores that serve the purpose of seeds by which it spreads to healthy beans and so reproduces itself. In fighting the anthracnose fungus, we are fighting a parasitic weed, in its habitats not greatly unlike the dodder which often destroys alfalfa. In considering the methods of combatting this disease three or four possible means are presented. First, seed treatment; second, spraying; third, the planting of clean seed; fourth, selection and breeding of resistant or immune varieties.

"QUALITY" CHRISTMAS SWEET PEAS.

AT the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cts., ¼ lb. 4 cts., ½ lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Florence Denzer. Pure white. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Le Marquis. This is the same color as Princess of Wales violet; but very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Helen M. Gould. White, open flower; standard lilac. marbled. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. Alex. Wallace. Lavender. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. William Sim. Salmon-pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Geo. Lewis. Large, pure white wavy flower. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. W. W. Smalley. Satiny pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Hannan. Deep rose-pink of a very pleasing shade; medium flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. F. J. Dolansky. Daybreak pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Chas. H. Totty. Sky-blue; late. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Zvolanek. Blue, variegated; good for variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Wallacea. Very fine lavender, a grand florists' variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Watchung. Pure white. Oz. 2 cts., ¼ lb. 6 cts., ½ lb. \$01.000, lb. \$1.75.

Wm. J. Stewart. Blue self. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

All other varieties of winter and summer flowering Sweet Peas supplied. Write for quotations upon large or small quantities.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

YOKOHAMA NURSERY CO., Ltd., 31 Barclay St., New York

ALLENTOWN, PA.—Ernest Ashley is building new greenhouses, the beginning of a new range which will be increased. Mr. Ashley came here about eight years ago and rented the greenhouses at Fourth and Tilghman street, which he expects to occupy for two more years. During the last few years business has increased so rapidly that it was found necessary to commence building operations. The two new greenhouses that are in course of erection are located a short distance east of the site on which the old East Allentown tollgate stood for many years. The greenhouses are modern in every respect and will be equipped with all conveniences. Each of the houses will be 21x125 feet and at the west end is built the office.

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1889. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; 1/2 oz., \$1.50; 1/2 oz., \$5.00; oz., \$10.00.

VAUGHAN'S "GIANT PANSY MIXTURE,"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt., 25c; 1/2 oz., 60c; oz., \$4.00; 1/2 lb., \$14.00.

Cyclamen Seed

Best Types and Colors.

Pure White (Mont Blanc) Per 1,000 seeds, \$5.00;
 Dark Crimson Per 100 seeds,
 Rosa von Marienthal (Daybreak) 75c; 250 seeds
 Dark Rose of a color at the
 White with Carmine Eye 1,000 rate.
 Giant-Flowered Cyclamen, extra choice mixed. Per 100 seeds, 50c; 250 seeds, \$1.15; 1,000 seeds, \$4.50; 5,000 seeds, \$20.00. This mixture is made up of the above separate colors.

NEW GIANT ORCHID-FLOWERED CYCLAMEN.

These are exceptionally fine with very large flowers that are frilled and fringed in wonderful fashion.

Pure White, Red, Pink... Each, per 100 seeds, \$1.00;
 White with Carmine Eye and Lilac Colored..... 1,000 seeds, \$9.00
 Giant Orchid-Flowered Cyclamen, in choicest mixture, 25 seeds, 25c; 100 seeds, 85c; 1,000 seeds, \$8.00.

New Salmon (Glory of Wandsbek). This is, to our knowledge, the best strain in this color, which is very striking and well liked by the public. Per 100 seeds, \$1.35; 250 seeds, \$2.85; 1,000 seeds, \$10.50.

SMILAX SEED

Trade Pkt., 10c; Oz., 25c; 1/4 Lb., 90c.

MIGNONETTE New York Market.

New Seed Now Ready.

This is an extra choice strain of Mignonette for greenhouse culture. Our seed is greenhouse grown, raised by a most careful grower. The plants grow from two to three feet high and produce flower spikes up to twenty inches long, according to the quality of the soil, weather and treatment. The seed is all saved from selected plants, grown from three to five shoots to a plant, and was all saved from the spikes measuring from ten to eighteen inches long. Trade pkt. (about 1,000 seeds), 50c; per oz., \$7.00; 1/4 oz., \$1.00.

ASPARAGUS SPRENGERI.

100 seeds, 15c; 250 seeds, 25c; 1,000 seeds, 75c; 5,000 seeds, \$3.25.

VAUGHAN'S ENGLISH CYCLAMEN. Unrivalled.

Rosy Morn. Giganteum variety, delicate rose color. Claret base.
 Picturatum. Giganteum variety. Light rose tinted with claret base.
 Grandiflorum Album. The largest giant white grown.
 Excelsior. Giganteum variety. White with red base. Extra large flowers.
 Princess May. Pale pink.
 Princess of Wales. Giganteum variety. Pink.
 Mauve Queen. Giganteum variety. Mauve.
 Duke of Connaught. Giganteum variety. Purplish crimson.
 Duke of Fife. Giganteum variety. Dark rose.
 Salmon Queen. New.

PRICES: Trade, 100 seeds, \$1.00; 1,000 seeds, \$9.00 net.

Vaughan's Winter Flowering Sweet Peas

New Seed Ready in August.

White Seeded Sweet Peas. Put seed in water over night, then put in box or flat and in a temperature of 60 degrees. Seed will germinate in two days and then can be sown.

	Oz.	Lb.		Oz.	Lb.
Angelino, self pink.....	.20	\$1.50	Mrs. Alexander Wallace, lavender.....	.15	\$1.00
Christmas Pink, pink and white10	1.00	Mrs. W. W. Smalley, a pleasing satin pink20	1.50
Christmas White.....	.10	1.00	Mrs. Geo. Lewis, pure white....	.25	2.50
Earliest of All, pink and white10	.85	Mrs. William Sim, salmon pink20	1.50
Mont Blanc, white.....	.10	.60			

If sweet peas are wanted for Christmas, sow the seed in well-ventilated houses, not before August 15, nor after August 25. This sowing will bloom from November 1 until April. For the main crop in January or February, sow about September 15. If the best sweet pea flowers are wanted for Easter (April 16 in 1911), sow the first part of November.

Notes on Seed Growing.

There is a growing demand for better seeds. With improvements along all lines, the average grade of seeds sold does not fill the bill. Not that the seeds obtained do not grow, or are not what they are represented to be, the trouble lies deeper—they are not bred up to a standard of perfection. The remedy is a matter of price. Growers are rapidly realizing the great value of fine strains and are willing to pay for such. Their demand will be supplied in time. At present much seed is sold far below a fair remuneration for skilful growing. For instance, in our locality a great deal of tomato seed is produced. The average market price of tomatoes rarely drops below 50 cents per bushel, while the seed contractors pay only about two cents. The result is unavoidable—the good fruit goes to market and the poor to the seed mill, much to the detriment of the seed industry. We have experimented with seed corn in recent years. We could not find a satisfactory early sweet corn at any cost; some had quality, but would not germinate readily in our cold soil in early spring. Other kinds had hardness and lacked quality. Still others lacked size. Several good kinds failed in dry weather. So we set about producing our own seed and have the satisfaction of having the best early sweet corn against all competition. We selected the earliest corn of fine quality to produce the seed, and planted with this a little later corn of great resistance and good size. These were timed to come in together and the early kind was de-tasseled. So the later variety produced all the pollen, hence influenced the entire product. The seed of the early kind only was saved.

With the coldest spring and the most severe draught on record, we may well feel satisfied to have before us the finest corn one could wish for, a perfect stand, early, fine quality, great productiveness and large size. The selling of such corn is reduced to simplicity—it is merely a question how much can you deliver each day at almost your own price. So much for seed-breeding. Now we do not expect this corn to come true another year. We expect it to break up into its two ancestor-types, hence shall depend on the original cross for one crop. We have some late crosses like this—made to adapt to our purpose. Such seed is the foundation of successful garden-

MARKETMAN.

Spraying With Bordeaux Mixture.

After three seasons' observation in large bean fields where the most up-to-date machinery was used, machinery particularly adapted to the bean crop, conclusions seemed to be that spraying with Bordeaux mixture is both unprofitable and entirely ineffective in controlling the anthracnose.

Pithiness in Celery.

Some experiments recently reported by the Maryland Experiment Station would seem to indicate that one of the causes of pithiness in celery is insufficient attention to the selection of seed. The station reports that in 1900 40 per cent of the plants grown in an experimental plot at the station from American-grown seed was pithy, while not a single stalk grown from French-grown seed in another similar plot was pithy. The variety used in both cases was Golden Self-Blanching. The experiment was continued in 1901 and 1902 with seed obtained from several different American seed firms. The results obtained are shown in the following table:

Kind of Seed.	Pithy stalks.	
	1901.	1902.
	Per cent.	Per cent.
A's French-grown seed.....	1	0
A's American-grown seed.....	43	46
B's French-grown seed.....	38	26
B's American-grown seed.....	40	43
C's French-grown seed.....	0	38
C's American-grown seed.....	41	..
D's American-grown seed.....	..	10
E's selected stock.....	20	..

In the case of A's and C's seed the table clearly shows a great superiority as regards pithiness for the French-grown seed. B's French-grown seed appeared to be in no way different from his American-grown seed and was probably a mixed lot of seed, since in both seasons the stalks of the celery grown from this seed were neither uniform in color nor size. D's select stock of seed was American grown and had been carefully selected and cared for, thus indicating clearly that by care and selection the quality of American-grown celery seed can be greatly improved. The station's conclusions relative to this work are in part as follows:

Taking the various points into consideration, the experiments plainly show the superiority of French-grown seed over the American-grown. That the difference is not due to the character of the soil or to climatic conditions is apparent from the fact that the celery stalks from the French seed were entirely different, though they were grown under the same conditions of soil and climate and were given the same kind of care. The difference must have come from the seed. We

can not accept as an established fact that the highest quality of celery seed can not be grown in America. But we can believe that the seed is not carefully selected and grown. Pithy stalks should never be used for seed, and seed plantations should be carefully watched and rogued whenever a strange plant appears. That much of the European-grown seed is superior to American-grown seed can not be disputed. The superiority is due altogether to their careful selection of seed stock and the subsequent attention paid to the plant to keep it up to the set standard. There can be no doubt that if the American celery-seed growers were as careful in their work as the French growers are their seed would in all probability be as good. Cheap seed is dear at any price. This is especially true when the profit of a whole season's work is dependent upon it.

Philadelphia Notes.

H. BAYERSDORFER & CO.

The florist supply business has of late years grown so much that to enumerate one-half of what such a house as H. Bayersdorfer & Co. have to offer would nearly fill one issue of this journal. Their place of business has a great capacity for storage, but nothing seems to remain stored very long; it goes out as fast as it comes in. However, their present stock will last long enough to give them an opportunity to make a grand display at the Rochester convention. Mr. Bayersdorfer has just returned from his annual European trip. Incidentally it may be stated that he never looked better and he must feel good, for he has again plunged into business with his shirt-sleeves rolled up. Of course, there are excuses for this. He is an energetic man; he brought back with him a great stock of novelties in supplies, and arrangements are being perfected for a great display at the convention. Another remarkable feature of this firm's business is that, though in all other lines there is complaint of "summer dullness," they are always rushed with filling orders. They are so busy, in fact, that even Paul Berkowitz, who is a real human dynamo, sometimes get tired. Well we started in to tell you about their stock. The best that we can do along that line at present, is to ask our readers to think of everything in the line of florists' supplies that they have ever seen, and then go to Rochester and look at the Bayersdorfer exhibit. Those who cannot go to Rochester should come to Philadelphia and look over the store before all the best things are sold, for they go fast.

August 8—There is practically no change in the condition of the cut flower market over that of last week. Tea roses are rather shy and American Beauty is again showing its superiority as a summer rose. There are many asters.

The Robert Craig Co. has sold to a syndicate a part of its holdings at Forty-ninth and Market streets. The plot sold has a frontage on Market street of 500 feet, with a depth of 214 feet. They have one year in which to vacate. They still retain property to the extent of 214x250 feet, which, for a time at least, will be used for growing purposes. Robert Craig, Sr., who has been sick, is much improved and expects to be at Rochester.

Paul Berkowitz, of H. Bayersdorfer & Co., has gone on his vacation. Sidney Bayersdorfer has just returned from a month's vacation. Accompanied by an able staff from the store he will go to Rochester to look after the firm's interests at the exhibition.

Samuel F. Lilly has removed his wholesale business from 1514 Sanson street to 5 South Mole street, near Market street. This brings him nearer to the heart of the wholesale district and his facilities are greatly improved.

Jos. G. Neidinger, the supply man of 1513 Germantown avenue, has taken space at Rochester and will exhibit some of the latest novelties, noteworthy being a fine line of fancy baskets.

Mark Mills, the genial foreman at the W. K. Harris range, has been somewhat indisposed, but it is hoped, by his many friends, that he will soon be restored to his usual good health.

Wm. S. Rich, who conducts the Novelty Flower Shop at 4820 Baltimore avenue, has been suffering severely from the effects of heat, but keeps around attending to business.

A noteworthy feature of the Habermehl store and greenhouses at Twenty-second and Diamond streets is the splendid collection of cibotiums of large size.

While candidates for president of the S. A. F. are being mentioned it is in order to state that there are a number of good men right here in this city.

Wm. J. Baker, the wholesaler, is resting at home during the hot weather. In the meantime the store is being well taken care of by his son and daughter.

A decided change in the weather set in August 8. Heavy rain fell throughout a great part of the day and there is a decided drop in the temperature.

John Burton is not worrying about dull times, but expects to have plenty of roses as soon as they are needed and will bring a price.

Edward Reid and David Anderson of Garrettsford, Delaware Co. took a party of friends to Atlantic City in their autos July 28 and made fast time.

Frank Johnson, of the A. L. Randall Co., Chicago, was in the city July 30 and calling on the Pennock-Meehan Co.

The stock in the large new house which Myers & Samtman erected this summer is coming on in fine condition.

While definite figures cannot be given this city is assured of a good delegation to the Rochester convention.

Charles Henry Fox is at Ocean City recuperating from the effects of a recent attack of typhoid fever.

Wm. K. Harris has been spending some time at Ocean City, but makes frequent trips home.

Alfred M. Campbell is handling a good line of Killarney and White Killarney roses.

W. E. McKissick is showing good lilies and a good assortment of general stock.

John Westcott is entertaining his friend, John N. May, of Summit, N. J. Wm. J. Colflesh is busy making improvements in his range.

Walter Yates has gone to Europe for about two months.

The bowling team has finished its practice and it is believed will give a good account of itself at Rochester. The following is a summary of the practice score:

	Games	Average.
Robertson	39	171
Graham	34	168
Bateheler	38	164
Dodds	36	162
Conner	37	159
Adelberger	35	156
Team average, 163.		

New York Notes.

While V. Aldana, bookkeeper for Carrillo & Baldwin, orchid growers of Mamaroneck, was passing through a lonely spot on his way to the bank with the firm's money he was attacked by a foot-pad. After a fierce struggle Mr. Aldana managed to draw his revolver and shoot the foot-pad dead, who was later identified as a notorious character in the locality. Mr. Aldana was exonerated by the coroner's jury and highly commended by the coroner himself. Mr. Baldwin who was in the court room described feelingly the affecting scene as the young man left the court room, everyone in the room shaking hands and commending him for his pluck. While Mr. Baldwin was saying good-bye to Mr. Aldana at the train his horse bolted and he was compelled to foot the seven miles from the station to his home, there to find his horse peacefully grazing at the gate, neither horse or buggy being injured or damaged.

A. J. Guttman says that he will have samples of his oils and paints at the Rochester convention, and states that the Best Oil Co. of which he is president and general manager with paint mills at Ellenville, New York, is now fully prepared to fill any sized contract, and claims that he will prove at the convention that this is the best and most economic paint known. The com-

pany is opening offices in the Hudson Terminal building.

The Long Island Florists' Club, of the borough of Queens, has been incorporated with the secretary of state, with the following as directors for the first year: John Donaldson and John Meisen, Elmhurst; Philip Kessler, Woodside; William H. Siebrecht, Philip Eismann, Henry B. Siebrecht and William H. Siebrecht, Long Island City.

Myers the Florist, Fifty-seventh street and Lexington avenue, reports a good sized funeral order last week. Among the pieces were a casket cover of purple asters, a 6-foot standing wreath of sweet peas and orchids and a large pillow of lily of the valley and orchids.

John Lewis Childs' gladioli are now in full bloom and open to inspection at Flowerfield, L. I., August 13. Take L. I. R. R. train from Long Island City or Flatbush avenue at 9:12 a. m. This train will stop at Flowerfield, which is 50 miles from this city.

Foreman Kraats of Bobbink & Atkins reports that he has over 20,000 Kaiserin roses and will start shipping about November 1; he expects to cut about 600 daily.

Mr. Schenck has returned from his stay in the Catskill mountains, having fully recovered his health and he certainly looks the part.

Long Island Florists' Club Bowling Score.

	Average.
Donaldson	180 182 153 185 175
Smith	147 198 224 120 172
Eismann	166 168 180 138 163

Kessler	145 144 135 153 144

NORTH WALES, PA.—Jas. J. Curran, formerly of Chicago, Elmira, N. Y., and later of Salem, Va., has taken the position of superintendent of the Florex Gardens at this place.

BRAMPTON, ONT.—Wm. Fendley has this year his usual carnations and violets, together with several thousand chrysanthemums, which are a credit to his capacity as grower.

VERDUN, QUE.—S. S. Bain is active making preparations for filling his greenhouses with new stock for the fall; his carnations are not in yet, but will be shortly. He has a few chrysanthemums planted which promise well.

BIDDEFORD, ME.—The Strout Co., organized here for the purpose of conducting a general florist, market garden and nursery business, with a capital stock of \$40,000, of which \$300 is paid in, has filed its certificate of organization at the office of the secretary of state at Augusta. The officers of the company are Chas. S. Strout, president, and Harry W. Libby, treasurer.

BUTTE, MONT.—The flower festival held at the Columbia gardens last week was a success. Visitors to the number of 6,000 were present July 24. Manager Forsythe presented 5,000 bouquets to the visitors and the city, which used to be called the barren burg, looked like a California flower fiesta after the throng reached town. The event of the evening came when Miss Jeannette Forsythe, in an automobile driven by Harold Howell, circled the spacious floor, throwing countless flowers at the dense throng.

BALTIMORE.—Hewitt & Co., one of the best known and successful commission firms, have incorporated with a capital of \$15,000, all paid in. The incorporators are Frank Hewitt, J. Frank Robinson and Addison E. Robinson. Mr. Robinson will continue to act as manager.—The season is practically ended, and it is expected that shipments will cease next week. The season has been one of the most unprofitable in the history of the trade, both for growers and commission men who handled the shipments.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

VISITED CHICAGO.—A. J. Cultra, of Onarga Nurseries, Onarga, Ill.

THE Southwestern Nursery Co., of Troy, O., has increased its capital stock from \$10,000 to \$25,000.

ST. ALBANS, VT.—Henry Bryant's business at Congress street has been turned over to Geo. Cooke.

The Wittbold Nursery, Edgebrook, Ill.

On a recent visit to the Geo. Wittbold Co.'s nursery at Edgebrook, Ill., we were surprised to see how fine and varied a lot of nursery stock had been got together in the few years since this nursery was started, as well as the extent of the nursery grounds. From the smallest beginning some six or seven years ago Messrs. Wittbold have now 32 acres of their own property and some 50 acres of leased land, almost all of it under cultivation. Entering the nursery from the depot the road lays through a deep natural wood of considerable beauty and on emerging from this large plantings of cannas are seen, these just beginning to show their fine characteristics and making a blaze of color. A little further along is a choice collection of named phloxes at their best at the time of our visit. Peonies are largely grown and the plants are making a good growth, though the flowering was injured by the frost this spring as in most other places.

Coming to the tree and shrub portion of the nursery large blocks of *Hydrangea paniculata grandiflora* were making a grand display, the plants being grown in various bush and tree forms and all flowering freely. On the opposite side of the walk, *Rosa rugosa* was making a fine show and, besides this hardy and excellent species, there are large numbers of the principal varieties of ramblers and climbing roses. The golden elders make a pretty block of color, these proving quite hardy here. One of the cut leaved elders, *Sambucus nigra* (cut leaved variety), is also quite hardy, but *S. laciniata* freezes back to the ground line every winter. There are good stocks of all these and other varieties to be seen.

The well known bush honeysuckles are grown here in considerable variety and the stock is fine, large bushes that have been frequently transplanted and are therefore perfectly safe to move. Then there are fine stocks of Carolina poplars in large, young and thrifty trees; good, characteristic weeping mulberries and weeping willows, also the Kilmarnock variety and the distinct and beautiful Camperdown elm. Lines of box-elder are under planted with Japanese irises in variety and the semi-shade thrown by the acer seems to suit *I. Kämpferi* well. Catalpas, oaks and other forest trees are well done and there are thriving lines of apples, pears and other fruits, both standard

and espaliers. The conifer plantations are not extensive, yet there are numbers of fine healthy trees, Koster's blue spruce and arbor vitae being grown. While we cannot pretend to do justice to the place in a short note of this description, we may say there is a very complete line of herbaceous perennials, many of which were in flower. Callirhoe involucrata seems to like the hot weather as it was growing freely and the crimson flowers are very showy. Several platycodons and delphiniums were also fine. We must mention the labeling system here which Otto Wittbold has installed. It is by far the best thing we have yet seen. At the end of the nursery row or wherever the label is needed a piece of steam pipe is driven into the ground deeply enough to remain perfectly firm. A cap of the same sized pipe has a small hole drilled in the top and a square (four-sided) wooden label is nailed on. The label is written and placed in the steam pipe out of the way, protected from the weather and absolutely safe from being struck by cultivators or hoes. It can be picked up or replaced in a second and there is no stooping needed to read it. This strikes us as one of those simple, but effective things that are highly useful in such places.

Condition of Nursery Stock.

The Andorra Nurseries, Chestnut Hill, Philadelphia, Pa., write: "Our spring opened up with a great excess of heat, forcing all plant growth four weeks earlier than normal. Directly after this, exceedingly cool and unseasonable weather checked the growth of many varieties. June and the early part of July, however, were very favorable for the growth of trees and shrubs, and our stocks have made growth fully up to the average. The last couple of weeks have been exceedingly dry, and stock throughout this section is much in need of a good rain. The material, however, promises to ripen early and should be in good condition for fall shipment—evergreens after the middle of August, and deciduous material as early as October 1.

Bobbink & Atkins, Rutherford, N. J., say that the planting season was one of the most remarkable they have had in the history of their business. Constant rains fell and the ground was always in a splendid condition for planting, and everything was in a growing condition up to the moment of the dry spell we are now experiencing. Evergreens, deciduous trees, shrubs and other stock never looked better than at this time.

Storrs & Harrison Co., Painesville, O., writes: "We think we had about the same spring as other sections of the country. A warm March and a cold and backward April and May. Stock was behind June 1, but since then we have had fine growing weather with seasonable showers, and think stock at present is up to the average growth for this season of the year."

Carl Cropp, of Vaughan's Nurseries, Western Springs, Ill., reports that nursery stock in general has made fairly good growth this season notwithstanding the drought. Young stock planted out this season has suffered considerably.

American Ass'n. of Park Superintendents.

ANNUAL MEETING AND CONVENTION.

The annual meeting and convention of the American Association of Park Superintendents opened at Harrisburg, Pa., August 9, with a fine attendance, those present showing great interest in the proceedings. Wm. E. Bailey, park commissioner of Harrisburg, read an address of welcome to the city which was well responded to by James B. Shea of Boston. President Manning then delivered his address. In the course of his remarks he referred to the betterment of cities brought about by the establishment of parks and open breathing spaces for the people and also noted the wonderful growth of the park movement and the increased interest taken in it throughout the country. One city in particular he cited, Spokane, Wash., where \$1,000,000 has been spent on the park system. Mr. Manning gave it as his opinion that park superintendency and landscape architecture should go together. He complimented the authorities at Harrisburg on the great progress made in the development of the park system. His address was very well received and vigorously applauded.

In the course of Mr. Bailey's remarks he said he would be glad to get suggestions from those present on the park movement. He said also that a great deal more was going to be done in Harrisburg but, just at present, the great drawback was a lack of the necessary funds. J. Horace McFarland was unanimously elected an honorary member of the association and presented to the meeting. Several changes in the constitution and bylaws were adopted. In the afternoon the delegates were taken on an automobile trip to places of interest in the neighborhood. At the evening session W. H. Dunn read his paper on "Road Surfaces," which was of extreme interest and well discussed by members. J. Horace McFarland was also well received and his remarks on "The Reason for Parks" were listened to with keenest interest.

On Wednesday the delegates visited the state capitol and the Mount Pleasant Press. The following new members were added to the association: Wm. Saltorff, East Orange, N. J.; Oglesby Paul, Philadelphia; George D. Vinnedge, Fort Worth, Texas; Ralph P. Wainwright, New Britain, Conn.; A. J. Robinson, Puyallup, Wash.; Frank Farrence, Decatur, Ill.; Wm. H. Anson, Columbus, O.; Thos. H. Reid, Kansas City, Mo.; J. M. Paige, Pomona, Calif.; Thomas E. Davis, Ottawa, Canada; W. W. Howell, Poughkeepsie, N. Y.; James Underwood, Columbus, O.; Edward A. Swigget, Utica, N. Y.; Alexander Stuart, Ottawa, Canada; Geo. Walker, Waterbury, Conn.; Charles R. Jones, Baltimore, Md.; Cornelius A. Vrohl.

The following are the officers elect: Wm. J. Zartman, Brooklyn, N. Y., president; W. H. Dunn, Kansas City, Mo.; Chas. E. Keith, Bridgeport, Conn.; James B. Shea, Boston, Mass.; Dr. Frank Baker, Washington, D. C.; W. R. Adams, Omaha, Neb., and J. W. Thompson, Seattle, Wash., vice-presidents; F. L. Mulford, Harrisburg, Pa., secretary-treasurer. Secretary Mulford's report shows the association to be in a most flourishing condition.

Chase Bros. Company, Rochester, N. Y.

A Large and Complete Stock of Herbaceous Perennials
Field Grown One and Two Year Large Clumps

Also a General Line of Nursery Stock==Shrubs, Ornamental Trees, Roses.

F. F. SCHEEL, Nursery, Shermerville, Ill.

Kansas City, Mo., has been chosen as the next place of meeting.

Those present were: Chas. G. Carpenter, Milwaukee, Wis.; C. A. Bossen, Minneapolis, Minn.; M. A. Stuart, wife and daughter, Ottawa, Canada; Chas. Haible and son, Newburgh, N. Y.; Wm. S. Manning and wife, Baltimore, Md.; Jas. B. Shea, Boston, Mass.; M. J. Zartman, Brooklyn, N. Y.; E. C. Rossa, Newburgh, N. Y.; J. H. Griffith, Chicago; Frank Baker, Washington, D. C.; P. M. Wood, Williamsport, Pa.; Wm. R. Adams, Omaha, Neb.; John Henderson, Montreal, Canada; W. M. Shepardson, Middlebury, Conn.; Geo. A. Burke, Pittsburg, Pa.; Frederick C. Green, Providence, R. I.; Wm. W. Howell, Poughkeepsie, N. Y.; W. Stophes, Poughkeepsie, N. Y.; Gustav X. Amberger, New Haven, Conn.; E. H. Hechler, Roslyn, N. Y.; R. B. Wainwright, New Britain, Conn.; J. Horace McFarland, Harrisburg; Eugene Goebel, Grand Rapids, Mich.; Gustav Ashurt, West Bend, Wis.; John Algotti, Chicago; E. F. A. Reinisch, Topeka, Kans.; Roland T. Satterthwaite and wife and Chas. Satterthwaite, West Grove, Pa.; Alfred Satterthwaite, Middletown, Pa.; P. T. Barnes, Harrisburg, Pa.; A. E. Hamilton, Harrisburg, Pa.; Chas. M. Laring, Minneapolis, Minn.; W. H. Dunn, Kansas City, Mo.; Frank Brubeck, Terre Haute, Ind.; W. G. Wallenbeck, Ithaca, N. Y.; Chas. E. Keith, Bridgeport, Conn.; A. F. Faulkner, AMERICAN FLORIST, Philadelphia, Pa.; J. W. Thompson, wife and daughter, Seattle, Wash.; Arthur Hay, Springfield, Ill.

NEW YORK.—Prof. Erich von Tschermak of the Agricultural high school at Vienna, who in 1900 rediscovered Mendel's law of heredity simultaneously with Prof. De Vries of Holland and Prof. Correns of Germany, arrived July 18 at the Hotel Manhattan from Ames, Ia., where he has been lecturing before the biennial graduate agricultural school at that place and holding conferences on plant breeding.

American Ass'n. of Railroad Gardeners.

The fourth annual meeting of the American Association of Railroad Gardeners will be called at Crawford hotel, Boston, September 5, at 10 a. m. An interesting three days' programme has been arranged, and while our membership is limited to those connected with the gardening department of American railroads, our meetings are open, and our programme is so broadside as to be of interest to all the gardening fraternity. One feature of our work is to place competent men in vacancies and on new work, and it will be of advantage to any who desire to take up this class of gardening to get in touch with us.

Our association is young, having been organized only four or five years, but our membership now represents nearly all American railroads that have an organized gardening department. It is

Restocking National Forests.

Washington, D. C.—The Department of Agriculture is using this year on the national forests over 10 tons of tree seed. Most of this seed has already been planted or sown. The rest will be utilized later in the season, as favorable conditions are presented. It takes a great many tree seeds to make 10 tons. Jack pine, the most important tree for planting in the Nebraska sand hills by the forest service, will average something like 125,000 to the pound. Of western yellow pine, the tree most extensively planted throughout the national forests as a whole, 10,000 seeds will make a pound. Altogether the 10 tons of seed to be used this year represent perhaps 300,000,000 single seeds.

If every seed could be depended on to produce a young tree suitable for planting, the result would be a supply of nursery stock sufficient to plant 300,000 acres of land, but no such result can be looked for because many seeds do not germinate. Most of the seed will be sown, either broadcast or in seed spots, or planted with a corn-planter, directly in the place where the trees are to stand. Even when nursery stock is raised a liberal allowance must be made for loss. In the first place a considerable percentage of the seeds will be found to be infertile. Of those which germinate, many will die before they leave the nursery beds, and many more will be lost in transplanting. If from a pound of western yellow pine seed that contains 10,000 individual seeds, 4,000 three-year-old transplants are available for field planting, the Department of Agriculture has obtained satisfactory results.

There are now 24 national forest nurseries with an annual productive capacity of over 8,000,000 seedlings. But there are many millions of old burns on the national forests which are waiting to be restocked, and some quicker and cheaper method than the actual planting of nursery-grown trees is urgently needed. Therefore the foresters are making experiments on a large scale with different methods of direct sowing and planting, and most of the seed gathered last year was obtained for this use.

Broadcasting has already been found to give good results in some regions. It was first tried in the Black hills of South Dakota, with an encouraging outcome. To broadcast an acre of land with yellow pine seed about eight pounds of seed is used. One of the most formidable drawbacks to this method is the extent to which the seed may be consumed by birds and rodents. If the season happens to be one in which food for these animals is scarce, the loss is very heavy. The problem of control of animal pests, such as field mice, ground squirrels and gophers, which eat the tree seeds, and also the further problem of preventing the depredations of rabbits, which are altogether too fond of the little trees themselves, whether nursery transplants or field-grown seedlings, is re-

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

ceiving the attention of the biological survey experts of the department.

In some localities the department has had to purchase seed, but most of that used is gathered by forest service men themselves. The cost of gathering has varied for the different regions from 35 cents to \$1 a pound. As a rule the seed is collected in the fall months, when most conifers ripen their seed. Parties of three or four men ordinarily work together. Where lumbering is in progress the collectors follow the sawyers and take the cones directly from the felled trees. In standing timber, the task is much more arduous. The men must often climb tall pine trees and pull the cones from the branches as best they can. Where these are on the extremities and beyond the reach of the hand, pruning shears are used. The cones are dropped to the ground and then gathered into buckets and transferred to sacks, in which they are carried to a central point for further treatment.

The extraction of the seeds is tedious rather than difficult. In some cases the cones are spread out upon sheets in the sun, when, after a time, they open and the seeds drop out; in other cases it is necessary to resort to artificial heat. This is applied by placing the cones upon trays with screen bottoms and raising the temperature of the room to the proper degree. The cones open, the winged seeds fall out, and the seed is separated finally from wings and dirt by a fanning mill. A good many seeds have been removed from the cone by hand, but this is a sore trial to the fingers of the pickers and an exceedingly slow process.

The National Nut Growers' Association.

THE 1910 CONVENTION

The ninth annual convention of the National Nut Growers' Association will be held in Monticello, Fla., November 1-5, 1910. As a nut growing center there are few places more interesting than Monticello. There are more and larger nut nurseries at that place than at any other in the world. In and around the city there are at least 2,000 acres of orchards, most of them being budded and grafted trees. Some of the oldest seedling pecan trees east of the Mississippi river are growing about the homes of the city. To those, therefore, who are interested in nut growing in any of its phases, there can be no more attractive place than Monticello, and certainly no better time to visit it than the above, when the nut crop of the year will be ripening; and

nut growers from almost every nut growing state will be present.

The eighth annual convention, held last year, was the best up to that time, and during the last year the association has greatly increased its membership, and its financial condition is now the best in its history. Time, place, and circumstances, therefore, indicate that the approaching convention will be a pre-eminent success.

While more particular attention will be paid to pecans, yet the range of discussions will include all nuts that are commercially profitable. Expert nut growers from all parts of the country will be present, and a programme is being prepared that will cover practically all phases of the subject. Particular interest will attach to the report of the committee on varietal adaptation. This committee was appointed at the last annual convention and is diligently at work making investigations as to the best varieties of nuts suited to each section. To meet and talk with the oldest and most progressive nut growers of the country will be well worth the trip to Monticello. Opportunity will be afforded all visitors to see the nurseries and orchards in and around the city. The local committee of arrangements is also planning to make the social features of the convention memorable.

ROSES

A SPECIALTY.

The Dingee & Conard Co.,
WEST GROVE, PA.

The Apple Crop.

After a lengthened trip west, John Hall, secretary of the Western New York Horticultural Society, says that conditions vary so much that "almost any opinion would be open to unfavorable criticism." In New York he considers the crops will average up quite as good as last year but the estimates as far west as Denver, Colo., are quite varied. When asked if the Empire state growers had anything to fear in western competition, Mr. Hall said:

"New York has nothing to worry over from the west if its fruit growers will open up their trees to God's sunlight and give the fruit a chance to color, and do some thinning of fruit in order that the harvested product shall be of good size. We do not have to take any back seat as regards flavor, and, after all, the consumer would rather have a richly-flavored apple of medium size and color than a great, rosy-cheeked apple of poorer quality.

"I might point out that the commissioner of agriculture in this state proposes to look after the packing end of the apple traffic this year, and those who have a 'weakness' toward uneven packing will do well to remember that the law of this state imposes a fine of \$50 on the man who packs with 'intent to deceive.'"

BOBBINK & ATKINS

World's Choicest Nursery and Greenhouse Products

We are making an exhibit at the Florists' Convention and invite all Florists and Nurserymen attending the Convention to inspect the sample products which we exhibit. We will have our Mr. Victor Morgan and Mr. William DeBree in attendance, who will reply to all questions and give visitors their attention.

Boston Notes.

The hard work which has been put in by Vice-President Pierce of the S. A. F. is certainly bearing fruit, for every day new names are added to the list of those who are to attend the convention at Rochester, and it now looks as if this city would be well represented. All the members have received the following circular letter from the Boston and Albany railroad:

"Meeting of the Society of American Florists and Ornamental Horticulturists, Rochester, N. Y., August 16-19, inclusive.

"First class fares to Rochester are as follows: Boston to Rochester, \$8.38; Worcester to Rochester, \$7.73; Palmer to Rochester, \$6.93; Springfield to Rochester, \$6.63; Pittsfield to Rochester, \$5.58. Reduced fares have been authorized on the certificate plan. Going tickets to be purchased August 12 to 17, inclusive. Ask ticket agent for certificate account of the meeting. Certificate when properly endorsed and vised at meeting will entitle original passenger to return ticket at three-fifths the fare until August 23." Anyone desiring to join the party should address E. Allen Pierce, Waltham, Mass., who will gladly furnish all details of the trip.

The absence of Thomas J. Bunnell, A. H. Hun & Co.'s genial salesman, from his weekly visit to the market has caused many inquiries as to his health, for he was suffering more or less with rheumatism during the spring. But a trip to North Cambridge found him enjoying excellent health, and busy as the proverbial bee overseeing the storing of the 5,000 tons of clay which will be moulded into pots the coming winter at this pottery. The clay has to be thoroughly dried and stored in that condition to prevent any possibility of frost getting into it before being handled at the pottery, and the unusual long spell of dry, hot weather has been very propitious, and kept him very close "on the job."

William Malloy of J. D. Budlong Sons & Co. and Edward Welch of Welch Bros., sailed Saturday on the Romanic for Genoa. They intend to be gone about six weeks, traveling on the continent, and returning from England. The Romanic carried about 100 of the Boston Knights of Columbus, and our friends can be assured of a most enjoyable trip. At Edward Welch's summer home at Old Orchard Beach, Me., the neighbors and friends gave him a rousing send-off before he left.

N. F. McCarthy left this week for the Maine woods, where he expects to get a much needed rest. He will probably be gone till the last of the month, returning by the way of the beaches.

N. M. Silverman and family are at Winthrop Beach for August.

E. J. Rogeau is back at the market from a month's stay in New Brunswick; he is looking quite well and fully recovered from the serious sickness which was reported early in July.

HENRY H. BARROWS & SON, Whitman, Mass.

Fort Myers, Fla.

In south Florida everything is booming at present. There are many people making their winter homes here building houses and decorating their gardens with palms, which grow luxuriantly. Nearly all the varieties of cocos, phoenix, Caryota urens, Seaforthia elegans, Oreodoxia regalis and Lantania Borbonica are used, but they are scarce in large sizes. People will not wait till they grow, but pay big prices for them. Dracaena Massangeana and its variety, Lindenii, Pandanus Veitchii, P. utilis, crotons and acalyphas do well here and give plenty of color. The finest vines are Bignonia venusta and Bougainvillea glabra and both are very beautiful here.

The Everglade Nursery Co. is a young concern but reliable. They have thousands of eucalyptus seedlings which grow very rapidly.

GODFREY ASCHMANN'S SONG. Tune: "John Brown's Body."

In the early morning sunlight upon the sea I go
To search the lands of Europe for the finest plants that grow.
I only buy the very best; those only you must know
Are good enough for me.

In the towns of little Belgium there are Araucarias fair.
And Azaleas with their promise of enchanting beauty rare.
I mean to beat the world with my shipment over there.
Just good enough for me.

I leave at home in my house the loveliest Ferns on earth.
And mean to match them with tall Palms of quite transcendent worth.
My Cyclamen and Primroses I've tended from their birth.
All good enough for me.

When I come home I want you all to come and see my show:
The sight of my Lorraines will set your heart and eyes aglow:
The health and beauty, bloom and leaf, then only will you know
What's good enough for me.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants 5-5½-6-7 in. pots. 12-15 18-20-25-30 in. high. 3-4 5-6 tiers. 2-3-4-5 years old, 35c. 50c. 60c. 75c. \$1.00, \$1.25 to \$1.50 each.

SPRINGFIELD-OHIO

Milwaukee Notes.

Summer business has been above the average at the E. Welke Co.'s store, 752 Third street. H. R. Marquardt, who is in charge made a trip to Chicago last week, buying stock for the firm. Several new greenhouses are being added and the work is being looked after by Mr. Welke. The material was purchased from A. Dietsch Co., 2642 Sheffield avenue, Chicago.

Eisner Bros. have bought the greenhouses, formerly owned by Henry Mackerey, 1153 Buffum street. Henry has charge of the store on Fond du Lac avenue and Chris. has charge of the greenhouses. The men are busy planting and at present are putting in carnations.

R. Lietz who bought the Johannes Bros. store, 1433 Fond du Lac avenue, reports business good. Mr. Lietz enjoys a good steady trade and also does a large funeral business. He hails from Detroit and was formerly in the employ of the L. Bemb Floral Co. of that city.

Robt. Zepnik, 147 Lincoln avenue, is remodeling his store and rebuilding five greenhouses. Fire damaged the store some time ago, temporary repairs were made but now the building is being put in first-class shape. A new ice box is also being installed.

Miss E. Vollnar of the Loveland Floral Co., 97 Wisconsin street, spent a few days of last week in Chicago on business. Miss Siegel had charge of the store during her absence.

F. Hesse and wife, 392 Grove street, returned from Conover July 30, where they had been spending their vacation. They leave in a few weeks on an auto trip from here to Phestigo.

Stewart Floral Co., 661 Third street, report that outside of the funeral and wedding work business is very quiet.

Nohos & Co., 211 Grand avenue, are enjoying a good transient trade. Business has been good this season.

Montreal.

Trade last week was somewhat quiet with some retailers, while others report a very good trade in funeral work and moderate priced bouquets. There is also a brisk demand for Boston ferns at about \$1. Flowers are plentiful; peas are a little spoiled by the heavy rains, but will be all right again in a couple of days. Asters are not as good as in former years and as yet scarce.

On Sunday, August 7, 15 members of the Gardeners' and Florists' Club spent an enjoyable day in the moun-

Do Not Miss Seeing

OUR EXHIBIT OF

Gladiolus Blooms

During the Convention of S. A. F and O. H.

JOHN LEWIS CHILDS, Floral Park, N. Y.

tains at St. Agathe. The twentieth annual picnic, held at King Edward park, was a very successful and enjoyable one, a good list of sporting events being brought off in fine style.

A number of gardeners and florists left with Secretary Hall for the convention of the Canadian Horticultural Association at St. Catherines, Ont.

LUCK.

STILLWATER MINN. Frank Rice has taken one of Frank Berry's places and started in the retail business here.

CALDWELL, O.—C. E. Reisling, for the past four and one-half years with G. L. Huscroft of Steubenville, is starting in the greenhouse business here with his brother, F. C. Reisling, who is identified with the Washington baseball team, under the title of Reisling Bros. Three houses are now in course of erection, 20x75 feet each, and carnations will be grown chiefly this season. More houses will be added for roses next year.

BROCKVILLE, ONT.—The planting of new stock, potting ferns, cyclamens and primulas is steadily going on, and the continued dry weather keeps the trade plying the hose during extra hours mornings and evenings. The little demand just now for cut flowers is mostly satisfied from outdoor cutting, for outdoor flowers are now more plentiful. Asters and gladioli are coming in. Roses and carnations are not very good, but lilies and valley are satisfactory.

GLADIOLI

You are invited to visit our exhibit at Rochester next week and get acquainted.

E. E. STEWART, Rives Junction, Mich.

WAVERLY, MASS.—Frank Nesbit has resigned his position with Edgar Bros.

INDIANAPOLIS, IND.—The W. J. & M. S. Vesey Co. of Fort Wayne was incorporated here as dealers in cut flowers with capital stock \$54,000. Wm. J., Margaret and Sally Vesey and Wm. J. Vesey, Jr., are incorporators.

BRAMPTON, ONT.—The Dale Estate has graduated two enterprising business men in Mark Henderson and Walter Calvert. These have recently launched into the trade on their own accounts. Mark Henderson starts out with two 50-foot houses. Walter Calvert was connected with the Dale concern in the capacity of foreman of the chrysanthemum department and other work. He also starts out with two 50-foot houses.

SAVANNA, ILL.—J. Y. Lambert & Son were awarded the first prize for decorated auto in the Fourth of July parade, turning out a handsomely decorated car. In the front Asparagus Sprenger and cream roses were used, pink and white carnations, roses and smilax being used for the body and canopy. Large bows and streamers of ribbon and plumes were also used and heightened the effect.

We will have a complete line of Samples of

Craig's Specialties at Rochester

Including Crotons, Ficus Pandurata, Begonia Lorraine, Cyclamen, Dracænas in variety, Arecas, Phoenix Roebelenii, Nephrolepis in variety, Pandanus Veitchii and Utilis, Etc.

Our exhibit will be in charge of our Mr. Wm. P. Craig and Mr. Duncan Macaw.
The stock offered this year is of exceptional quality and sure to please the most critical buyer. Look for Us. We will Look for You.

FLORISTS' CLUB PICNIC.

All the stores were closed on Thursday afternoon in order that the dealers might take in the florists' picnic and most of them did. There were 165 florists there. Two special cars filled to overflowing with the gay crowd left the traction station for the scene of the festivities, Bertermann's Grove near Cumberland. Throughout the cars and in every nook and corner and in everyone's hand was a bouquet. The tables in the grove were also decorated with immense vases of hydrangea. Under the direction of the committee, Homer Wiegand, Sydney Smith and Fred Hukreide, races were run by the men, boys, little girls, young ladies and married women. Among the prize winners were John Zoylan, Robert Fohl, Norman Hukreide, Carl Elsner, Helen Rieman, Frieda Rieman, Clara Rodenbeck, Miss Louise Rieman, Miss Esther Strickland, Mrs. Degnan and Mrs. Albert Reinken. There was also a ball game in which the florists of the south side defeated those of the north side by a score of 11 to 1. During the entire afternoon an orchestra furnished music while 500 pints of beer and as many cheese and ham sandwiches, together with 10 gallons of ice cream made up the refreshments.

About three o'clock a scouting party was organized and the Bertermann swamps on the south side of the National road were explored. The visiting florists found many things of interest in these swamps. The new greenhouse which is being added to the Bertermann plant was also closely inspected and much favorable comment was expressed. Among those who took prominent part in the festivities were Harry Rieman, special conductor in charge; Ernest Rieman, master of ceremonies; John Hartje, official umpire of the ball game; Herman Young, race prize distributor; Irwin Bertermann, cigar distributor; Mrs. Herle, disher-out of the ice cream; and the following members of the picnic committee: Chas. Pahud, Billy Roepke, Homer Wiegand, Irwin Bertermann, A. J. Bauer, Fred Hukreide, and Sydney Smith. Many came out in automobiles and several prominent out-of-town florists took the opportunity to become better acquainted with the city brothers by joining in the good time. During the course of the afternoon A. Wiegand became somewhat indisposed and was taken into the city in an automobile by his son George and one of the employees in the store of A. Wiegand & Sons.

NOTES.

The asters at John and August Grande's places are not doing very much this year. John says he cannot account for the dwindling away of the plants. John Grande's chrysanthemum plants are certainly looking

themum plants are certainly looking healthy and no doubt he will have some of the finest flowers on the market this year.

For the convenience of the many friends and patrons of the Hobbs nursery at Bridgeport, Ind., C. M. Hobbs & Sons have opened offices in the State Life building. These offices are in charge of O. A. Hobbs who has met with remarkable success since locating in this city.

John Rieman had a large gathering around his festive board at his Broad Ripple summer home last Thursday and found that his efforts to attend the florists' picnic were all in vain when he attempted to desert the gathering there.

B. F. Hensley, when present at the florists' picnic, expressed his intention of closing a deal for a new Richmond automobile for pleasure use.

Bertermann Bros. Co., is having its rapid delivery truck repainted, and is using wagons for delivery purposes.

Edward Bertermann is back from his extensive vacation trip and is looking well.

A. W. B.

Detroit.

The Florists' Club annual outing to Bois Blanc Island took place Friday, August 5, and was most successful in all respects. The weather was fine, and the hour and a half boat ride down the river was in itself a pleasurable feature, and upon landing at the island the ball game was immediately commenced and the teams were captained by Robert Rahaley and M. Bloy. The feature of the game was the batting and base running of Captain Rahaley, and was most exciting till Rahaley's team piled up a lead of six runs and the result from this time was never in doubt. The final score was 13 to 6. Victory for Rahaley's team. The other events followed in quick succession and awards made as follows:

Girl's race (12 years).—Mildred Mills, first; Margaret Carey, second.
Shoe string race (boys 12 years).—Howard Knope, first; Albert Reno, second.
Boy's race (16 years).—B. Pautke, first; Marvin Bloy, second.
Girl's race (16 years).—Mamie Carey, first; Catherine Mulso, second.

J. A. BUDLONG

39 Randolph St., Chicago.

Married ladies' race.—Mrs. Mills, first; Mrs. Bloy, second.

Hundred yards dash for men.—Hugh Watson, first; Ernest Clessow, second.

Egg race, for ladies.—Ruth Knope, first; Catherine Mulso, second.

Pipe race (men).—Ernest Clessow, first; J. K. Stock, second.

Three-legged race.—Hugh Watson and Ernest Clessow, first; Tony Schmidt and H. Mass, second.

Running broad jump.—Hugh Watson, first; T. Miller, second.

Running hop, skip and jump.—Hugh Watson, first; T. Miller, second.

Game of quoits.—M. Bloy, first; J. F. Sullivan, second.

Tug of war.—J. K. Stock's team was victor.

The donors of the various prizes were: Kenneth Anderson, E. A. Scribner, Hugo Schroeter, Michigan Cut Flower Exchange, A. Pochelon, M. Bloy, Hammond Paint and Slug Shot Works, J. K. Stock. The stagnant condition of business the day of the outing easily permitted most of the florists to attend and make the annual club affair the splendid success it was.

Robert Rahaley, manager of the Michigan Cut Flower Exchange, is enjoying a vacation with his wife at Mackinac Island the whole of this week, but will return in time to join the delegation to Rochester, which leaves by boat Monday evening, August 15, at 5 o'clock. Many of this party will extend their trip to other eastern points after the convention adjourns. E. A. Feters and wife will visit New York, Philadelphia and Washington before returning home.

NEW CARNATION

"CHRISTMAS CHEER"

Easy to grow. Easy to sell.
It will make a fortune for you.

HENRY EICHHOLZ, Waynesboro, Pa.

Baltimore.

There have been some showers but
very partially and those who were
neglected, think very inequitably dis-
tributed, which have mitigated some-
what the severe drought, but in dis-
tricts which were not reached by the
refreshing rains the crops are getting
into a condition which is almost hope-
less. Business keeps dull, and little but
funeral work is doing.

The meeting of the State Horticul-
tural Society held recently at O. Har-
rison's, Berlin, Md., was well attended,
the city being represented by about 40
visitors. Mr. Harrison proved a gener-
ous and agreeable host and all who at-
tended were charmed with his hospi-
table treatment. Many of those at-
tending the meeting, after the formal
sessions were ended, went over to
Ocean City to enjoy the sea breezes
and bathing.

Frederick Fischer, of Bengies, Bal-
timore county, general florist, died last
week. Mr. Fischer was a German who
had been in this country about 15
years, and had won the respect of his
neighbors and the trade. The business
will be continued by his son Paul.

Misses Matilda and Rose Held left
Saturday for a voyage abroad and will
visit many of the principal cities of
the European continent, their trip be-

"GREENHOUSE MATERIAL"

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Marvelous bargains in Greenhouse Sash and Building Material of all kinds. Corrugated Roofing and Siding, Structural Iron, Gutters, Eave Spouts, Hydrants and Valves, 10,000 feet Rubber Hose, Soil Pipe, Plumbing Material of all kinds. Boilers, Feed Pumps, Flower Pots, etc. Thousands of other articles of interest to Florists or Greenhousemen. We can save you from 30% to 75%.

Send for our new 500-page Catalog No. 47. Free upon request.

CHICAGO HOUSE WRECKING CO.,

35th and Iron Sts., Chicago

We Want Every Florist—

to read our "Trap Book." It throws new light on an interesting and important subject.

MOREHEAD STEAM TRAPS

If you want to know more about the possibilities of making your steam lines more effective, save on fuel, water and labor—and grow better stock. Write for the Florist's "Trap Book" at once.

Don't delay. The information will cost you nothing and will pay you well.

MOREHEAD MFG. CO. Dept. N, DETROIT, MICH.

Are You Aware

THAT OUR 1910 DIRECTORY

OF FLORISTS
SEEDSMEN AND
NURSEYMEN

Contains Approximately

1,500 New Names in Its 570 Pages

Price \$3.00 Postpaid.

Every name is keyed to show the branches of the business in which each individual or concern is engaged, with greenhouse area and acreage of land.

STEAM TRAPS.

Steam traps, the Standard return steam trap has no equal for its simplicity of working. E. Hippard, Youngstown, O.

Morehead, Return Steam Traps. Morehead Mfg. Co., 1047 Grand River Ave., Detroit.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

LANDSCAPE GARDENING (Maynard).—The development of landscape art within the past few years compels the wide awake florist to keep posted on this branch of the business. The many suggestions of this book will be found helpful every business day. It contains 338 pages, 165 illustrations. \$1.50.

WINDOW GARDENING.—(Dorner.) An excellent treatise on this interesting subject telling in plain language the best methods of cultivating plants in rooms and windows. The author is a well known and practical grower. Well bound in green cloth, 153 pages and 43 illustrations, \$1.25.

THE GOLDFISH (Mulerdt).—A number of florists find goldfish an attractive and paying addition to their business. The best advice is given in every department of the subject, including construction and care of the parlor aquarium, in this volume of 160 pages, handsomely illustrated. \$2.00.

LANDSCAPE GARDENING (Waugh).—This is a very useful little book on the art of landscape gardening. It will be found exceptionally valuable to amateurs, as it covers in detail the numerous problems that come to the owners of small gardens. It is freely illustrated and the pictures have been chosen with a view to informing the reader rather than decorating the book. 50 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

BEAN CULTURE (Sevey).—An excellent practical treatise on this important crop containing instructions on all phases of culture from seed sowing to harvesting and marketing. Profusely illustrated, 144 pages. 50 cents.

THE PRINCIPLES OF FRUIT GROWING (Bailey).—The entire subject of fruit culture is treated very thoroughly in this illustrated volume of 516 pages. It is a book that no up-to-date fruit grower can afford to be without. \$1.25.

YARD AND GARDEN (Baker). An excellent book treating on the method of making home gardens attractive. The author covers a wide range of subjects in quite an able manner and the book is full of interest for the amateur gardener; 140 illustrations, 420 pages, \$2.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

THE GARDEN MONTH BY MONTH (Sedgwick).—A well classified list of hardy herbaceous and other plants arranged for each month in the year. Water plants, vines, ferns, foliage plants and others all have separate chapters devoted to them and a color chart is an unusual and extremely useful addition to a most carefully compiled and excellent book. Finely illustrated. \$4.30.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

THE MANAGEMENT of the Superior Machine & Boiler Works, 840-850 Superior street, Chicago, reports the sale of two boilers—one to Peter Mertens, 6104 North Winchester avenue, Chicago; the other to Ira Clark & Co., Broadway and McKee street, Greensburg, Ind.

Steam Coal Notes.

Chicago.—While internal dissensions in official relations between J. H. Walker, president of the United Mine Workers' Union of Illinois, and T. L. Lewis, president of the United Mine Workers of America, the national organization, are still rending agreements between the Illinois Coal Operators' Association and the miners in this state, with no prospect of a settlement anyway soon, the season is slowly but surely approaching when all users of steam coal—such as electric light plants, water works, elevators, large manufacturing plants, railroads, etc., will be forced to use strenuous methods to protect their season's supply of fuel. In this summary must be included domestic yards in Chicago, and at other large points.

While considerable tonnage from the West Virginia smokeless coal fields is at this time being shipped to the lower lake ports, there being loaded to water carriers destined for ports on the upper lakes, which will continue to be the case until the freeze-up at the locks some time this coming winter, nevertheless the mines in West Virginia, Indiana, and other eastern states, are helping out the situation in this city by increased shipments just at this season this year to this terminal. The prices obtained, while somewhat higher than figures obtained in previous years, are not out of proportion when the quality of the coal is considered and the further fact that the railroads are charging more per ton for hauling; also that the miners are receiving a proportionate increase in wage scale.

Several of the larger greenhouse men, seedsmen and nurserymen have bought heavily of these coals, especially of West Virginia and Indiana mines, not desiring to risk the issue. However, the present outlook is such that a great many florists and nurserymen will be literally frozen up during this coming winter, if the apathy shown in covering their wants in the steam coal line at this time is a criterion. Coal is as essential to the florist and nurseryman as the glass he owns, for without coal to produce the heat his glass is useless.

Back From Extended Outing.

Adam Schillo, of the Adam Schillo Lumber Co., Hawthorne and Wood streets, Chicago, in company with Peter Reinberg and several others, returned recently from an extended trip to the Pacific coast. Yellowstone Park, Portland, Ore., Spokane, Seattle, and Tacoma, Wash., were taken in enroute. The Puget Sound waters proved very enjoyable to the party. The return trip was made via Victoria and Vancouver, B. C., and Winnipeg and other points

of interest in the Canadian country were also noted in the itinerary.

On his return to Chicago Mr. Schillo found business in good shape, which was the case practically the whole of the past season. The pecky cypress, with which Mr. Schillo's business comes in direct connection with the greenhouse trade, is moving along very satisfactorily. At the present time, however, stocks of this lumber are down to minimum, and Mr. Schillo strongly advises intending purchasers to cover promptly their requirements along that line, as shipments from the south may be delayed in transit.

WE would like to call the attention of readers to the excellent "Standard" mailing tubes, scored wrappers and other specialties made and sent out by the Standard Manufacturing Co. of Coatesville, Pa. Valuable prints and other mail matter are often rendered useless by careless packing, but these tubes insure safe arrival under any circumstances with the minimum of trouble and expense and they should be in all offices, large or small.

Heating a Greenhouse.

ED. AMERICAN FLORIST:—

How would you advise heating a greenhouse 15x20 feet, two feet in the ground always dry? On the north end is a shed eight feet wide, open 6½ feet high where it joins the greenhouse and 5½ feet at back, eight feet from greenhouse. This storage shed might be closed from the greenhouse if advisable. The chief end now sought is to heat the greenhouse as cheaply as is consistent with good results. If we enlarge the greenhouse next season, would it have to be hot water heat? We are short of funds now, but would like some good advice before we do anything.

J. F. T.

While not very satisfactory, a house of the size mentioned can be heated by a wood-burning box stove from which a pipe is carried around under the side bench. Especially if the house is to be added to another season, it will be far more satisfactory if a hot

water heater is put in now, which will be sufficiently large for the house to be built next year, as well. The proposed house can be readily heated by running a 2-inch pipe on each plate and connecting them with coils containing four 2-inch pipes each, if a temperature of 60° is desired, or three pipes in each coil if 50° will answer.

L. R. T.

Yonkers, N. Y.

The regular monthly meeting of the Horticultural Society was held in Wiggins' hall August 5, with President Bennett and a large number of the members present. The committee on the June show reported it had the business of the show about completed and reported a substantial balance in hand over all expenses. The schedule for the fall show was read and adopted and it is hoped to have the same printed soon; there are 67 classes in all. The committee reported receiving

a good number of prizes from different persons, but is still ready to receive more. Those donated consist of gold medals, silver cups and cash prizes.

Hamilton Scott was elected secretary to fill the vacancy caused by W. H. Waite resigning. As Mr. Waite has been in poor health for some time he has gone on a trip to Scotland and we hope to see him greatly improved in health on his return. John Goff read a very able essay on "Carnations," telling how he grew them so very successfully. The next meeting will be held the first Friday in September.

L. W.

Fiber Board Boxes in Demand.

R. E. Ferguson of the advertising department of the Sefton Mfg. Co., 1301-1341 Thirty-fifth street, Chicago, reports an unusually brisk demand for corrugated fiber board boxes used by florists for shipping cut flowers and designs. Indications are that this year's business will eclipse former high marks for total business; inquiries are on the increase.

BUSINESS QUIET.

Trade is a little quiet here at present writing; quite a number of the trade, taking advantage of the dull spell, are away on their vacations. Forces at the wholesale and retail stores are thus running short handed, and to an outsider the impression would be a very busy time. The rose crop that is on more than equals the demand in My Maryland and Killarney, while Kaiserin is just the contrary. Asters continue plentiful, many of them very poor quality, there being hardly enough fancy ones to go around. Gladioli are coming in more heavily and some very fine America are seen. This variety moves out well; the longer stocks seem to find better sale than the short ones, yet have equal quality blooms. Beauties are moving out clean, but cheap. Good smilax is very scarce. Other greens are very plentiful.

NOTES.

The Pittsburg & Allegheny Florists' Club, at their last meeting decided not to have a picnic this year.

Harry Elicker, Homestead, is going to Chicago to try his hand at the florist business.

Breitenstein Co. is showing a very pretty window, in the way of a lily pond.

B. Huscroft of Steubenville, O., has returned from his trip through California.

Karl Klinke and wife are spending several weeks in Canada.

Zeiger Co. has had quite a run on funeral work.

Geo. Stanger, North Side, is moving his store.

Mrs. J. B. Smith, McKeesport, is very ill.

J.

J. M. GASSER'S Patent Zinc Joints For Butting Without Laps.

The Improved Glazing for Greenhouses, Sky Lights, Etc.

Air and water tight. Saves fuel. Glass is not broken by frost or medium sized hail.

IMPROVED GLAZING.

We call particular attention to the J. M. Gasser Patent Zinc Joints, illustrated below, for which we are now the exclusive manufacturers, under special arrangement with the patentee.

These Joints make glass roofs air and water tight, prevent breakage from frost, and where heat is required, as in greenhouses, save fuel and insure a uniform temperature. They have been in use for over twenty years and the uniform experience of users has been most satisfactory.

Directions for Use.

Bed the bars in putty in the same way you have been doing. Use very soft putty. Take a board and spread with putty. Take a zinc

and scrape some putty on one side from off the board. Take a glass and scrape some putty on the end that you connect. Lay on board ready for use.

Put in the first glass in the same manner you have been doing, nail it so it cannot slide. Then take a zinc and connect with the glass, putty down; take a glass and connect it with a zinc, putty down; in this way you can connect as many as you reach, then nail it. Have a boy to help you; he can put the putty on the zincs and glass, while you nail, and then he can hand you the zincs and glass while you put them in. In that way you can put in from 600 to 800 feet of glass a day.

PRICES.

Per 1000	Per 1000	Per 1000
18 inches, \$9.10	14 inches, \$7.10	10 inches, \$4.00
17 inches, 7.50	13 inches, 4.75	9 inches, 3.50
16 inches, 6.00	12 inches, 4.50	8 inches, 3.00
15 inches, 5.50	11 inches, 4.25	

Any size smaller, the same.

You can almost save the price of zincs on glass and putty.

In ordering, mention the size of glass between bars.

It takes one joint for every pane of glass.

10 per cent. discount for cash with order, or will be sent C. O. D. to unknown parties. State if wanted shipped by express or freight.

**VENTILATING
APPARATUS**

*The Largest
Hot Water Boiler ever built*

IF YOU SHOULD VISIT the Works of Kroeschell Bros. Co., the manufacturers of the well-known "Kroeschell Boiler," you would be very much impressed with the large number of boilers finished on orders and ready for shipment. Recently there were sixty odd of these boilers finished awaiting shipment, with as many more under construction.

One of their latest models, the No. 16, was being shipped. This is claimed to be the largest hot water boiler ever built, having a capacity of 80,000 square feet of glass for carnations at zero.

The economy of a large single unit as compared with several smaller size boilers has proven to be very great, not alone in fuel consumption and the original cost of the boiler, but also in the way of labor in attending to the firing. Many concerns are installing one large Kroeschell Boiler to do the work of two or more smaller boilers, and the large sizes have become very popular, the Eastern demand being extremely heavy. Recently a number of these large sizes were shipped into the Northwestern territory, Vancouver, B. C. and neighborhood. They have a very large trade in these boilers in the cold northwest territory, where they are also used in heating Office Buildings, Hotels, Stores, etc.

The demand for smaller boilers than the No. 1 Kroeschell Boiler for small ranges, as well as for residences, has induced them to add to their list four smaller sizes, "A," "B," "C" and "D," ranging in capacity from 2,250 square feet of glass to 4,500 square feet of glass. They now build twenty-two sizes of their Hot Water Boiler, ranging in capacity from 2,250 to 80,000 square feet of glass, enabling them to furnish boilers for ranges of any conceivable size.

It is very interesting to note the great care that is taken by this firm in the selection of the material, the construction of the boilers, and the excellent workmanship put on all their work.

The demand for Kroeschell Boilers has been very heavy, and during the past four years, the Kroeschell Hot Water Greenhouse Boiler has been installed to heat over **9,000,000 SQUARE FEET OF GLASS**. This does not include the Kroeschell Steam Boilers, of which they also sold many, to be used in greenhouses.

Their records show sales very much in excess of last year at this time, and at the present rate their business will show an increase of fully fifty per cent over last year's sales.

"WHAT THE USERS SAY"

Your boiler is making summer heat up here, although we had 24° below zero. Am well satisfied with it also boiler tube riping system: it made a fine job.

The No. 4 Kroeschell boiler we purchased of you in 1909 is giving the very best of satisfaction, would wish no better. Your boiler replaced return tubular boiler which used one half more coal than the Kroeschell. Your boiler is so easy to regulate that in a few minutes I can run up the temperature by opening the drafts. The flues and returns are connected with Kroeschell generator and work the very best. We cannot give your boiler enough praise.

The No. 4 Kroeschell 1910 Model is heating 10,000 sq. ft. of glass—it would take care of 13,000 sq. ft. of glass easy. Have no trouble to keep temperature of 50° and 60° in coldest weather. Your boiler has given perfect satisfaction. We had two cast iron boilers, these boilers never did the work at their best even when the greenhouses were new. According to our experience with the Kroeschell it will save 20% to 25% of fuel.

TAKE OUR ADVICE ON BOILERS. SEND FOR CATALOGUE.

KROESCHELL BROS. CO., 452 West Erie Street, Chicago, Ill.

Oyster Bay, N. Y.

The annual outing of the Nassau Co. Horticultural Society was held at the Inside Inn, August 4. It was a regular family affair, as nearly all the boys had their wives and children with them. All had a good time, and many went home carrying trophies won at the different sports. The dinner was excellent, plenty of everything and the bar being handy, nothing was missing. The principal winners were as follows: Ladies race, over 40, Mrs. Wilson and Mrs. Matz; under 40, Miss Highton and Mrs. Edward. Children's, over 10, Henrietta and Marie Addor. Under 10, Emily Everett. Boys over 10, G. and W. Wright; under 10, R. Wright and R. Johnson. Men over 40, J. Gilliar and Al. McKenzie under 40, E. Westlake and M. Schwarz. High jump, T. Heron and F. Finlawson. Stone throwing, A. McKenzie and H. McDonald. Broad jump, F. Gale and A. McKenzie. H. B. Jump, F. Gale and J. Ingram. Ladies' ball throwing, Mrs. Wilson. Hammer throwing, J. Ingram, Heron and McKenzie. Fat men's race, G. Wilson and G. Maynard. Ladies' race, Mrs. Elmslee. Tug of war, Oyster Bay (Glen Cove was too tired!) Kibs, Brown & Marshall.

The New Duplex Gutter

Over six miles in use and highly recommended by all. The only Drip Proof gutter on the market.

The Standard Return Steam Trap

It has no equals for simplicity or its working. Catalogue free.

E. HIPPARD, Youngstown, Ohio.

Providence.

TRADE DULL.

There was a large amount of funeral design work at the different stores the first part of the week, but the business is back to its former condition again which is dull. Counter trade is no better than it was a month ago and it will be another month before we look for any change in this trade. If anything should turn up unexpectedly to cause a more brisk demand for cut flowers the market would be found decidedly short of first-class stock. It is almost impossible to get good carnations as those in the houses are exhausted or thrown out to make room for the young plants which are being housed now. There are no field carnations grown to cut from about here. The supply of asters is gradually increasing and some are coming in of a good quality and are the popular flower now. Sweet peas are poor but there are some good ones coming in from Massachusetts growers. Gladioli are quite abundant and a great many of the light colors are used up in funeral work. Roses are abundant enough to supply all demands. Some very good Kaiserins and Carnots are seen. Killarney, My Maryland and Richmond are only fair in quality. Orchids are not so plentiful but enough to satisfy all demands. The supply of lilies is very light. There is little demand for green goods. Hydrangeas, tritomas and larkspurs are used extensively in window decorations of the stores.

The employees of T. J. Johnston & Co., presented recently to Mr. and Mrs. Edward Brook, the managing owner of this firm, a very beautiful desk and typewriter with all equipment in honor of their recent wedding. Mrs. Brook was formerly Miss Edith Sims, the bookkeeper for this firm for the past year and is a very popular young lady. All connected with business extend to them their best wishes.

J. A. Budlong & Son, Auburn, gave 10,000 roses to the Society of the Rhode Island Branch of International Order of King's Daughters and Sons to be sold on the streets of this city for the benefit of the poor, sick and indigent children and tired mothers of the city's poorer quarters to enjoy a two weeks' rest to the Emily S. Chace Memorial Home at Oakland Beach.

The Citizens Saving Bank has discharged a \$5,000 mortgage against Thomas Curley and wife on their greenhouse property on Harkness and Slocum streets. This does not go to show business is limited with this firm as they do an immense business at landscape and floral work.

Frank O'Reilly, who has been in the florist business 40 years in Pawtucket, is now employed as a forester in that city.

Fred Luther has just purchased a 12-h. p. Maxwell runabout automobile.

Edward Murray, manager of Wm. Hay's wholesale cut flower market at 20 Clemence street, reports business very satisfactory for this season of

The "Ideal" Hot Water Circulator

THE "IDEAL" is the simplest and most efficient circulator on the market; requiring less power to operate than any other.

Sectional Cut of Improved Circulator No. 6.

Some Advantages of the "Ideal" Circulator.

- (1) Improves to perfection the circulation in hot water plants that are defective.
- (2) Enables present hot water systems to be extended to a very large extent without increasing the size of the pipes or the height of the circulating head.
- (3) Owing to the reduced size of the main piping required, it considerably reduces the first cost of installation.
- (4) Gives an even temperature in the pipes throughout the system.
- (5) Reduces the amount of radiating pipes required.
- (6) Enables smaller piping to be used.
- (7) Piping may be placed below boiler level as well as above.
- (8) Effects a large economy in cost of fuel.
- (9) Requires a very small amount of power to operate (1-10 of one horse power is sufficient, for 5,000 sq. ft. of heating surface).
- (10) Can be used as an auxiliary to gravity system, and does not impede the flow of same at times when forced circulation is not required.

Pay and Buy

Coming in on the train this morning, as we whizzed by a bill board I just caught these words. "You can pay more, but you can't buy more."

Don't know whether it referred to chewing gum or automobiles, but it at once flashed into my mind, what a perfect description that is of our Iron Frame house. Thought over detail after detail of its construction, and followed in my mind's eye how carefully each part is made at that big up-to-date factory of ours; then I began comparing the various houses, making the "just as good" claims; after this did a little mental arithmetic and found out how long our houses have been standing the racket, and I said, to myself, Yes, those nine words tell the "You story—can pay more but you can't buy more."

Drive a nail in that thought and clinch it so it can't get away; some day it will save you money.

Hitchings and Co., ELIZABETH, N. J.
NEW YORK, N. Y.

the year. Mr. Hay's market is the first legitimate wholesale store started here and undoubtedly will be a success.

SLEEP ALL NIGHT

and you need not fear about your plants or flowers spoiling

When the Giblin Standard Greenhouse Boiler is Used

It Runs From 8 to 12 Hours WITHOUT ATTENTION.

Does not this feature alone compel you to get interested?

Mr. Willis Greene, Little Falls, N. Y. writes recently and says: "I fire the boiler at 10 p. m. and it requires no further care until 6 a. m., even in the coldest weather." He uses a No. 406 steam boiler.

To introduce our boilers where not known, we will donate 25% of the net price as a premium on the first order. This will save from \$25.00 to \$200.00 according to the size.

We can name net price delivered, at any place in the United States.

Write us now for details of proposition and catalog.

IGOE BROTHERS

Manufacturers of the Model Plant Supports for Carnations, Dahlias, Golden Glow, Peonies Chrysanthemums and Tomatoes.

63-71 Metropolitan Ave. BROOKLYN, N. Y.

Urbana-Champaign, Ill.

Although in the midst of the dull season all are being kept busy with funeral work, carnation benching and greenhouse repairs. For several days there was a scarcity of stock for funeral work, but now both indoor and outdoor asters are coming in, which will no doubt relieve the situation. Outdoor asters especially are in fine condition and a large crop is being looked forward to. So far we have had plenty of rain and hardy perennials and all other outdoor stock have made excellent growth.

A mid-summer farmers' institute will be held at the University of Illinois under the auspices of the College of Agriculture from August 16 to 19. A very interesting and instructive programme has been arranged for. Visitors will be conveyed over the grounds of the university and experiment station by the various departments, and all experiments of especial interest will be explained to them by those directly in charge of the work. Excursion rates have been granted from all points in Illinois, and it is estimated that from 4,000 to 6,000 agriculturists will take advantage of this opportunity and visit the home of the College of Agriculture and Agricultural Experiment Station.

The rose work at the Experiment Station greenhouses is well under way. All the plants are in a healthy condition and are growing vigorously. The sunken gardens are being admired by every one. A large circular bed of King Humbert cannas edged with Centaurea gymnocarpa is attracting a

great deal of attention. No doubt this example of formal gardening will have a stimulating effect in the adornment of homes.

Thomas Franks & Son have not done all their planting. George reports that good help has been scarce all summer, and that he had difficulty in getting men to do the heavy work connected with carnation benching. He leaves for Wisconsin in a few days, where he expects to spend several weeks boating and fishing.

Dean Davenport is spending a few weeks on his farm in Michigan. Prof. Blair and family leave for northern Michigan Saturday, where they expect

to spend the remainder of the summer.

Gus. Johnson is making extensive improvements to his greenhouses. Last week he had quite a number of out of town orders for funeral work. He has finished benching his carnations.

R. B. Howe, who has been carrying on pomological investigations for the Department of Horticulture for several years, has accepted a position with the W. W. Barnard Co., Chicago, Ill.

J. F. Ammann of Edwardsville and Henry Johann of Collinsville were visitors at the experiment station greenhouses July 16 and 17. A. H. N.

Louisiana Cypress

Washington Red Cedar

A. DIETSCH CO.,

2642 Sheffield Avenue,

CHICAGO

Newport, R. I.

The business for the next six weeks promises to be something unprecedented. The number of cottagers here is greater than for several seasons, and the arrival of the New York yacht club squadron will be followed by the opening of the National lawn tennis tournament at the Casino. The arrival of the United States Atlantic fleet with a number of entertainments planned for the officers and men is causing quite a lively business already. There are to be several elaborate dinners with extensive floral decorations. Functions of this kind are always numerous here during August. The stores are making great displays of herbaceous flowers, sweet peas and gladioli of which the variety America appears to be the favorite. Some good American Beauties, Richmond, Killarney and My Maryland roses are seen in the stores. Also lily of the valley of good quality.

NOTES.

The Horticultural Society will hold its Autumn exhibition of palms, decorative plants, cut flowers, dahlias fruit, etc., September 17-19. Daniel J. Coughlin, Bellevue avenue, is secretary. The society will hold a grand ball on the evening following the close of the show, September 20. And the following comprise the committee to take charge of arrangements: Andrew S. Meikle, William F. Smith, John Forbes, John B. Uquhart, and John T. Allen.

John P. Hammond was reappointed to a five-year term on the park commission by Acting Mayor William Shepley at the annual meeting of the commission. Mr. Hammond is a live practical gardener and he with Richard Gardner and Secretary H. W. H. Powell who will serve as assistants after their long experience in park management are sure to make their influence felt.

John P. Hammond, James J. Sullivan and Colin Robertson are appointed a committee to judge the school gardens.

John Hays, of Henry A. Dreer, Inc., with his family, are spending their vacation here.

J. BRINTON.

Hawthorne and Weed Sts., CHICAGO

Atlanta, Ga.

For the past week the weather has been very hot and sultry, driving the buying public to the seaside and mountain resorts, making business quiet, with just enough funerals to keep from throwing stock away. Flowers that pulled through the wet spell last month jumped into the oven this month. Stock is very good excepting carnations, which are poor in stem, flower and color. Good Kaiserin and Killarney roses are to be had now, also asters, which are coming good.

At Dahl's, West View, Atlanta, and Nunally's everything is about planted. On July 30 the councilmen, aldermen and

city officials were the guests of Mayor and Mrs. Maddox at their beautiful country home (Woodhaven), where they spent the afternoon amongst the flowers. The informal gardens and pergolas were the chief attractions and just at present they are at their best.

E. J. Grennor, landscape architect, is at present laying out a beautiful subdivision in one of the suburbs. G. L.

MINNEAPOLIS, MINN.—The Raddison Flower Shop is reported in difficulties and to have asked that a receiver in bankruptcy be appointed. The proprietors say that if allowed to remain for six months they can pay 50 cents on the dollar.

STOCK SCARCE.

Never, at any other time of the season, has stock been as scarce as at present. Gladioli are coming in small quantities and of fine quality. Carnations are practically off the market. Roses are in great demand. Harrisii lilies are coming in and bring a good price. There has been a shortage of light colored stock for funeral purposes. A few chrysanthemums have been brought in during the past week. Shipping has held up remarkably well.

NOTES.

The Florists' Club held a meeting August 4 and it was well attended. The annual picnic, flower show and the convention were the main topics discussed during the evening. F. H. Holton addressed the meeting in regard to the convention and expressed his regret that there were only 17 S. A. F. members in the state of Wisconsin and that out of these probably only 10 would attend. He stated he mailed 150 circular letters urging those he thought would be interested to attend the convention, and received only two replies. Mr. Holton said the society has done a great deal for the trade and concluded with "Wisconsin isn't doing her share." It was decided to hold the annual picnic the first Sunday in September at Boutzloffs' grove, on the north side, one block from the North Milwaukee car line. The members on the entertainment committee are: G. Rusch, G. H. Hunkel, F. H. Holton and William Zimmermann. The second annual flower show will be held at the Auditorium November 7-14 and prizes to the amount of \$3,500 will be awarded. The members on the committee are H. V. Hunkel, chairman, J. C. Heitmann, Nic. Zweifel, G. Kellner, C. Dallwig, A. Leidieger, Wm. Zimmermann and C. C. Pollworth. Refreshments were served and we wish to thank the club for its kind hospitality on the occasion of our visit.

Holton & Hunkel, 462 Milwaukee street, are remodeling their store. The office will be moved to rear, and new counters put in. Two new ice boxes are being built, one in the store and another under the walk in front of the building. The box in the store will be 8x23 feet and the other 6x30 feet; both are made of hard pine. Other new fixtures will be added and the store arranged to suit every convenience. The counters will be put crossways, this being more favorable for working purposes. Eight new greenhouses, 29x100 feet each, are being erected. Mr. Hunkel is looking after the work. The material was purchased from the J. C. Moninger Co., Chicago. The houses are of iron and concrete; cement walks will also be laid. George Keene, brother of the well known St. Louis manufacturer, has charge of the wire department at the store. S. Rusch returned August 1 from his vacation, which was spent at Fox Lake. F. H. Holton is spending a few days of the present week at Chicago.

C. C. Pollworth Co., 454 East Water street, has enjoyed a good season and the bulk of the business exceeded that of former years. C. C. Pollworth and wife will attend the S. A. F. convention and visit several other cities while in the east. The company makes a specialty of growing flowering plants for

Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

NATURAL GUANO COMPANY, Aurora, Ill.

the holiday trade, and after the holidays room is made for the bedding stock. The men have just finished planting the roses and carnations. Walter Holiday returned home August 1 from his vacation, which was spent at Mount Clemens, Mich. Tom Cassidy and Frank Boyer are enjoying their vacation fishing among the lakes.

W. C. Zimmermann, 432 Grand avenue, will remodel his store. A balcony will be put in and the office moved upstairs. A new ice box will also be installed. Miss Zimmermann is spending her vacation at Pewaukee, where she is staying at the Lake Side hotel. Mr. Zimmermann will spend his vacation at St. Louis and expects to leave about August 22. An extended lease has been secured on the store.

J. M. Fox & Son, 414 Milwaukee street, do nearly all the work for the Milwaukee Country and Fox Point clubs, which consists mostly of table decorations. On July 24, a casket cover in the shape of a blanket, made of lily of the valley and orchids, was delivered at Menominee, Mich., where the funeral of Mrs. J. W. Wells, the wife of the well known lumber man, was held.

J. Davis and wife of the McKenny Floral Co., 417 Milwaukee street, are spending their vacation in the west. This firm decorated the Pillsbury home on Prospect avenue, where the Pillsbury-Curtis wedding took place on August 2. The decorations were in pink and white. Killarney roses, lily of the valley, gladioli and asparagus were used in the decorations.

The Flora-Bon, corner of Third street and Grand avenue, opened up August 1 and has enjoyed a good week of business. The store is centrally located in the center of the business district. Anna Thierfeldt, formerly with A. B. Loofbourow, 376 Grove street, has charge of the flower department.

Nic. Zweifel has finished planting. He grows mostly carnations and has put in 50,000 plants. Mr. Zweifel reports having had a very good season. His Bright Spot has shown up very well this season and he is preparing to disseminate this next year.

J. P. Sharer, formerly member of the board of public works, bought the James Chacona store at 87 Wisconsin street and took possession August 1.

Has stood the test of over a Quarter of a Century.

THE ROCHESTER CONVENTION

Next Convention at Baltimore, Md.

OFFICERS FOR 1911:

President, Geo. Asmus, Chicago.
Vice-Pres., R. Vincent, Jr., Baltimore, Md.

Secretary, H. B. Dörner, Urbana, Ill.
Treasurer, W. F. Kasting, Buffalo, N. Y.

Convention Proceedings.

The twenty-sixth annual meeting of the Society of American Florists was called to order by Fred W. Vick, chairman of the executive committee for the convention, and president of the Rochester Florists' Association, promptly on time at 2 o'clock on Tuesday afternoon, August 16, 1910. This and subsequent business sessions of the convention were held at the convention hall in Rochester, which was also the headquarters for the exhibitors; their display being very elaborate and tasteful. Mr. Vick introduced his honor, Mayor H. H. Edgerton, who welcomed the convention to Rochester, and said that its citizens were proud of the florists and proud of their own name of "The Flower City." In extending the freedom of the city he hoped that all would so enjoy the occasion as to wish to come again and come often.

Mr. Vick next introduced George Dietrich, president of the Rochester chamber of commerce, who spoke of the good city government enjoyed by Rochester, and referred to its diversified industries and number of homes, all of which would be found to boast of lawns and flowers. He congratulated the Rochester florists upon the successful growing by them of new varieties and their trial grounds which developed the best that could be grown in the climate of this locality. He briefly outlined the progress of the city in its progress from flour to flowers, its first cognomen being the "Flour City," which later developed to the "Flower City," and added his emphasis to the welcome voiced by the mayor.

Mr. Robt. Craig, of Philadelphia, responded to the addresses of welcome, and complimented Rochester on its

ability to take care of large bodies of men assembled in conventions. It is the only city, so far as Mr. Craig knew, that has adopted for its civic emblem a flower, the delight of the florist. Mr. Craig feelingly referred to the life and labors of George Ellwanger, Patrick Barry, Jas. Vick, and a host of others whose careers of usefulness are familiar to all florists, and whose work has done so much to make Rochester famous as a horticultural center. The cordial greeting extended, he declared, was warmly reciprocated, and the visitors were glad to be in Rochester and proposed to make the most of their visit. They had brought with them a few examples of the plant grower's art which would doubtless interest the people of Rochester. He said in conclusion that there was a growing sentiment he thought in favor of the spring season for a convention and exhibition because at that season shrubs and plants are seen at their best. He hoped that the beauty of the exhibition at this time might prove some compensation for the kindly welcome that had been accorded to the visitors.

Mayor Edgerton asked permission to say yet a further word about the business enterprises of Rochester, which privilege was willingly extended by President Pierson, and the mayor told of the goodly coin of the realm that flows into Rochester all the time, whether business is good or bad elsewhere, by reason of such industries as the photographic supply people, that furnish 95 per cent of the photographic goods sold in the entire country; the largest optical factory in the world located here, and so on.

Patrick O'Mara, of New York, obtaining the floor, made a neat speech

presenting to President Pierson a beautiful ivory gavel, with trimmings, a gift from the Rochester Florists' Association. Mr. O'Mara felicitated President Pierson upon the efficient work that he has already accomplished, and suggested that he show no favors to the donors when he had occasion to use the gavel, and, however he might wield it, he felt sure he would never prove to be a "knocker," but when he finally, in the course of events, turned the office over to another he would leave a record that few could equal and none surpass.

Executive Business.

President Pierson, in accepting the gavel, returned his acknowledgments to the Rochester Florists' Association. He assured his hearers that the gift was none the less acceptable and appreciated, because it had been unlooked for. The president's address followed, and reports by Secretary H. B. Dorner, of Urbana, Ill., and Treasurer Wm. F. Kasting, of Buffalo, N. Y., the financial portions of which were referred to the auditing committee: C. L. Washburn, C. G. Miller and Jos. Heacock.

The minutes of the meetings of the executive board were read and approved, and their recommendations concurred in at this time, with the exception of action upon the appropriation for the National Council of Horticulture, which was made a special order for Wednesday morning's session. The following were appointed as committee on vice-president's reports: W. B. Du Rie, Frank Traendly, Benj. Hammond. In the absence of the official entomologist of the society, Dr. S. A. Forbes, his report was read by Prof. J. J. Davis, and duly filed.

Prof. H. H. Whetzel, pathologist for the society, was introduced to the convention, and announced that he would locate himself in the exhibition hall and desired to meet there all members who had troubles to report, as he sought to learn all he could of the to disease conditions in horticulture, problems that confront the florists as with a view to finding a remedy wherever possible. He promised to have something further to communicate on Wednesday regarding his plan of work.

John Westcott, chairman of the committee on convention sports, told something of the work of that committee, and its belief that the furnishing of laudable sports was an incentive to many to attend the meetings that might otherwise remain at home absorbed in their usual routine duties. He promised that absolutely fair play should prevail in all awards, and none but amateurs and strictly members in good standing of the S. A. F. would be permitted to compete.

Mr. O'Mara, chairman of the tariff and legislative committee, made a report of an interesting character embodying a voluminous correspondence showing conditions surrounding the glass industry as affecting the florists, and other matters. The report was received and filed, and discussion of it postponed until later on. Further reports were deferred, and the convention adjourned to 9:30 a. m. Wednesday.

RICHARD VINCENT, JR.

Vice-President-Elect Society of American Florists.

Wednesday's Proceedings.

The first business at the Wednesday morning session was the reading of invitations from Ellwanger & Barry to visit their nurseries during the convention or while members were at Rochester; there was also an invitation from Mrs. F. F. Thompson, through R. E. Ballantyne, to visit her private estate, "Sonnenberg," at Canandaigua, N. Y.

Secretary Dorner announced that the total enrollment of new members up to last night, August 16, was 180, and the present membership 1,067, as against total membership of 995 on the last day of December, 1909. Edward D. Boyer, cement expert for the Atlas Portland Cement Co., delivered a very timely and interesting paper on the "Use of Cement with Special Reference to Greenhouse Construction." This address touched a popular want and drew out a lengthy discussion in which the following participated: Messrs. Peterson, Cushman, Christy, Farenwald, Dunlop, Freeman, Birnie, Holton, Curtis, Peck, Cowell, Whetzel, Weber, Barry, Hammond, Pierson, Hill, Winterich, Elliott and Poehlmann. Some of the inquiries had reference to the possibility of using ashes without sand for making cement for benches, one member reporting favorable results with such material. One member had been told he might expect fungi from ce-

ment but the essayist and Prof. Whetzel assured him such an apprehension was entirely groundless. The entire discussion showed that the topic was a very live one, and will probably continue to be. A vote of thanks was extended to Mr. Boyer.

Next Year's Meeting Place.

Invitations were read from various cities to hold the 1911 convention in their precincts, and finally after some spirited flights of oratory, the cities of Baltimore and Chicago were placed in nomination and voted upon. N. F. Flitton made the principal speech for Baltimore, and was supported by Past Presidents William R. Smith, R. Vincent, Jr., O'Mara and Freeman. August Poehlmann nominated Chicago and was supported by J. C. Vaughan and J. Bertermann. John Dunlop nominated Montreal and made a plea for it, if not now, later on. J. A. Valentine demanded to be shown what the facilities of the two cities were with respect to exhibition space and other accommodations, and was given the information. On motion of W. A. Manda the nominations closed; Messrs. Vincent and Ammann were appointed tellers, and, the ballot being cast, resulted in 180 for Baltimore, and 135 for Chicago. The contest was evidence, if it were needed, that the society is in a healthy condition, and the contesting cities very desirous to get the meetings.

GEORGE ASMUS.

President-Elect Society of American Florists.

The convention then adjourned until 2:30 and upon reconvening the report of the auditing committee was read, pronouncing the books and accounts of the secretary and the treasurer correct. The report was accepted and filed. The report of the committee on vice presidents' reports was read by W. B. Du Rie and filed.

Prof. Whetzel, the official pathologist of the society, of Cornell University, Ithaca, N. Y., spoke briefly, promising to file a formal report later, outlining his plan for co-operation by the society in work along lines of investigation and research for remedies for diseases of plants affecting the florists. He said that his plan if accepted by the society would involve an expenditure of \$1,500 annually, and he believed that practical results might be expected from it. No formal action was taken.

National Council of Horticulture.

J. Otto Thilow submitted the report of the delegates to the National Council of Horticulture, recounting the valuable work done. The report was received and filed. Separate action was had upon the recommendation of the executive board to make an appropriation of \$150 towards the work of the National Council of Horticulture. Mr. O'Mara opposed this recommendation, stating his reasons therefor. E. G. Hill had heard that the statement had

been made that in one article appearing the recommendation was made that 16 gladiolus bulbs be planted to the square foot, but he believed that it must have been a typographical error. He made some suggestions for the securing of a higher grade class of articles that would be less amateurish but believed that the appropriation should be voted. W. J. Stewart opposed the appropriation for reasons similar to those he had put forth last year at Cincinnati. J. C. Vaughan believed that the articles printed at the instigation of the National Council of Horticulture had been productive of much good to the trade generally, and advocated the continued support of the work of the council in this regard. Mr. Manda opposed the appropriation on the ground that the work, if done, should be done under the direction of the S. A. F. exclusively. J. K. Farquhar denied that the gladiolus recommendation referred to was a typographical error, giving reasons, and thought the articles were not of sufficient merit and value to warrant the expense. The motion to make the appropriation was lost by a rising vote of 31 ayes and 44 nays.

The following were announced as a committee on president's address: J. A. Valentine, Robert Craig, E. G. Hill, Wm. R. Smith, and J. C. Vaughan, and the committee submitted its report, which was received and filed. The

vote for convention city being announced at this time, J. C. Vaughan moved that the selection of Baltimore be made unanimous, which was agreed to and Mr. Flitton, on behalf of the Baltimore people, returned his thanks for this proof of the breadth and greatness of Chicago, declaring that it was a big city in every way.

Under the head of nomination of officers, Mr. O'Mara presented the name of Geo. Asmus, of Chicago, for president, and the same was unanimously ratified and agreed to, the nomination being seconded by R. Craig, also by B. Hammond and P. Foley. The name of Richard A. Vincent, Jr., of White Marsh, Md., was presented for vice-president by Mr. Harrison, and unanimously agreed to. W. F. Kasting nominated for re-election Secretary H. B. Dornier, of Urbana, Ill., which was supported by Mr. Valentine and W. W. Coles, and unanimously agreed to. Mr. O'Mara presented the name of Wm. F. Kasting for re-election as treasurer and this was seconded by Mr. Hammond and unanimously agreed to. All nominations were laid over under the rules until the next day, when election will take place at 11 a. m. The report of the committee on trade exhibits was read by the secretary and accepted as read, after which an adjournment was taken to 8 p. m.

George Asmus.

George Asmus, president-elect of the Society of American Florists, who is now serving his second term as president of the Chicago Florists' Club, was appointed a member of the executive committee of the Society of American Florists in 1908 by President Traendley. He was born at Buffalo, N. Y., January 24, 1872, where he received his education at the public schools and graduated in the spring of 1887. His first connection with the business was in his native city, a position with Wm. Scott as errand boy. Here he remained 10 years, gradually working himself into a position of trust. In 1896 he accepted the position of manager to Schiller the Florist (Herman Schiller, proprietor) at Chicago. At that time there was considerable glass in connection with the business but owing to the rapid increase of the retail end of it at the two stores, it was decided to sell this. Mr. Schiller died in 1902 and in 1905 Mr. Asmus was made part owner of the business, still retaining his position as manager. Although a large business when Mr. Asmus took hold, it has more than tripled itself since.

Mr. Asmus is well known as a popular club man and his genial presence is always looked for at meetings and conventions of the many societies of which he is a member. He has managed several shows of the Horticultural Society of Chicago. He is a life member of the Society of American Florists and a regular attendant at the conventions. In 1905 he was chairman of the committee on sports at Dayton, O. He is also a member of the Chrysanthemum Society of America, the American Rose Society and the American Carnation Society. Outside of the trade he is an advanced Mason and also a member of the Odd Fellows, Royal Arcanum and the Modern Woodmen of America.

William F. Kasting.

Wm. F. Kasting, treasurer of the Society of American Florists, was born July 27, 1870, at Sachsenhausen, Germany, whence he came as a boy to America. For 20 years he has been engaged in floriculture. The first eight years were devoted to greenhouse work in Buffalo, Cleveland, Erie, Pa., Steubenville, O., and Buffalo again. After working for D. B. Long, Buffalo, for three years, Mr. Kasting bought his employer's wholesale business. As park commissioner for Buffalo he did excellent work; and two years ago ran 4,000 votes ahead of his ticket in an unsuccessful contest for the county treasurership. Mr. Kasting successively filled the offices of financial secretary, treasurer and president of the Buffalo Florists' Club. He also has held the office of vice-president of the American Carnation Society and of the Society of American Florists. At the Buffalo conventions of each of these organizations Mr. Kasting served energetically as chairman of the ways and means committees.

President Pierson's Address.

It gives me great pleasure to address you on this occasion—our twenty-sixth annual convention. This convention marks the beginning of the second quarter century in our history. It is very fitting that Rochester, the flower city, should have been chosen for this convention, for no city in the United States has done more to in-

culcate the love of horticulture among our people than has Rochester. This city was the cradle of the seed and nursery business of the United States, and has a world-wide reputation for its love of flowers and the beautiful.

WILL WE AFFILIATE?

To my mind, one of the most important objects to be accomplished at this time is the incorporation or consolidation of the various societies devoted to special lines of ornamental horticulture into one homogeneous, harmonious whole. By this I do not mean that the different societies, such as the Carnation Society, the Rose Society, and the other kindred organizations, should lose their individuality or identity, but that, instead of being separate organizations, they should become sections of the national society, each devoted to its own individual interest, but incorporated into one powerful organization. This is the day of concentration, and now, it seems to me, is the psychological moment for the unification of the different horticultural interests.

You may ask how this is to be done; and it is a pertinent question. As my friend Patrick O'Mara, has expressed it, "We need a Moses to lead us out of the wilderness into the promised land." If I remember correctly, this promised land flowed with milk and honey; so it would seem as if the object to be attained was worth striving for. I do not want you to mistake me as expecting to be the "Moses" to lead you out

of the wilderness of the numerous and varied interests represented by the different horticultural societies.

This subject has been uppermost in all our minds for years, and the question of affiliation has been threshed out, and it seems to me as if we might accomplish in a concrete and practical form, what we have been theorizing about for years, in the mid-winter convention, which it is now proposed to hold in connection with the National Flower Show, to be held in Boston next spring, the executive board having recommended that a special meeting of the society be held during the time of the National Flower Show; and I sincerely hope that this recommendation will meet with your approval and be adopted—especially in view of the fact that the American Carnation Society has already fixed that date for holding its annual convention, and the American Rose Society has also agreed upon that date for holding its annual convention, and, I trust, we may have the co-operation of all the other societies as well. This is directly in line with what I have in mind at this time as a desirability. In other words, I believe that, instead of having a convention of the Carnation Society in January, a convention of the Rose Society in March, and a meeting of the Sweet Pea Society in the summer, it would be better if these different meetings were held at one time under the auspices of the Society of American Florists.

DON'T CHANGE HASTILY.

This would afford us an opportunity to test the desirability and advisability of such a mid-winter convention before committing ourselves definitely to any change of plan. There are a great many arguments that can be advanced in favor of the summer convention, such as we have always held, and there are other arguments in favor of the mid-winter convention. There are some who advocate doing away entirely with the summer convention of the society and substituting a mid-winter convention; but at this time I should not want to advocate so radical a change. The secretary was directed to send each member of the society an inquiry as to whether he would find it more desirable or convenient to attend a summer meeting or a meeting during some month in the spring; so we shall soon have this information available. I do not know why it would not be advantageous for the national society to hold a semi-annual convention instead of an annual convention, as in the past. The summer convention has its advantages for plant exhibits, but gives no opportunity for an exhibition of cut flowers practically of any kind.

SEMI-ANNUAL MEETINGS.

Last year, at Cincinnati, there was some considerable discussion as to the desirability of making our exhibitions of such a character as to interest the general public, but on account of lack of room at Rochester, there being such a demand for space by exhibitors, it was found impossible to carry out that suggestion at this time. There is no doubt but the general public is very much interested in our conventions, and it is very desirable that our exhibits should be of such a character as to interest the public, and help floriculture generally in the different cities

**W. F. KASTING.**

Treasurer Society of American Florists.

where we gather from time to time. A mid-winter convention would offer a magnificent opportunity for this purpose, and I believe that the coming National Flower Show will demonstrate the desirability of a mid-winter meeting,—possibly not on such an elaborate or extensive a scale as will be attempted in Boston next year, but along those general lines. I do not see why our interests are not of enough importance to justify these semi-annual gatherings. It certainly would require no less of an outlay of both time and money to attend the consolidated semi-annual meeting than to attend all the various smaller meetings.

An exhibition in mid-winter would also interest the retail section, as it would afford a splendid opportunity to the retailer to show what can be done in artistic arrangements, and would give him an excellent opportunity of reaching the public in the most effective way. I was particularly pleased to have President Valentine organize a retail section last year. I believe it will conserve the interests of the large number of men who buy and dispose of the products of the growers, and will be productive of great good to the retailer and grower.

If an affiliation can be accomplished, I would suggest the desirability of having the secretary of the national society also the secretary of all the affiliated societies. I think this would tend to greater efficiency and economy. I would also suggest that the presidents of all the affiliated societies be made members of the board of directors, thus giving each society a voice in the management of the affairs of the national organization.

THE OFFICE OF SECRETARY.

Along these lines, it might be apropos for me to mention what I have had in mind for a long time, and that is that our interests are large enough and important enough to justify the employment of a secretary who shall devote his entire time to the advancement of the interests of our society. Our presidents are appointed for only one year, so that it would be desirable to have one executive officer whose term of office should be more or less continuous. We are to have submitted to us at this time an amendment to the constitution relative to the election of a board of directors. I am firmly of the opinion that we would more nearly follow out our ideas of a democratic form of government by the election, rather than by the appointment, of directors; in fact, I believe that the offices of the president, vice-president, and directors should all be elective, and that the office of the secretary, and possibly of the treasurer, should be appointive. So far as the treasurer is concerned, I am not so insistent that his should be an appointive office, but I believe that the secretary should be appointed by the board of directors, and that his tenure of office should not be subject to any uncertainty, as long as he does his work well, and satisfactorily to the board of directors. Constituted as we are as a society, it is desirable that some one should occupy this office who is familiar with the situation and who can give it his entire time and attention. I believe that the extra expense

involved would be money well invested.

You may ask what there is to do that requires a man's entire time. Our committees as now constituted, with one man in one city and another in another city, are unwieldy and unworkable, and are too far apart to do effective work. Those who have served on these committees will bear me out in this statement. Take, for instance, the question of legislation alone. It is becoming necessary that there should be some check upon the various bills that are introduced both in congress and in the state legislatures, many of which in the form in which they are introduced are inimical to our interests. There is also the question of the regulation of express rates, tariff, and other matters requiring constant attention and supervision.

MEMBERSHIP.

Another matter to which more attention should be given is an increase in the membership of our society. This has been talked of often before, by many presidents who have preceded me; and, while a great deal has been accomplished in the past by those who have occupied this office, we all admit that we do not have as many members in our society as we should have. There are a great many who do not fully realize what a great benefit the Society of American Florists really is,

and what good a society of earnest workers can accomplish with the proper support. I believe it is the duty of every man in the business to belong to our national organization.

In regard to the recommendation of the executive committee fixing the life membership fee at \$50 I expressed myself at length on this subject at the last convention. I believe that \$50 is none too much for a life membership in our national organization. Many local clubs and smaller societies charge as much as this, or more. The right way to succeed is not to cheapen the life membership, but to increase the value of the organization, so that a man will be willing to pay almost any price for membership in the society.

Further, I believe that the annual dues might well be increased from \$3 to \$5. It seems to me that \$5 is little enough for a membership in our society. Now, every member attending a convention gets more than five dollars' worth of entertainment alone, to say nothing about the other benefits derived therefrom. A member of the society who pays his annual dues of \$5 for 10 years consecutively might be made a life member, and the payment of further dues cease. I think that an inducement such as this would prevent a great many from allowing their membership to lapse, as has been the case frequently in the past.

H. B. DORNER.

Secretary Society of American Florists.

I would also recommend for your consideration that any member of the society, to be eligible to the presidency, should have first served on the board of directors. My reason for this is because such a man elected to the presidency would have familiarized himself with the detail work of the so-

be offered. There is no place in the country where such a magnificent collection of plants can be collected as in the vicinity of Boston; and I ask the hearty support of every member of the national organization to make this exhibition a red letter day in the annals of horticulture in this country.

F. R. PIERSON.

President Society of American Florists.

ciety, and, consequently, be better equipped to act as the chief executive officer of the society.

THE NATIONAL FLOWER SHOW.

I wish to call the attention of the members to the most important event of the year, namely, the organization of the National Flower Show, which is to be held in Boston next spring. A guarantee fund of over \$10,000 has been raised, Mechanics hall—the finest hall in the city of Boston—has been leased, and a manager and secretary engaged; and everything points to a successful show. The first National Flower Show was a great success, but the second, which is to be held in Boston next spring, is the most ambitious project that has ever been attempted in this country; and I believe that every live florist should endeavor to attend this exhibition, as it undoubtedly will be the finest one of flowering plants that has ever been gathered together in the United States at one time. No effort will be spared to make this a magnificent exhibition. Premiums aggregating over \$10,000 will

I have to congratulate the society on the splendid exhibition in Convention hall at this time. The value of these trade exhibits to the society cannot be over-estimated, as they are of great educational, as well as financial, benefit.

I want to express to the chamber of commerce of the city of Rochester at this time, on behalf of the Society of American Florists, our appreciation of the magnificent building which has been tendered to the society without cost. I think you will all agree with me that we have never had finer facilities at any of our conventions. I wish, also, to congratulate the society on the splendid attendance at this convention. The vice-presidents should be commended for the splendid work that they have done in bringing here such a large representation as we see today.

In conclusion, let me urge every member of the society to feel that our future success depends not so much upon the officers elected from time to time, as upon the individual effort of

each member. Looking back over the last 25 years of horticulture in this country, one cannot help but feel proud of the progress that has been made in our profession; and amidst such auspicious surroundings as we find ourselves today, we should be inspired to greater effort, that the history of the next quarter century may record even greater progress.

Secretary Dorner's Report.

The books and other properties pertaining to the secretary's office were turned over by the outgoing secretary early in January. Much commendation is due Mr. Rudd for the excellent and simple system that he has devised for the keeping of accounts and records. It is only by a careful examination of these that one can fully appreciate the thought and labor put into the work.

CONDITION OF FINANCES.

The finances of the society are steadily improving. The permanent or life membership fund August 1 had reached the sum of \$8,313.50 and to this amount will be added \$125 for five new life memberships which have been received since that date.

It is also gratifying to note that the membership is also gradually increasing. In 1908 the membership of the society was 889 at the end of the year. In 1909 this had increased to 995. Up to August 10, 1910, the paid up memberships number 825 which, with those who pay their dues during the convention week and the new members joining at this time, promise to surpass all records.

NEW MEMBERS.

The number of new members added to the roll to date is 77. Four of these came in as life members. The secretary sent out, with most of the receipts, a request that each member make an effort to secure at least one new member. In reply to this four or five names were sent in. Few realize that if each member made an effort and secured at least one addition to the roll the membership would be almost 2,000 at the present time instead of 995. Many plans have been devised for increasing our numbers yet how many members have made a determined effort to convince their neighbors that they should belong to the S. A. F.

Many members overlook the fact that dues are payable on the first day of January and a failure to pay them at this time calls for a second notice. This is not only additional work for the secretary but is an extra expense to the society. This money could be well used in efforts to secure new members.

TRADE EXHIBITIONS.

The trade exhibition of 1909 was a success in every way, being a great improvement over former exhibitions. After all bills and the superintendent's commission were paid a profit of \$629.15 remained in the society's treasury. During the present year several changes were made in the rules governing the exhibition, principal among which were the increasing of the rates and the limiting of all signs to black lettering upon a white ground. This latter change has done much to make the exhibition more attractive.

Following the instructions of the society \$7,500 of the permanent fund has

been invested by the executive board. This investment is in the form of two loans, one of \$6,000 and the other of \$1,500, secured by mortgages on properties located in Fort Wayne, Ind. These securities bear interest at 5 per cent.

Application for reduced rates to the 1910 convention were made by all traffic associations and were met by the granting of a rate of one and three-fifths on the certificate plan by the Trunk Line association, the New England association, the Central association and the Eastern Canadian association. This rate was the lowest that could be secured under the present conditions. As usual, a charge of 25 cents is made for the vising of each certificate.

STATE VICE-PRESIDENTS.

Many of the state vice-presidents made quite an effort to secure new members. Many letters were sent out but reports show that these are not as effective as they might be, due to the fact that they are easily laid aside and forgotten. The following state vice-presidents have sent in new members:—

E. Allan Peirce, Waltham, Mass., one life, 15 annual.

Geo. B. Hart, Rochester, N. Y., 10 annual.

Alex. Millar, Dallas, Tex., one life, five annual.

Fred Holton, Milwaukee, Wis., two annual.

Otto Koenig, St. Louis, Mo., two annual.

The following members also deserve credit:—W. L. Kellar and Albert Sunderbruch each sent three, F. H. Traendly and L. H. Butts each sent two, Jacob Becker, E. Dailledouze, A. F. J. Baur, F. P. Avery and E. H. Cushman each sent one. W. J. Stewart sent in one life member.

MEDALS.

Medals have been awarded during the past year as follows:—Bronze medal:—F. R. Pierson Co., for *Nephrolepis elegantissima compacta*, offered at St. Louis, 1909. Silver medal:—Cottage Gardens Co., for *Carnation Mrs. C. W. Ward*, offered through the American Carnation Society at its annual exhibition held at Pittsburg, January, 1910. Bronze medal:—Cottage Gardens Co., for *Carnation Alma Ward*, offered through the American Carnation Society at its annual exhibition held at Pittsburg, January, 1910.

PLANT REGISTRATION.

New plant names have been registered since last report as follows:—

No. 414—August 13, 1909. *Odontoglossum crispum* variety *E. B. Baum*, by Julius Roehrs Co., Rutherford, N. J.

No. 415—August 13, 1909. *Canna*, New Chicago, by Vaughan's Seed Store, Chicago.

No. 416—August 27, 1909. *Geranium*, Red Wing, by F. H. DeWitt & Co., Wooster, O.

No. 417—August 27, 1909. *Nephrolepis Pruessneri*, by J. D. Pruessner, Galveston, Tex.

No. 418—August 27, 1909. *Nephrolepis Galvestoni*, by J. D. Pruessner, Galveston, Tex.

No. 419—September 10, 1909. *Berberis Thunbergii*, Silver Beauty, by M. J. Van Leeuwen, Franklin, Mass.

No. 420—September 18, 1909. *Rose Climbing Killarney*, by Alex. Montgomery, Natick, Mass.

No. 421—October 8, 1909. *Canna Multiflora*, by Vaughan's Seed Store, Chicago.

No. 422—October 15, 1909. *Rose Priscilla*, by Peter Henderson & Co., New York.

No. 423—October 15, 1909. *Rose Abundance*, by Peter Henderson & Co., New York.

No. 424—October 15, 1909. *Adiantum Roedderii*, by Alfred Roedder, Shorb, Calif.

No. 425—October 30, 1909. *Chrysanthemum Mrs. Jane Cockburn*, by S. Cockburn & Sons, Woodlawn, N. Y.

No. 426—November 20, 1909. *Canna Halley's Comet*. No. 427—November 20, 1909. *Canna Mrs. Alfred Conard*.

No. 428—November 20, 1909. *Canna Mrs. Carl Kelsey*, all by Conard & Jones Co., West Grove, Pa.

No. 429—January 22, 1910. *Rose Alice of Ingleside*, by S. C. Briggs, Washington, D. C.

No. 430—February 26, 1910. *Begonia Glory of Cincinnati*, by J. A. Peterson, Cincinnati, O.

No. 431—March 5, 1910. *Rose Wm. R. Smith*, by Conard & Jones Co., West Grove, Pa.

No. 432—May 7, 1910. *Violet, Marie Elise*, by Thomas DeVoy's Son, Poughkeepsie, N. Y.

No. 433—May 28, 1910. *Nephrolepis Roosevelt*, by American Rose & Plant Co., Springfield, O.

No. 434—June 11, 1910. *Rose Red Killarney*. No. 435—July 7, 1910. *Rose Dark Pink Killarney*. No. 436—July 7, 1910. *Rose Lady Cromwell*, by A. N. Pierson, Inc., Cromwell, Conn.

No. 437—July 7, 1910. *Rose Purity*, by Hoopes Bro. & Thomas Co., West Chester, Pa.

No. 438—July 14, 1910. *Nephrolepis Dreyerii*, by Kessler Bros. & G. Dreyer, Woodside, L. I.

No. 439—August 4, 1910. *Carnation Christmas Cheer*, by Henry Eichholz, Waynesboro, Pa.

THE DEATH LIST.

Since the last report three members have died:—November 1909. Albert Richfar, Richmond, Ky. May 3, 1910. Wm. E. Hall, Clyde, O. June 14, 1910. Dr. L. L. Bamborn, Alliance, O. On April 8, 1910, occurred the death of Mrs. W. J. Vesey, the wife of W. J. Vesey, Fort Wayne, Ind. In Mrs. Vesey's death the Ladies' Society lost one of its best workers and the florists of the country one of their best friends.

THE TRADE PRESS.

The trade papers have continued to give the society their cordial support. The thanks of the society is also due them for the complimentary copies sent for use in the office of the secretary.

AID OF THE SOCIETY.

It should be borne in mind that the S. A. F. is for the good of its members and that the secretary is its

LILIUM ELEGANS WALLACEI AMONGST AZALEAS

chief clerk. Information regarding express troubles, questions regarding rates, legislation, etc., if sent to the secretary will be placed in the hands of the proper committees for action. Such data as this will give a firmer working basis in their investigations. The society can best help you when your wants are made known. The secretary will always be ready to give all the aid possible or else refer your troubles to others who may be of help to you. In closing I wish to tender my heartfelt thanks to those friends who have given me so freely of their time and assistance and who by their advice have helped make my work both easier and better.

Treasurer Kasting's Report.

The following figures are from Treasurer Wm. F. Kasting's report presented by him at the meeting:

GENERAL FUND.

The balance in hand, August 10, 1910, was \$4,850.50, the receipts from February 2, 1910, to August 2, 1910, being \$6,171.89, the disbursements \$1,321.39. These funds are invested in various banks and bonds specifically announced in the report.

LIFE MEMBERSHIP FUND.

The receipts from February 1, 1910, to July 6, 1910, are \$8,313.50, making a grand total of the two funds of \$13,164.

Wednesday Evening's Proceedings.

The convention met, pursuant to adjournment, at 8 p. m., President Pierson in the chair, who announced that owing to the illness of John Dunbar, assistant superintendent of parks, Rochester, N. Y., it would be impos-

James L. Cowles, secretary-treasurer of the postal progress league of New York, addressed the convention at some length in explanation of the pending bill before congress known as the Sulzer bill. In connection with his address he presented resolutions, which were offered by Mr. O'Mara, and unanimously adopted. Mr. O'Mara, in speaking to the foregoing resolutions, said that beyond any question of doubt whatsoever the railroad and express interests have, up to the present time, influenced the findings of the committee on postoffices and post roads and have thwarted the popular demand for the consolidation of the third and fourth class matter, something that has been urged upon congress for the past six or seven years by the post-office department itself.

Mr. O'Mara spoke forcibly and strongly upon the subject, and gave some inside history that very much interested the attentive audience present. After the transaction of the foregoing business of the evening, an adjournment was taken to 11 a. m. Thursday.

Thursday's Proceeding.

At the morning session the officers nominated the preceding day were duly elected. J. A. Valentine presented his report on the Retail Florists' Association, J. K. M. L. Farquhar reported on the National Flower Show. Action on the constitutional amendments was postponed and it was decided that on adjournment the society adjourn to meet in Boston, March 26, 1911.

The American Rose Society reorganized with W. H. Elliott president, succeeding Aug. T. Poehlmann. The Na-

The Trade Exhibitors.

The Advance Co., Richmond, Ind., ventilating apparatus.
American Blower Co., Detroit, Mich., steam traps.

H. J. Smith, Hinsdale, Mass., cut ferns.

E. E. Stewart, Rives Junction, Mich., cut gladioli.

Storrs & Harrison Co., Painesville, O., nursery stock, palms and ferns.

Stumpp & Walter Co., New York, general line of garden implements and bulbs.

Syracuse Pottery Co., Syracuse, N. Y., pots.

Jos. Faudt, Canajoharie, N. Y., variegated sweet alyssum.

Taylor Steam Trap Co., Battle Creek Mich., steam traps.

M. S. Radiator Corp., Dunkirk, N. Y., steam and hot water boilers.

B. Hammond Tracy, Wenham, Mass., cut flower exhibit.

Vaughan's Seed Store, Chicago, bulbs.

James Vick's Sons, Rochester, N. Y., cut annuals from trial grounds, also aster exhibit.

Vick & Hill Co., Rochester, N. Y., early asters.

W. Waits, Newburgh, N. Y., interlocking steel benches.

Wertheimer Bros., New York, ribbons, chiffon and tassels.

Wilson-Hoyt Co., New York, patent steel moulds for concrete benches.

Report of the Judges.

Kroeschell Bros. Co., Chicago, Kroeschell threaded tube piping system, highly commended; Kroeschell generator, 1910 model, highly commended; Kroeschell shaking and dumping grate, certificate of merit.

Wilson Hoyt Co., New York, steel mould for concrete greenhouse benches, certificate of merit.

Lion & Co., New York, matched bridal scarfs, invisible velvet violet shield, highly commended.

Robert Craig Co., Philadelphia, Pa., Croton Mrs. Duncan Macaw, highly commended; C. Mrs. W. P. Craig, highly commended; C. Soleil D'Or, highly commended; C. Edwin Lonsdale, certificate of merit; C. Paul S. Randolph, certificate of merit. Collection of 85 crotons, certificate of merit.

Non-Breakable Flower Vase Co., Washington, D. C., non-breakable flower vases, honorable mention.

The judges were: Charles H. Totty, E. Allen Peirce, and W. W. Coles.

IN THE WAKE OF THE CONVENTION SPECIAL
FROM N. Y.

ALONG THE ROUTE OF THE NEW YORK TO ROCHESTER SPECIAL.

Rice & Co., Philadelphia, Pa., spun glass butterflies, muslin butterflies, silver corsage ribbons, embossed moire crepe paper corkwood, twig baskets, honorable mention.

Schloss Bros., New York, shower effects, gauze ribbons, fancy ribbon chenille and silk cords bouquet holder, highly commended.

Conard & Jones Co., West Grove, Pa., self-watering flower boxes, honorable mention.

King Construction Co., North Tonawanda, N. Y., iron frame boiler house, certificate of merit.

Henry Eichholz, Waynesboro, Pa., Carnation Christmas Cheer, honorable mention and highly commended as pot plant.

George Giatras, West Hoboken, Nephrolepis Giatrasii, honorable mention.

Kessler Bros., New York, Nephrolepis Dreyeri, honorable mention.

W. A. Manda, South Orange, Polypodium Mandaianum, certificate of merit; Asparagus elongatus, honorable mention; Dracena Rothiana, highly commended.

T. M. Miller, Janesville, N. Y., geranium (seedling), certificate of merit.

F. R. Pierson Co., Tarrytown, N. Y., Nephrolepis Mossii, a very distinct variety, certificate of merit.

Joseph Traudt, Canajoharie, N. Y., sweet alyssum (variegated), honorable mention.

H. W. Koerner, Milwaukee, Wis., Gladiolus new giant flowering hybrids, other seedlings un-named, honorable mention.

National Clock & Electric Mfg. Co., St. Louis, Mo., thermostatic instruments, highly commended.

Champion Stemmer & Supply Co., Chatham, N. J., galax and small flower stemmer, highly commended.

State Vice-Presidents' Reports.

MARYLAND.

We are glad to note that building activity continues and improvements in every way, all along this line, seem to be the order of the day, many old places being torn down to make way for modern constructions. Business has been a little above the average. Easter trade was far in advance of other seasons. Spring trade was good, all good stock being well cleaned up. The seedsmen report an excellent spring trade. The great suburban development has created an extensive demand for all kinds of bedding and nursery stock. The Florists' Exchange, owned and controlled by growers, has been very successful in advantageously disposing of all stock, both cut flowers and plants, in a very satisfactory manner.

Maryland is coming to the front as a great apple center; a large capital is being invested and thousands of acres planted on the mountain sides in the western part of the state, where the finest that can be produced anywhere are being grown.

The State Horticultural Society has held two very notable meetings, the one held last December being a complete success. The exhibition was a revelation in regard to the state resources in the fruit line and created great enthusiasm among the members. The summer meeting just held is conceded to have been the most successful ever held in the history of the association.

The Gardeners' and Florists' Club has been wide awake. The meetings have been full of interest and well attended. The membership has greatly

increased; several special meetings have been held at which prominent speakers lectured on interesting subjects. The club being firm in the belief of unity of effort, of kindred association looking to the betterment of every horticultural interest, is affiliated with the Farmers' League and the Maryland Horticulture Society. The legislative committee has been on the alert watching legislation, seeing if anything could be done in the interest of the horticulturist and that no adverse laws should be passed. They have urged liberal appropriation for the purpose of advancing all horticultural interests. They have also urged on the representatives in congress to use their utmost influence in securing a parcel post enactment.

R. A. VINCENT.

LOUISIANA.

Ornamental horticulture, nursery and florist business has been increasing more and more every year, even the financial crisis a few years ago had no effect on its progress and prosperity, and I believe the business of 1910 will be a record breaker. The artistic appearance of our stores was never excelled in the elaborate displays of choice cut flowers, blooming plants, etc. Several years ago it was considered extravagant and a waste to make such displays; but it can easily be seen from this that there must be an increase in the demand.

The growing of cut flowers under glass has come to stay, and is no more an experiment. While our winters are not severe, still we have to be prepared for any and all emergencies, especially for heating, as the weather changes very suddenly at times. It is a well known fact that plants grow much quicker here, and flowers during the winter season are a better color, are more fragrant and have longer stems than imported stock, and are preferred by customers on account of their freshness and odor. Carnations have not been given a fair trial; on account of their cheapness nobody seems to care to trouble with them, but I believe if given the right trial they and many other plants not now grown, can be grown in this climate providing the same attention is given them as elsewhere.

Cut flowers of the highest grade are now much more in demand than formerly and nothing is too good and the price no object provided the quality is there. American Beauty roses head the list so far as prices are concerned, Orchids next, then the tea roses, val-

AT THE JAPAN BRITISH EXHIBITION IN LONDON.

Portion of the Exhibit of the Yokohama Nursery Co.

ley and so on; Cape jasmines have been in better demand this year than for several years. Our busy season begins the last of October and lasts until the last of June. The demand for porch and window boxes, hanging baskets, vases, box and bay trees is increasing yearly. Well grown blooming plants are also in better demand than before.

Since the organization of the Tree Society last year, which has full control of all trees and shrubs on our boulevards, avenues and sidewalks in New Orleans, a proper system has been established for the regular planting and taking care of them. They have established a nursery, where they have set out thousands of seedling trees and shrubs, to be planted out later on the city streets. Our parks, especially City and Audubon parks, are growing more beautiful every year and now rank among the finest of their kind. Our playgrounds, public squares, boulevards, avenues and streets are growing more beautiful every year. Our country club, golf links and the cemeteries are all falling in line.

Considerable greenhouse building has been done during the last few years, of the improved styles, modern material, large glass, cement walls, and the best quality cypress bars; giving more light and growing better stock. The truck gardeners are also building large improved houses, mostly

devoted to cucumber forcing, which are shipped to northern markets. These were formerly grown in hotbeds, now, one of the largest ranges of glass around New Orleans are cucumber houses.

I take pleasure on behalf of the mayor of New Orleans, Progressive Union and the New Orleans Horticultural Society, to extend to you a most cordial invitation to hold your convention in our winter and summer capital and convention city of the south in 1915 when we expect to have the great Panama exposition. This may seem a little premature, but I want to give you ample time for consideration as you all may think you will find a hot south in August, but instead you will find one of the coolest and healthiest cities in the United States fanned by the breezes of Lake Ponchartrain and the Mississippi river.

HARRY PAPWORTH.

INDIANA.

As far as I can learn from the florists of our state business has been the best in its history. In all quarters an optimistic view is taken of our business in general. However, the increase in greenhouses is less than in former years, largely due, no doubt, to the high price of glass.

The carnation is more in demand than any other cut flower, although more roses than usual have been used during the past season. The principal call is for pink and white. American Beauty and Richmond comprise perhaps 20 per cent. of the total sales. Nearly every one who grows roses is growing Killarney and discarding Bridesmaid, while most of them continue to grow Bride. I would judge that 80 per cent. of the carnations grown could be included in the following six varieties: Enchantress, White Enchantress, Rose Pink Enchantress, White Perfection, Beacon and Victory. There is a growing demand for Afterglow which seems to be taking the place of Lawson. The tendency of the retail demand is for a better grade of both cut flowers and plants, for which the people are willing to pay a fair price. Hardy flowering shrubs and herbaceous plants are selling in increased numbers and I would recommend that all retail florists push this department.

The State Florists' Association, organized nearly a quarter of a century ago, will give a chrysanthemum show at Tomlinson hall, Indianapolis, November 8-12. We hope that our brother florists from other states will visit us and make exhibits. A new association has been formed and was incorporated July 20, 1910, as the Northern Indiana Florists' Association. Its

membership consists mostly of florists from about 10 counties in the northern part of the state. I think this society acted wisely in making the dues only \$1 per year. The membership is likely to be much larger at this nominal figure, and the larger the membership the more good a society can accomplish.

We have every reason to be proud of our state because it has given the trade more good new roses and carnations than any other state or, it may be safe to say, any other two states. It has also produced many good standard chrysanthemums, and no better American Beauties are grown anywhere than in Indiana.

W. W. COLES.

Convention Notes.

One of the largest, if not the largest, delegations that ever attended a convention of the S. A. F. left Boston on the 10 o'clock train Monday, August 15. The party numbered nearly 50 and all were full of enthusiasm when the train drew out of the station. The party received a few additions at Springfield and the ride over the Berkshire hills in the early afternoon was enjoyed by everyone. The dinner was a little late for some, for there were seven Pullmans in the train, and with one dining car some had to wait long after their usual dinner hour. The ride through the Mohawk valley, which was pronounced by the Rev. Henry Ward Beecher as "the most beautiful valley in the world," was very enjoyable and thoroughly appreciated.

Nothing happened to mar the happiness of all until the train arrived at Syracuse. Here some of the party, remembering the tedious wait they had had at dinner, ascertaining that the train would make a stop of 10 minutes, disembarked and went into the depot restaurant to eat a hurried lunch. They were gone less than 10 minutes and upon coming out of the station found the train had gone and left them. Fortunately another train was due in less than five minutes, and after explaining the matter to the conductor, boarded the train and reached Rochester but 10 minutes behind the party. The only anxiety was in regard to their baggage, which the rest of the party looked out for, and the quarters which they had in the regular smoker were not quite as comfortable as the special Pullman.

Chester I. Campbell, who will superintend the National Flower Show to be held at Boston March 27, 1911, very soon ingratiated himself into the good graces of all. It looks as if the committee had made a 10-stroke in securing his services and his assistant, W.

P. Edgar, always had a joke to crack; those that came within reach of his wit were sure to feel the sting.

The "We are seven" of the Boston party, who got left at Syracuse, were the butt of many a joker when they showed up at the hotel, but they all said they had had a jolly good time trailing and none of them could be induced to say who was to blame or what the escapade had cost them.

The young men in charge of the florists' supplies exhibits were all hard workers, always on the job at the exhibition during the day and staying up around the hotels until the "wee sma' hours" if there was an order on deck or a prospective customer in sight.

Some of the stand-bys at the last conventions show that the years are beginning to show, but ex-President W. R. Smith must have surely discovered the "spring of youth," for he was just as sprightly and looked every day as young as he did 20 years ago.

C. H. Vick was a very busy man Tuesday and he and his assistants had their hands full, but he fulfilled all the demands made upon him, kept his temper throughout the hot spell, and wore a smile when the hardest knocker showed up.

The Ladies' Society of American Florists had its headquarters all ready

early Tuesday morning for the reception of members and the other ladies attending the convention and the attendance of the wives and daughters was very large.

John T. Temple, one of the few members of the society who have attended every annual meeting from the start, has not chewed gum since he saw how they made it at Omaha during the convention of 1898.

The attendance of so many of the ex-presidents was one of the early good signs, for the presence of so many old pilots is sure to keep the good old ship on the proper course.

The building in which the convention was held proved to be all that was desired, centrally located, near to the headquarters and large enough to accommodate everything.

The Boston and New York parties arrived at very nearly the same hour Monday evening and the bell boys at the Seneca will remember the rush for many days.

The grand display of gladioli was an eye-opener to many of the older florists and was a great attraction to both the trade and people of Rochester.

The trolley rides to the parks and the lake were great attractions after the heat of the day and were taken advantage of by many of the visitors.

John Evans, in spite of the mustache turning from black to white, was just as much one of the boys as ever. Long may he continue.

It was sizzling hot weather, but everybody was having a good time.

(FOR VISITORS AND BOWLING SCORES SEE PAGE 186.)

THE illustrations herewith give a very good idea of the class of exhibits put up by the Yokohama Nursery Co. at the Japan-British exhibition in London. The tea house is also used as an office by the firm. These artistic houses are already much used in British gardens and they will probably be used in the United States in the near future. The dwarf trees are no longer a novelty but the collection maintained by this company is very complete and varied and it intends keeping its exhibits in a fresh and interesting condition by replacing them at frequent intervals during the course of the exhibition. The company cordially invites all American visitors to the exhibition to inspect its horticultural novelties, which they will find of great interest.

Ladies' Society of American Florists.

The Ladies' Society of American Florists held the most successful meeting in its history at the Seneca hotel, Rochester, N. Y., August 17. There was an unusually large attendance and 32 new members were added to the role of membership, making a total of 242. The society appropriated \$50 for a vase to be offered for the best table decoration at the National Flower Show. The following officers were elected for the ensuing year: Mrs. John B. Phillips, Brooklyn, N. Y., president; Mrs. Julius Roehrs, Rutherford, N. J., first vice-president; Miss Margaret Vesey, Fort Wayne, Ind., second vice-president; Mrs. Albert H. Herr, Lancaster, Pa., treasurer; Mrs. John Maynard, Detroit, Mich., secretary.

The Gladiolus Society's Show.

The first annual exhibition of the American Gladiolus Society was a marked success for an initial venture and the interest shown gave promise of a bright future for this young and energetic society. The following is the list of awards given:

Vaughan's Seed Store silver medal for best 25 spikes of Mrs. Francis King.—B. Hammond Tracey, Wenham, Mass.

Peter Henderson & Co.'s prize of \$10 in gold for best 12 varieties not in commerce, three spikes of each.—W. H. Koerner, Milwaukee, Wis.

W. W. Rawson & Co.'s silver medal for best collection of 25 varieties, three spikes of each.—Arthur Cowee, Berlin, N. Y.

Silver medal for basket filled with Gladiolus America.—B. Hammond Tracey.

Silver medal for the best American seedling never before exhibited nor yet disseminated.—Vaughan's Seed Store, Chicago.

Bronze medal for 10 spikes of scarlet gladioli.—Arthur Cowee.

Silver medal for 10 spikes of the purest white gladiolus.—Vaughan's Seed Store.

A. L. Miller's prize of \$5 for the best display of pink and white varieties, three spikes of at least six sorts.—Arthur Cowee.

E. H. Cushman's prize of \$5 for best and \$3 second best vase of 25 whites.—Arthur Cowee, first; B. Hammond Tracey, second.

A. T. Boddington's prize of \$5 for best vase of any named yellow variety.—E. E. Stewart, Rives Junction, Mich.

Geo. B. Hart's silver cup for the exhibit containing the largest number of standard named varieties.—John Lewis Childs, Floral Park, N. Y.

Montague Chamberlain's silver cup for best six named varieties, one spike each, exhibited by an amateur.—B. F. White, Terryville, Conn.

Agave Americana.

The illustration herewith shows a flowering plant of Agave Americana, or century plant, as it is popularly called, at Lincoln park, Chicago. In the last few weeks visitors to the park have been anxiously watching its development and it has caused a great deal of interest. Although naturally people look to this as a crowning feature of cultural skill, a cultivator who has fine specimens of this agave does not usually feel elated when they show signs of bloom, as this means the end of the life of the plant.

DANVILLE, ILL.—John Willius has filed a petition in bankruptcy.

TRENTON, N. J.—The store of Martin C. Ribsam, completely remodeled and elaborately decorated, after the fire which took place there March 30, was opened July 30. The interior is handsomely finished and a fine show icebox in mission style has been installed.

SAN DIEGO, CALIF.—A special committee was recently appointed by the San Diego Floral Association to confer with the park commissioners about extensive improvements to the public park system. A name is to be evolved to suit the exigencies of this locality.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Gates Ajar.

SEE SUPPLEMENT WITH THIS ISSUE.

Few designs allow for so many different methods of treatment as the gates ajar. There is a great variety in the method of treatment, the shape of the wire design itself varies considerably, from the simple shape of the pillars, gates and base to others with various ornaments. The gates ajar has, to some extent, to be formal for unless the form is outlined in some way the whole thing loses its significance and character and becomes a jumble of

Agave Americana Flowering at Lincoln Park, Chicago.

flowers, beautiful perhaps but meaning nothing. But, on the other hand, there is no need to run to the other extreme and tie the flowers in closely and stiffly so that they lose their individuality. The thing to do is to suggest the outline rather than to describe it with geometrical precision and to let the various parts merge one into the other rather than have the dividing line sharply defined.

For instance where the pillars of the gates joins the base in a large design, a few cypress or large croton leaves, a small, shapely coccus or anything similar is pretty and effective and will break the lines, so to speak. A few sprays of adiantum or whatever green is used should run out from this over the pathway, which is usually done solid in flowers of some kind. To carry out the idea strictly we like to see the pathway of flowers clear in the center, leading to the partly open gate, and do not care to put flowers there that stand higher in the center. But we have seen designs with two colored

flowers at the base sharply defining the path and this is not in good taste or artistic in any way. A broad mass of white carnations, if colored flowers are used above, or of violets if the rest of the design is white should be unbroken except, as noted, when a few sprays of flowers or fern are allowed to escape from the flowers and foliage at the base of the pillars. As to the flowers to be used in the design itself there is no need to mention them specifically as they will vary according to the season and the price to be paid for the design.

Store Wisdom.

"Well, business is business, and I must get a move on," said the drummer as he began to pack up his samples, "Sure you don't want any cypress leaves; better let me send you another 100 assorted?" "No, I have enough." "No wheat sheaves?" "No, got enough now for the mice; I can't keep them out of the box somehow."

"Yes, business is business, but I think this retail end of it is the most slavish trade a man can get into, from early in the morning until late at night. Nothing in it; so much opposition and the street men getting as thick as flies and selling flowers for less than I can buy them, and then the department stores with their cut prices. I tell you things are not what they used to be." "That's so," said the traveling man. "Business is done differently now from what it used to be. Well, so long, see you again in November."

Things are not what they used to be, but men like our store friend who, while they are compelled to see a difference plod along in the same old way that prevailed years ago, working hard without results, without being able to see that it is not modern business methods, themselves stand in the way of their own success. There is one great essential without which no business can be successfully carried on, and that is enthusiasm. The proprietor must be full of it all the time, in fact boiling over. For his class of trade he stocks up with the best he can find, his place of business always has a live, up-to-date appearance, there are no old dusty baskets on the shelves, no faded yellow-leaved or plants out of flower standing about. He couldn't get enthusiastic about things so passe as these and so nothing of the kind is seen. The store windows are always bright, attractively decorated with plants and flowers of the season. The man who does this is enthusiastic about his work, he no sooner has one window finished than he begins to plan for another to succeed it and, if possible, attract more attention. He got his enthusiasm from the boss, urged to do the best he could, he did even better; what was work before was turned to pleasure, which lasted all day, for as the groups of admirers gathered and passed on and an occasional word of praise reached his ears, he felt more than satisfied.

It was the same with the other employees, they caught the spirit, they could not help it, they made their sales in that confident way that impresses customers and convinces them that they are doing the best they can. As to the department stores and their bargains, the street men with their

GATES AJAR.

LUTHER BURBANK'S OLD HOME—NOW USED AS ADMINISTRATION BUILDING.

cheap flowers, such competition does not bother them; they may hear of it, but the superiority of their store and its stock they make so convincing that their cheaper competitors are forgotten. If a man is not enthusiastic about his store, or the stock, or the business, there is a cause for it. As the advertisement says, "There's a reason," which it is worth going to a lot of trouble to find out. Let him figure out in his own mind an ideal store, how it ought to look; the windows, the counters, the cases, the floor, the refrigerator, what stock should be on sale at that particular season, how it should be arranged, what amount of a force such a store will require, which of the men he knows would be placed in charge of the counter and who would be the decorator and the other assistants he would like. When this and other details are fixed in his mind let him take a walk down the street and coming up the other side take a look at his store as a stranger, see if the front is anything like his ideal, are the windows right? Would he, if he wanted flowers be induced from the display to go in, or say I want something better than these. I will try further up the street?

Step inside and glance around; are things inviting, are there objects in plain sight that he did not find in his "Ideal" store? Is the stock in the case all fresh and nicely arranged? How do the shelves and counters look, etc.? The chances are that as a

stranger he will find the situation very different from his "Ideal" establishment and the many things necessary to be done at once, very apparent. His pride asserts itself, he sets to work to get somewhere near the "Ideal." Everybody is soon busy and the store takes on a changed appearance that is very noticeable, it has a bright, attractive look, the stock is better arranged, it looks more, the customers as they come in are cheerfully received, it is no longer work to wait on them. A gentleman calls for violets. "Here are some of the finest violets we have had this season," is said in a confident manner, and this new two-toned ribbon and fancy pin make a perfect finish. The customer that complains of the price, and says that Brown down the street sells as good for less, is not told "Well, that's the place to get them." Instead they are soon made to realize that the flowers here are the very best in the market at the price and leave their order.

All this freshening up, this added impetus to the business, this enthusiastic spirit is brought about with but little if any money outlay. Just an opening of the eyes to the situation, a look within from outside. As Burns says: "Ah wad some power the Giftie gie us to see oursel as ithers see us." We criticize others and do not see the faults in ourselves. "The times are changed, there are too many in the trade, flowers are too plentiful"

and other reasons are conjured up to account for poor business while others not far away are forging ahead solely on account of their up-to-date methods which meet the changed conditions and because they have faith in what they are doing and carry this enthusiastic spirit into all their undertakings.

K.

Twenty Years Ago.

AUGUST, 1890.

The sixth annual convention of the Society of American Florists was held at Boston, August 19-22. The officers for that year were J. M. Jordan, St. Louis, president; M. H. Morton, Boston, vice-president; W. J. Stewart, Boston, secretary, and M. A. Hunt, Terre Haute, Ind., treasurer.

The re-establishment of the Chicago Horticultural Society, which had been in suspension since the fire of 1871, was talked of at the Chicago Florists' Club meeting.

In many Pennsylvania points the temperature was below that recorded for the same dates in the previous December.

At a reunion of the Gardeners' Club of Baltimore over 350 were present.

"Gardens laid out, kept in order and free of cats" was the sign of a New York landscape gardener.

John Thorpe and E. G. Hill were appointed S. A. F. delegates at the meeting of horticultural societies in Chicago to consider matters in connection with the world's fair.

Henry Bennett, the famous English rosarian, died August 15. An account of his life's work was given in the AMERICAN FLORIST by E. G. Hill.

Canadian Horticultural Association.**OTTAWA NEXT MEETING PLACE.**

The thirteenth annual convention of the Canadian Horticultural Society opened August 10 in the Public Library building, St. Catharines, Ont. The delegates were about 100 of the leading florists, nurserymen and seedsmen of the dominion, and many of them were accompanied by their wives.

The Dale Estate, of Brampton, had a large display of orchids, ferns and supplies of every description. R. H. Ellis, of Leamington, had an exhibit of ferns. R. L. Dunn and W. W. Walker had well arranged displays. Thomas Manton, of Toronto, who was judge this year, exhibited orchids. There were fine displays by the Connor Floral Co. of Hamilton. The Steele-Briggs Seed Co. and J. A. Simmons, Toronto; H. L. Jansen, of Berlin, and the Foster Pottery Co. showed a variety of wares.

The room was crowded when President H. E. Philpott, of Winnipeg, took the chair. Mayor McBride was introduced and delivered an address of welcome. E. J. Mepstead, of Ottawa, replied to this and returned thanks for the hearty welcome extended, from which he inferred that the association had made a mistake in not coming here before.

President Philpott, at the conclusion of his address referred to the reception of strangers, and said he would ask the executive to see to that. Secretary Hall presented his report. It referred to the last convention held in Toronto in November, the argument being that there would be a greater turnout on account of the chrysanthemum show going on at the same time; there was the same argument for non-attendance of members. He hoped there would be no more November conventions. At the last session the secretary was asked to get the opinion of the trade on the tariff question. Out of 300 forms sent out, only 30 were returned duly filled out.

The second day's proceedings at the convention of the Canadian Horticultural Association August 12, included the choice of a place of meeting for next year and the election of officers. Ottawa is the city selected, with the officers as follows for the coming year:

J. Connon, Hamilton, president. A. Wilshire, Montreal, first vice-president. R. L. Dunn, St. Catharines, second vice-president. C. Hall, Montreal, secretary. H. Simmers, Toronto, treasurer.

Executive committee H. P. Cowan, Peterboro; Walter Nuston, Dansville; H. E. Mepstead, Ottawa.

A very enjoyable tour through the district of St. Catharines, was enjoyed by the visitors as guests of the St. Catharines Horticultural society.

Floriculture in the Canadian Northwest.

Read by H. L. Patmore, Brandon, Man., before the Canadian Horticultural Society, August 11, 1910.

The object of this paper is to bring to the attention of the Canadian Horticultural Association the progress which has been made in horticulture and tree-planting since the first settlement of the northwest prairies, and to enlist your interest and support in our continued progress.

The real settlement of the Canadian west may be said to have commenced with the building of the Canadian Pacific railway in the early eighties. The first settlers (most of whom were from the eastern provinces) took with them seed, plants and fruit-trees such as they had been accustomed to grow in the older provinces, but it was soon found that the climate of the new provinces was very different from that of the old, and that many varieties of seeds, plants and trees which were grown successfully in the east

were of very little value in the west. With the limited practical knowledge available at that time, the coldness of the winter seasons was looked upon as the cause of all the difficulties, and complete discouragement in the future prospects of all lines of horticulture was the immediate result.

CLIMATIC DIFFICULTIES.

Not only was it found impossible to grow the trees and plants from other provinces with any degree of success, but even the transplanting of the native trees were with few exceptions failures. These exceptions were the wild currants and gooseberries which grew in the ravines, and which succeeded fairly well under cultivation.

Jubea Chilensis.

But most other native trees invariably died one or two years after being transplanted. Experience has since taught us that the reason of trees dying was not altogether due to the coldness of the winters, but the principal cause of failure seems to have been that after our short hot summers, we usually get dry weather in the fall season, and that this is the period at which the real injury is done to the newly transplanted tree, so that it goes into the winter unfitted to stand the severity of the climate, and if the spring season is not unusually favorable, it results in great loss.

During the period 1880 to 1900, several greenhouses and nurseries were established, but it was soon found that they were premature, and some were discontinued. But from the continued efforts and perseverance of two or three of these, much practical knowledge and some result has been gained, so that today we are able to tell you a little of the progress which has been made, and to point to the trend of horticulture in the Canadian west to a point which was considered impossible in the earlier years, and which, in the near future, will do much to make conditions of home life and general welfare more modified, and much more desirable.

FLOWERS AND VEGETABLES.

Up till the years '88-'89, potatoes were about the only vegetable grown, and flowers (especially in outside gar-

dens) were considered almost an impossibility. But about that time, with the introduction of the experimental farms at Brandon and Indian Head, and the building of greenhouses by Mr. Bull, of Winnipeg, and others, the cultivation of flowers began to be looked upon as more of a possibility; as it was found that there were many of the early flowering varieties which bloom to perfection 'neath the bright summer sky, and that with the sowing and planting of seeds in early season, so as to induce early maturity, and with the avoidance of those varieties which were too tender to endure the spring frosts, and too late in maturing to give reasonable returns before the fall season set in, a fair measure of success soon began to be obtained, until now you will find in the towns and villages, and on many of the prairie farms, flower gardens containing many of our choicest perennial and annual flowers, and including even such tender plants as dahlias, cannas, etc., all of which bloom in profusion in their respective seasons, so that it is now possible to have a continuous flower garden in the open air from early spring until late fall.

With vegetables, it has also been found that with the right early maturing varieties sown on time, and properly cared for, nearly all of those in ordinary domestic use can be well and profitably grown, until it is now becoming a question whether the west cannot develop her own canning factories and provide for herself in all lines of vegetable produce.

FRUITS.

With fruits, in the early days it was considered that it would never be possible to grow fruits such as apples, crabs or plums on the prairies. But about that time, in some of the nurseries, which were then starting, some trees were then planted which did not kill out entirely, but were left to struggle on. After a time it was found that the new growth of these trees, the wood of which was grown in the west, became acclimated, and it was then that some of the men who were interested in horticulture, such men as A. P. Stevenson, the late archbishop of Rupertsland, and others, began to see that there were possibilities, and efforts were made to obtain the hardiest known varieties and these were planted under the conditions which experience was teaching to be the best. Now the apples grown on the A. P. Stevenson orchard in Manitoba are noted as being some of the best in quality and appearance which can be produced; and not only has this result been obtained here, but all over the settled portion of the Canadian west. In every corner can be found growing successfully little groups of apples, crabapples, plums and other fruits, proving absolutely that these trees can be grown; providing the horticulturist can discover and show clearly what conditions are needful and necessary to make the growing of fruits a complete success.

TREE PLANTING.

This is one of the problems which is at the present time before us: Can we study the conditions under which these successful trees are grown? Can we find the cause of the few successes, and also the cause of the many failures, and can we point out under what conditions these can be remedied? This is what the people of the west are all asking from the nurseryman and horticulturist. In the planting of trees for shade, shelter or ornament, it was early recognized that this was one of the greatest necessities for home life on the prairie. And it has always been the earnest intention, we believe, of almost everyone that has moved into the west, to plant trees, especially with the idea of making their homes more like the homes to

which they had been accustomed in the older countries. But the attempts of the earlier settlers were so many series of failures that they had not only become discouraged themselves, but also discouraged all new comers by telling them it was absolutely useless to plant trees.

But it was soon found that with the proper preparation of the soil, and the selection of suitable varieties of trees, it was quite possible to grow them, and grow them successfully and rapidly. But the effects of the early discouragement were hard to overcome, and it is only during the last few years that the people have begun to renew their interest in the planting of trees. There is one man to whom the west will ever owe a debt of gratitude. That is the Hon. Clifford Sifton, who, as minister of the interior, inaugurated the plan of tree planting on the prairies. This is rendering possible the planting of trees where most needed, that is, not by the man who has the time and the means, but by the homesteader whose family, as well as himself, need the shelter and the associations which trees alone can afford on a prairie, which in summer is one glare of sunshine, and in winter, one vast expanse of snow.

But the tree-planting scheme which it has been possible to get into operation at the present time, is only a mere drop in the bucket of what must be done in the very near future if the dominion of Canada is going to ensure the future prosperity and progress of the western prairies. And here is one of the ways in which the Canadian Horticultural Association can assist by encouraging those in authority in further extensions which may be developed on the lines of prairie tree planting. Before leaving this subject we would also like to call your attention to the great work which is being done by the railway companies in the west in horticultural lines. The Canadian Pacific railway for some years past has been gradually establishing a department under which it is doing a vast amount of tree planting and making ornamental gardens along its lines. This is valuable work in many ways, for, while it encourages the residents along the lines of railway by showing them what can be successfully grown in trees and flowers, at the same time it is affording one of the most valuable inducements for the encouragement of settlement on the prairies. Travelers passing over the lines of the C. P. R. in the near future, seeing it a line of gardens and neatly planted groves of trees along the right-of-way, will form a very different impression

of western Canada to what they were likely to do in years gone by, when the railway trains ran past bare prairies and desolate station houses.

Up to the present, this paper has dealt only with outside horticulture. But the Canadian west is now becoming able to take care of the florist and the winter-gardener. For with the progress and the prosperity of the last few years, there is fast springing up a demand for those plants and flowers which do so much to make life a pleasure at all seasons. Where a few years ago it was scarcely possible for one greenhouse to make a livelihood in the whole of the northwest, there are today in operation many greenhouse plants in all parts. While with many of these it may still be a struggle to make ends meet, yet the florists are all working together in an effort, not only to make a success of their own individual businesses, but to promote the general comfort and progress of the people who live in our Canadian west, by seeking to interest them in the use of flowers and plants at all seasons. So that we may confidently expect that the time is not far distant when the trend of horticulture will bring us, the people of the west, to that happy condition of progress, when it will be possible for us to have among us the floral establishments like the Dales and the Dunlops of the older provinces.

How Can the Agricultural College Assist Floriculture.

Abstract of an address delivered by Prof. W. S. Blair, Macdonald College, Quebec, before the thirteenth annual convention of the Canadian Horticultural Association, August 10-11.

All florists I take it are agreed that much can be done at an agricultural college or experiment station in securing information of a definite character to assist them in the art of growing flowers. Lack of time, expenses entailed and equipment necessary are some of the reasons why effective research work cannot be conducted by the average florist. The successful grower is the one who masters details. It is through such men that we can hope to isolate various factors and determine upon which most attention should be given. Florists generally are fast finding out the suitability of plants to certain conditions, but real research to find out the reason why, is not receiving the attention it should.

In planning the greenhouse at Macdonald College the objects in mind were to give an effective training to the student by placing him in close touch with the growing in a commercial way of plants under glass; and to assist the florist and vegetable

grower by conducting experiments with the principal greenhouse crops. Limiting factors in the pursuance of the latter have been lack of space, funds and time.

Our experiments in benches indicate that the kind of bench used is not a factor likely to limit the production or quality of bloom. The openings in the side of the bench wall to give aeration to the lower bench material are, apparently, of no value. Drainage in the nature of rock or similar material does not appear to be necessary where careful watering is done. The bench soil of course in this test was kept at a uniform condition so far as moisture contents were concerned, and water was added only when in the judgment of the grower it was considered necessary.

The usual practice among Canadian growers is to bench violets after the first touch of light frost. This frost usually occurs during the latter part of September or early in October. Twenty-five plants of Princess of Wales were benched August 10, 1909, and a similar lot on September 10 and again on September 28 after a light frost. The stock was the same throughout having been started from cuttings at the same time and planted to the field in May.

Benched.	No. of flowers.	Date of first flowers.	No. of flowers to Jan. 1.
Aug. 10	1435	Sept. 25	107
Sept. 10	1732	Oct. 29	38
Sept. 28	806	Nov. 5	15

The quality of the bloom in size and substance and length of stems of the August planting could not be better. The September planting gave good blooms throughout but not so good as the August planting. The yield was heavier however. The September 28 planting produced inferior bloom until towards spring. Planting made early should be given all the air possible otherwise a strong vegetative growth is liable to develop to the detriment of bloom. It would seem, however, that the early September planting is advisable. These experiments are being continued.

The getting of fresh warm air into our greenhouses during the cold dark days of winter is another problem worth some attention. In fact, countless experiments could be suggested ranging all the way from starting the plants in the cutting bench to the marketing of the bloom, any of which would serve to throw additional light upon the various problems confronting florists, and gradually develop something definite and of practical value as a guide for them in their work.

OUTING OF THE PACIFIC COAST HORTICULTURAL SOCIETY AT CAMP TAYLOR, JULY 24. See Page 230.

Plants vs. Cut Flowers.

A paper read by Geo. A. Robinson, Montreal, Que., at the thirteenth annual convention of the Canadian Horticultural Association, August 10-11.

The subject of this debate, namely: "Plants vs. Cut Flowers" for the holiday trade is an open question and one which every florist has to answer for himself, but comparing the florist holiday business today and 20 years ago, I have no hesitation in saying that plants have had a great deal more than cut flowers to do with the revolutionizing of the florists' business at these particular seasons. As far back as my connection with the trade goes, flowering plants have been in favor but never as much as at the present time. And can it be wondered at?

I need not go into history but just mention the facts as they exist at the present time. In all up-to-date floral establishments a week or so before Christmas or Easter the florist begins to fill up his store with flowering plants, arranging the windows with some especially well grown specimens, the colors harmoniously blended and artistically displayed. This arrangement will appeal to the public taste and arouse more interest than the best arranged window of cut flowers, lily ponds, old mills or any other of the florists' creations. The finest vase of cut flowers can never compare with a growing plant. What is more beautiful than a well grown cyclamen with its luxurious foliage and butterfly like flowers? A plant of Begonia Gloire de Lorraine is a thing of beauty impossible to duplicate in cut flowers.

Then the combinations possible by these growing plants have made baskets and hampers the popular articles there today. Not only combinations of plants but baskets filled with one variety only are much better sellers than the same flowers in a cut state. Take for instance a basket or pot of tulips growing and the same number of cut tulips and see which sells the best—or compare a basket made up of Easter lilies or a well grown lily plant with a case of cut lilies and note the difference. There are endless ways in which plants can be used in receptacles without losing their individuality or marring their beauty in any way; but it is not my intention to mention them at this time, only to show the importance of plants at holiday seasons. A great point in favor of the plant over cut flowers is the large variety which a customer has to choose from instead of the everlasting roses and carnations. We have for Christmas all shapes and sizes of plants in all different prices to suit all customers, large or small.

The most important flowering plants for Christmas are azaleas, cyclamens, Begonia Gloire de Lorraine and similar forms, poinsettias, primulas, (obconica and Sinensis), Begonia incarnata, solanums and ardisias for berried plants. At Easter the lily takes precedence over all other plants—then spiraea, azaleas, lilacs, rhododendrons, roses (hybrids and ramblers), flowering shrubs, bulbous stock and lots of odds and ends which go to make up an interesting and profitable display. Apart from these, foliage plants are always in great demand at these seasons. The Boston fern and its forms are the most popular while Adiantum Farleyense, fern dishes, rubber plants, araucarias, dracenas in variety and aspidistras are all sold in large quantities at the holidays.

Another point in favor of the plants over the cut flowers is their freshness. How often do we hear complaints of cut flowers going to sleep through being kept too long, but very rarely do we get the same complaints about plants. A plant grower times his stock so well that there is no ground for a kick. He knows—or should know—just

exactly how long a plant will take at a given temperature to come into bloom, and, after being hardened off, these plants are able to stand any ordinary house treatment long after cut flowers are in the ashbarrel—thus giving far more satisfaction to the purchaser or the recipient as the case may be. This, I think, is the greatest factor in making the holiday trade a plant trade. I have never yet seen a holiday when good plants were a drug but I have often seen them a scarce commodity.

The price of plants compared with the price of cut flowers at holiday times is another factor in popularizing the plants at these seasons. The demand at these times is naturally greater than at ordinary times, while the supply of cut flowers is practically the same as at any other time of the year. This state of affairs is a great temptation to the wholesaler to raise the prices, sometimes beyond reason. The retailer has to do a lot of explaining, especially to regular customers as to the reason why the price of cut flowers is double and sometimes treble the price they were the week previous. Some customers believe him, others go away without buying, thinking it is a holdup. New customers especially often get so disgusted with the prices asked that they never come back again and the consequence is the retailer will push the sale of plants rather than cut flowers. He can show samples and fill all orders with good stock instead of risking the rise in prices and the doubtful quality of cut flowers so often supplied at these times. The price of plants does not fluctuate at all and the flower buying public get to know this and buy accordingly.

As to the future of plants for holiday seasons, all I can say is that I firmly believe that the popularity of plants will increase every year, more so than they have in the past. The satisfaction they give to the purchaser, their moderate price and the certainty of the supply are bound to tell and I would strongly advise growers to be alive to this branch of their business.

THE earnest and thorough work of the late E. V. Hallock and President Pierson of the Society of American Florists at New York, Albany and elsewhere in the interests of school gardening, has borne fruit, the New York board of education having recently approved of a scheme to provide the city children with ground, seeds and tools to be used in their garden operations.

EASTER next year will fall on April 16, almost three weeks later than Easter of 1910.

ALPHA ELBERFIELD, of the Alpha Floral Co., Kansas City, Mo., has applied for a patent on a reservoir arrangement, holding water, designed as a jardiniere, to prevent drying out of plants when left in the dwelling house or elsewhere for a long time without water.

We have received from Perry's Hardy Plant Farms, Enfield, Eng., a block of water lily manure, which is made specially for the use of those engaged in the culture of aquatics. The blocks simply have to be sunk near the water lily plant, when they dissolve close to the root and fertilize it, a simple and effective way of supplying food to these somewhat gross feeding plants.

Refrigeration Congress.

THE AMERICAN FLORIST is in receipt of prospectus giving details of the second international congress of refrigeration to be held October 9 to 12, inclusive, 1910, at Vienna, Austria. This pamphlet is embellished with several views of Vienna and adjacent points of interest. Among other matters that will be considered at the Vienna congress will be the preservation of perishable plants, flowers, fruits, vegetables, etc. America, through a joint resolution authorizing President Taft to invite the International Congress of Refrigeration to hold its succeeding meeting in this country, is likely to be the next place where the third international congress of refrigeration will be held. Sufficient interest must be manifested, however, by interested parties to assure selection of this country for that purpose.

The Sweet Pea Show.

ED. AMERICAN FLORIST:—

I read with much interest W. T. Hutchins' "Impressions of the Sweet Pea Show" in your issue of August 6 and am quite at one with him in much that he says, but in weather such as we were—and had been—experiencing, it was impossible and absurd to expect better flowers than the best of those exhibited on that occasion. With the temperature hovering around 90° in the shade, even the giant flowered Spencers will lose much of their waveness and size. It is not that there is aught amiss with the strain—simply "weather conditions." I have seen the same results follow a hot, dry spell succeeding a cool, damp period—in England and Scotland.

Had Mr. Hutchins been privileged to see the Fordhook sweet pea trials this season, he would, I am sure, have agreed that the flowers came pretty near perfection, and almost, if not quite, up to the English exhibition standard. The "original work" to which he refers was also much in evidence here—scores of selections, results of first and second generation crosses—hundreds of this year's crosses, etc. Should Mr. Hutchins have time and opportunity to visit this part of the Atlantic states any time during June he will find the Fordhook sweet pea trials as interesting and fascinating as any sweet pea enthusiast could desire.

I presume that the illustration on page 55, labeled E. J. Dale, is really

meant for E. J. Deal and it might not be out of place to point out to your readers that this variety is synonymous with Dainty Spencer, other names for it being Elsie Herbert, Distinction, Holdfast Beauty, Winifred Deal and Picotee. The variety illustrated on page 54 and named Helen Scott ought to read Janet Scott.

G. W. KERR.

American Rose Society.

ROSES REGISTERED.

CROMWELL, CONN., June 25, 1910.

We wish to register the roses described as follows: Dark Pink Killarney, a sport of Killarney originating with the Montrose Greenhouses, Montrose, Mass., and acquired by A. N. Pierson, Inc., by purchase. It is a sport of Killarney identical with the parent in habit and size of bloom. The color however, is much darker than Killarney at all times of the year. This rose will be disseminated in 1911.

We wish also to register Rose Lady Cromwell, a sport of My Maryland originating with A. N. Pierson, Inc., in 1908. This rose in every way resembles My Maryland except in color. It is a shell pink outside, shading deeper towards the center, which is a creamy yellow, and sometimes quite a deep yellow. During the hot weather, however, the yellow center disappears, and the rose looks very much the color of an Enchantress carnation. It is very fragrant. This rose will not be disseminated until the spring of 1912.

A. N. PIERSON, Inc.

To Benjamin Hammond, Sec'y.

Coming Exhibitions.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, First Regiment Armory, Michigan avenue and Sixteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Roses and
Carnations
A Specialty.....

WHOLESALE
GROWER of

CUT FLOWERS

Sam Pearce, 2137 Clybourn avenue, is busy planting, the chrysanthemums are already in, poinsettias being put in and ferns being potted. There are 25,000 of the latter, both large and small, mostly all being Bostons. The chrysanthemums and asters are used for retail purposes. Mr. Pearce does mostly forcing and cuts lilies at all times of the year. One bench of 2,400 Giganteum of excellent quality are about ready for cutting. The smoke from the railroad darkens the glass to a considerable extent and at present the men are busy scrubbing the glass on both the inside and outside. A few new benches have been put in the houses and the usual summer repairs have been made. Mr. Pearce has 16 houses in all, five men are employed at present and the force is increased in the winter when their busy season is on. Alex Males returned from his vacation, which was spent in Michigan. Mr. Pearce has been in business here for 23 years, he having removed to Chicago from Philadelphia in 1883.

Still another huge addition, this time of 13 houses, each 27x450 feet, is to be made at once to the A plant of the Poehlmann Bros. Co., Morton Grove. Besides this a new brick storage building 60x150 feet, is being erected. The stock in all departments is looking well and remarkably good Beauties are being sent to the store. Already some 150,000 field carnations have been planted on the benches and planting is going on at full swing. August and Adolph Poehlmann, with their wives and children, left for Rochester on the special convention train at 5:30 p. m. on Monday. Business is very brisk at the wholesale store and the stock of all kinds is in first-class order.

At J. A. Budlong's the stock is remarkably fine this week. We particularly noticed the quality of the Beauties and My Maryland roses, also some white outdoor asters that are certainly the best we have seen. The stems are 30 inches and over in length, the flowers large and of exceptional purity. They are as good as early white chrysanthemums. Some of the Trego varieties were also noted and some Kaiserin roses of really magnificent quality and substance.

At the store of Peter Reinberg business is keeping up remarkably well

and last Monday was an exceptionally busy day. Good stock in all varieties continues to arrive, the roses a little short in the stem as yet but of fine color and substance. Miss Corbett has gone for a week's vacation but Tim Matchen is still on hand and wondering when he will be able to get away for his. The store is being cleaned and repainted.

Vaughan & Sperry are receiving the first of the new crop of Beauties from their Indiana growers, who sent them such elegant stock all through the winter and spring season. The flowers are short and medium in stem as yet, but the flowers and foliage are superb and doubtless the longer stemmed flowers will soon be along. White Killarney, too, is coming in great shape. Fred Sperry returned from his vacation August 18.

J. Paulus, 4501 N. Clark street, is about through planting. A few poinsettias remain to be put in the houses. Mr. Paulus and wife spent August 11 at Joliet. George is spending his vacation in northern Wisconsin. Arthur will spend his vacation at the Dells and will leave as soon as his brother returns. The auto is used almost daily for trips to the market.

The flower garden in front of the Chas. Grabig store, 1843 Irving Park boulevard, continues to attract the attention of the public who pass by. The cannas, especially King Humbert, are in excellent condition. Mr. Grabig recently purchased 25 tons of Pocahontas coal and was busy storing it away in the basement at the time of our call.

John Deamud left for his farm in Michigan on Monday evening and dropped off here for a short time on his way to the Rochester convention, going over the Michigan Central. We noticed some extra fine golden glow among the stock at the store, also elegant named varieties of gladioli such as Princeps, Mephistophele and others.

At E. H. Hunt's we noticed C. M. Dickinson back at his desk after his vacation. W. Lynch, C. Pruner and others of the staff have left for theirs, Mr. Lynch going to Michigan. We noted elegant colored and white asters here, also fine Cattleya labiata.

John Mangel has been very busy with funeral work, a large consignment of wreaths, sprays and a fine basket going to the funeral of Mrs. Fisher at Rose Hill cemetery on Monday. A wreath of fine water lilies, Lilium auratum and asters was noted in the Wabash avenue window on Monday, a very fine piece of work.

T. C. Yarnall left for Rochester on Wednesday night to join the bowlers from this city. L. H. Vaughan was already in the east and the other members of the team. Geo. Asmus, P. Olsom and James Wilson, left on the convention special on Monday.

N. J. Wieter and John Sinner are fishing at Hackley lake, Wisconsin. Gus Alles, at the Wieter store, reports everything cleaning up daily at good prices. J. Psenica, foreman at the greenhouses, is under the weather.

George Reinberg has now a fine cut of Cattleya labiata on, the flowers large and of good substance and color. His new crop of tea roses is also coming in fine shape.

Geo. Asmus was accompanied on the Rochester trip by his wife and children; Mrs. Asmus went on to the convention and the children stopped off at Buffalo to visit friends.

Harry Manheim, of the Hoerber Bros.' force, is away on his vacation in Indiana. W. Hoerber reports the young stock looking well in the new houses.

Gus Canger, 40 E. Randolph street, is enjoying a good summer business.

Visitors: Wm. F. Gude, A. Gude, Ernest Gude and A. Gude, Jr., Washington, D. C.; John Davis, Cambridge, O.; F. Walker, Louisville, Ky.; Geo. H. Blackman, Evansville, Ind.; Otto H. Cron, Monroe, Mich.; Fallrath, Springfield; C. S. Ford, Philadelphia, representing A. Herrmann, New York; Harry Balsley, of the Detroit Flower Pot Manufactory, Detroit, Mich.; C. E. Wholesale Cut Flowers

51 Wabash Ave., CHICAGO
Long Distance Phone Central 3155.

John Lang, 1948 Melrose street, is busy planting, two houses are devoted to ferns, one to chrysanthemums and three to carnations. The carnations will be put in immediately after the first rain, as the ground is too hard to handle at present. The usual summer repairing has been done. Mr. Lang has a fine stock of Boston ferns, rubber plants, Jerusalem cherries and variegated vincas. Both a wholesale and retail business is conducted here.

Chas. W. McKellar is on the waiting list for membership in the Chicago Athletic club. He and Mrs. McKellar are attending the Rochester convention.

Des Plaines, Ill.

Frank Garland has a couple of houses of fine Kaiserin and is cutting about 800 a day. We also saw here nine benches of white and pink Killarney and Rhea Reid in excellent condition. The chrysanthemums are also in first class shape, Golden Glow will soon be in flower and Bonnaffon will be in flower in September. The men are busy planting and at present are putting in carnations, three houses are devoted to these plants. Two houses of adiantum are in full swing. Mr. Garland is expecting some Paper Whites and 125,000 other bulbs will be in the latter part of September. New cement benches are taking the place of the wooden ones. Mr. Garland makes his own benches, they are portable and can be moved with little difficulty. Several moulds, for bottom pieces, side pieces and posts were seen in the workshop. Mr. Garland has 65,000 feet of glass, the houses are 41x150 feet, 19 feet to the ridges. Every-

thing is in fine condition and the houses well kept up.

The Des Plaines Floral Co. is busy planting, 19,000 carnation plants are being put in. In speaking of cement benches Messrs. Blewitt and Prickett stated that one of the advantages over the wooden benches was, that the concrete bench gave perfect drainage while the wooden ones had a tendency to swell and this obstructed the drainage. At present nine benches of Garland construction are used in the greenhouses, and have proven satisfactory. The stock is in fine condition

and little or no trouble was experienced with insects. Inspection of the carnation stock proved it to be in first-class condition, undoubtedly due to the fact that the stock was kept well watered during the dry season.

The wells of W. S. Garland, Fletcher James and Frank Garland ran dry last week and a supply was pumped from river.

New Plants in England.

Referring to the novelties exhibited at the recent Holland House show in London, the "Garden" comments as follows:

Rose Juliet.—This rose has already been fully described. The flowers are large, rather globular in shape, and very double. The outer surface of the petals is clear golden yellow and the inner bright cerise, the effect being a delightful combination of the two colors. The flowers are exceedingly fragrant. Shown by W. Paul & Son, Waltham Cross. First-class certificate.

Rose Mary Countess of Ilchester.—A hybrid tea rose of much beauty, the flowers being full, fragrant and brilliant crimson carmine in color. Award of merit.

Philadelphia.

The business of the past week was a slight improvement over that of the previous one, though there has been no increase in prices worthy of note. Orchids are rather scarce and possibly a few sold as high as 75 cents each, but as the demand is limited it is safe to state that more sold for lower figures. Very good American Beauty roses are coming in, but they move slowly. A few sell for 25 cents each, but the bulk of the stock goes for lower prices. The quality of Kaiserin roses is somewhat improved, but Killarney, Bride, and Bridesmaid are indifferent. A few of the best quality asters are now arriving. Gladioli are plentiful enough, but many are of indifferent quality. While there are a few carnations, they are not a real factor in the market. Hydrangeas and various other stocks are seen. Good lilies and lily of the valley are worthy of note.

NOTES.

A merry company left the Reading terminal at 10 a. m. August 15, bound for the Rochester convention. Prominent were the following well known members of the craft: Robert Craig and wife, John Westcott, A. Farenwald, Fred Michell, of H. F. Michell Co., Edward Reid and son, I. O. Thilow of Dreer's, Leo Niessen, Tanner, of Ratcliffe & Tanner, Richmond, Va., J. Wolff, Jr., and Theodore Shober. The bowling team was on the same train. It is composed as follows: W. Robertson, Wm. Graham, J. H. Dodds, S. J. Batchelder and Frank Adelberger. Others who took a later train were: E. J. Fancourt of the Pennock-Meehan Co., D. T. Connor and T. B. De Forest of Lord & Burnham Co., New York. W. P. Craig, manager of the Norwood range of the Robert Craig Co., and his foreman, Duncan Macaw had previously departed for Rochester to get their exhibit arranged. S. S. Pennock is not going to the convention, but his partner, Chas. Meehan, will be seen. In addition to those mentioned, a number of others, including John Burton and Jos. Heacock, are expected to reach Rochester by autos or aeroplanes.

John McIntyre is selling narcissus bulbs from the bulb farms of the Poat Bros., Highland Park, Richmond, Va. He sold these products last year and says that they gave better satisfaction than foreign grown bulbs. Mr. McIntyre is now handling a large stock of long stemmed asters.

Berger Bros. report good business during the past week. They are particularly strong on Kaiserin roses.

W. E. McKissick is now handling a fine quality of American Beauty roses.

Baltimore.

The extreme dryness and heat continues, and though there have been some showers their distribution has been very erratic. There has been relief in some districts, but the bad effects of the prolonged drought is seen very markedly in others and growing crops are damaged in many cases beyond redemption. Considering the inauspicious season and the customary flight from the city of so many of the population, business continues fairly good. One or two large funerals last week made heavy requisitions for showy flowers. The burial of Joe Gans, the fistic champion, was marked by a great crowd of people and the contribution of floral decorations by his admirers is described as something immense. The mortality lists are heavy and the daily supply of good flowers is not more than sufficient for

current calls. Asters are very inferior in quality, and their numbers are much less than the normal owing to the unsatisfactory weather conditions.

The Gardeners' Club, at its meeting August 8, determined to invite the Society of American Florists to hold its meeting of 1911 in this city. A large delegation composed of members of the club and others on the train left here on Monday morning by the B. & O. route. A special parlor car was assigned to the party and it was handsomely decorated with flowers and greenery. The Washington contingent in its own car joined the train at the station and good fellowship, hilarity and kindly association prevailed throughout the two delegations. Following is a partial list of those composing the party from this city: Isaac H. Moss and wife, Fred C. Bauer and wife, Jos. C. Boone and wife, Chas. L. Seybold and wife, S. W. Tilton and daughter, Richard Vincent, Jr., and wife, Richard A. Vincent, L. H. A. Klein and wife, Harry Lohr, John J. Perry, N. F. Flitton, John A. Nuth, Mack Richmond, Geo. Morrison, Jacob Keplinger, Geo. S. Kolb, Chris. Gregorius, Jas. Glass and wife, Harry Quirk and wife.

Miss Lilian Wright, assistant in the office of the Florists' Exchange, and who was popular with all having business therein, has resigned, the heavy pressure of the work proving too much for her health. S. B.

New York.

WORST WEEK OF THE SEASON.

Market conditions for the past week have been the worst of the season. The effect of the much needed rain of Wednesday and Thursday is already quite noticeable in the quality of outdoor stocks, but although said stocks are in much better condition than previous weeks it is next to impossible to move them at anything that resembles a price at all. Buyers are a rarity at the market, which condition, however, is not unusual at this season. And while the amount of stock which at other times would be quite salable and is now consigned to the ash barrel is considerable, this fact is probably due to the volume of stock arriving, exceeding that of other years at this season and is not to be regarded with any alarm. Roses are arriving in about the same condition as last week, small, and in many cases mildewed. Carnations are about over for the present, very few arriving and not very good at that. Gladioli are arriving in better condition but are hard to move. While fair prices can be obtained for the best asters, large quantities are sold at buyers' prices. Quantities of hydrangeas, tritomas and cosmos are now arriving, but like everything else are lacking purchasers. Some good dahlias have been noticed, but somehow they are not attracting much attention from the buyers. Orchids are getting scarcer, while lily of the valley, although not as plentiful, is, like other stock, immovable.

NOTES.

J. H. Small & Sons are taking advantage of the dull season to give their Broadway store a thorough overhauling. Enlarging the ice box, decorating the ceiling and side walls, a new marble slab at the door and new signs are some of the improvements this firm is making. In spite of the foregoing conditions, however, they still maintain their magnificent window display of aquatics which attract the passing throngs on Broadway.

John I. Misner, with Butler's, on Broadway, sustained severe bruises while touring the Catskills in his new auto last week. Rounding a curve at quite a lively clip the auto skidded, bringing up against a rock, the shock throwing him out of the auto and over an embankment; he is now able to be around as usual, although still wearing bandages on his arm.

The term "it's an ill wind that blows nobody any good" could readily be applied in the case of the several Hoboken florists, as the attempted assassination of Mayor Gaynor has brought them considerable unlooked for business delivering flowers to the hospital from his many friends and admirers.

Jas. Mallon & Sons, Brooklyn, are making extensive alterations on their Smith street store. Owing to the Bijou theatre taking part of their greenhouse away they have been compelled to build an addition on the other side, consequently they will not lose any room by the operation.

R. Gretsche announces that he has taken over the business of Ordenez Bros., West Twenty-eighth street, which will now be run under the name of R. Gretsche instead of Gretsche & Ordenez Bros.

Forster & Mansfield Co. is taking advantage of the slack period to manufacture a supply of Christmas tree stands for the coming season.

S. J. Clark, Mt. Vernon, is building a new greenhouse on the outskirts of the city and expects to have it finished by September 1.

Bonnet & Blake will attend the convention with a party. Bonnet is at present enjoying a fishing trip on the Sound.

Gilmore Clarke, of Clarke Bros., leaves Monday for a trip to the White Mountains and Maine resorts.

New York Special to Rochester.

ENROUTE.

All aboard, toot! toot! and the New York florists' convention special is off. A superbly equipped train of four cars with as jolly a lot of people as ever rode over the Lehigh Valley or any other railroad. The transportation committee has left nothing undone for the comfort of members or their friends, even to refreshments, of which there are an abundance, and the buffet car, needless to say, is being well patronized by the men folks. Business cares were left behind on entering this palace on wheels, and the genial spirit which always prevails when florists meet on an occasion of this kind is if anything more evident than ever.

Arrive at Glen Summit Springs where a bountiful dinner is waiting in the main dining room of the luxurious Glen Summit Springs hotel.

Chicken Gumbo	Consomme Printaniere	Royal
Sweet Mixed Pickles	Olives	Chow Chow
Gherkins	Pearl Onions	
Baked Weak Fish	Sauce Jenoise

Filet of Beef	Tournedos Bordelaise	
Prime Ribs of Beef	au Jus	
Philadelphia Capon	Giblet Sauce	
Mashed Potatoes	Boiled Potatoes	
Stewed Sugar Corn	Asparagus Hollandaise	
Lettuce with French Dressing		
Apple Pie	Rice Pudding	Custard Sauce
Chocolate Ice Cream	Assorted Cakes	
Roquefort Cheese	Edam Cheese	American Cheese
Saltines	Bent Water Crackers	Coffee

Situated on a knoll above the railroad tracks with its spacious verandas crowded with guests displaying an eager interest in the disembarking and embarking of the New York delegation and their guests. Wm. Warburton, the proprietor and manager, is a relative of Alex. McConnell, the Fifth avenue florist, and to whose courtesy and able management is due the fact that the sumptuous meal provided by him for the transportation committee to its guests was served without waiting or a hitch of any kind.

After dinner A. L. Miller, president of the New York Florists' Club, made a short address calling for a vote of thanks to the transportation committee for the able manner in which they had conducted affairs, which was heartily responded to by all present. P. O'Mara also took advantage of this opportunity to make a short speech,

asking for the support of members present in nominating Geo. Asmus of Chicago for president of the S. A. F. at the coming election. C. H. Totty also made a short address favoring the election of directors instead of by appointment and the appointment of secretary and treasurer instead of by election. Arriving in Rochester, 9 p. m., perhaps the only regrettable feature on this occasion is the fact that only a few New York retailers were present. The following were on the train:

Jas. Kidd, New York; C. H. Totty and wife, Madison, N. J.; L. Schmutz and wife, Brooklyn; R. E. Berry, Elizabeth, N. J.; Peter Beuerlein and wife, Elmhurst, L. I.; Jos. Manda, West Orange, N. J.; R. Buffalo.

Trade is very quiet and the supply of stock is fair. Asters are good. Everything at present is Rochester and indications are for a banner convention. The Rochester boys are ready for all comers.

Vacations are still in order. Miss Sauer of S. A. Anderson's is at the Thousand Islands. Miss Goehring is in Warren, Pa.

Good & Halliday, the new wholesale florists, are about ready for business. W. C. Buechi of Pine Hill was in Rochester last week on business.

The Buffalo bowlers are in fine shape.

Visitors: E. C. Ludwig and son, Fred Burke and W. H. Carney of J. B. Murdoch & Co., Pittsburg, Pa.; F. R. Mitman of the J. B. Heiss Co., Dayton, O.; Hugo Schroeter, Detroit, Mich. Emil Schloss, New York. BISON.

Boston.

GOOD SUMMER BUSINESS.

The conditions of the market have changed but a very little from that of a week ago. Asters are much more plentiful and of much better quality; the good ones are bringing a profitable price, but there are many that are of so poor a quality that they sell at unremunerative figures. Carnations are growing scarce; a few outdoor blooms being sent in and one or two of the growers are receiving a limited quantity from the plants benched this year, which are, of course, short stemmed as yet. Roses are about as last reported. While there are some very handsome Kaiserins being offered, pink and red are of inferior quality and these as well as the Beauties offered must be disposed of early as they open up the day after being purchased. Lilies are still of excellent quality and are quite plentiful both Longiflorum and Lancifolium. Gladioli are very plentiful and in great variety. The better grades bring good prices. Some very showy vases of tritoma (red hot poker) are seen in the show windows and some very handsome exhibits of nymphæas are shown in some of the stores. The trade is about as has been reported for the last week or two but the wholesalers all report an exceedingly good summer trade surpassing that of previous years.

NOTES.

A very sad accident happened in Robinson's new quarters on Friday. Joseph Murray, one of the errand boys was crushed and instantly killed in the elevator. He was only 15 years old and while he worked in the store on Province street seemed possessed to ride the elevator in the other building. He had been frequently warned by the members of the concern and elevator operator to leave the elevator alone but it is supposed that he took advantage of momentary absence of the operator, started the elevator and jumped aboard, his body being caught as the elevator passed the top of the door. It took more than an hour for the combined efforts of the police and firemen to remove the body.

The base-ball team from Rose Farm, Madbury, N. H., came down on Saturday to play the market boys a return game. They were entertained by the boys here and then all proceeded to Belmont, the home team being very anxious to wipe out the defeat which was administered to them last month in New Hampshire, but the Madbury boys put up too strong a game and after a hard and prolonged struggle won by the score of 3 to 2 in 10 innings. The market team were without the services of their pitcher Solar, but Walter Aylward filled the position and did very creditable work.

The principal items of interest among the trade are the comings and goings of the vacationists. Monday will see the return of many and the following departures are reported: Miss Dickie, bookkeeper at Penn's starts for Bethlehem, N. H. Miss

Monahan, bookkeeper at Stephen Quinn's, Brookline, goes to Winthrop. Benjamin Snyder of H. M. Robinson & Co., starts with his family to Contocook, N. H. W. F. Chase at Zinn's goes to Wells' Beach, Me., with his family.

A contemporary accuses your correspondent of showing his friends around town in an automobile. We would like to say that the story is fiction for we are not all given to automobile riding, in fact, have a little of the antipathy of the country farmer to the "chug wagon" and we would also add that we have found plenty to do this summer, having had very little leisure time.

The local party to the convention numbered nearly 60. Vice President Pierce had 50 names on his list the first of the week and more to hear from. They left Monday so as to arrive in Rochester Monday evening and be on hand early Tuesday morning at the opening exercises.

A letter received this week from Joe Maigolis of H. M. Robinson was posted at Florence, Italy. He has traveled in Holland, Germany and Switzerland and will now traverse France to England, whence he returns.

John Rogers, who has been doing the market work for Penn this summer had an unusual smile this week. "There's a reason," a new arrival at the house, a girl.

F. W. Robinson, formerly chauffeur for Peirce Bros., has accepted the position of chauffeur for President Taft at Beverly.

George T. Butterworth of South Framingham, is expected home the middle of the week. E. A. W.

Davenport, Ia.

Throughout the past week the cut flower trade was about as slow as it could be without coming to a complete standstill. Funeral work was about all that kept anything moving. Summer flowers never were as scarce as they are at present owing to the driest weather experienced here for over 40 years, and the few flowers that do find their way to the market are flowers in name only. Outdoor asters are small and poor. It is a month since we had any rain, the glass registering nearly 95° every day. Much of the indoor stock is of indifferent quality, although some very fair roses and asters are now coming in.

FLORISTS' CLUB MEETING.

The Tri-City Florists' Club meeting was held at the home of Ludwig Stapp of Rock Island, Ill., and found nearly every member of the society present. The club first inspected the new range of houses (which is one of the largest and most modern in every way in this part of the country) and found the crops therein in first-class shape, with an excellent crop coming on and very bright prospects for the season. The chrysanthemums and carnations have all been housed and have taken a good start, and all show the care of a master hand. The picnic committee reported all bills paid and still a few shekels in the treasury. The evening topic for discussion was "Carnations—Indoor and Outdoor Culture." A discussion followed as to the merits of some of the newer varieties. After the coal question, and some minor subjects were gone over, the club adjourned to the dining room, where a banquet was held and a social hour enjoyed over the best the land affords, and Mississippi bubbles and Havana cigars. The club accepted J. Staack's invitation to meet at his residence in Moline on the second Thursday in September.

NOTES.

J. W. Davis (of cucumber fame) is at the Davenport hospital, having contracted typhoid fever while out camping. He has been very low, but is holding his own and chances are now favorable for a speedy recovery.

Uncle John Temple is the official representative of the club at the convention of the S. A. F., and the only one to get away from business cares long enough to get that far from home.

Harry Bills has started the erection of another new house, and has just finished two others and is busy engaged housing carnations.

Wm. Knees, of Moline, is changing his heating system from steam to hot water and is installing a fine new Kroeschell boiler.

Henry Pauli is building cement benches in all his new houses and has everything in fine shape for the coming season.

Bulbs are arriving and are keeping the boys hustling putting them away. Carnation planting is about completed.

Mrs. Bahr, the mother of Fritz (Andy) Bahr, has been quite ill for the past two weeks.

Staacks of Moline are busy glazing their new range of houses at Watertown, Ill.

THE BUSINESS.

This week's market is somewhat better than last owing to a scarcity of first-class flowers. There was some good funeral work and a few weddings. Counter trade was also somewhat better. Asters are plentiful but not first-class; tuberose are coming in limited quantities. Hydrangea paniculata is in great abundance but moves slowly. The gardens are now ablaze with all kinds of flowers but there is little demand for this class of stock, though cemetery bouquets use up some of it. Lilies, lily of the valley, orchids and green goods are equal to the demand. The weather is perfect, neither temperature nor humidity too high, with cool nights.

NOTES.

John J. Johnston, of Johnston Bros., visited New York the past week and shipped home several cases of large plants to be used the coming season for decorative work. This firm has just completed remodeling its store with all new fixtures, including a very artistic refrigerator and bookkeeper's desk. Robert Johnston has returned from his vacation at the White mountains.

A representative of the Crowl Fern Co., of Millington, Mass., was in town the past week and received an order from the Abbott Decorative Co. for 10,000 yards of laurel roping for first week in September to be used in the decoration at the convention of deeper water ways.

The partnership heretofore existing between Frank G. Smith and John W. Hall, of Warwick, under the name of the Frank G. Smith Forestry Co., has been dissolved by mutual consent and Mr. Hall is continuing the business.

H. Howard Pepper, proprietor of the Melrose Rose Gardens on Elmwood avenue, has been appointed a director of the Industrial Trust Co., one of the largest banking institutions in this city.

The final meeting of the creditors of F. L. Ziegler of Newport was held recently at the office of the referee in bankruptcy. The trustee's account was allowed and the trustee discharged.

T. L. O'Connor and wife have re-

Brooklyn, N. Y.

turned home from an automobile trip through the Berkshire mountains in Massachusetts and the White mountains in New Hampshire.

Charley L. Hunt has reglazed and repainted his greenhouses. Mr. Hunt had about 1,000 broken panes of glass to replace caused by the hailstorm in July.

Robert Hunnicks, for many years gardener at the Breakers, at Newport, has resigned his position to take a position with William Maxwell at Rockville, Conn.

Frederick C. Green, superintendent of parks, attended the annual convention of the American Association of Park Superintendents at Harrisburg, Pa.

Eric Boneriet, manager for Mrs. Wm. Butcher, is making an extensive trip abroad and is visiting England, Holland and Belgium.

Arthur C. James is having a new range of greenhouses erected on his estate at Newport by the Wilson Hoyt Co., of New York.

Walter S. Sword, of Valley Falls, has just completed a new greenhouse 30x100 feet and has rebuilt all his old houses.

Joseph Kopelman has just completed retouching his store and installing a new steam boiler to heat the same.

Arthur Curtis Brown, of Newport, is building a new range of greenhouses on his estate in that city.

William H. O'Connor and family are occupying a cottage at Seaconnnet Point during the month.

Herman Dolbeck, with E. A. Chipman, of Woonsocket, is enjoying his vacation at Newport.

William Jurgens, of Newport, was in this city during the past week taking orders for his gladioli.

Samuel Resnich, with Joseph Kopleman, has gone to Block Island for a two weeks' vacation.

Ernest Johnson, with T. J. Johnston & Co., is spending his vacation at Narragansett Pier.

M. J. Leach & Sons, of Pawtucket, have just completed a new greenhouse 35x125 feet.

A. Holscher is sending in the first chrysanthemums of the season. They are Golden Glow.

Edward T. Buckingham, seedsman, of Brooklyn, N. Y., was a recent visitor to this city.

The William Grosvenor place at Newport is erecting a new range of greenhouses.

Frederick Dietz is to build an addition to his greenhouses on French street.

W. S. Pino and wife are at Quonochontang Beach for a month's vacation.

Miss Marcella M. Johnston is spending her vacation at Block Island.

J. BRINTON.

Pittsburg.

Business picked up a little the past week due to a rush of funeral work. Outside of that it would be quite dead. Stock is coming just about the same. Gladiolus America is very scarce.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

HALF or more of the Chicago crop of onion sets has been pulled and is in the crates.

THE crops of tuberoses and caladiums in the south are reported to be looking good at this time.

THE headquarters of the Kentucky Blue Grass Association, is understood to be located very near Cincinnati.

It is understood that the bulk of the shipments of Dutch bulbs will leave Rotterdam about August 13, due in New York about August 21. This means early shipments.

THE prospects for the dwarf and pole Lima and other pole beans in California are reported to be fairly good at this time, but a better estimate of the crop can be made September 1.

NEW YORK.—Vaughan's Seed Store received a consignment of two and one-half carloads of French bulbs, one car for this city and the balance for Chicago.—J. McHutchison, of McHutchison & Co., says that the present indications point to the coming season as being an unusually busy one.

CHICAGO.—Prices on the board of trade August 17 for grass seed were noted as follows: Timothy, \$5.50-\$6.50 per 100 pounds. White clover from 20 cents to 25 cents.—Peter Hollenbach shipped three cars of onion sets last week, the early sorts, Bermuda, Crystal Wax and White Pearl.

HARRISBURG, PA.—Walter S. Schell, who opened a seed store about the new year at 1308 Market street, has had great success. He says he makes a specialty of quality. In a short time he will move across the street and occupy the two stores, 1307-1309, Market street, where his capacity for doing business will be doubled. He has a good force of assistants, noteworthy being J. W. Yeakle, formerly with J. F. Noll & Co., Newark, N. J., and Chas. M. Storey, formerly with the Holmes Seed Co.—The Holmes Seed Co.'s store is a very busy place, the great stock of farm and garden implements being a leading feature at this season.

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

SAN JOSE, CALIF.

New Jersey Conditions.

Morganville, August 10.—Owing to the extreme dry weather that we have been experiencing in this section for the past six weeks, the tomato crop has been damaged to a very large extent, and there will be a short crop.—C.

Mullica Hill, August 10.—The prospect for all seed in this vicinity looks fair at present. The cucumber crop seems to be the poorest.—H.

Purity Standard in Seeds.

Standards in purity and germination in agricultural seeds offered for sale in Virginia were fixed August 9, by a committee of the State Board of Agriculture appointed for that purpose. The committee is composed of W. W. Sproul, of Augusta, and Berkeley D. Adams, of Charlotte, the latter the secretary of the state board.

The new law governing the inspection of seeds, which goes into effect on September 17, is quite specific in its requirements. The committee found that it had little to do save fix the standards of purity and germination and to prescribe the nature of the label to go on all packages.

Representatives of seed companies were present, but it was soon found that the proposed regulations would be satisfactory both to them and to the members of the committee, representing the people of the State. The new statute itself is not drastic. The complete list of rules adopted by the committee is as follows:

SECTION 1.

The form of label which is required by section 1 of the law, and which must be attached to each package of seed over 50 pounds in weight, shall conform to the following specifications:

The label shall not be less than five inches long by three inches wide, and shall be plainly written or stamped in not less than eight-point heavy Gothic type. The form and style shall be substantially as follows:

(a) For standard seeds.

Kind of seed (barley).

Name (Oderbrucker).

Name of seedsmen, importer, agent or dealer (John Doe, Seedsmen, Richmond, Va.).

Standard seeds.

Note.—The above label only to be used on the case of seeds of the required standard of purity and germination, as provided by the State Board of Agriculture and set forth in section 2 of these rules.

(b) For seeds other than standard.

Kind of seed (barley).

Name (Oberbrucker).

Name of seedsmen, importer, agent or dealer (John Doe, Seedsmen, Richmond, Va.).

Percentage of purity or freedom of seed from foreign matter or from

other seeds distinguishable by their appearance.

1. Name and number of noxious weed seeds.

2. Name and percentage of impurities or foreign matters (if exceeding 2 per cent.).

MUST LABEL BAD SEEDS.

3. Name and percentage of the following seeds and bulbs:

(a) Wild onion.

(b) English charlock.

(c) Wild oats.

Note.—Where noxious weeds as defined by section 3, subsection 1, of the act, exist in greater number than one to 2,000, the sale or distribution is prohibited.

Where any of the following seeds or bulbs are present—wild onion, English charlock or wild oats—the name and percentage must be stated on the label, but none of these seeds shall be present in seeds marked "standard."

Where seeds of the common weeds, as defined in section 4 of the act, are present in quantity greater than two per cent. of the seed under examination, the name and percentage of such seeds must be stated on the label. The name and approximate percentage of inert matter, such as sand, dirt, sticks or broken seeds, as defined in section 5 of the act, when present in quantity greater than two per cent. as fixed by section 2 of these regulations, shall be stated on the label.

This is not to apply to seeds which come up to the standard of germination and purity as fixed by the Board of Agriculture in section 2.

GIANT PANSY PLANTS

The KENILWORTH Strain

Must not be compared with the flimsy Trimar-deau, it is much larger and of good substance, the immense flowers of $3\frac{1}{2}$ to 4 inches are of perfect form, every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selection. The stock plants are selected from many thousand of plants grown for market. It is rich with shades of brown, bronze, red, mahogany and numerous other light, medium or dark mixtures.

1910 Seed Now Ready.

2000 seeds 50c; 5000, \$1.00; $\frac{1}{4}$ -oz. \$1.25; 1-oz. \$5.00; 1 lb. \$50.00. Also the following colors of the Kenilworth strain: yellow, yellow-darkeye, Lord Beaconsfield, Mme. Perret, white darkeye, purple, black, masterpiece, red, brown, bronze, and light-blue shades. Trade packets 25c. any five for \$1.00.

Rainbow is a blend of over 50 of the latest introductions of giant pansies of the most beautiful gorgeous colors; blotched, striped veined margined, etc. With every \$1.00 worth of Kenilworth strain I will send 1000 of Rainbow free, and with other amounts in like proportion.

Annual meeting at Grand Rapids, Mich.,
Sept. 27-29.

ONARGA, ILL.—Early in the summer the Mosbaek Greenhouse Co. shipped six carloads of pieplant to the American Dehydrating Co., of Waukesha, Wis., to be manufactured into a product known as dehydro. Miss Annabelle Risser of the Mosbaek company received a consignment of the manufactured product last week. By a mechanical process which does not rob it of any of its flavor, color or natural constituents, all the water is eliminated from the pieplant, reducing it to almost a powder. By the addition of water it is ready to cook. The company also puts up spinach, and other vegetables in this manner. The industry is as yet comparatively small, but is rapidly becoming recognized as a practical one.

Greenhouse Notes.

THE SOIL PROBLEM.

At this time of the year the soil problem forces itself to the front. Shall we use the same or sterilize or renew entirely? Of the three ways we like sterilizing the least. If our soil was satisfactory all around, we would leave it alone and cover deeply with fresh manure. This should be watered thoroughly once or twice a week, enough so to keep it in good growing condition. After a month or six weeks of this treatment it is ready for another season's campaign.

However, if results have been unsatisfactory owing to repeated cropping, it is often best to renew at least six inches of it. One of our growers once said the best sterilizer was a gang of Italians with wheelbarrows. He meant the removal and new soil. We have had such remarkable returns last season in a new house with new soil, that we hardly care to risk old. While the cost of removal may seem large, it is better and cheaper than fretting over indifferent crops. We have a large amount of old hotbed manure each season, which enables us to tone up fresh soil to just the point required. It is either a case of new soil and old manure or old soil and fresh manure and no sterilizing with us. MARKETMAN.

How to Use Cold Frames and Hotbeds.

This is the title of a most interesting little booklet written by Professor W. F. Massey for the Sunlight Double Glass Sash Co., Louisville, Ky., and while to some extent exploiting the excellent "double glass" sash made by this firm yet it contains a great amount of excellent cultural data that would be useful to anyone whether a user of the double glass sash or not. As to the latter we have already called attention to its merits, but it may be well to mention again that the sash are made with two sets of glass instead of one and with an air space be-

tween, this forming an effective protection from cold owing to its non-conductibility.

As to practical tests of the sash Mr. Massey notes in his book that growers in New York state have reported that their plants have come through cold spells of 5°-20° below zero with no other protection than the double glass sash affords, while a New Jersey grower states that he kept his plants in flower in January covered with these sash when the outside temperature was 5° below zero. He also says he feels sure that by the use of these sash growers can raise beets in December after a fall crop of lettuce and have these fit for bunching in April, in plenty of time to clear the ground and plant cucumbers. Thus the frames, if covered with the Sunlight double glass sash are working the whole year around. Another use the professor recommends these sash for is to cover plants of thyme and mint during winter and thus have a supply of these useful herbs no matter what the weather is.

Early asparagus, early egg plant, tomatoes or any other vegetable crops always command a bigger price if sold, or are more greatly valued if used at home, than late ones and the use of this excellent sash will forward these crops very materially in spring. Then the sash are invaluable to the florist who wishes to raise violets, pansies or similar half hardy crops for flowering in winter, they maintaining a far more regular temperature than the ordinary single glass sash. In hotbeds where heat, either from fire or manure, is used much less is needed under the double glass sash than under the ordinary make and there is no doubt they will pay for themselves in a very short time owing to increased yield and greater earliness of the crops grown by their aid. The price of this excellent little book is only four cents, sent in stamps to the Sunlight Double Glass Sash Co., 929 East Broadway, Louisville, Ky.

Bean Blight or Bacteriosis.

Bean blight or bacteriosis is a disease that is common upon field, garden and Lima beans. It affects leaves, stems and pods, but particularly the leaves and pods, upon which the symptoms are most conspicuous. It is believed the diseased seed is the source

of many infections, whereas later infections may result through wounds in any green parts. On the foliage there appear irregular water-soaked patches, which later become, during dry weather, brown and papery. The disease progresses slowly, therefore it becomes evident, as a rule, only when the pods begin to form. Control is difficult, and must concern itself largely with seed selection and crop rotation. Seed from an affected field should not be planted. It is not enough to attempt to sort out healthy seed, when some of the lot are evidently diseased, for many which show no discoloration will be penetrated by the bacteria.

NEW CASTLE, IND.—P. Olinger, who recently purchased his partner's interest in the Weiland & Olinger greenhouses is making great improvements to the plant, the most important being the installation of a new heating plant. Four new boilers have been set, two large ones and two small ones. These will be equipped with automatic stokers. The benches of the rose and carnation houses are all being rebuilt and this work is nearing completion.

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1889. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; 1/2 oz., \$1.50; 1/2 oz., \$5.00; oz., \$10.00.

VAUGHAN'S "GIANT PANSY MIXTURE,"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

ACCORDING to a report by Senator E. S. Neal of Garrison, N. D., the crops of all kinds throughout the state are good.

A CALIFORNIA horticulturist is said to have obtained an edible and nutritious fruit from the climbing rose by cross breeding.

VISITED CHICAGO:—W. Hart of the Clinton Falls Nursery Co., Owatonna, Minn.; C. H. Perkins, of Jackson & Perkins Co., Newark, N. Y.

FULLERTON, CALIF.—T. D. Robertson, who has for the last 10 years been connected with the Orange County Nursery & Land Co., has purchased the ornamental, floral and seed departments of the business from this concern, the company retaining the fruit, citrus and eucalyptus departments.

WE have received the "Proceedings of the Thirty-fifth Annual Convention of the American Association of Nurserymen" held at Denver, Colo., June 8-10, 1910. It is a book of 160 pages containing in full the constitution and bylaws, the proceedings of the meeting and the excellent papers read thereat. The next convention will be at St. Louis.

THE Parking Commission of New Orleans has issued an ordinance defining the duties of the commission and giving the annual statement of the president. The principles and practice of municipal arboriculture are briefly reviewed and the special report of the superintendent given. It is well illustrated with views taken in various streets and boulevards.

GLEN BROS., Rochester, N. Y., write us saying that the report we printed from a Poughkeepsie paper respecting the removal of their offices to Wappinger's Falls is incorrect. As a matter of fact this firm has only recently completed a new office building in Rochester and is at present negotiating for a farm near the latter city so as to increase its growing facilities for handling western New York business.

Association of Park Superintendents.

THE HARRISBURG MEETING.

Sunset from the river front was on the programme for the evening of August 10, but that feature was abandoned. Sol was behind the clouds, very dark and wet at that. For about an hour the rain fell in torrents. It cleared up in time to enable everybody to reach the lecture room of the Mt. Pleasant Press. There a most instructive entertainment was in store. There were three addresses, all illustrated with stereopticon views. Peter Bisset of the Department of Agriculture, Washington, D. C., was very entertaining. Geo. W. Ehler of Baltimore elaborated on the benefits of public playgrounds.

Thos. Beckendoff, of the public bath commission, Baltimore, was both amusing and instructive as he traced

the evolution of bathing from the "old swimmin' hole" to the present highly developed systems in his own and other cities. Many views were shown of scenes in the baths of Chicago. On the morning of August 11 the delegates took a special car for Gettysburg and spent the day viewing the many points of interest on that memorable and historic battlefield.

THE REASON FOR PARKS.

In the address by J. Horace McFarland, before the Association of Park Superintendents at Harrisburg, Pa., August 9, the speaker called the attention of the visitors to the cost and maintenance of the great stretch of parkway (nearly 30 miles) covered in the auto trip. "All you have seen today," said Mr. McFarland, "has been done within a quarter of a million dollars, some of which is left over. The maintenance is within the appropriation of \$27,000."

Then he contrasted the difference in the meaning of parks of today and 40 years ago as defined by the dictionaries. "In 40 years," said Mr. McFarland, "the reason for parks has been totally changed by the congested conditions and by the necessity for assimilating great masses of foreign population."

He said that the purpose of parks is to serve best those who need them most. Some parks and the ideas that control their development in other cities in the United States were compared and some quotations from the annual report of the president of the West Park Commission of Chicago, John F. Smulski, were incorporated in the talk.

"Every dollar expended for small parks in crowded districts of a large

GEO. WITTBOLD CO., 737-739 **Chicago**

Long Distance Phone, Graceland 1112.

Lancaster, Pa.

This is a thriving city and the center of a rich agricultural section. It may not be generally known that in this last feature, tobacco growing is largely represented. Whatever some people may think of the "weed" and its use, they could scarcely deny the beauty of the great fields with their broad and graceful leaves. The florists are keeping pace with other lines of industry, carnations being a leading feature. There are also several prosperous retail stores.

The genial Albert M. Herr, having his carnations planted and all looking fine, has gone with Mrs. Herr and the boy to the Rochester convention.

Harvey Schroyer now conducts the retail store at 151 North Queen street, long conducted by his father, the late G. W. Schroyer.

The Wheatland Aquarium and Greenhouse Co. show a number of good features.

B. F. Barr & Co., in addition to an extensive range, have a prosperous store.

Elizabethtown, Pa.

J. W. Hoffman has just finished two carnation houses, 28x201 feet each. The young plants were planted directly into the beds while the houses were under construction and had made splendid growth. Mr. Hoffman has

been in other business here for a number of years and has been successful. About two years ago he erected one small greenhouse. He was so successful that he was encouraged to go into growing on a larger scale.

E. S. Rutt is another grower who, though a young man, by painstaking industry has built up quite a business. He grows carnations and sweet peas.

Most of the stock grown in this part of the state is marketed in Harrisburg or Pittsburg, the latter, of course, taking much the largest quantity.

DEDHAM, MASS.—H. A. Stevens is enlarging his greenhouse on Washington street.

Chrysanthemums

AND

Aster Seeds

Elmer D. Smith & Co., ADRIAN, MICH.

St. Louis.

There were quite a few flowers in the market during the past week and there was somewhat of a demand. Most of the growers have thrown out their carnations and many are now planting. It will be some time before carnations have much of a showing. There are, however, plenty of very fine long flowers, lilies, single tuberose stalks, asters and Killarney roses. American Beauty roses have become a little more plentiful but open up quickly. Tuberoses are selling at \$4 per 100, also light colored gladioli. The theatres are opening up, two more will start up Sunday. In two weeks our public schools will reopen. People will, with the advent of cooler weather, return to their homes and start the social whirl moving. So Mr. Florist get busy and have everything in shape. The retailers must make a showing at our next flower show as Otto G. Koenig and his assistants intend this show to be best and largest ever given here.

NOTES.

A jolly party of 15 left the Union station at 1 p. m., for the S. A. F. convention. Otto G. Koenig took care of everybody and everyone was well supplied with solid and liquid refreshments. Mr. Koenig being quite an accomplished connoisseur in these matters. The following ladies and gentlemen composed the party: Alexander Waldbart, E. J. Waldbart, Will Osseck of the W. C. Smith Wholesale Floral Co., Otto G. Koenig, Mr. and Mrs. F. H. Meinhardt, Mr. and Mrs. F. W. Bruenig, Mr. and Mrs. H. G. Berning, J. F. Ammann, J. Winkler, E. W. Guy and daughter and two lady friends, and Miss Olinda Gundering.

The first issue of the Florists' Bulletin came out August 9 and every local and suburban florist was mailed a copy through the secretary, J. J. Beneke of the Florists' Club. Thus C. E. DeWever has at last seen his efforts and labors come to a successful issue. Success to him and those other gentlemen of the committee.

Meredith D. Thompson, assistant to Park Commissioner Scanlon, died Saturday at St. Luke's hospital. He had been ill several months with dropsy but attended the city hall daily almost up to his death. The funeral was held Sunday from his brother's home, Wm. H. Thompson, cashier of the Boatmen's bank.

The following florists donated flowers to the carnival of the "Made in St. Louis" at the Coliseum this week: E. L. Loyet, J. E. Windt, Grimm & Gorly, Mrs. M. S. Meyers and A. W. Murray.

Fred Alves of Geo. H. Angermueller's has left on a vacation. Geo. Angermueller and friends will go on a fishing excursion next week.

A. & H. Werner of Clayton, Mo., are making their first cuts of Richmond and Killarney. They are also cutting a fine crop of Harrisii lilies. W. F.

HENRY H. BARROWS & SON, Whitman, Mass.

New Orleans.

"Stagnant" best describes the state of the market at present, both in plants and cut flowers. Most of the prominent families are out of town and about the only thing doing is a little funeral work occasionally. Local asters are about done but tuberose are still plentiful. The rains have ceased at last and all outdoor stock is much improved. Six of the craft from this city are attending the convention in Rochester this week—a pretty fair representation considering the distance. This city is determined to land the convention here in 1915, and no effort will be spared to attain that end. A visit of the S. A. F. to this city would be most advantageous to both the society and the whole south.

The monthly meeting of the Horticultural Society was held August 11, a week ahead of schedule. This was done to enable those who are going to the convention to be present and also to confer on the invitation to the S. A. F. to meet here during the Panama exposition in 1915. R. Eichling, the newly elected president, was in the chair and ran the meeting like a vet-

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great Araucaria Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Excelsa Glauca**, are in favor more than ever this year.

Belgium to protect and select for my customers the best of **Araucarias**, **Azaleas**, **Palms**, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 35c, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.

GODFREY ASCHMANN

Wholesale Grower and Importer of Potted Plants, 1012 West Ontario St., PHILADELPHIA, PA.

eran. Two applications for membership were received and laid over till next meeting. More stock of the Panama exposition was subscribed for, the total amount from members of this society reaching to goodly figures. After disposing of the routine work the meeting adjourned and repaired to the cafe and sat down to a supper provided by the new officers. Formality was thrown to the winds and jest and story made "sauce to meat." Former President Alost, who has just returned from a three months' trip to Europe, found time to give a short account of his trip.

Otto and Paul Abele have the sympathy of the trade in the loss of their mother, who died in Germany just about the time that Otto Abele was

Robusta Compacta, **Excelsa Glauca**, 6 in. pots, \$1.00 to \$1.25 each.

"QUALITY" CHRISTMAS SWEET PEAS.

At the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cents., ¼ lb. 75 cents., ½ lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cents., ¼ lb. 4 cts., ½ lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Florence Denzer. Pure white. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Le Marquis. This is the same color as Princess of Wales violet; has very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Helen M. Gould. White, open flower; standard lilac, marbled. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. Alex. Wallace. Lavender. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. William Sim. Salmon-pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Geo. Lewis. Large, pure white wavy flower. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. W. W. Smalley. Satiny pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Hannan. Deep rose-pink of a very pleasing shade; medium flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. P. J. Dolansky. Daybreak pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Chas. H. Totty. Sky-blue; late. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Zvolanek. Blue, variegated; good for variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Wallace. Very fine lavender, a grand florists' variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Watchung. Pure white. Oz. 2 cts., ¼ lb. 6 cts., ½ lb. \$01.000, lb. \$1.75.

Wm. J. Stewart. Blue self. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

All other varieties of winter and summer flowering Sweet Peas supplied. Write for quotations upon large or small quantities.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

Scientific Fertilization in Germany.

As to farming in general in Germany, it may be said to be in advance of the United States in two respects: (1) The application of scientific intensive methods, and (2) in organization. The German farmer generally has much less land at his disposal and hence cannot afford to have as large fields, keep as much stock, nor have as improved machines as the American. He must therefore make his fields yield as much as possible by means of scientific fertilization and care of the crops, by drainage and the avoidance of waste. He must take proper care of his stock so as to make it as useful and productive as possible, and on the other hand, a much larger percentage of the work must be done by hand. Progressive German farmers are also definitely organized for the purpose of making experiments relating to agri-

Heacock Palms Will Help You Establish a Trade That Increases With Each Season

You can, by handling Heacock's Palms, make your Palm sales one of the substantial, dependable assets of your business—your trade in them **this** year will help you **next** year, and **every** year.

We put the best of our many years' experience into our Palm business. We grow the plants right here from the seed; that is your assurance that they are sturdy, well-developed, acclimated. Further, this guarantees to you that our palms will do well for your customers, when given ordinary care, bringing you not only more Palm business, but more trade in the other things you sell as well. "Heacock Quality" has helped scores of florists all over the country to make their Palm Departments pay. It will help **you**, and we suggest that **now** is an excellent time to place your order. The following list represents some of the finest stock we have ever grown and as you will see, our prices are no higher than you would pay elsewhere.

Give us a trial order, and we will prove to you that the quality of ours is better—and the stock will go forward to you without an hour's unnecessary delay.

BYER BROS.
Chambersburg, Pa.

Milwaukee.

The condition of the market has eased up considerably the last week. There were quite a few gladioli and asters which helped out. Harrisii lilies are fine and selling rapidly, roses enough to fill orders most satisfactorily. Shipping business is very good and it seems remarkable how business keeps up during the summer months, always something doing. Carnations are almost entirely out of the market, and the few that are coming in are not very good, which must be expected, but seem to sell at a fair price considering the quality.

NOTES.

The local party left on the 1:45 train on Monday and joined the Chicago florists to attend the convention. They are Fred H. Holton, C. C. Pollworth, Nic Zweifel, Gus Mueller and H. Koerner. The latter will exhibit some fine seedling gladioli which he would like to have some of the trade express their opinion on. He has quite a lot to pick from, as he makes a specialty of gladioli and dahlias, also a lot of other hybrid stock.

The picnic will take place on Sunday, September 4, and all florists and friends are invited to attend. This affair will be somewhat different from what we have had before, as it will be more on the order of an old-fashioned basket picnic. There will be the games and other pastimes the same as usual, and there will be just as good a time. It will take place at Butzlaff's Grove, at the end of North Milwaukee car line.

Albert Groth says he is running into another crop of carnations. His carnations were exceptionally fine during the summer months. This is accounted for by the late planting he did last fall, as his heating system was not in order and he could not keep his houses at the right temperature.

Wm. C. Zimmerman will go to St. Louis this week to attend the Eagles convention. He intends to meet Will Smith, which will make it more pleasant for him, and there is no question but what they will have a good time, as they are two of a kind and know how to enjoy themselves.

J. Sherrer, of the Sherrer Co., formerly Chacona's, says he is well pleased with the way things are going. He is a new man in the business but takes hold of it as though he had been in the same for years. He no doubt will handle the place successfully.

Gustave A. Pohl seems to be one of the fortunates who had a nice cut of asters this year considering the dry spell and has quite a crop. Upon this writing the news has spread that his home has been blessed with a baby boy.

Holton & Hunkel Co. reports business good. The place looks as though it were moving day, but it is only

Asparagus Elongatus, 1-yr.-old clumps..... 5.00
Fine stock for dividing up.

GEO. REINBERG,

35 Randolph Street, CHICAGO.

caused by the remodeling of the store and the firm expects to have a very fine place when finished.

Roy Currie, of Currie Bros. Co., is back on his job since Monday and says he had a good time. He spent most of his time canoeing and sailing at Army Lake. Will Currie has left for this place to enjoy himself.

Fred H. Holton was in Chicago last week to attend the Knights Templars convention. The long walk did not make a bit with him in the parade; it had a very bad effect on his joints.

C. C. Pollworth reports business very good, being exceptionally busy in the bulb line. Every one is back on duty after the summer vacations.

Julius Neubeck, of the M. A. McKenney Co., is running the shop alone at present, while Mr. and Mrs. Davis are spending their vacation.

Miss Rose Semmler, of the Edlefsen-Leidiger Co., is taking a month's vacation and is spending same at Buffalo and Cedar Lake.

J. M. Fox reports business good. He handles quite a large quantity of garden truck of the fancy variety.

Miss Anna Holz has returned after spending her vacation in Indiana and reports a very good time.

Fred Schmeling is still cutting a few good carnations which are selling rapidly.

The E. Welke Co. reports business very satisfactory, especially in funeral orders.

Manheim, Pa.

About 150,000 square feet of glass are devoted to carnation and sweet pea culture in this town. E. P. Hostetter has two ranges, comprising 75,000 square feet, largely devoted to carnations. He grows likewise a fine quality of **Asparagus Sprengeri**.

M. H. Hostetter is a carnation grower with a side line of sweet peas. He has about 50,000 square feet of glass and his range is well kept up.

P. S. Hostetter has succeeded to the business of the Manheim Carnation Co. and is also interested in winter flowering sweet peas.

Press Photography for the Amateur.

Combined with the idea that photographing for the press is the highest branch of the art, is the erroneous notion that none but the most costly cameras can be used for press work. Except in size, there is no requirement for a camera for such work different from any other. At least a 5 x 7 size should be used, as the photos are always "thrown down" (made smaller) in the engraving room and often distorted for "telling" effect. With your first thrill of triumph, the germs of the fever of success at seeing your work in some publication, will come the faintest chill of disappointment that the photos are not full size. It is all there, but the 6½ x 8½ you worked out so faithfully is down to 4 x 5. Your consolation must be that reduction in size has also worked a reduction in defects. My first accepted illustrations were only 3½ x 3½, but I have had so many rejected on account of size that I do not advise anything under 5 x 7.

A very high authority on the subject advises but one brand of plates, and that a fast one. My experience has neither proved nor disproved that advice definitely; I have sometimes been where a plate was needed of a speed too fast for safety in ordinary "view" work. A fast plate will help out a slow lens, and as many of my best illustrations have been made with a 5 x 7, costing \$7.50, I have found two grades of plates a necessity. The much-discussed ray filter is a good addition to an outfit. While it will not do all that many claim for it, in many cases it will be found a great help. When you decide to use it, focus through it. If it gives the clouds distinctly and the foreground is clear and sharp in detail, make the exposure, allowing the extra time, and you will have the "cloud effects" in the print.

The question of what to select as a subject is as wide and indeterminate as the universe. That I have, since the first article appeared, "viewed for publication" a range of subjects from a swill barrel at a farmer's back kitchen door to a great battle-field, shows the infinite variety to be covered. Often the text of a "story" allows great latitude in composition, and in such cases the old rule should govern. We instinctively see from left to right; we read our lines that way and our illustrations should unfold in the same direction. A view of a plain should have the point of interest in the lower left portion of the picture, with just sufficient margin to give a setting; the sky-line should be low, a very small stop used, and everything in focus.

Straight lines across a landscape, such as roads, should cross the line of sight at an angle of 30 degrees. In views of a broken country or mountain streams the sky-line should be high up on the plate; a stream should break the sky-line in the upper right-hand portion, flow from right to left, and leave the view in the lower left hand. We "read" a mountain water-course up-stream, and this composition gives the natural left to right rendering. In a river scene the unbroken water portion should never occupy more than one-half the width of the view. Everything that appears in all such illustrations should be sharp in outline, as the interest is in everything from foreground to sky-line, and indefiniteness mars the effect. Where the interest centers in some one point occupying relatively a small portion of the plate, the background may be ignored, or at least slighted.—A. M. St. Cyr in American Photography.

5,838,181 19,997,736 771,737 2,758,304 1,711,425 5,324,166 \$27,378.46

The above is equivalent to an insurance upon 34,636,555 square feet of glass.

The total receipts for the year ending Aug. 1, 1910, and including last year's balance, as per Treasurer's report, have been \$40,109.09.

The total expenditures, as per Treasurer's report, have been \$38,523.61.

The Emergency Fund is exhausted, and \$3,301.20 has been borrowed from the Reserve Fund, of which \$1,585.45 in cash remains on hand.

The amount of interest collected on Reserve Fund investments for the year is \$970.00. The amount of interest collected on bank deposits for the year has been \$183.83.

Losses representing a breakage of 222,413 square feet of single thick glass and 82,757 square feet of double thick glass, have been paid during the year.

1,520 losses have been adjusted since the organization of the F. H. A., involving a total expenditure of more than \$188,000.00.

The 10 per cent. assessment on hazardous risks netted the treasury \$79.43.

The estimated liabilities of the Association are: amount due Reserve Fund of \$3,301.20, and a few unadjusted losses, amounting to a few hundred dollars.

The Reserve Fund consists of \$22,000 in securities and \$1,301.20 due from the Emergency Fund.

The following table shows losses reported to the Secretary for the past twenty-three years and number of claims paid.

STATES	No. of hail-storms from June 1, 1887, to Aug. 1, 1910.	No. of losses paid from June 1, 1887, to Aug. 1, 1910.	No. of hail-storms for year ending Aug. 1, 1910.	No. of losses paid for year ending Aug. 1, 1910.

After paying out over \$82,000 in the last three years, an extra assessment is necessary, for the first time since the organization of the Association, to restore funds borrowed of the Reserve Fund, and put the F. H. A. upon a strong cash basis.

The time of levy will be fixed by the Directors, and your Officials have not a shadow of a doubt but that it will be promptly paid.

JOHN G. ESLER, Secretary

TREASURER'S REPORT FROM AUG. 1st, 1909 to AUG. 1st, 1910

Signed, JOSEPH HEACOCK, Treasurer

I have this day compared the accounts of Secretary and Treasurer of the Florists' Hall Association and found them to be correct, and the securities belonging to the reserve fund are intact and are deposited with the Jenkintown National Bank.

ALBERT M. HERR, Auditing Director.

Caucasian Products.

Frank N. Meyer, agricultural explorer, Tiflis, Caucasus, Russia, in a letter of April 1, says that A. C. Roloff, director of the Botanical Garden at Tiflis, is unusually well informed in regard to the economic products of the Caucasus, and wants to exchange seeds and plants with the United States Department of Agriculture. He offers Caucasian varieties of various fruits, as apples, pears, peaches, apricots, plums, pomegranates, etc.; also seeds and plants of various native trees, shrubs and herbaceous plants. The Department of Agriculture there has a corps of foresters all over the country, and practically any plant described from the Caucasus can be obtained at the Tiflis Botanical

Garden. They have the largest collection in the world of native Caucasian plants and are increasing it all the time. Mr. Roloff offers to send seeds of *Medicago glutinosa*, a very promising Caucasian alfalfa, and other drought resistant legumes adapted for fodder plants.

He also writes that in Asia Minor there are varieties of *Prunus laurocerasus* cultivated for their fruits, which are large and sweet and are considered by the Turks to be an especially fine fruit. Dr. Schmidt, director of the Caucasian museum, recommends that we try all the native Caucasian species of trifolium, 53 of them. He recommends *Trifolium resupinatum* as a lawn plant on account of its delicious perfume. He says the finest hazel nuts grow around Trebizond and Kerasund

in Asia Minor, and the Turkish government has prohibited their exportation. He has heard that bamboos grown in colder localities do not split like those grown in the subtropical climate of Chakva. There are large clumps of *Phyllostachys Quiloi*, *P. mitis*, and *P. aurea*, growing here and there in the Caucasus, and the people are beginning to make bamboo furniture. All these three species have stood nearly 10° below zero, F., in Tiflis, and were not killed. The government intends to build factories for utilizing the bamboos as soon as the supply gets large enough to warrant the outlay.

GROTON, MASS.—H. Huebner has been confined to his room with rheumatism for several weeks.

The Florists' Market Place,
Our Ready Reference Ad. Dept.

"GREENHOUSE MATERIAL"

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Marvelous bargains in Greenhouse Sash and Building Material of all kinds. Corrugated Roofing and Siding, Structural Iron, Gutters, Eave Spouts, Hydrants and Valves, 10,000 feet Rubber Hose, Soil Pipe, Plumbing Material of all kinds. Boilers, Feed Pumps, Flower Pots, etc. Thousands of other articles of interest to Florists or Greenhousemen. We can save you from 30% to 75%.

Send for our new 500-page Catalog No. 47. Free upon request.

CHICAGO HOUSE WRECKING CO.,

35th and Iron Sts., Chicago

MR. FLORIST, IF YOU WERE SHOWN:

That by the installation of a good tilting steam trap you would effect a saving in fuel sufficient to pay for the trap in from three to six months.

That you would increase the efficiency of your steam lines by draining them of all condensation.

That this pure hot condensation could be returned to the boilers as feed water by means of this trap without the assistance of pump or injector.

Would it not be a matter of considerable import to you?

The MOREHEAD Tilting Return Steam Trap will do this and more.

WRITE FOR TRAP BOOK AND TRIAL OFFER PROPOSITION.

MOREHEAD MFG. CO., Department "N" Detroit, Mich.

King Iron Frame Greenhouses

"Ask the Man Who Has One."

What S. J. Goddard Says:

FRAMINGHAM, MASS., Jan. 15, '10.

Gentlemen:—

It gives me a great deal of pleasure at this time to tell you that I am perfectly satisfied with your construction. We have just experienced two very bad blizzards. One of them was very severe and the house never so much as trembled. In fact, it is the stiffest house on my place, and you know I have the best of construction on the others.

Wish you every success,

Yours very truly,
(Signed), S. J. GODDARD.

Send for Bulletin No. 35, which describes the King Iron Frame Construction.

KING CONSTRUCTION CO.,

North Tonawanda, N. Y.

THE ALLIED TRADES

Week's Steam Coal News

Chicago.—With the opposing factions of President Lewis of the United Mine Workers of America and President Walker of the United Mine Workers' Union of Illinois playing for points in their struggle for supremacy at the newest Indianapolis conference, the matter of opening the Illinois steam coal mines is still very much in abeyance. What the outcome of the latest gathering of the powers of miners' unions will be is very difficult at this time to prognosticate. A new phase to the complicated tangle is given by the arrival at Indianapolis in capacity of delegate from Spring Valley, Illinois, of John Mitchell, formerly at the head of miners' organizations. His well-known stand to conservatively view matters of this nature may tend to quicken the time when Illinois mines will resume producing coal.

On the other hand the Illinois Coal Operators' Association is determined to force the issue by importing into this state miners from other sections. This may conflict with a law of the State of Illinois, but this point will be cleared up through means of a test case. To this end the Illinois Coal Operators' Association will act collectively by purchasing one of the coal properties, bringing in outside miners to operate same, and, if there is any liability of any sort creeping up, the entire Association will bear the damages.

Meanwhile the visible coal supply is diminishing steadily.

In an interview with Mr. C. A. Eastman, vice president of Eldridge Coal Co., with regard to the present coal situation, he advised as follows:

"The Illinois mines have been idle so long since April 1 that regardless of whether they resume work by September 1 or later, the season is now so well advanced that a serious congestion in coal demand during the fall and early winter months can not be avoided. This situation will, no doubt, be aggravated by the fact that notwithstanding the idle mines in Illinois, the number of available empty cars is growing rapidly less each week and the railroads today report a much smaller number of idle cars than a year ago at this time, and the supply diminishing so rapidly that it will only be a short time until there is an actual shortage and no doubt a serious one in view of the congested demand that must come.

"As to Eastern coal, such as Smokeless, the railroads already report a car shortage, and the mines are only able to fill orders with a reasonable degree of promptness by using hoppers and other classes of cars that, as a rule, it is not necessary to resort to until much later in the season.

"The Lake Michigan docks and those at the head of the Lakes are drawing very heavily upon the mine

supply, as no season for years found the docks so completely cleaned up and entirely out of coal as the present one. This situation is also true as to local yards in and around Chicago, stocks in sight being much less than at this time for years past, while, from now on, there will be little chance for any accumulation in excess of the daily demand; the railroads also have been prevented from accumulating their usual supply on account of the long stoppage of the mines, which, no doubt, will result in an unusual amount of confiscation of shipments in transit as they help themselves without asking whenever they get short; so, taking it altogether, the outlook is for an unusually strenuous time during the next four or five months and possibly through the entire winter season, and we can not lay too much stress upon the importance to the consumers in avoiding any further delay in securing at least a reasonable portion of their supply, and in so doing they will have nothing to lose and a great deal to gain.

"As to Anthracite coal, particularly where the small sizes are used, all that is said above will apply with greater force, and while we are quick to forget all should remember the difficulty in securing small sizes last fall and winter and profit now by the experience."

A. L. BERRY COAL CO., 802 Great Northern building, Chicago, reports a good run of business on its coals, inquiries from florists and allied trades showing a decided improvement during the past two months.

J. M. GASSER'S Patent Zinc Joints For Butting Without Laps.

The Improved Glazing for Greenhouses, Sky Lights, Etc.

Air and water tight. Saves fuel. Glass is not broken by frost or medium sized hail.

IMPROVED GLAZING.

We call particular attention to the J. M. Gasser Patent Zinc Joints, illustrated below, for which we are now the exclusive manufacturers, under special arrangement with the patentee.

These joints make glass roofs air and water tight, prevent breakage from frost, and where heat is required, as in greenhouses, save fuel and insure a uniform temperature. They have been in use for over twenty years, and the uniform experience of users has been most satisfactory.

Directions for Use.

Bed the bars in putty in the same way you have been doing. Use very soft putty. Take a board and spread with putty. Take a zinc

and scrape some putty on one side from off the board. Take a glass and scrape some putty on the end that you connect. Lay on board ready for use.

Put in the first glass in the same manner you have been doing, nail it so it cannot slide. Then take a zinc and connect with the glass, putty down; take a glass and connect it with a zinc, putty down; in this way you can connect as many as you reach then nail it. Have a boy to help you; he can put the putty on the zincs and glass, while you nail, and then he can hand you the zincs and glass while you put them in. In that way you can put in from 600 to 800 feet of glass a day.

PRICES.

Per 1000	Per 1000	Per 1000
18 inches, \$9.10	14 inches, \$5.00	10 inches, \$4.00
17 inches, 7.50	13 inches, 4.75	9 inches, 3.50
16 inches, 6.00	12 inches, 4.51	8 inches, 3.00
15 inches, 5.50	11 inches, 4.25	

Any size smaller, the same.

You can almost save the price of zincs on glass and putty.

In ordering, mention the size of glass between bars.

It takes one joint for every pane of glass.

10 per cent. discount for cash with order, or will be sent C. O. D. to unknown parties.

State if wanted shipped by express or freight

A Gutter With a Reputation

Ask the man who has tried them. For further particulars, write to

GEO. M. GARLAND CO.,
DES PLAINES, ILL.

Mention the American Florist when writing

CLARK T. ROBERTS, of E. L. Hedstrom & Co., Marquette building, Chicago, who have some large coal producing mines in all parts of America, reports all coal coming into their control as being "snapped up." Good prices are obtained—that is to say, 15 to 20 cents per ton over last season's figures. Inquiries from florists and nurserymen show up heavier than at previous seasons at this time of year, with a larger percentage of business maturing. Mr. Roberts looks for still higher prices in the near future.

CROSS SECTION OF A SUNLIGHT DOUBLE GLASS SASH ON A SUNLIGHT FRAME

Here is the sash you don't have to cover

Two layers of glass instead of one. A $\frac{1}{2}$ inch layer of dry, still air between—a perfect non-conductor—a transparent blanket—takes the place of mats and boards.

The saving in time and labor

Sunlight Double Glass Sash will pay for themselves in a single season. They never need covering—and therefore save half the time you have to give to single glass sash in covering and uncovering—in watching them on frosty nights.

Earlier, Stockier Plants

Under Sunlight Double Glass Sash the plants get all the light all the time. Every grower will see at once the value of the earlier, stockier plants resulting. Your crops will mature weeks ahead of the grower's who uses single glass sash—and you will get the benefit of the high prices in the early market.

Here is what one grower says

Harry S. Walker of Terre Haute, Ind., grew cabbage, tomatoes, eggplants and mangoes under Sunlight

Sunlight Double Glass Sash Co.

Double Glass Sash last season. The minimum thermometer was 15 below zero. No plants were injured. He says in part: "Plants grown under single layer sash were not to be compared with mine".

Agents wanted: A liberal commission to responsible agents where we have no agents now. Write us for details.

Get our free catalog today— It contains the details of this new invention for hot-beds and cold-frames, and testimonials from well known growers all over the U. S. who have used Sunlight Double Glass Sash successfully under all weather conditions. Use the coupon at once and get this interesting book free.

Send 4 cents in stamps for a valuable booklet on hot-bed and cold-frame gardening by Prof. W. F. Massey. There is no higher authority in the country. If booklet is wanted mark a cross (X) on square in coupon and enclose 4 cents in stamps.

Harrisburg, Pa.

Business is rather quiet at present. The feature of the past week was the convention of the Association of Park Superintendents. This city like nearly all state capitals, is dull after the statesmen go home. At the capitol grounds and greenhouses there are fine features in horticultural work. The parks are also a fine feature of the city at this season.

NOTES.

J. A. Kepner has sold his retail store on South Market square to Wm. W. Walmer and will hereafter devote his attention to his greenhouses and his store at Steelton.

Charles Uttley, who has for the past five months been suffering from inflammatory rheumatism is now much improved and attending to business.

Albert Abdenroth, who has two nice greenhouses on Briggs street, intends in the near future to erect two more.

C. L. Schmidt is doing a prosperous business at his Third street store.

Curved Eave House at Hartford, Conn.

One of those three compartment Curved Eave layouts, with the workroom "jogged in" and a lean-to on the south side of it.

Such an arrangement overcomes a good bit of the shade cast by the workroom when attached in the usual way. You also gain additional room and secure a decidedly attractive effect.

We finished this one last fall, for Prof. Jacobus, at Hartford, Conn. Alfred Cevalius is the gardener.

Our gardener friends are invited to send for our Curved Eave circular. Some of the houses are illustrated in three colors. This one is fully described.

To Be Done Now.

IN THE GREENHOUSES.

Have everything in readiness for sowing the early mignonette and sweet peas for early winter flowering.

In spite of all that has been written on the subject few growers are awake to the fact that clear water, vigorously applied, is still the best antidote for red spider.

The young American Beauty rose stock must be freely watered. After the roots have obtained a good hold on the soil they are easily kept too dry especially where heavy spraying is not practiced.

In pruning holdover stock of tea and hybrid tea roses remove all green, undeveloped wood and old, black, useless shoots, cutting in the good wood to plump eyes.

Never try to hurry Begonia Gloire de Lorraine and similar varieties in hot weather. Give them their own time and they will grow freely a little later.

Plant up old stock plants of poinsettias for cutting flowers from at Christmas if these are in demand.

Repot *Cattleya gigas* before the roots at the base of the new pseudobulbs have made much progress, preferably before they start at all.

Geranium cuttings from indoor plants root better indoors; those from outdoor stock root better in the open.

Cucumbers that have been fruiting all season will probably be about ready to come out and make room for new stock previously prepared.

Tomatoes fruiting heavily will have to be heavily fed with liquid manure or topdressed with very rich soil and watered freely.

String the young smilax beds when the plants have thickened out sufficiently at the bottom to throw up good strong shoots in plenty.

OUTDOORS.

The earlier the soil pile is started the better, as there will be plenty of work for the teams later.

Look over the shrubberies and remove any stock shoots that may be starting from grafted shrubs or trees; also any strong shoots of elder or other weedy shrubs that may be crowding better things.

Any new sod laid where grading has been in progress should be freely supplied with water daily until again established.

Heavy thunderstorms may be expected at any time. See that all drainage pits near gravel walks are kept clear.

Clear off useless cabbage patches and plow the leaves under. If left standing they form good breeding quarters for the white butterfly grubs which are always sufficiently plentiful.

Feed the roses where necessary and endeavor to get the growth of the ramblers well ripened by thinning out old and superfluous wood and taking just the tips off the new shoots.

Save Money by Using DAVIS' COMBINATION Check and Globe Valve

Better than any other check valve for any purposes but especially adapted for use on pipes leading to steam boilers and from heating pipes to return pipe. This combination valve takes the place of two valves, a check valve and a globe valve, and gives much better satisfaction; making simple and short connections, saving valves, nipples, labor and money. Send for descriptive price list.

W. B. DAVIS, Aurora, Ill.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,**

and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

A. J. GUTTMAN. President and General Manager.

Floriculture in Spain.

Consul Robert Frazer, Jr., furnishes the following information concerning the cultivation of flowers in Valencia: "The city of Valencia is proverbially noted for the abundance and variety of its floral products. There are about 80 cultivators of flowers for sale, with gardens of one-fourth of an acre to two acres in extent. The great ease with which flowers are raised appears to militate against careful cultivation and scientific selection, which produce such marvelous results in countries less favored by climatic conditions. Nearly all the surplus flowers grown here are consumed in Madrid, although Barcelona and a few important cities of the interior also furnish large orders for the celebration of religious, civic, and artistic festivities, so that the demand is quite equal to the supply. Very little capital is employed in

the trade, and probably the greatest drawback to the development of the industry is the slowness of transportation facilities by sea and land, and the total lack of cool transport cars so essential in hot countries, for the delivery of cut flowers in a fresh crisp condition over long distances.

"Although there are no florists here accustomed to international correspondence, the addresses of two leading cultivators are herewith transmitted. [On file in the bureau of manufactures.] The flowers most cultivated here are roses, pinks, tuberose, wall-flowers, violets, chrysanthemums, hyacinths, jasmynes, and dahlias. Many of these are in season the whole year round in limited quantities, but the natural season for roses is from September to April, and for pinks from March to May. Roses are always obtainable, but those raised under the subtropical sun of the summer months,

San Francisco.

Considering the fact that we are now launching into another summer month, the retail business has been fairly good. However, there is still an abundance of outside or garden flowers to be had, and consequently the cut flower trade has diminished to a considerable extent, but, on the other hand, there has been a good demand for funeral work recently which has placed the week-end business in a position to reach a very high mark as far as sales are concerned. As is generally the case when business is brisk, stock is scarce, and that condition of affairs prevailed in the market last week. There were very few good carnations or roses brought in by the growers, and those that were sent in commanded a good price. Lillies are bringing from \$2.50 to \$3 per dozen wholesale. Sweet peas, although poor in quality, are being sold at 60 cents per dozen, and asters from 7½ to 10 cents per dozen.

The retailers and growers of this city gave a picnic July 24, at Camp Taylor, under the auspices of the Pacific Coast Horticultural Society. An energetic committee, under the leadership of V. Matraia, president, and Frank Pelicano, chairman, made this outing one of the most enjoyable affairs ever given by the society. It had more the appearance of a large family gathering than a picnic, for every one who attended was made to feel that he or she was not a stranger in a strange land, but a most welcome guest. After a nice lunch was served by the committee, dancing and other outdoor sports were enjoyed for the balance of the day. Another reason for making this day eventful to those engaged in the flower business was the fact that the retail stores in the city were closed, with a few exceptions, all day in order that the proprietors and clerks might share the many advantages derived from such an outing. The retail stores have previously kept open the full seven days of the week, but a movement is now being made by the larger stores to close their establishments every Sunday at noon.

China Asters.

The China aster, which has come into prominence in comparatively recent years, is closely related to the chrysanthemum, and, as its name implies, is a native of China. It was originally single flowered and of limited range of color—blue, violet, and white—but under cultivation it has been made to assume a great variety of forms and colors, rivaling the chrysanthemum in these respects, although the aster has not been developed to the size of the larger varieties of chrysanthemums and has not yet been made to show the brilliant shades of yellow which are so prominent in certain of the varieties of the latter flower. In a bulletin of the Cornell Experiment Station, L. H. Bailey states:

"The China asters are amongst the best of all the annual garden flowers. They are of the easiest culture, most free of bloom, and comprise a multitude of forms and colors. They are therefore admirably adapted to profuse and generous effects in schemes of planting. They are also worthy of wide attention because they are adapted to many of the purposes for which chrysanthemums are grown, and they can be raised to perfection wholly without the use of glass. They attain their best in the decline of the season, from late August till frost, at a time when many of the annuals and the greater part of the perennials are spent and gone. No garden flowers carry such a profusion of bloom and color down to the very closing in of winter. The aster border still had blooms when the snows fell in November, and when even the wild golden-rods had waned and died."

The China aster is an annual and especially effective in borders. It grows well in almost any soil, but prefers a rich, moderately moist, but well-drained loam. It responds generously to liberal fertilizing. Recently there

has been a quite general and widespread failure in successfully growing the China aster, owing to various diseases and insect pests. R. E. Smith, of the Massachusetts station, has been studying this subject and finds among the more important troubles of asters a stem-rot disease or wilt, which is characterized by a wilting and final dying of affected plants, accompanied by a discoloration and rotting of the stem just at the surface of the ground; a yellow disease, which appears as a spindling yellow growth of the branches and leaves and a peculiar abnormal development of the flowers; and root lice, which cause the plant to stop growth and finally wilt and die. In such cases the roots are found to be covered with masses of small bluish-colored plant lice.

"The stem rot or wilt, although first showing itself at any time during the plant's growth, appears to be contracted only in the seed bed or pricking-out flats. Both this disease and the root lice may be avoided by proper methods of cultivation. For the yellow disease no treatment is known. None of these troubles can be remedied after they have once appeared."

Based on the results of his work, Mr. Smith gives directions for growing asters, applicable more especially to regions north of southern Pennsylvania, as follows: "Start your own plants. Seed planted as late as June 1 will give an abundance of bloom before frost. Procure seed directly from a reliable seedsmen. It costs no more and is much more liable to be fresh and true to name. Sow the seed in the open ground at any time after the ground gets into good condition, in good soil where asters have never grown before. Fall sowing outdoors may also be practiced. For very early flowering sow in cold frames or in the greenhouse, but this, especially the latter, is much more liable to produce stem rot. Avoid at all times the use of soil where asters have grown before, especially

where the stem rot or root lice have occurred. Prepare the permanent bed by working in a liberal dressing of barnyard manure during the previous fall and a light application of any good commercial fertilizer in the spring. If this is not practicable, remember that as a general principle the richer the soil the better will be your asters. Plant if possible in moderately moist soil. This will give better growth and less trouble from grubworms."

As to varieties of asters to grow, Mr. Smith says: "Asters may be classed into early, mid-season, and late, coming into bloom ordinarily about July 20, August 15, and September 1, but varying, of course, with the time of planting. The Queen of the Market, in various colors, is the standard early variety, together with the similar Queen of Spring, Queen of the Earlies, etc. The recently introduced Tom Thumb Comet or Poodle is also worthy. Of the mid-season the Victoria, Peony Flowered Perfection, and Giant Comet are best known, but by no means include all the best kinds. The new California Branching Comet is especially striking, and many others might be mentioned. Of the late varieties Semple's Branching stands pre-eminent as one of the finest of asters, especially for commercial purposes. The pink Mary J. Semple is considered by many the finest of all asters. It is with difficulty that such a list as this is brought to an end, on account of the many beautiful kinds left unmentioned. The dwarf varieties are numerous and odd, but of no great value for cutting."

NATCHEZ, MISS.—R. C. Taylor of the National cemetery is just getting around again after a long and painful illness caused by pricking his finger with a rose thorn and leaving it uncovered. Mr. Taylor writes that the finger is still stiff and he fears he will have to have it removed.

Gladiolus Brenchleyensis.

Regarding the introduction to commerce of this popular gladiolus, George Bunyard, of the Royal Nurseries, Maidstone, writes to say that he noted a statement in a contemporary recently to the effect that enquiries have been made respecting the origin of Gladiolus Brenchleyensis at the village of Brenchley in Kent, but no particulars could be gleaned. Mr. Bunyard therefore wrote as follows: "In reference to your note as to origin of this gladiolus, allow me to say that over 50 years back, my father purchased bulbs from the raiser, a Mr. Hooker, of Brenchley, Kent, who raised it from Gandavensis. I can well recollect selling them at 2s. 6d. each. We raised a big stock the same year. Mr. Youell, of Yarmouth, called on his round, and we sold him a quantity, which, in his sandy soil, soon enabled him to flood the country with it." Mr. Bunyard now informs us that he believes that Mr. Hooker was once a nurseryman. Mr. Bunyard knows nothing about Mr. Youell's foreman, as mentioned in our note upon the newly-established American Gladiolus Society, but he well recalls Mr. Youell himself, a cheery, short and thickset man. Gladiolus Brenchleyensis, writes Mr. Bunyard, is still one of the most reliable sorts for massing, being less liable to disease.—Gardeners' Chronicle.

The Lath House.

Presuming that sundry lath houses are in the making, it is deemed seasonable to commence advice as to what to do therein. July should be hot, if precedent counts for anything in weather prophecy, and ferns and other things in the lath house should be in full growth; frequent and regular waterings are therefore in order, particularly with pot plants and hanging baskets. Never let ferns, especially, suffer for water. If a hanging basket gets dry, soak it for half an hour in a tub of water, for spraying with the hose will never wet it up. Go over ferns carefully and remove old or inferior fronds, but never take off all the fronds at the same time, as this is a shock to the plant that only the maidenheads seem to be able to stand. With the maidenheads a close hair-cut once in a while seems to have a tonic effect.

Use a little liquid fertilizer once a week. It is too far along in the season

The "Meyer Green Silkline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb.

Mention the American Florist when writing

for repotting, but begonia cuttings strike well now. One of the latest wrinkles for growing maidenhair is a good one. Take an olla and set it in a hanging basket, large enough to leave a 2-inch margin all around, fill between with leaf mould and sphagnum moss, and plant the ferns in tiers all around. If the basket won't reach to the neck of the olla, use wire to supply the deficiency. Hang up and keep the olla full of water. The seepage through the sides and bottom will preserve a moist condition with perfect drainage, that the ferns love. The suggestion to use a hanging basket is made, because to cover the olla satisfactorily with loose wire or wire netting, is no easy job for an amateur.

If any of the pot plants seem puny and yellow, see if the drainage has not been clogged, and if it has, repot. In such a case it is well to carefully wash all soil from the roots, as there is sure to be a sourness there. This lack of proper drainage is a fruitful source of trouble with potted plants. If you have troubles in your lath house, write to California Garden and get its help.—California Garden.

THE ROCHESTER CONVENTION

Continued From Issue of August 20.

Thursday's Proceedings.

Owing to the number of subsidiary meetings being held on Thursday morning before the regular convention session, it was about noon before the latter got under way, but under the energetic handling of President Pierson business was rapidly transacted. The first matter taken up was a report from Past President Valentine giving the results of the meeting held by the retailers in perfecting their organization. They had not been able to conclude their work, and notice was given of another meeting at two o'clock at the Seneca hotel. Mr. Valentine reported everything moving favorably, however.

The next matter to come before the general convention was an invitation from James Vick's Sons to visit their seed farm and trial grounds, and details of the trip there were announced for Friday morning early by special train, returning in time to allow all to participate in the other pleasures planned for the day. The invitation was accepted with thanks.

National Flower Show.

By request Past President Stewart read the action taken by the executive committee placing at the disposal of President Pierson for the benefit of the next National Flower Show an unexpended balance of \$400. By unanimous consent the action of the executive committee was ratified and confirmed.

J. K. M. L. Farquhar submitted a report of progress by the committee on the next National Flower Show, and incidentally referred to the sacrifice that the Massachusetts Horticultural Society is willingly making in not holding during the same year its own usual spring exhibition from which it usually realizes a handsome net return. The report was received and filed, and Mr. Farquhar and his committee were thanked by President Pierson for their able work thus far. The action of the executive committee recommending

that a special meeting of the society be held during the time of the National Flower Show was read by the president, and on motion of Mr. Valentine said action was confirmed. The following resolutions were moved by Mr. Valentine and unanimously adopted.

Resolved, That when this meeting adjourns it shall adjourn to reconvene in the city of Boston on the twenty-sixth day of March, 1911.

The officers nominated yesterday were by unanimous vote respectively and duly elected to serve for the ensuing year, and each and all of them made appropriate responses when called on, voicing their appreciation of the honor conferred.

Amendments to Constitution.

The matter of amendments to the constitution was taken up, and the proposed amendments to Article II, as set forth on the programme, due notice of which had previously been given, were opposed by Messrs. O'Mara, Hill, Ball and Stewart, and upon motion of the latter were indefinitely postponed. Previous to this disposition of them their adoption was warmly urged by Past Presidents W. R. Smith and J. A. Valentine, but the tide in opposition was too strong to be overcome even by such persuasive speakers. The proposed amendment to Article III took the same course.

The proposed amendment to Article V as to time of meeting was discussed by Messrs. Valentine, Dean, O'Mara, Kasting and others, and on motion of Mr. Kasting, seconded by Mr. O'Mara, this proposed amendment was laid on the table for one year, in order that some experience might be had as to the probable number who would come to a March meeting. Secretary Dorner stated that out of some 615 replies received to postals sent out on this subject, 369 voted in favor of summer meetings, 238 opposed, and eight were indifferent.

Mr. Kasting stated that although he favored spring meetings he would wil-

lingly abide by the majority opinion.

Action as to proposed amendment to Article IV was on motion indefinitely postponed.

The following resolutions offered by Prof. F. W. Dick, of Cornell University, were unanimously adopted:

Whereas, It is the purpose and policy of the Society of American Florists and Ornamental Horticulturists to encourage experimental investigation in horticulture at the state experiment stations, where this subject has been much neglected as compared with other branches of horticulture; and

Whereas, The florists of the state of New York will this winter make an effort to secure an appropriation of \$50,000 from the state for a range of greenhouses for experiments in horti-

be read by the secretary, but the point of order being raised by Mr. Valentine that the action sought to be taken was outside of the province of the society, the chair ruled against the point taken, and upon an appeal being suggested, on motion of Mr. Cowell, the communication was laid on the table.

The following were appointed as committee on resolutions: W. F. Sheridan, J. K. M. L. Farquhar and P. Welch, to report at the evening session Thursday.

In making a response at this time to calls for a speech, President-elect George Asmus said that he had cheerfully accepted the honor and the duties of the position of president in the

served to get it. He felt that Mr. Asmus would meet every expectation and do honor to the society. He assured his hearers that Maryland would give them all a warm welcome at Baltimore and they would enjoy the time of their lives.

Past President Stewart followed with an enthusiastic and cordial invitation to all to come to the National Flower Show at Boston, for Boston has waked up as may be seen by its three solid carloads that came to the present convention.

Treasurer-Elect Kasting expressed his pleasure at being regularly elected; his previous part term having been a hold-over, he had not felt that he was meeting the approval possibly of all the members until he had the evidence of it to his great gratification in his present election.

Secretary Dörner said little but what he said meant much for his devotion to the interests of the society during his new term of office.

School Garden Movement.

At the closing session of the convention on Thursday night, President Pierson in the chair, the first paper read was by W. B. Du Rie, Rahway, N. J., on "The School Garden Movement." The chair announced that owing to the continued illness of John Dunbar, assistant superintendent of parks of Rochester, it was still impossible for him to deliver the illustrated lecture that he had contemplated giving on "Trees, Shrubs and Flowering Plants," but that Mr. Dunbar hoped that he would be sufficiently recovered on Friday morning to receive any members who desired to visit Highland park, and that he extended a cordial invitation to all the friends to come down and meet him at the park pavilion Friday morning between half past eight and nine o'clock, and he would be glad to show them around the park, which is one of the most beautiful in any city.

In reference to the paper by Mr. Du Rie, Mr. Dean declared that in passing through the state of New York he was pleased to note that a number of schools were interested in the school garden work and he had hardly seen a window in a school building that was not decorated either with individual plants, or groups of plants, or flower beds in boxes, and very often he could see places where perhaps a flag-stone had been taken up, fresh soil put in and plants set out, showing that the movement was proceeding in the right direction.

President Pierson followed with a characteristic speech delivered in his forcible and pleasing manner. He urged that the study of nature as it can be carried on through the school garden is a practical form of education which is another encouraging evidence that modern education is leaving the old beaten track and getting away from the former idea that education should be entirely classical and literary and that the only avenue for man's intellectual activity lay in one of the three professions, the ministry, medicine, or law. It is now recognized that education should rather seek to broaden and beautify the lives of all by furnishing to every youth a practical knowledge of some calling which would fit him not only to earn his livelihood

PRESIDENT PIERSON

And the New Gavel Presented to Him by Patrick O'Mara, on Behalf of the New York Florists' Club, at the Rochester Convention.

culture at Cornell University; therefore be it

Resolved, That the society strongly endorses this effort, and urges its favorable consideration at the hands of the legislature, and pledges itself to use its influence in every possible way to further the movement.

Mr. Dean hoped that copies of the resolutions would be sent to each of the New York state senators and representatives in the legislature, which was agreed to.

A communication asking the adoption of resolutions endorsing the movement to memorialize congress to fix the location of a World's Panama exposition at New Orleans in 1915, was about to

firm confidence that he would receive the loyal support of the many sound advisers to whom he would look for counsel and assistance. He declared that every man that loves flowers may be expected to be a good man, and his association with the members of the S. A. F. had proved such to be the case in the past and he believed would continue in the future. In concluding he made a strong plea for a full attendance at the Baltimore convention in 1911.

Mr. Vincent told how the Baltimore brethren had worked early and late to secure the convention, and what they would do to prove that they had de-

THE LADIES' AUTOMOBILE PARTY AT THE ROCHESTER CONVENTION.
THE SOCIETY OF AMERICAN FLORISTS' AT THE MANITOU OUTING, ROCHESTER, N. Y., AUGUST 19, 1910.

but to get the best out of life by supplying new avenues of enjoyment and of realization of the highest conceptions of life. This is the more necessary because 95 per cent of all the children attending the public schools never pass through the high schools or go to college. In developing the youth of the country the school furnishes the most solid corner-stone for a free government, and in this form of practical education the school garden and all that it implies will perform no humble part. President Pierson appealed to the American florists to come up to their full responsibility and to leave no stone unturned to foster this movement in their communities, and if necessary to even donate flowers in order to awaken a love for them in this way in the young. A hearty vote of thanks was at the suggestion of President Pierson tendered to Mr. Du Rie for his valuable and interesting paper.

Benjamin Hammond, of Fishkill-on-Hudson, N. Y., chairman of the committee on school gardens, presented his report showing the substantial work being done in this direction. Following the report Mr. Barry made a ringing speech in support of this movement. He referred in a feeling manner to the many parts of the country in which the school-houses and school-yards are too often sadly neglected and no effort made to render them pleasing and attractive. He felt that much of the responsibility for this might be fairly laid at the door of the florists and nurserymen of the country, who of all men were best fitted by the nature of their occupation to realize the uplifting effect of flowers in bloom upon the susceptible heart of the child and the good results that would follow early imparting to the young a knowledge and love of trees, flowers and shrubs.

There is something more in life than merely the three R's, but in order to give to the adult the power to appreciate the beauties of nature a love of these things must be implanted in early life, and it is in the school-room and school-yard that this taste will be acquired, fostered and cultivated; and unfortunately our present arrangements do not in many communities afford opportunities for that thing at all. He hoped the florists of the country would push the work still more vigorously and the result would be of great benefit to the whole nation. Those desiring to contribute to the movement might plant trees and shrubs and make every school garden a thing of beauty and attractiveness which would have a reflex influence upon the whole community. J. Otto Thilow desired to add his contribution to the enthusiastic plea of Mr. Barry, and he thought that those of the teachers who have showed an interest in this movement should have the warm commendation and endorsement of the Society of American Florists. Mr. Thilow was followed by other members in the same strain.

President Pierson appointed J. C. Vaughan, Chicago, Theo. Wirth, Minneapolis, H. C. Irish, St. Louis, P. Holm, St. Paul, and H. E. Philpott, Winnipeg, delegates to the Conservation Congress at St. Paul, September 5-9. A letter from Robert Kift, Philadelphia, was read, calling attention to

the work of Miss Anna Jarvis in the founding of Mother's day, and on the motion of Wm. R. Smith, Washington, resolutions endorsing Miss Jarvis' work in this connection were adopted unanimously.

Experiment Station Work.

Owing to unavoidable circumstances, W. N. Rudd, former secretary of the organization, was unable to be present, and his paper on "Value of Experiment Stations to Ornamental Horticulture," was read by Secretary Dorner. It was pronounced by Mr. Dean one of the best papers that had ever come before the society. Secretary Dorner stated that he made it his business to ascertain what the Illinois experiment stations were doing. He found that except in a few in-

Patrick O. Mara

Nominating George Asmus for the Presidency.

stances they were doing absolutely nothing in this direction, but they would be only too glad to attempt more if they were given the proper help by the legislature, which could be brought about through the efforts of the florists, who should be vitally interested in this work. The experiment stations demand the co-operation of the florists. Through the efforts of the Illinois State Florists' Association they had induced the state of Illinois to erect four good greenhouses of a superior quality of construction, and with their aid through the erection of those greenhouses at least one experiment station proposes to prove to the florists of that state what it can do.

Presentation to President Pierson.

E. G. Hill desiring to bring up a matter of interest to all, obtained the privilege of the floor, and at once elicited the attention of the audience by saying that he had been handed

by a lady this conundrum: "Were cacti grown in the Garden of Eden?" A technical discussion was about to be precipitated on this head, which was dexterously sidetracked by Mr. Hill, who continued as follows:

We will not attempt to answer the above question just at this particular time. Some one has said that truth is progressive, but that all things have their season, and the things that were at one time proper might be later on called in question. So we find that the age develops a thing that other age takes up, and again that a succeeding age may entirely abandon or drop things that were practiced in former times. This pertains very aptly to floriculture as well as to men. The lady also said on this card, "The best goods are put up in small packages, and it is true that the things that are of real interest and value are still smaller than small packages." I have about concluded that the lady was right; but I said to her, "What are you driving at? I would like a practical illustration." "Well," she said, "your president is a practical illustration of the intrinsic value of a real good thing done up in a small package." (Laughter and applause.) I said to her, "What about Foley, he is majestic looking, and Traendly, he is a rotund fellow, you know? What about them? That congressman from Buffalo, W. F. Kasting." I said, "what about him?" "Oh," she says, "they are only good for ballast!"

Now I did not dare to ask her where Bob Craig and myself came in for fear she would say, "Well, you were something some time ago, but you are has-bens." I know that is what she thought, but she was too modest to tell me.

Now the other day in England that brilliant Welshman, Lloyd George, was making a speech in a conservative district, and the conservative people had placarded the town with a dwarf about four feet high. So when he got into the meeting place they began to hoot and yell, "Pigmy!" and one thing and another. But he said, "Give me your attention just one minute." They quieted down and he said, "Now I will tell you, your conservative party measures the man from his feet up to his chin and stops there; but the party to which I belong measures him from the chin up to the top of the head." And that is just what the florists of this association did this past year, and I tell you we were right in our measurement, for I think our president has accomplished wonderful things. I tell you he has set us a shining example of how to do things. He has got there with the goods. Look at the work he has done in regard to the plans for our rational show; look at the splendid outcome of this meeting here, and the example he has given of his vitality, his energy and his stick-to-itiveness of purpose. I think we are all of us the better for this stimulating example. I will tell you that some of the presidents that are coming along to follow in his foot-steps will have to get into a pretty good gait to keep up with him.

There is a little boy out in Indiana where I come from—we produce nice boys out there, and girls too—and this little fellow got very ambitious to go into business. He wanted to make

TRADE EXHIBITION AT THE ROCHESTER CONVENTION.

Giving Partial Views of the Exhibits of Kroeschell Bros. Co., Chas. Eble, Stumpp & Walter Co., Geo. B. Hart, Pennock-Meehan Co., Henry A. Dreer, Conard & Jones Co., Geo. M. Garland, Geo. Giatras, F. R. Pierson Co., E. R. Fry, Robert Craig Co., H. Bayersdorfer & Co., Reed & Keller, Schloss Bros., Brown Bros. Co., John Lewis Childs, Vaughan's Seed Store, Vick & Hill Co., James Vick's Sons, Crowl Fern Co., Arthur Cowee, Shaw Fern Co., Ellwanger & Barry and Kessler Bros.

some money. He had saved up quite a number of dimes and quarters and half dollars, and somebody told him that the chicken business was a good thing for him to embark in. So he went at it. He did not give the subject quite enough thought, and he bought a whole lot of bantams. Finally he had a couple dozen of them. He went in there every morning to gather the hen fruit, and the little fellow was disgusted with the size of the product, the smallness of the eggs. He scratched his head and thought that would not do; so he went into the house and got out an ostrich egg that had been a parlor ornament for a number of years and hung it up in front of where these banties were performing service, and he hung this sign beneath it: "Look at this, and then do your best!"

This sign, "Follow the example of Frank Pierson," is written all over this hall and on the pages of our horticultural papers, and I tell you to beat it some of the fellows will have to exert themselves. I know that our friend out in Chicago will read the sign, and will get there too. Now this body of people—you are good looking, every one of you, especially the ladies, you are kindhearted and thoughtful—so this body of people, Mr. President, have thought they would like to give you a little momento as an expression of their great appreciation of your services and the things that you have done. We hope you will divide or share this with Mrs. Pierson, and some of us will be around Tarrytown to help use some of these knives and forks. Please accept them on behalf of your friends, the members of the Society of American Florists and Ornamental Horticulturists. (Applause, three cheers and handkerchief salute for "Pierson.")

RESPONSE BY PRESIDENT PIERSON.

Ladies and Gentlemen, Friends All: I did not think that I occupied so large a place in your hearts. As years go by I value the friendships that have been made in this association. I think as we become older we are apt to do that. The friendships that I have formed in the Society of American Florists have become very dear to me. As an illustration I want to call the attention of this association to my friend over here, W. R. Smith. I want to tell you he is one of the men I love and rely upon, one who has the interest of this association very close to his heart. If I wanted any further testimonial of your friendship, or any further inducement tonight to do anything more for you in the future than I have in the past, certainly this would do it.

I was very much embarrassed, however, by the fulsome words of praise from Mr. Hill. I am a modest man and would rather do the work than to receive the praise or a presentation; but I certainly tonight, ladies and gentlemen, wish to tell you that I value exceedingly this expression of your good will, although even it cannot add anything to the desire I have to advance the interests of this association, or bring it closer to my heart. I shall try to promote its interests as long as I live, to the utmost of my power. I do not think I can fittingly voice to you tonight all that I feel at this time. Words fail me to make to you

an adequate expression of my feelings. I hope you will take the wish for the deed. (Applause.)

In the absence of John P. Cowell, the official botanist of the society, his report was considered read and ordered printed in the proceedings. Walter F. Sheridan, chairman of committee on resolutions, presented the following as its official report, which was unanimously adopted by rising vote, viz.:

Resolutions of Thanks.

We, the members of the Society of American Florists and Ornamental Horticulturists assembled here in Rochester, appreciating the splendid wel-

P. J. Foley

Singing "My Maryland" at the Rochester Bowling Tournament.

come we received, and recognizing the pains taken to make our sojourn here a comfortable and enjoyable one, take this opportunity to return thanks for the splendid facilities afforded us for our convention; therefore be it

Resolved: That the thanks of this society be tendered to the Rochester Florists' Club for the great work which it has done in connection with this convention; and be it further

Resolved: That the thanks of this society be tendered to his honor, Mayor Edgerton, the chamber of commerce, Fred W. Vick, vice-president of the society, Charles H. Vick, superintendent of the exhibition, and to the ladies' committee of the Rochester Florists' Club; and be it further

Resolved: That in consequence of the hearty co-operation of the above mentioned and other persons, the society recognizes the present convention as one of the most successful in its history.

WALTER F. SHERIDAN,
JOHN K. M. L. FARQUHAR,
PATRICK WELCH,

(Signed by all of the committee.)

The convention now finally adjourned. A pleasing post-convention event was the presentation at about 10:30 p. m. Thursday to Chas. H. Vick, superintendent of the exhibition, of a magnificent gold watch, the gift of the various exhibitors. The presentation speech was made in a felicitous manner by Harry A. Bunyard, who devised an ingenious opening in the way of a mock complaint, accusing Mr. Vick of sundry derelictions in duty as superintendent, and when he had succeeded in arousing Mr. Vick's just indignation at such treatment, he suddenly steered his discourse in the opposite direction and overwhelmed him with commendations, and finally threw the gold watch at him, so that Mr. Vick passed through all the gamut of the cold, sleet and snow of winter to the blooming flowers of spring, the victor's crown of roses, the esteem of his friends. Mr. Vick's confusion and blushes may be better imagined than described.

Florists' Hail Association.

The annual meeting of the Florists' Hail Association was held in Convention hall, Rochester, N. Y., August 18. Officers were elected as follows:

E. G. Hill, Richmond, Ind., president.
John T. Temple, Davenport, Ia., vice-president.

Joseph Heacock, Wyncote, Pa., treasurer.

John G. Esler, Saddle River, N. J., secretary.

J. C. Vaughan, Chicago, and H. H. Ritter, Dayton, O., were elected directors.

Two assessments will be levied, the first one November 1, 1910, and the second April 1, 1911.

An amendment to come before the association next year will change Section 1, Article 5, to read "10 cents per 100 square feet" instead of eight cents.

Florists' Telegraph Delivery Association.

A meeting of retail florists was held in Convention hall, Rochester, N. Y., Thursday forenoon, August 18, to perfect the organization of a delivery association. After considerable discussion the meeting adjourned to meet at the Seneca hotel at 2 p. m., when the organization was named the Florists' Telegraph Delivery Association and the following officers were elected:

J. A. Valentine, Denver, Colo., president.

W. J. Palmer, Buffalo, N. Y., vice-president.

W. L. Rock, Kansas City, Mo., treasurer.

H. B. Dorner, Urbana, Ill., secretary.

Directors: One year, A. B. Cartledge, Philadelphia, Pa., W. F. Gude, Washington, D. C., and Fred H. Meinhardt, St. Louis, Mo.; two years, Philip Breitmeyer, Detroit, Mich., Ernst Wienhoeber, Chicago, and Geo. Asmus, Chicago; three years, W. L. Rock, Kansas City, Mo., John Bertermann, Indianapolis, Ind., and Irwin Bertermann, Indianapolis, Ind.

At the conclusion of the afternoon session of the retailers, they adjourned sine die, after a unanimous vote of thanks to President Valentine for his arduous work in working out the plan of organization, the articles constituting the by-laws were adopted in toto as presented, and it was understood that Mr. Valentine had thought them out carefully in all details.

Mrs. John V. Phillips, President.

Mrs. Chas. H. Maynard, Secretary.

Mrs. Albert M. Herr, Treasurer.

OFFICERS OF THE LADIES' SOCIETY OF AMERICAN FLORISTS.

Ladies' Society of American Florists.

The following new members have been added to the Ladies' Society of American Florists:

Mrs. Lincoln Brown, Cleveland, O.; Mrs. D. W. Davis, Berwick, O.; Mrs. C. Arnold, Astoria, L. I.; Mrs. G. Gasseau, Jersey City, N. J.; Mrs. H. H. Kuhlmann, Houston, Tex.; Mrs. J. H. Playdon, Andover, Mass.; Mrs. Palmer, Buffalo, N. Y.; Mrs. Walter Sheridan, New York; Mrs. Chas. Totty, Madison, N. J.; Mrs. J. L. Dillon, Bloomsburg, Pa.; Miss C. Elizabeth Freeman, Washington, D. C.; Mrs. Chas. J. Hewson, Buffalo, N. Y.; Mrs. Wm. H. Knebler, Brooklyn, N. Y.; Mrs. E. Kleinstark, Louisville, Ky.; Mrs. Harry Weston, Hempstead, L. I.; Mrs. J. A. Wollmers, Brooklyn, N. Y.; Mrs. J. H. Moss, Govanstown, Md.; Miss Ida May Keefe, Madison, N. J.; Mrs. S. N. Peck, Toledo, O.; Mrs. Schmutz, Flatbush, N. Y.; Miss Bertha Stuessy, Louisville, Ky.; Miss Clara Stuessy, Louisville, Ky.; Mrs. J. Austin Shaw, Brooklyn, N. Y.; Mrs. E. A. Schirapff, Scranton, Pa.; Mrs. Peter Benerlein, Elmhurst, L. I.; Mrs. Ella Grant Wilson, Cleveland, O.; Mrs. Stella M. Wilson, Brooklyn, N. Y.; Mrs. L. H. Brague, Hinsdale, Mass.; Mrs. Tracy, Wenham, Mass.; Mrs. Edward A. Feters, Detroit, Mich.; Mrs. Herman Komitsch, Secaucus, N. J.; Mrs. F. W. Bruenig, St. Louis, Mo.; Mrs. Albert Vick, Rochester, N. Y.

American Gladiolus Society.**FIRST ANNUAL MEETING AT ROCHESTER.**

The first annual meeting of the American Gladiolus Society was held August 15 at Rochester, President Hendrickson in the chair. The meeting was called to order at 10:30 a. m. Secretary Gage read the report and minutes of the organizing meeting at Boston which were accepted and ordered placed on record. The president's address, which follows, was adopted with applause and ordered placed on record.

PRESIDENT HENDRICKSON'S ADDRESS.

As the American Gladiolus Society was organized less than three months ago there is not much to report concerning the past, but the future is full of promise and opportunity if we seize it, for the signs of the times point to the ever increasing popularity of the

gladiolus. The society was organized at Boston, May 27, 1910, with about 75 members. It was agreed to hold the charter member list open until the August meeting, and through the activity of the members, we have been able to increase the number to 137, which we think is a very good showing, considering the fact that there are a multiplicity of kindred societies. The gladiolus is deservedly popular; for where can we find any flower that will yield more real satisfaction from every standpoint, whether handled by amateur or professional gardeners or wanted for garden decoration or church wedding? By the use of greenhouses and cold frames we now have blooms in the market from April until November. What flower will surpass it for keeping quality after being cut? Perhaps the orchid will rival it, but where we could have one vase of orchids, we can have many of gladioli, and as for colors we certainly can find every tint, shade and hue imaginable, both in solid colors, and all colors combined, which indeed gives it a place as the "orchid of the common people."

THE FUTURE OF THE SOCIETY.

While the main object may be to stimulate interest in this glorious flower, it seems to me that one of the most important things we can do is to assist our nomenclature committee in testing out at our trial grounds, so kindly offered by Cornell University, at Ithaca, N. Y., all varieties now on the market with a view to eliminating worthless and inferior sorts, reducing the number of named varieties to a reasonable number, prevent renaming varieties as far as possible and where synonyms are discovered, to observe the original name. As there are some 2,000 or 3,000 varieties now listed, you see the task is no easy one. I think if we can induce all growers to submit their supposedly new varieties to our society for examination or trial, and secure our certificate of merit before offering to the public we shall accomplish much, and reduce the multiplicity of varieties. The trade can assist very materially in this, if they will insist on

the society's approval of a variety before listing it in their catalogues. While it is true that much the largest number of named varieties now on the market are listed in foreign catalogues, which our society, perhaps, cannot control, still, at the rate that the growers of America have produced seedlings during the last few years, it will not be long before we will rival the European growers, so it behooves us to take up the work in time.

OLD STANDBYS.

It goes without saying that there are some very old varieties that are now surpassed in beauty that we will be a long time discarding, if ever, for the reason that they are so well known that the demand is very heavy. Take Ceres for instance, which at the time of its introduction was a real advance in whites; today there are white varieties that are far superior, yet the demand for Ceres, especially in Europe is enormous, and as a cheap variety is really satisfactory. The same is true of Isaac Buchanan, in the yellow section.

Our by-laws provide that we publish every three months a magazine called the "Progress of the Gladiolus." While I do not think we can give too much publicity to our favorite flower, yet I cannot see where we can get material enough for such frequent issues. However, I think it would be an excellent plan to issue a bulletin from time to time as opportunity presents itself, and I would like to recommend that a committee be appointed to take this matter up, and also to act as a general press committee to secure as much publicity for the gladiolus among periodicals as possible. I would also recommend that the society offer a prize of \$10 in gold for the best article for amateurs on "Gladioli," and \$5 for second best, the press committee to have this matter in charge and secure the publication of the article in as many papers as possible. I would also recommend that the society adopt a scale of points in judging new varieties, and to issue certificates of merit for meritorious varieties, and would

suggest that the present exhibition committee be empowered to draw proper rules to govern the awarding of certificates.

I am also convinced, if our society could make some uniform offer to local horticultural societies for best exhibits of gladioli at their shows, much interest could be stimulated, and if our finances would allow, I certainly would recommend the offering of cups, medals or some other valuable trophies, but I presume we will have to limit ourselves to ribbons, etc., if we do anything at all in this line at the present. I also believe it might be feasible for our Society to offer a cup for some special entry at our annual exhibition.

There are many ways that could be planned out for the advancement of our society, and our pet flower, but I believe you will agree with me that all of our plans will come to naught, if we do not put our shoulders to the wheel and do something, for after all, the success or failure of any undertaking depends upon the individual efforts of those interested. In closing, I wish to thank my associates in office for the splendid assistance rendered to me in my attempt to act as your president, and as the by-laws and constitution says I hold office until the 1911 meeting, I must ask your further indulgence, and trust that I may have your undivided support in an effort to at least double our membership within the next year.

I would also recommend that we call a meeting of our society at the time of the National Flower Show to be held in Boston, March, 1911, and that our exhibition committee be empowered to solicit trophies for an exhibition of forced gladioli, including the Colvillei type.

Short talks and discussions were taken part in by John Cavers, Oakville, Ont.; E. E. Stewart, Rives Junction, Mich.; J. C. Vaughan, Chicago; Arthur Cowee, Berlin, N. Y., and others. Ralph E. Cushman offered the following resolution: "That the recommendations of the president, as made in his address, be adopted, and the proper committee be appointed to carry the same into effect: The offering of a prize for article on amateur culture of gladioli, the appointing of a committee to make rules and a schedule of points for registering and certificating of new varieties of gladioli; the securing of a place on the schedule of the National Flower Show of 1911." Voted to adopt this resolution as a whole.

The financial secretary read his report, which was adopted and referred to the auditing committee. The auditing committee's report was read and adopted and ordered to be placed on record. The report of the treasurer, which was received too late to be audited, was referred to the auditing committee. The membership committee reported favorably a large number of applications for membership, and it was voted that these names be placed on the membership list. H. Youell's report as chairman of the exhibition committee was read and adopted. The report of Professor Judson, chairman of the committee on awards, was read and adopted and the committee was given a vote of thanks for its able and efficient work.

Papers by Maurice Fuld, of Boston, Mass., and Wilbur A. Christy, of Kins-

man, O., could not be read on account of the limited time allowed for the use of the assembly hall, but they were given a vote of thanks and referred to the bulletin committee. Mr. Christy gave a short but very interesting talk on "Gladiolus Breeding." H. B. Dörner, secretary of the S. A. F., addressed the meeting urging that the society affiliate with the national society. A suggestion by Mathew Crawford that the society print a pamphlet, setting forth the advantages and purposes of the society to be sent in catalogs and

J. A. Valentine.

Pres. Florists' Telegraph Delivery Association.

letters was referred to the press committee. Vice-president Cushman addressed the meeting very interestingly, advancing valuable suggestions and his manner of handling the subject in question was clear and right to the point. President Hendrickson appointed a press committee with the following members: H. Youell, Prof. L. B. Judson, L. Martin Gage; and re-appointed the present exhibition commit-

W. J. Pa'mer.

Vice-Pres. Florists' Telegraph Delivery Ass'n.

tee to serve at the next exhibition, which will be held in Boston next March at the National Flower Show of the S. A. F. On motion of Professor Judson the meeting adjourned.

American Rose Society.

MEETING AT THE S. A. F. CONVENTION.

On Thursday, August 18, the members of the American Rose Society met in Convention hall, to the number of 34. The meeting was called to order by the secretary, who stated that the annual year began July 1, but that according to custom the organization meeting had been held during the S. A. F. convention and the newly elected officers assuming control. August T. Poehlmann, of Morton Grove, Ill., was present as retiring president and William H. Elliott, of Brighton, Mass., assumed the chair.

The statement was made that the society had invested its permanent fund to the amount of \$3,000 in guaranteed mortgages at a rate of 5 per cent, dating from July 1, that there was a balance in the treasury of something over \$100 and that, up to that date, all bills were paid, with one exception, a matter of some \$9.20. The present executive committee is as follows:

Philip Breitmeyer, Detroit, Mich.; Peter Bisset, Washington, D. C.; William F. Kasting, Ellicott St., Buffalo, N. Y.; Wallace R. Pierson, Cromwell, Conn.; August T. Poehlmann, Morton Grove, Ill.; J. A. Valentine, Denver, Colo. Secretary Benjamin Hammond, Fishkill-on-Hudson, N. Y., and Treasurer Harry O. May, Summit, N. J., hold over and Adolph Farenwald, of Roslyn, Pa., is vice-president.

The chief matter of interest that came up before the meeting was the coming National Flower Show to be held in the city of Boston, the latter part of next March and to continue for one week. Frank R. Pierson, chairman of the National Flower Show, was present and submitted the proposition from his committee, which was for the Rose Society to adopt its schedule of prizes for roses in pots or tubs, to which they had allotted \$730 as premiums and for the Rose Society to, as usual, make up its own schedule for cut flowers and accessories, and that the National Flower Show committee would place at the disposal of the Rose Society \$1,000, as a premium fund, to which amount the Rose Society could add any further sum that it saw fit. The interest taken in the meeting was very considerable and after some discussion the following resolutions were offered and carried unanimously:

Wallace R. Pierson of Cromwell, Conn., moved the following resolution: "That the American Rose Society accept the \$1,730, offered by the National Flower Show committee and that the president of the American Rose Society shall appoint a committee to draft a schedule for the exhibition in connection with the National Flower Show."

This was followed by a motion made by Patrick Welch, of Boston, as follows: "That the American Rose Society guarantee payment of any premiums in excess of this amount which the committee of the American Rose Society shall deem necessary and that any funds which shall be added to this amount shall become an asset of the National Flower Show committee. The

following concerns pledged themselves to furnish exhibits and to do all in their power to make the coming exhibition a great success:

Poehlmann Bros. Co., Chicago.
William H. Elliott, Brighton, Mass.
Adolph Farenwald, Roslyn, Pa.
E. G. Hill, Richmond, Ind.
Lake View Rose Gardens, Jamestown, N. Y.
Erie Floral Co., Erie, Pa.
Joseph Heacock, Wyncote, Pa.
Bassett & Washburn, Chicago.
John H. Dunlop, Parkdale, Ont.
Waban Rose Conservatories, Natick, Mass.
F. R. Pierson Co., Tarrytown, N. Y.
Welch Bros., Boston, Mass.
Thomas Roland, Nahant, Mass.
The Montgomery Co., South Hadley, Mass.
A. N. Pierson, Inc., Cromwell, Conn.

Then Thomas Roland stated that the society would need some money to carry on this work a little extra than common and he offered \$25 for use to advance the general interest in the coming rose show. Then the following gentlemen offered for the use of the Rose Society, as the executive committee may deem fit, as follows:

August T. Poehlmann.....	\$50.00
William H. Elliott.....	50.00
William F. Kasting.....	25.00
William J. Palmer.....	25.00
A. N. Pierson, Inc.....	50.00
Waban Rose Conservatories.....	50.00
P. Welch.....	25.00
E. G. Hill Co.....	25.00

Mr. Farenwald made a very earnest speech in favor of making the premiums of such size as to bring out the largest display of cut flowers. It was then moved to adjourn with the best of good feeling.

BENJAMIN HAMMOND, Secy.

Additional Exhibits.

E. A. Beaven, Evergreen, Ala., moss.
The Chilton Co., Philadelphia, Pa., post cards.
A. Dietsch Co., Chicago, greenhouse construction materials.
Geo. Giatras, West Hoboken, N. J., Nephrolepis Giatrasii.
J. G. Harrison & Sons, Berlin, Md., trees and shrubs.
John C. Hatcher, Amsterdam, N. Y., Asparagus Hatcherii.
Hilfinger Bros. Pottery, Fort Edward, N. Y., pots.
Illinois Heater & Mfg. Co., Chicago, self-watering flower boxes.
J. E. Matthewson, Sheboygan, Wis., carnation support.
Thos. Pegler, Boston, Mass., greenhouse bracket.
Elmer D. Smith & Co., Adrian, Mich., chrysanthemums.
J. J. Williams, Utica, N. Y., florists' supplies.
Andrew Wilson, Chatham, N. J., leaf and flower stemmer.

Rochester Group Photographs.

The Rochester group photographs will be supplied by the Rochester Photo Co., 21 Bly street, Rochester, N. Y. Society of American Florists, at \$1 each and Ladies' Society of American Florists 75 cents each, post free to any address. Both pictures are very handsome.

Postal Progress League Resolutions.

In last week's report of the proceedings at the Rochester convention of the Society of American Florists reference is made to resolutions presented by Patrick O'Mara, see last week's issue, page 178. The resolutions are now presented in full as follows:

Resolved, That the postoffice is our mutual transportation company; that its only limit should be the capacity of our transportation machinery and that its rates should be determined by

the cost of the service rendered; further,

Resolved, That all candidates for public employment as members of the United States senate and house of representatives should be pledged to the widest possible extension of the postoffice, and its most efficient and economical administration; further,

Resolved, That the members of the sixty-first congress responsible for the continued limitation of our economic postal express to 4-pound parcels of unsealed merchandise at 16 cents per pound, while protecting foreigners in posting their merchandise throughout the United States, to-wit, Italians, 11 pounds for 79 cents; Germans, 11 pounds for 81 cents, and Austrians, 11 pounds at 86 cents, should be overwhelmingly defeated as candidates for re-election this fall; further,

Resolved, That the conservative postal progress league bill known as the Sulzer bill, house of representatives No. 26,581, representing the demands of the friends of the postoffice as set forth at the recent parcels post hearings at Washington, should be enacted into law at the opening of the coming session of congress, viz.:

A bill (by Mr. Sulzer; H. R. 26581) to reduce postal rates, to improve the postal service, and to increase postal revenues.

Be it enacted, etc., That the common weight limit of the domestic postal service of the United States is hereby increased to 11 pounds, the common limit of the Universal Postal Union, and that in the general business of the postoffice the 1 cent an ounce rate on general merchandise—fourth-class mail matter—be, and is hereby, reduced to the third-class rate, 1 cent for each 2 ounces or fraction thereof.

Sec. 2. That the rate on local letters or sealed parcels posted for delivery within the free-delivery services is hereby determined at 2 cents on parcels up to 4 ounces, 1 cent on each additional 2 ounces; at nondelivery offices, 1 cent for each 2 ounces.

Sec. 3. That all mail matter collected and delivered within the different rural routes of the United States is hereby determined to be in one class, with rates, door to door, between the different houses and places of business and the post-office or post-offices on each route, as follows: On parcels up to one twenty-fourth of a cubic foot, or 1 by 6 by 12 inches in dimensions and up to 1 pound in weight, 1 cent; on larger parcels up to one-half a cubic foot, or 6 by 12 by 12 inches in dimensions and up to 11 pounds in weight, 5 cents; on larger parcels up to 1 cubic foot, 10 cents. The full value of any direct loss or damage that may occur through the fault of the postal service. The fees for insurance and registration shall be as follows: For registration and insurance up to \$50, 10 cents; for each additional \$50, 2 cents. No claim for

posting shall be provided on demand. On registered parcels of declared value, and on which the fee for registration, insurance and postage has been duly prepaid, the Post-Office Department shall be liable. (FOR OTHER CONVENTION NOTES SEE PAGE 25)

OBITUARY.

Frederick Katoll.

Buffalo lost one of her oldest florists, by an accident last week, in Frederick Katoll of Ellicott street. He was about to drive down town when the young horse which he had become frightened and in attempting to run away threw him out and kicked him in the head and face, fracturing his skull, causing his death on Monday. Fred Katoll, as he was always called, was born in West Prussia in 1836, coming to Buffalo in 1868. He was employed by the late Gibson T. Williams looking after his private grounds. He afterwards bought land from Mr. Williams on Linwood avenue where he has conducted a greenhouse business for over 30 years. About nine years ago Mr. Katoll bought land on upper Ellicott street and built houses there, also a residence, which he ran in addition to his Linwood avenue place. He was one of the florists of the old school and his knowledge of plants was great. Specimen plants that were rare and difficult to grow were nearly always found at his place, carefully grown by him, while his sons looked after the other part of the business. Mr. Katoll leaves a wife and six children, three sons and three daughters. Two sons, Fred and Arthur, it is expected will continue the business. Mr. Katoll was one of the original members of the old Horticultural Society and of the Buffalo Florists' Club. BISON.

Dr. Charles H. Shaw.

Dr. Charles H. Shaw, assistant professor of biology at the University of Pennsylvania and a noted botanist, was drowned in Kinbasket Lake, British Columbia, recently. The details of the accident are meager. With his wife, two children and a party of friends, he had for several weeks been camp-

THE KROESCHELL EXHIBIT AT THE ROCHESTER CONVENTION.

compensation will be admitted if not presented within one year after the parcel is posted.

Sec. 5. That all acts and parts of acts inconsistent with this act are hereby repealed.

Sec. 6. That this act shall take effect six months from and after the date of approval thereof.

To 1 cubic foot, 6 by 12 by 24 inches in dimensions and up to 25 pounds in weight, 10 cents. No parcels shall be over 6 feet in length, and in no case shall a carrier be obliged to transport a load of over 500 pounds.

Sec. 4. That on all unregistered prepaid mail matter without declared value an indemnity up to \$10 shall be paid by the Post-Office Department for such actual loss or damage as may occur through the fault of the postal service, and this without extra charge. Certificates of

ing at Revelstoke, B. C., some distance from the lake. It has been his custom for several years, to camp in northwestern Canada and engage in exploring and botanical work. He had held the position of assistant professor at the University of Pennsylvania but a short time. Previously he had held positions at Temple University, Ursinus College and the Medico-Chirurgical College, Philadelphia. He was about 38 years old, and a native of Delaware, O.

THE AMERICAN FLORIST

1885 TWENTY-SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

THE next annual meeting of the American Association of Farmers' Institute Workers will be held at Washington, D. C., November 14 to 16, 1910. At the same place and beginning November 16 will be held the annual meeting of the Association of American Agricultural Colleges and Experiment Stations. This meeting promises to be one of the most important that the Institute Association has yet held. The relation of the farmers' institute to the work of the section of the Association of Colleges and Stations will be up for discussion, as well as the subject of young people's institutes and farmers' institutes for women. Special effort should be made by institute directors and lecturers to be present and take part in the discussion of these topics.

CORRECTION.—The price of Watchung sweet pea in A. T. Boddington's advertisement should be 20 cents per ounce, 60 cents per quarter pound, and \$1 per half pound, and not as quoted in two previous issues.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, public notice is hereby given that the registration of the carnation, "Christmas Cheer," by Henry Eichholz, Waynesboro, Pa., becomes complete.

H. B. DORNER, Sec'y.

August 25, 1910.

National Sweet Pea Society.

ED. AMERICAN FLORIST:—

At a meeting of our society at the S. A. F. convention at Rochester, August 18, Vice-President Wm. Sim in the chair, a motion to act in conjunction with the S. A. F. in Boston at the National Flower Show to be held in the spring was unanimously carried.

President Pierson promised to secure us appropriation and our society stated that it would endeavor to secure the same amount so it is quite possible that we shall have a prize list of about \$350 for sweet peas at that time. Any one desirous of offering prizes, kindly communicate with the secretary.

HARRY A. BUNYARD, Secy.

International Floral Association.

IMPORTANT NOTICE.

We wish to correct an impression which may have gone broadcast through an article published in your July 30 issue under the heading of "International Delivery Concern."

We sent you on the above date an article stating that a representative of the International Floral Association had called upon us, and that Mr. Tracy came near losing his membership fee by the transaction.

Since that time we have made a thorough investigation in regard to the International Floral Association, and we find it to be not only a straightforward business proposition, which merits attention and commendation, but we also find those associated in the enterprise to be men of integrity as well as perfectly financially responsible.

The investigation shows that no florist need fear as to the outcome if they desire to affiliate themselves with this organization, and we are, therefore, pleased to rectify our mistake.

THE ROSERY, per

EDWARD P. TRACEY.

H. G. EYRES,

ROBERT DAVIDSON.

Duty on Roses.

L. Gillier & Co., New York, protested against an assessment of duty on rose plants, the particulars below being given in "Treasury Decisions":

"The importation consisted of rose bushes classified under the provision in paragraph 264, tariff act of 1909, for 'rose plants budded, grafted, or grown on their own roots,' and claimed to be dutiable under the provision in the same paragraph for 'Manetti, multiflora and briar rose.' Protest sustained. 'Considerable testimony of men who appear to be well posted in the growth of rose plants was taken in this case, and we think it clearly appears from this testimony that the budding

or grafting of the plants in question had failed from some cause or other, and the goods as imported were simply plants of Multiflora and should have been so assessed.'"

Explorations in Palestine.

The amount of valuable information scattered broadcast every year by our Department of Agriculture is hardly realized by the ordinary man though many put it to good use. In Bulletin 180 the department has issued a most interesting book on "Agricultural and Botanical Explorations in Palestine," which is worth reading from cover to cover. As the author, Aaron Aaronsohn, points out the orient is beginning to be appreciated in this country and the results of economic exploration will be that the arid portions of our great empire will realize that "light comes from the orient." Varieties of figs and grapes and the hard wheats from Russia are only a few of the good things that have come from the east, and there are many more waiting to be introduced that will prove of immense value economically to our "desert states."

But all this has been written and rewritten many times. The charm of the present volume is in the interesting sidelights given into the working conditions, the social usages and other interesting details of a country that everybody wishes to see and feels an interest in. There are many similitudes between Palestine and California, the vastness of the latter being the principal difference. A list of plants and fruits indigenous to Palestine that the author thinks would be worthy of introduction to the United States is given with good descriptions and the author goes into no rhapsodies about them. There is hard common sense in all he says, as well as indications of a deep scientific knowledge. The pictures are interesting and the fact that the book can be obtained free on application is no criterion of its interest and value.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Boston, Mass., September 23-25, 1910.—Autumn exhibition of the Massachusetts Horticultural Society at Horticultural Hall, Boston. Address Wm. P. Rich, Horticultural Hall, Boston.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. Address C. P. Close, College Park, Md.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, First Regiment Armory, Michigan avenue and Sixteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Hartford, Conn., September 22-23, 1910.—Dahlia exhibition, Connecticut Horticultural Society, Unity Hall.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. Address A. F. J. Baur, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elber on Horticultural Society. Address R. Carey, Long Branch, N. J.

Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Club, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Address Jerry P. Jorgenson, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

New Bedford, Mass., September 15-17, 1910.—Annual fall exhibition of the New Bedford Horticultural Society, Old Fellows hall. Address E. E. Pierce, New Bedford, Mass.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music hall, 115 Court street. Address Frederick H. Wirtz, 86 Nicoll street, New Haven, Conn.

New York, September 20-22, 1910.—Seventy-ninth fair of the American Institute, Berkeley Lyceum building, 19 and 21 West Forty-fourth street. Address W. A. Egelson, American Institute, New York.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

Pasadena, Calif., November 3-5, 1910.—Fall flower show, Pasadena Gardeners' Association, Maryland hotel. Address Angus McLeod, 1612 Alhambra avenue, Pasadena, Calif.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition, St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Address Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition, Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Address Adin A. Hixon, Horticultural Hall, Worcester, Mass.

Meetings Next Week.

Albany, N. Y., September 1, 8 p. m.—Albany Florists' Club, W. C. Kings, 24 and 26 Steuben street.

Chicago, September 1, 8 p. m.—Chicago Florists' Club, Union Restaurant, 111 Randolph street.

Lake Forest, Ill., August 31, 8 p. m.—Horticultural Society of Lake Forest, Council Chamber, City Hall.

Lake Geneva, Wis., September 3, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Milwaukee, Wis., September 1, 8 p. m.—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason streets.

Pasadena, Calif., September 2, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

San Francisco, Calif., September 3.—Pacific Coast Horticultural Society.

Utica, N. Y., September 1, 8 p. m.—Utica Florists' Club, Genesee hall, Oneida square.

Poehlmann's Orchids

LARGEST STOCK IN THE WEST

And All the Time Getting Bigger

Beauties, Valley, Roses

American Beauty and other Roses have been so long and so well grown at our greenhouses that there is little need of our calling attention to the excellence of our stock. **We lead for quality and quantity.** White Killarney, Richmond, Killarney, My Maryland and Perle are coming in great quantities and the quality is the Poehlmann Quality and head and shoulders above everything else on the market.

Easter Lilies and Valley all the Year. Our arrangements for a perfect supply of these popular flowers all the year round have long been perfected and we can always take care of your orders.

Chrysanthemums. Our plants never looked better. We shall have a grand supply in all varieties. **Carnations.** Our field stock is perfect and never looked more promising. We shall be in crop early in September. **Green Goods of every description. Everything Home Grown.**

TRADE KEEPING UP.

The improvement in the roses noted last week is well maintained and Beauties, especially, are coming in excellent shape for the season. There is a very fair proportion of long stems and all have good foliage and fine flowers. Although they are coming in greatly increased numbers they seem to clean up well daily and the demand from city buyers on some days has been quite spirited. Maryland is showing up in excellent form and is far and away the finest pink rose on the market this week. Killarney is not as good as usual, though some very fair flowers are shown. White Killarney is thin and not to be compared with the flowers of Kaiserin that are shown, this fine summer rose being the best on the market now. Carnations from the young plants are in but they are very short in the stem and poor in color as yet. This is, of course, to be expected at this time. Chrysanthemum Golden Glow is arriving spasmodically but the demand is not brisk. Orchids are still scarce. Cattleya labiata not being in full cut as yet. Valley is variable in quantity, some being poor, though in some of the principal wholesale houses there is grand stock of this useful flower. A number of poor gladioli and golden glow continue to cumber the market, only good stock in either of these lines standing any chance of selling. As to business, everybody is satisfied for it must be classed as quite up to the average for the season. Mondays have been good days of late and the present week was no exception, large numbers of out-of-town orders reaching the wholesalers. Tuesday was not so good but there was little complaint. The members of the S. A. F. who returned early in the week from the convention re-

port having a good time and all we have spoken to say it was a great convention, the Rochester Florists' Club coming in for great praise for its hospitality.

NOTES.

If helping a stranger in a strange land brings its own reward, then John Mangel, the well known retailer of Wabash avenue and Monroe street, has a big one coming to him for there is no better friend to the Greek boys who come to this city than he. Nearly three years ago Peter Karavasas came

to Mr. Mangel and he gave him work in his store where the boy did well and was able to keep himself in fair circumstances. Some time ago he fell sick and had to be operated on for appendicitis. This not proving successful, he was again operated on but all to no avail, and he died on Sunday last at the hospital. Everything in the way of expense for hospital and doctor's fees, nursing and the best of attention in every way was cheerfully met by Mr. Mangel while the bedside of the poor lad has been kept

Summer Flowers

**New Beauties, Kaiserin, Rhea Reid,
Pink Killarney, Maryland, White Killarney**

These are the Best Roses for hot weather. We devote a whole range of glass to their growth, and our plants are two to five years old, giving big, strong flowers.

Peter Reinberg, 35 Randolph St.,
CHICAGO.

cheerful throughout by almost daily presents of flowers and fruits from the same source. He was buried on Monday at Elmwood cemetery, Mr. Mangel again meeting all the expense of the funeral and burial while he covered the casket in which the lad was buried with choice white roses and lily of the valley. Peter was 18 years old and worked for Mr. Mangel for two years. His illness commenced in January, since when he has been the object of Mr. Mangel's constant care. Mr. and Mrs. Mangel both attended the funeral on Monday.

The Raedlein Basket Co., 713 Milwaukee avenue, is having a catalogue and price list printed and expect it to be ready next week. The catalogue will contain illustrations and will be mailed to anyone, anywhere upon request. Nine cases of baskets were received last week and another shipment will arrive next week. R. Raedlein's niece, Edna Kindler, is expected back from Ebendorf, Germany, where the factories are located and where she had been in the company's interest. Miss Kindler will have charge of the office and Mr. Raedlein will devote his time on the outside. Everyone is in-

vited to call at the storerooms and look over the stock while florists visiting the city should do likewise as here may be seen practically everything in the basket line.

The Douglas Boulevard Floral Co., (A. Vanderpool, Mgr.) 600 Douglas boulevard, delivered a design in the shape of an emblem of the Royal League to 1015 Olive street, where the funeral of David F. Cunningham was held on August 20. The emblem, a circle, square and triangle, was worked out in yellow and the filling colors were of red, white and blue; roses and immortelles were used. Mrs. Vanderpool returned last week from Brooklyn, N. Y., where she had been visiting relatives. Mr. Vanderpool stated that he was one of six retailers carrying the union label in this city.

Some of the finest valley we have seen is now coming to the Poehlmann Bros. Co.'s store from the greenhouses. The spikes are long and strong, the bells large and pure white and there is ample foliage. This certainly is elegant stock. Among the roses it is difficult to single out any for special mention for all are so good, but Beauty and My Maryland are at the top of the

tree for quality. The quantity of all varieties coming in is also large, but it keeps moving, business being very brisk.

Joseph Gatelis, gardener at the Wilce residence on Harrison street and Marshfield avenue, is busy putting in new benches and walks in the greenhouses. About 1,500 feet of glass are used for the growing of bedding stock for decorating the lawn and premises. The hardy water lily ponds are in fine condition and with the flower beds make the place a beauty spot which attracts the attention of all who pass by.

Hoerber Bros. are installing a new 200 h. p. Fairbanks boiler at their plant at Desplaines. The boiler is already on the ground and will be set at once. This is to be used as an auxiliary and in case of a break-down, as the battery already in was fully capable of taking care of all the glass. Harry Mannheim is back at his place in the store.

Vaughan & Sperry are receiving large numbers of fine Beauties now while orchids, choice valley and other high-class stock is plentiful here and moving well.

CENTRAL 2571.

52-54 Wabash Ave., CHICAGO.

J. Paulus, 4501 N. Clark street, reports that outside of a little funeral work business is very quiet. A broken column five feet high, made up of asters, pink gladioli and English ivy, was last week delivered to the Kent residence, 709 Sacramento boulevard, where the funeral of M. W. Kent was held. A standing wreath five feet high and two feet in diameter was delivered to the Stewart residence on Thome avenue, the latter part of last week. We also noted here a couple of orange trees and a coffee plant, one of the trees standing eight feet high and at present carrying a crop of oranges. The coffee plant is also carrying pods and seems to be the center of interest at the place.

C. W. McKellar is back to business after his extended auto tour. He says he had a splendid time all through and as he made some 4,000 miles over good roads in 14 different states with no accident to his machine, except a

little tire trouble in the way of fair wear and tear, we can quite believe him. On his return from Rochester he shipped his car from Buffalo to Detroit, driving the rest of the way and arriving in the city on Sunday. His record run was on the last lap, 300 miles on Saturday.

At Peter Reinberg's American Beauty is a strong card, the flowers being fine and arriving in quantity. The teas are also improving right along owing to the cool nights and, except that they are a little short in the stem, may almost be said to be up to winter form. Business keeps up remarkably well here to out-of-town points and the city trade is better.

Among the stock showing at Wiator Bros. this week are some elegant Kaiserin, White Killarney and Richmond roses, these varieties coming in fine shape now. N. J. Wiator has returned with an abundance of fish and stories, especially the stories. J.

Psenicka is well again and business at the store is good.

Some extra fine asters are on view at E. H. Hunt's as well as the usual stock in all lines, which is of first rate quality. W. Lynch is still away with his family at Three Rivers, Mich., and writes that he is enjoying a real good time.

Vaughan's Seed Store received a carload of Chinese narcissus this week and this firm has 624 cases of Dutch bulbs enroute from New York.

Geo. Wienhoeber, of the Fleischman Floral Co., Jackson boulevard, left this week for a two weeks' vacation, returning about Labor day.

J. F. Klimmer has not been well since Decoration day and his many friends will be sorry to hear that he has not improved as was hoped.

Wm. H. Engleheart, of the Idlewild Greenhouses, Memphis, Tenn., is in town for a week or two on a vacation.

W. W. Fuller and family, 4526 W. Ravenswood park, returned August 8 from a month's outing, which was spent at Druse lake. Mr. Fuller is severely tanned and in the best of health and is prepared for another busy season. Wm. Jr. is at present spending a few weeks at Hart, Mich. Miss Julia will attend the Northwestern University at Evanston, she having won a scholarship at the Lake View high school last year. Bud Campbell returned August 9 from his vacation, which was spent at South Haven, Mich.

PICNIC AT HINSDALE.

A most enjoyable picnic was given at Hinsdale on Friday last by the boys from Bassett & Washburn's. They gave the picnic, supplying the refreshments, etc. Bassett & Washburn donated the prizes, as noted below, and E. B. Washburn acted as umpire. It was a gorgeous success, not a hitch occurring to mar the pleasures of the day, and everybody decided that it was one of the most enjoyable picnics they ever attended. The following is a list of events and the winners:

Men's 100-yard championship race.—Alex Sinn, first, scarf pin and cuff links.
Sewing race for married ladies.—Mrs. Reed, first, belt pin.
Sausage contest, open to men.—Emil Ober, first, shirt.
Fifty-yard dash for girls under 16.—Miss Lochman, first, roller skates.
Shoe races, open to men.—Dave Lunden, knife; Paul Weiss, \$1.
Nail driving contest for ladies.—Mrs. David Lunden, first, handbag.
Married men's race.—David Lunden, first, umbrella.
Ladies' race, 16 years and over.—Margaret Lynaunt, first, umbrella.
Sack race, men.—Joe Hanson, first, pipe.
Pinning tail on donkey.—Prizes for everybody; ladies, hat pins; men, necktie.

Aug. Jurgens, 2241 Herndon street, is negotiating with G. J. Smith & Son, real estate dealers, 2175 Lincoln avenue, for the purchase of a 10-acre tract of land in Grosse Point. The place he is now occupying is alongside of the railroad and is more valuable as a factory site than for growing purposes, and if the deal is closed new houses will be erected at Grosse Point and the present property disposed of. Another drawback of the present location is that the smoke and dirt from the nearby foundry and railroads darken the glass and cause a great deal of trouble. Mr. Jurgens has a fine cement basement 40x100 feet which he uses for storage. Some auratums of fine quality, marking the windup of the season were seen here. We also noted a fine stock of Boston ferns and rubbers. Mr. Jurgens makes a specialty of growing bulb stock in the winter and bedding plants in the spring. The seven passenger Packard auto is receiving a new coat of paint.

T. Corten, who is in charge at the Graceland cemetery, is enjoying a two weeks' vacation. J. Eichenold is in charge during Mr. Corten's absence. Visitors: G. F. Crabb, of Crabb & Hunter Floral Co., Grand Rapids,

Philadelphia.

BUSINESS FAIR.

The business of the past week was fair for this season. While there was no rush for flowers there was a steady demand for good stock, at reasonable prices. Roses and asters have somewhat improved in quality and move better but there is no advance in prices and it is not expected that there will be for some time to come.

NOTES.

Joseph Heacock, the well known grower, was recently nominated for the state senate. The press has recently been airing a scandal in connection with the construction of a state hospital for the insane and has addressed letters to all candidates. The following explains itself:

"No detailed reply to Lindley Johnson's report came yesterday from the commission which for nine years has had in its charge the construction of the still incomplete Rittersville state hospital for the insane and in that time has spent more than \$1,700,000 of the state's money."

A non-partisan spirit is exemplified in this communication:

"I am certainly in favor of a thorough investigation no matter who it hurts, and I greatly admire the course 'The Press' has taken in this matter. While I am a candidate on the democratic ticket for the state senate from Montgomery county, I trust that politics can be kept out of this investigation and let us get at the truth for the credit of the state and common decency."

JOSEPH HEACOCK.

"Wyncote, Montgomery County."

The Rochester convention attracted a number of the leading men in the trade. They have all reached home and are unanimous in pronouncing it a great convention. Robert Craig, J. Otto Thillow, Fred Michell, Edward Reid and others who attended say that the trade exhibit in particular surpassed that of any previous meeting. There is general satisfaction over the results and there seems to be a general sentiment that the S. A. F. will continue to make good. It is also hinted that the other societies had better get in the band wagon.

A. Miller, of Skidelsky & Irwin, was in New York last week attending to the shipping of French bulbs and Formosum lillies for his firm. Mr. Miller reports bulbs are sound and up to size. R. J. Irwin, of the same firm is on a few weeks' vacation, in Maine.

M. C. Dunn, 618 Chestnut street, has been in the retail business in that locality for 39 years. He has a regular and reliable trade and is not worrying about dull times.

The Philadelphia Cut Flower Co. is handling good stock and reports favorable business. Everybody is glad that Robertson won out in bowling at Rochester.

W. J. Baker is handling an exceptionally fine quality of asters that sell fast.

Berger Bros. were so busy last week that vacations had to be postponed.

SAN DIEGO, CALIF.—Miss K. O. Sessions, the enterprising grower of plants of this city, is back at her place of business after a pleasant sojourn in the country.

TRADE DULL.

Trade here last week was at the lowest ebb. Flowers were abundant and fairly good in quality but stagnation pretty well expressed the local conditions. There is no let-up of the protracted drought, and many crops feel the effects of lack of moisture. A few local showers seem rather to exaggerate than lessen the effects of the dry season.

A number of the trade who were attendants at the convention at Rochester, have not yet returned, extending their trip to the lakes, the St. Lawrence river and other points of interest to sight-seers, but those who are home came back enthusiastic over the capture of the convention of 1911 for this city and pleased with the general arrangements and many pleasures and profits of the one just past. The stay-at-homes are equally elated over the prospect of the coming hither of the national society and from now on the Gardeners' Club, which assumed the initiative of the invitation and on which will rest the burden of preparation for the great event, will be untiring in its preparation for the meeting. It is understood that Mr. Vincent, whose election to the vice presidency is recognized as a compliment to our locality, has already secured the immense armory of the fifth regiment of the Maryland national guard for the trade exhibition. This is a building of immense proportions, and admirably adapted to show purposes. Mr. Vincent's firm will also entertain the entire membership of the society at its place at White Marsh and give a practical exemplification of Maryland hospitality. Other entertainments and diversions will doubtless be arranged for and the visitors to our city will be welcomed and cared for in a fashion which will leave no regrets at their

S. B.

Cleveland.

TRADE DULL.

Business has been a trifle slow the past week, and stock has not been over-abundant. The early asters are beginning to go and at this writing are not very plentiful. It will be a few weeks before the later varieties arrive. The exceedingly dry summer is holding back all outdoor stock. Dahlias are arriving but as yet are not of the largest. Gladioli are plentiful and of good quality. Water lilies still find a good market. A few sweet peas are still coming in, the demand being only fair. A fine lot of Kaiserin roses are a part of the regular stock. Smilax and greens are plentiful. Good valley finds a ready market.

NOTES.

There is going to be a "florists' section" in the horse parade to be held here Labor day. There will be prizes for the best turnouts as usual, and all florists are cordially invited. The entrance fee is \$1. Address J. B. Perkins, Blackstone building.

Most of the boys have returned from the convention and all report a good time.

Funeral work continues good and counter trade has considerably improved over that of last month. In two weeks most of the schools will open and the people that have been away for the summer will commence to arrive home which is looked upon as the opening of the fall trade. Last week found some days extremely busy in funeral orders and first-class stock was in great demand. Carnations are very poor and scarce and what few come in from field-grown plants are soon bought up at good prices. Asters have improved in quality and quantity and there is still too many of the poorer class but there are great numbers of them used in design work. Gladioli continue plentiful and sell well. Good roses are coming in more abundantly and there is not so much poor stock. Killarney, My Maryland, Kaiserin, Richmond and President Carnot are the favorites and seem to be improving with each cut. Easter lilies were in good demand. There was also a good demand for lily of the valley caused by several weddings. Some fine dahlias are coming in and sell well. Golden Glow chrysanthemum has made its appearance in limited quantities. Great heads of hardy hydrangeas are extensively used in window decoration and ground work of designs. Some cosmos is seen but not of good quality. Orchids are scarce and in very little demand. Asparagus and all other green goods were in better demand the past week. There is a great influx of all kinds of garden flowers and very little demand for such stock. The weather has been fair with a moderate temperature, very little humidity and very cool nights; frost was reported in some locations one night the past week.

NOTES.

William Patry, with John F. Wood, narrowly escaped being drowned from an excursion steamer last Sunday, as he was accidentally pushed from the rail of the boat, but, being an expert swimmer, he was rescued none the worse except for the drenching of his clothes.

Alex. Miller and wife, formerly proprietor of the Rhode Island Greenhouses here and now foreman on the Greene place at Dallas, Tex., paid us a visit on Sunday on his way home from the convention at Rochester, N. Y. Mr. Miller reports the convention one of the greatest affairs of the kind. He says the Greene place contains 300,000 feet of glass and 3,000 acres of land.

William Tarbox was in town the past week and reports his display of dahlias and asters finer this season than

ever before. Mr. Tarbox grows several acres of these plants and has taken many prizes.

The Rhode Island Florists' and Gardeners' Club met Monday evening. The new members admitted were Albert Holscher, John Burke, Charles Haskins, H. C. Neubrand and M. J. Leach.

W. S. Sword of Valley Falls was in town during the past week and reports business in his vicinity very good.

Louis Clarner, Abbott Run, formerly a market gardener, has planted all his greenhouses to carnations.

Fred Covill, manager of the floral department at the Shepard Co., is on a two weeks' vacation.

Edward Brook and wife are at Cottage City for the remainder of August.

Visitors: Alexander Miller, Dallas, Tex.; Franklin of Franklin & Crosby of Danielson, Conn.; W. S. Nichols, Hampton Meadows; William Crompton, East Greenwich; D. E. Newell, Attleboro, Mass.; Harry L. Turner with National Folding Box Co.

J. BRINTON.

New York.

NEW YORK TRADE BETTER.

Market conditions for the fore part of last week were about the same as the week previous, plenty of stock but not much sale for it. On Friday and Saturday, however, all stocks took a decided soar upwards, owing, probably, to society events at Newport recently, where 8,000 American Beauties and about the same amount of lilies on two decorations alone were used. Gladioli are arriving in poorer condition and not so plentiful. Carnations are over with for the time being. There is still an abundance of asters arriving but mostly inferior stock, although some exceptionally fine ones have been noted. Lilies are not as plentiful and stock which brought only 2½ and 3 cents in the fore part of the week are now bringing 4 and 5 cents. Roses are arriving in about the usual quantities and condition for this season.

NOTES.

W. Reed, of Reed & Keller, reports that he was very busy all day Monday showing visitors through his warehouse on West Twenty-fifth street, who are returning to their various home towns by way of this city.

A. Langjahr returned home from the convention Sunday and leaves Monday for a short vacation with Mrs. Langjahr to be spent at Mattituck, L. I.

J. Sharkey of East Twenty-eighth street reports having an order for a casket cover of lily of the valley and orchids.

V. Warendorf is spending his vacation at the Thousand Islands and expects to be back September 1.

A. Henshaw and party arrived home Sunday at midnight in his auto from Rochester.

Buffalo.

TRADE AND STOCK GOOD.

The weather is fair and cool. Stock is of good quality, such as asters and gladioli. My Maryland roses are coming in good now. From what was very quiet two weeks ago we completely changed last week, funeral and other work making things very active for August.

NOTES.

Many visitors called to and from Rochester, namely, P. Holm, of Holm & Olson, St. Paul, Minn.; J. F. Sullivan, Detroit, Mich.; Michael Bloy, Detroit, Mich.; J. Noble, of Noble Bros., Cleveland, O.; J. S. Heppe, Akron, O.; Wm. Honeysett, Erie, Pa.; J. V. Laver, Erie, Pa.; G. B. Babcock, Jamestown, N. Y.; Simon Humfield, Muncie, Ind.; Arnold Ringier, Chicago, and Max Blattus, Dayton, O.

Again Buffalo can put a feather in her hat when the S. A. F. honored George Asmus with the presidency. While George is a Chicagoan and proud of it, we had him first and have several more of the same name here. It is needless to say that he will give the S. A. F. a good administration and retire with honor to himself and the society.

W. J. Palmer has purchased the Hummell home in Lancaster immediately which adjoins the Erie railroad and separates his property from the latter. It is a very desirable addition to Mr. Palmer's fine place.

About two-thirds of the florists from this city were in Rochester and from reports it was a good convention.

R. A. Scott is on a western visit.

BISON.

COSMOS ROSE QUEEN.—This is an early flowering variety of great merit, the flowers large, of fine form and a rich rose color. It received an award of merit from the Royal Horticultural Society of England when exhibited by Dobbie & Co., July 19.

St. Louis.

VERY LITTLE DOING.

The market shows but little change from last week. There is very little doing and funeral work seems to be the only output for flowers. Single tuberose are coming in more freely. There is only a limited number of fancy asters, although the white, pink and lavender, in fair stock, are cleaned up pretty nicely. Rose White Cochet, in good quality, is selling well. Richmond opens up too fast and it is the same with Killarney and even American Beauties don't keep over a day. Carnations are improving slightly but it will be fully four weeks before they become a factor in the market. A few good, light colored gladioli are in and selling at good prices. A large supply of greens is in, many growers tearing out their old stock. Growers report that the violet outlook is poor but that is the same old cry every year. Some extra fine lily of the valley and lilies are in. This week the Eagles are with us and we hope they will help to move things some. Shipments of asters are now coming in from Buffalo, N. Y. Larger varieties will arrive later.

NOTES.

The Florists' Club held a very important meeting, August 11, at Odd Fellows' hall, at 2 o'clock. Talks on the first issue of the Florists' Bulletin, special S. A. F. convention talk and the election of officers were the features. The committee representing the Florists' Bulletin were congratulated on the issue of the first copy. Twenty-five members were present. The following gentlemen were elected as officers:

John Connon, Webster Grove, Mo., president.

Frank A. Weber, vice-president.

J. J. Beneke, secretary.

Will Smith, treasurer.

Will Smith was unavoidably absent attending the funeral of a dear friend but assured the club, through its secretary, J. J. Beneke, if elected he would serve the club faithfully as treasurer and was duly elected. E. W. Guy, of Belleville, Ill., was elected 3-year trustee. The next meeting of the club will take place at Weber's Nurseries, and will be known as the inauguration meeting as all elected officers will be installed.

The Apple Growers' Association met at the Planters' hotel, Wednesday, August 10, for a two days' session. Over 100 growers were present from Missouri, Illinois, Arkansas, Iowa, Michigan and New York. The general opinion was that the apple crop this year would be short owing to the late frosts. A banquet, at the Southern hotel, was given Thursday evening. The following gentlemen of the Florists' Club attended: J. J. Beneke, Frank Fillmore, E. W. Guy, John Connon, G. B. Windler, Fred Ammann, Emil Schray, Will Smith, Chas. Schoenle, Professor Irish, Max Herzog, F. A. Weber, Andrew Meyer, C. Bergsterman and J. Walther. The following florists, not members of the club, attended: F. H. Pring, Julius Koenig, Otto G. Koenig, F. H. Meinhardt and E. Falgraf.

H. G. Berning has rented the ground floor west of his present location to be used as increased floor space for the sale of cut flowers. The steady increase in his business has compelled him to get more space and to make important alterations. He is putting in an additional icebox, 12x12 feet, for the keeping and handling of American Beauty roses in large quantities. He expects to handle, this fall and winter, the cut in American Beauties of some well-known growers and therefore desires increased facilities in this line. The walls between the two stores are to be cut through and the entire place

will be renovated and cleaned up so as to be ready for the fall and winter trade.

C. A. Kuehn is doing a nice trade. Last week he received consignments of extra fine Golden Glow chrysanthemums. He is also in line with some very fancy asters and lilies. He is receiving an increased supply of American Beauties and a regular supply of asters and Harrisii lilies.

Ostertag Bros. were very busy last Thursday, having orders for flowers for the six-year-old son of Jack Powell, pitcher, who died August 23 after suffering from scarlet fever and diphtheria. The offerings were very beautiful and costly.

W. C. Smith Wholesale Floral Co. is getting along nicely with the alterations. The upper floors have been cleaned up and prepared for the transaction of business. Will Osseck has returned from the convention.

Will Smith is a busy man these days. His partner attending the convention put double work on him. This week he entertains his friend, Wm. C. Zimmerman, from Milwaukee who is here attending the convention of Eagles.

Adolph Ahner has planted two houses in carnations and starts on the third one this week. He is building a house 17x100 feet for sweet peas. He will have to purchase violet plants, as so many of his have gone wrong.

Wm. Brinkman has a very pretty and beautifully arranged store. Besides a stock of plants and cut flowers he keeps a fine stock of sea shells, gold fish and fancy jardinières. He is ably assisted by his wife.

The Mullanphy Flower Co. is a heavy buyer in this market, making daily large clean-up purchases. Messrs. Kingsley and Seeger are hustlers and appear to get their share when anything is doing.

Geo. Angermueller has rented the space room above his present location for the keeping of florists' supplies and wire work, the lower floor to be used exclusively for the sale of cut flowers.

Andrew Meyer, jr., city forester will take his three weeks' vacation in the near future. He will journey to the Pacific coast, where he will combine pleasure and business.

The Paris Floral Co., near Olive street and Broadway, has a pretty window display, tastefully arranged by a very attractive young saleslady, Miss May Burns.

F. C. Weber, Jr., is stopping in Atlantic City. He is spending his honeymoon there with his pretty young wife and is expected to return September 1.

Arthur E. Beyer, manager for Grimm & Gorly, has left for the east to visit his folks. Mrs. Vincent Gorly has also gone on a visit to her folks in the east.

Alex Siegel is expected home from the lakes shortly. The wholesale houses miss Alex, especially at the bargain counter.

The Connon Floral Co., of Webster Grove, has been planting carnations all week and expects to have a fine crop this winter.

The Bentzen Floral Co. has a splendid show window and makes some very attractive window displays.

We are glad to announce that Jim Arado has recovered from his sick spell and returned to his post.

Theo. Miller has returned from his vacation. He has been in the Ozarks taking a much needed rest.

G. M. Reburn, of Vaughan's Seed Store, is with us and visiting our friends in the country.

H. Skelcher & Sons are now cutting Maman Cochet roses. They expect to build next year.

Charlie Young, with his wife and son, have left for the lakes, Charlie needing a rest.

Desirable Wall Space to Rent for Advertising.

V. S. DORVAL, Secretary.

Mrs. G. H. McNeill, of Jackson, Tenn., accompanied by her son, will be here several days.

Hugo Gross is coming to town daily with large consignments of tuberose and gladioli.

F. H. Weber returned last Saturday from the east where he attended the convention.

A. A. Arnold's representative, Sam Fruend, is in the city drumming up trade.

Geo. Waldbart has painted his store-room and greenhouses, inside and out.

Hugo Gross is now cutting some fine tuberose and gladioli.

Charlie Young has returned from his vacation.

Fred Alves is back from his fishing trip.

W. F.

Boston Note.

The annual sale of stalls at the Boston Flower Exchange, the original Park St. Market, will be held on the morning of Saturday, August 27, at 9 o'clock.

Convention Notes.

One of the familiar faces seen in the lobby of the Hotel Seneca and in Convention hall was that of W. H. Siebrecht, Jr., the florist lawyer of New York, with that calm, pleasant expression which indicates perfect enjoyment, not at all the same Mr. Siebrecht that is seen in court cross-examining delinquents.

Emil Leuly, of West Hoboken, N. J., rode from New York to Montreal and back to Rochester on a bicycle to attend the convention, covering 832 miles in 10 days. Mr. Leuly returned home on his wheel.

We regret to state that J. V. Phillips, of Brooklyn, was taken suddenly ill while attending the convention, leaving for home Wednesday evening. We trust it is not serious.

Signs.—A street car doing business as a lunch wagon was labeled "A Has-been" and a cottage on the way to Manitou bore the legend "Seldom In."

Wm. R. Smith, of Washington, D. C., in his eighty-third year, was a notable figure at the meetings, taking vigorous part in many of the discussions.

"The sweetness of low prices never equals the bitterness of poor quality." Ionia pots are pots of best quality. (Card of Ionia Pottery Co.)

J. H. Fiesser, of North Bergen, N. J., left the convention for the Thousand Islands and Montreal. He expects to be gone about two weeks.

W. G. Matthews and family, of Dayton, O., were under the weather during the opening days of the convention with stomach trouble.

Persons not in the trade to the number of 2,300 approximately, paid admission to the trade exhibition, the fee being 25 cents.

President-elect Asmus and Mrs. Asmus are spending a week along the St. Lawrence and will probably visit Quebec and vicinity.

Chas. Weber reports that he will have a new carnation out by November 1 which promises to eclipse his famous Victory.

J. R. Freeman says the magic pencils distributed by the Chicago delegates wrote Baltimore instead of Chicago.

A. Schloss gave away one of his beautiful bouquet holders to every single lady attending the convention.

Wm. R. Smith will be the guest of his friend, Andrew Carnegie, at Skibo Castle, Scotland, next summer.

Ed. Winterson's many friends are still wondering why he was not on hand.

Frank Traendly is always obliging, but that water errand was an imposition.

Conventions are different, somehow, when Rudd and Watson remain away.

Ballast.—P. J. Foley, Chicago, and Frank H. Traendly, New York.

The band concerts were a notable feature of the convention.

Ask Billy Rickards how long it takes the moon to get full.

Sporting Events.

Snail Race.—Carney, Pittsburg, first prize, umbrella; Luetchford, Rochester, second, box of cigars.

Backward Race.—Carney, Pittsburg, first prize, umbrella; Swan, Philadelphia, second, bottle of Peruna.

National Florists' Board of Trade, 56 Pine St., NEW YORK

Wichita, Kans.

Continued dry weather and the usual routine of dull business and summer work at the store and greenhouses will about sum up the situation. The extreme hot and dry spell has been broken by about 10 days of cooler weather accompanied by local rains, mostly in light showers of variable extent but making good growing conditions while they lasted. However, it gave no surplus, and with the weather conditions changing back to dry again we are against the original proposition. Business is running in volume about the same as last year for same period, funeral work furnishing the bulk of it, and the amount of home grown stock entering into the trade here at this time is probably the lightest for years. Gladioli are about all in, dahlias not worth considering; asters are only fit for design work and are rapidly getting scarce at that. So that the slack trade has its recompense in the correspondingly smaller amount of stock it is necessary to buy—and there is never much to be made on summer stock.

NOTES.

The Fairview Greenhouses and the firm of Cain & Dugan are no more. The greenhouses were torn down at close of the spring season, and it was planned to rebuild upon a new location near the cemeteries, but at the last minute a "hitch" occurred with the real estate owner concerning some points in the lease, and, although part of the material had been moved to the new location, the deal was declared off and the whole thing fell through. Mr. Cain has taken a position with Chas. P. Mueller and Mr. Dugan has taken charge of the Bixby greenhouses and, we understand, has sold part of the greenhouse material to Mr. Bixby.

A woodland camping scene in one of the show-windows of W. H. Culp & Co.'s store elicited numerous favorable remarks for fidelity to nature and detail. It also brought a grouch from the office boy who complained that he

S. AN & CLEGGIN,**Roan Mountain, Tenn.**

could not keep the window clear from finger prints. He received but cold comfort from the window trimmer.

The change in the weather gave an opportunity to house some carnations. Chas. P. Mueller has practically all of his benched; W. H. Culp & Co. have one house to plant yet which they expect to do this week. Chrysanthemums are looking well at both above named places.

F. Kuechenmeister is erecting a new residence. Mr. Kuechenmeister struck it about right with a house of asters, they having behaved much better during the dry spell than outdoor stock.

W. I. CHITA.

Miscalculation.

"The hairy worm, observing that the sun was on the meridian, ventured forth from its hiding place.

"Along came a minion of the city forester and spattered it with poisoned spray.

"And I thought," gasped the worm with its dying breath, "that all I had to dodge was the early bird!"

"Haec fabula docet, in medio non tutissimus ibis."

Here is a bit of nature-faking or else carelessness in the choice of words. Hairy worms indeed. But the fable teaches that "eternal vigilance is the price of safety." The gardener, of course, knows that worms are to be looked for in the morning. "In medio tutissimus est," is for the gardener also (not too much enthusiasm.) Reminds me of the motto of the AMERICAN FLORIST: "More comfort amidstships, but we are the first to touch unknown seas." Such saws are all good in cases where they fit, but: What is good in one case, is not, therefore, good in all cases, (in applying poison). "Eines schiekt sich nicht fur Alle." Watch the corners, keep in the middle of the road, be progressive, conservative, anything, but don't get caught.

Logansport, Ind.

Orris Root.

The orris root so familiar to lovers of perfumes should really be called iris root since it is made from the roots, or rather rootstocks, of several species of iris, especially Iris Germanica, the common blue flag of the gardens, and Iris Florentina, a white variety. It is reported that the root has to be dried and preserved for some time before the fragrance is fully developed. The freshly dug plants have no fragrance.—American Botanist.

Bogus Order Swindler.

Washington, July 21.—Vernon Jett, a young man out of a job, applied to several Rochester seedsmen and nurserymen asking for the privilege of acting as their agent. He was employed and sent in a number of alleged orders upon which commissions were demanded and paid. Yesterday he was arrested by postoffice inspectors for violating the postal laws.

His alleged orders were claimed to be bogus. The Perry Nursery Co. and the Herrick Seed Co. were the complainants. They claim to have been defrauded to the extent of about \$50 each. When taken before United States Commissioner Taylor, Jett pleaded guilty to the charge and was held to the grand jury. He is in jail awaiting indictment and says he is anxious to plead in court so as to begin his term and have it over as soon as possible. The grand jury is in session.—Rochester Post and Express.

HASTINGS, NEB.—C. B. Tanner & Co. have just purchased of U. S. Rohrer 11 lots in Wemple's sub-division and will greatly enlarge the business. They will build more greenhouses as well as more extensively engage in the business of supplying the demand for flowers, shrubbery and plants of every kind. These additional lots will give them a large and valuable tract for this expansion. \$4,500 was the price paid by C. B. Tanner and his father, S. B. Tanner, of Lincoln, for these lots. They are just completing a large addition to the plant.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

GEORGE C. WATSON is revising Buist's catalogue.

VISITED CHICAGO: W. Atlee Burpee and Robert Buist of Philadelphia, Pa., returning from California.

ONION SETS are now mostly pulled and on the racks. The very late planted fields—small acreage—will be helped by the past week's rain.

THE daily papers report considerable damage to crops in Japan and private cable advices confirm serious damage to lily bulb crops. Details are not yet at hand.

KENTUCKY BLUEGRASS seed is quoted at 20 to 22 cents, with nothing offering, as compared with 10 to 13 cents this time last year. Indications are that these prices will advance.

WASHINGTON, D. C.—There is much sympathy for F. W. Bolgiano on account of the serious illness of his only son, a promising lad of 16 years. He has been ill for over four weeks with the malady known as infant paralysis, which, contrary to popular belief, does not confine its ravages to infants. For a time his life was despaired of but it is now believed that he will recover.

SEEDSMEN present or represented at the Rochester convention were Vaughan's Seed Store, Henry A. Dreer, A. T. Boddington, Henry F. Michell Co., Rickards Bros., Skidelsky & Irwin, W. W. Barnard Co., Peter Henderson & Co., J. D. Imlay, R. & J. Farquhar Co., Thos. J. Grey & Co., and besides these the local people who were active in convention matters were James Vick's Sons, Vick & Hill and Crosman Bros.

ONION SETS at Chicago are in sheltered crates in the fields now and curing. Fortunately most were dug in advance of the rains of last week. Sets were never of better quality here or harvested in drier condition. Quite a number of crates standing in the fields in racks were unroofed by the windstorm of August 23 and some of the top crates in the racks were wet by rains. Bright weather followed, however, and it is believed the sets will dry out satisfactorily.

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,
Growers for the Wholesale
Trade Only.

SAN JOSE, CALIF.

CHICAGO.—Prices on the board of trade August 24 for grass seed were noted as follows: Timothy, \$6 to \$7 per 100 pounds. White clover from 20 cents to 25 cents.

MILWAUKEE, WIS.—S. G. Courteen, the well known seedsman of this city, is reported to have bought the beautiful country estate comprising 100 acres and a number of fine buildings at Oconomowoc, known as La Belle Knoll.

SWISS CHARD SEED, according to a recent treasury decision, is dutiable as "beet seed" and not as "seeds not specially provided for under paragraph 266, tariff act of 1909." The protest came from Cramstock, Ferre & Co., Hartford, Conn.

PHILADELPHIA, PA.—Walter P. Stokes has returned from a two month's tour of Europe. He was accompanied by S. F. Willard of Wethersfield, Conn. They thoroughly enjoyed the trip. Mr. Stokes states that on account of a cold and wet season nearly all the European seed crops are short.—R. J. Irwin, of Skidelsky & Irwin, has just returned from two weeks of camping in the Maine woods. He was accompanied by Mrs. Irwin. They sojourned at Camp Oshaloosa as the guests of Frank Mitchell, a well-known florist of Waterville, Me. Mr. Irwin modestly acknowledged catching a number of black bass that weighed three pounds each.

Duty on Hyacinth Bulbs.

Hyacinth bulbs are dutiable under the provision in paragraph 263, tariff act of 1909, for "hyacinth, astilbe, dielytra, and lily of the valley clumps," and not under the last provision in the paragraph for "all other bulbs, bulbous roots or corms which are cultivated for their flowers or foliage."

This is a decision of the United States general appraisers, New York, August 12, and is in the matter of protest 390332 of Joseph Breck & Sons against the assessment of duty by the collector of customs at the port of Boston. The following is from "Treasury Decisions" of August 15:

"Waite, general appraiser: The goods in question are hyacinth bulbs. It is conceded by both sides that they are dutiable under paragraph 263, tariff act of 1909, but each contends that classification should be made under a different clause thereof. The paragraph, in so far as pertinent hereto, reads as follows: '263. * * * Hyacinth, astilbe, dielytra, and lily of the valley clumps, \$2.50 per 1,000; * * * all other bulbs, bulbous roots or corms which are cultivated for their flowers or foliage, 50 cents per 1,000.'

"These bulbs were assessed at \$2.50 per 1,000 under the clause first above quoted; the importers claim they should be dutiable at 50 cents per 1,000 under the last clause of the paragraph, as quoted above. It will be observed that the question involved is purely one of construction of this statute to determine the meaning of the law. Hyacinths are expressly provided for, whether in one form or another, under the provision of paragraph 263, first quoted above. If hyacinths are to be assessed under the last clause of the paragraph, as claimed by the importers, it is because they are included in the general provision for 'all other bulbs or bulbous roots or corms which are cultivated for their flowers.' After a careful consideration of the statute, and all things in the record pertinent thereto, we have come to the conclusion that the word 'hyacinth' in said paragraph should not be considered an adjective qualifying 'clumps,' and hence was intended to cover hyacinths in the form here imported as a separate and distinct grade or class of bulbs. The protest is therefore overruled."

Imports.

During the week ending Aug. 13 imports were received at New York as follows:

Vaughan's Seed Store, 792 cases, two crates bulbs.
R. M. Ward & Co., 623 cases bulbs.
C. F. Meyer, 526 cases bulbs.
H. F. Michell Co., 303 cases bulbs.
Henry & Lee, 253 cases bulbs.
H. A. Dreer, 265 cases bulbs.
Skidelsky & Irwin, 251 cases bulbs.
A. Roelker & Sons, 155 cases bulbs.
F. R. Pierson Co., 110 cases bulbs.
W. Hagemann & Co., 144 cases bulbs.
Stumpp & Walker Co., 108 cases bulbs.
Stokes Seed Store, 85 cases bulbs.
J. M. Thorburn & Co., eight cases bulbs.
H. Mungesser & Co., 269 bbls. clover seed.
Brown Bros. & Co., 50 cases seed.
To others, 2,180 cases bulbs, 1,013 bags clover seed, 928 bags, 603 bbls. seed, 47 bags grass seed, six cases plants.

During the week ending Aug. 20, imports were received at New York as follows:

Vaughan's Seed Store, 750 cases bulbs.
Stumpp & Walter, 386 cases bulbs.
R. M. Ward & Co., 340 cases bulbs.

GIANT PANSY PLANTS

The KENILWORTH Strain

Must not be compared with the flimsy Trimardeau it is much larger and of good substance. The immense flowers of $3\frac{1}{2}$ to 4 inches are of perfect form, every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selection. The stock plants are selected from many thousand of plants grown for market. It is rich with shades of brown, bronze, red mahogany and numerous other light, medium or dark mixtures.

1910 Seed Now Ready.

2000 seeds 5c; 5000, \$1.00; $\frac{1}{4}$ -oz. \$1.25; 1-oz. \$5.00; 1 lb. \$50.00. Also the following colors of the Kenilworth strain: yellow, yellow-darkeye, Lord Beaconsfield Mme. Perret white darkeye, purple, black, masterpiece, red brown bronze and light-blue shades. Trade packets 25c. any five for \$1.00.

Rainbow is a blend of over 50 of the latest introductions of giant pansies of the most beautiful gorgeous colors; blotched, striped veined marbled, etc. With every \$1.00 worth of Kenilworth strain I will send 1000 of Rainbow free. and with other amounts in like proportion.

Annual meeting at Grand Rapids, Mich.,
Sept. 27-29.

MUSK MELONS are later than usual in New Brunswick, but there will be an abundant crop according to J. Bebbington & Sons at Fredericton.

CHICAGO.—R. F. Dilger, 6058 N. Clark street, returned August 18 from Milwaukee, Wis., where he attended the funeral of the two-year-old daughter of Mrs. Chas. Bunda. The funeral was held at the home of Frank Dilger, the well-known florist of Milwaukee. The two gentlemen are brothers and Mrs. Bunda is a daughter of Frank. Mr. Dilger was accompanied home by his sister, Mrs. W. H. Krantz, and two daughters, all of this city. This week will mark the windup of the cucumber crop and preparations are being made for the lettuce crop. A cement walk is being laid on the premises.—The greenhouse vegetable growers are busy planting and expect a good season. Celery and cabbage will be a failure and this will be an advantage to the greenhouse grower.—The first crop of Grand Rapids lettuce came in the market last week and brought from 30 to 35 cents a 3-pound case.—Quite a delegation of greenhouse growers from this city will attend the annual convention of the Greenhouse Vegetable Growers and Market Gardeners' Association at Grand Rapids, Mich., September 27-29. R. F. Dilger will open the discussion on "Selling Through the Commission Man."

Market Gardeners' Association.

GRAND RAPIDS MEETING.

The programme committee, consisting of President C. W. Waid, Prof. R. L. Watts and E. A. Dunbar, has practically completed its labors and the plans outlined for the third annual convention of The Greenhouse Vegetable Growers' and Market Gardeners' Association of America, to be held at Grand Rapids, Mich., September 27-29.

All phases of market gardening, both outdoors and under glass, are given a share in the discussions. The leaders for the various topics are the foremost men in the country in their profession. The Livingston hotel will be headquarters for the convention.

PROGRAMME.

Tuesday, September 27, 9:00 A. M.
Call to order.—President C. W. Waid, New Carlisle, Ohio.
Welcome Address.—Geo. E. Ellis, mayor of Grand Rapids.
Response.—Prof. Wm. R. Lazenby, Columbus, Ohio.
President's Address.
Report of Secretary.
Report of Treasurer.
Reports of State Vice-Presidents.
Reports of Standing Committees.
"Results of Local Organization."—Floyd J. Zuck, Erie, Pa.

1:30 P. M.

"Detail Methods of Operating a Massachusetts Market Garden."—Prof. H. F. Thompson, Attleboro, Mass.

Indoor Tomatoes.

ED. AMERICAN FLORIST:—

Please tell me through your columns how far apart should tomatoes be planted in the greenhouse and what manure and soil would be the best. I had one house planted in cucumbers; could I plant tomatoes in the same soil? C. S.

Tomatoes should be planted about 15 inches apart in the rows and the rows 18 inches apart, less or more, according to the width of the bench. Any good soil will grow tomatoes, but it should not be too rich at first. Add the manure when the plants begin to fruit. Any manure containing a good percentage of potash is suitable. The soil that has grown cucumbers should be suitable for tomatoes, but it would be improved by the addition of a fourth or fifth portion of new, clean loam.

Mushroom Growing in England.

I know it to be a fact that many inexperienced young gardeners are afraid to make an attempt to grow mushrooms except in structures artificially heated. It is certainly a much easier matter to grow them in such places, but elaborately-built houses are not absolutely essential to success, as I have proved during a period of 25 years. In that time I have had at my disposal properly-constructed mushroom houses, and in some in-

stances only cool sheds. In these, and in the open air, with the aid of good hotbed material, and, in several cases, only tree leaves, I have grown mushrooms without experiencing a single failure except one partial failure when attempting to grow them in practically all peat moss litter from stables. I will briefly explain how a beginner should work so as to attain success.

The hotbed material and the way it should be prepared are very important essentials. Of course, stable manure is the best to use, and with it a small proportion of tree leaves, as the latter induce a steady and lasting heat. Many persons fail because they spawn an ill-prepared bed too soon—while the heat is too high—and then the spawn is destroyed. The manure must be gathered fresh every morning and spread out thinly in an open shed to partially dry and sweeten. If turned over every morning the rank gases escape, and in this way the manure is sweetened. When sufficient material has been prepared, the bed should be built. But prior to making up the hotbed, throw up the whole of the stable manure into a conical-shaped heap and allow it to remain so for one day and one night, then spread out the material again thinly. Much steam will escape, and so the manure will be finally sweetened.

Having decided upon the position, proceed to make up the bed. Beds may be of any size, but the smallest should measure 3x4 feet, and the largest 4x12 feet. A very suitable size, however, is a 4x8 feet bed. In nearly all cases, where the beds are constructed on floors of sheds, the beds should be flat-topped and 15 inches deep at the back, with a depth of one foot in front. Where leaves are used they should be added when the bed is being formed. It is a great mistake to remove all the straw litter from the manure; long straw may be taken out, but the short litter should be left in. Add one barrowload of leaves to three of manure, and thoroughly mix the parts. Shake the manure and leaves lightly over the place where the bed is to be made, and as layer after layer is so put down well tread all so that when all the material is used up the bed will be very firm.

When the heat has reached the maximum, and stands at about 85° on the decline, insert the spawn nearly two inches below the surface of the manure, and nine inches apart each way. The lumps of spawn should be nearly two inches square. Beat down the manure again when the spawn is inserted, and follow with a coating of sifted maiden loam one inch thick. Finally cover with clean straw one

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1880. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; 1/8 oz., \$1.50; 1/2 oz., \$5.00; oz., \$10.00.

VAUGHAN'S "GIANT PANSY MIXTURE,"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Casier strain. Trade pkt., 25c; 1/8 oz., 60c; oz., \$4.00; 1/4 lb., \$14.00.

Greenhouses:
Western Springs, Ill.

foot deep. No watering will be required; keep the shed darkened and exclude draughts. In about six weeks' time the first mushrooms will appear.

When in full bearing, I like to remove the straw covering in the case of beds in sheds and replace it with sheets of brown paper, as the mushrooms always come pure white under the paper whereas the damp straw stains them. Only water the beds with tepid water if they become dry, but syringe the floor and walls of the shed every day. When the beds have been in bearing for about six to eight weeks, the growth of mushrooms may be stimulated by giving the bed a good watering with tepid liquid manure—from stables, and about the color of pale brandy—and some salt; the latter being used at the rate of one ounce to a gallon of the liquid manure water.

Beds in the open air may now be constructed. The preparation of the manure and its manner of use should be the same as in the case of beds in sheds; only the beds should be in the form of ridges four feet wide at the base, and three feet high at the ridge. In this case, both a coating of litter and a thatch of straw—and in severe weather, mats—will be necessary. For beds made of leaves only beech and oak leaves should be used; they must be just slightly damped when the bed is constructed, and I have found it a good plan to put on a layer of maiden loam three inches deep and insert the lumps of spawn in the center. Usually, we have noticed that a period of about eight to ten weeks passes before mushrooms appear. Protect these beds in the same way as the others. Outside beds are best made up on the west or northwest sides of walls or fences, but never make them under the branches of trees.—Gardeners' Magazine.

Geraniums, Rooted Cuttings

Ricard and S. A. Nutt until Oct. 20, at \$10.00 per 1000, better book your order soon. Poitevine all sold until above date.

Perennial Phlox,

A superb Salmon Pink, strong divisions at \$2.00 per 100 or \$15.00 per 100. (These prices are cash with order.)

ALBERT M. HERR,

Where Peppermint is Raised.

St. Joseph county, Ind., and Berrien county, Mich., raise 90 per cent of the peppermint grown in this country, according to information gathered by the U. S. census bureau. These two counties have a vast acreage devoted to the culture of mint plants and several thousand men are employed in the industry.

The soil is particularly well adapted to the raising of the plant and several large firms are devoted exclusively to the culture of a single product. One farm in Berrien county, owned by A. F. Beebe & Sons of Niles, Mich., alone comprises about 1,700 acres. The largest growers in St. Joseph county are Jacob Weiss, Crull Bros., Daniel Ward, George Lane, George Motts, and J. A. Boles.

The mint plants are cultivated much like other farm products, but a small distillery is used to extract the oil following the harvest. Mint this year is selling at \$1.50 a pound, although the price has gone as high as \$5. The crop this year is short, owing to the continued cool weather in the spring and recent drought.

Coleus Rooted Cuttings

Verschaaffelti Golden Bedder and Fancy assorted among the latter are a good proportion of D. K. Herr's unrivaled Giant Leaved at \$5.00 per 1000 until Oct. 1. (Fine lot ready now.)

Iris, "German"

Mixed colors at \$2.50 per 100, \$20.00 per 1000.

Lancaster, Pa.

Frederickton, N. B.

We have certainly had a beautiful season so far, plenty of rain which seems to suit us here in this part of the province; also the temperature has not been tropical, but temperate, cool nights and moderate warm days. The lawns, trees and fields are green. Potatoes look well and are a fair crop. Garden truck sells well, also beets, turnips, radishes and lettuce. Tomatoes are coming in in limited quantities at about 10 cents per pound. This has been a poor season for tomatoes; the temperature has not been high enough—too much growth, not enough fruit. Our frame cucumbers have sold well at 40 to 50 cents per dozen. The local supply did not meet the demand and they will likely be cheaper from now on. The season suited dahlias, roses, sweet peas and pansies, in fact almost everything that likes moderation. Trade has been rather better than usual.

J. B.

KENNEBUNK, ME.—J. O. Elwell has been making repairs at his greenhouses on Brown street, including the building of a cement wall under one of the boiler houses.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

RUDBECKIA GOLDEN RAY is a great improvement over R. Golden Glow.

AUGUSTA, GA.—P. J. Berckmans Co. writes: "Since May we have had ideal growing weather, and nursery stock has more than made up for the lost time due to severe drought in March and April. Owing to the drought there is a poor stand of some things, which could not be planted until late. As an illustration of how nursery stock is growing, we have one year budded apples which are today eight feet tall and still growing. The outlook for fall business is very promising. We have recently closed up several large landscape contracts in different parts of the south."

Connecticut Nurserymen at Play.

ED. AMERICAN FLORIST:—

Enclosed find photograph of a group of the members of the Connecticut Nurserymen's Association, taken on the grounds of the Elm City Nursery Co., New Haven, where the association met for a field day, August 11. After spending a pleasant morning exploring the nurseries, the members took the trolley to Savin Rock, Connecticut's Coney Island, where, after a well served dinner at the Colonnade, the members played kids for the remainder of the day, taking in all the shows from the roller coaster to the flying horses. It was voted unanimously that the day had been most pleasurably spent.

E. F. C.

A Good Nursery Label.

While looking through the nursery of the Geo. Wittbold Co. at Edgebrook, Ill., recently we were much impressed with a simple and, apparently, an extremely effectual system of labeling

trees or other stock that have to be a long time on the ground. Wood labels soon decay and there are numerous faults to be found with almost all of the metal ones we have seen. The system followed at the Wittbold nursery is to drive a length of steam pipe of about 1¼-inch or 1½-inch bore firmly into the ground with the upper end open. A cap of the same sized pipe has a wooden rectangular label attached to it and this is simply dropped into the open end of the pipe. It is easily withdrawn for examination, is protected absolutely from all

Vitality of Pine Seeds.

It is well known that various species of pine in the western United States retain their cones and seeds for a number of years after the seeds are mature. Sometimes these cones remain on the tree for nearly 20 years. The question having arisen as to the vitality of the seeds in such aged cones, several experiments have been made in order to settle the matter. J. C. Blumer experimented with 6,000 seeds and found the older seeds not only as viable as the younger ones

but more so. Out of 3,000 from 10 to 30 years old, 40 per cent retained their vitality, while of a similar number of seeds less than 10 years old, only 31 per cent grew. The advantage of this prolonged vitality is that it gives the trees a distribution in time similar to the distribution in space of other trees. A forest of such pines may thus be reproduced in a locality more than 30 years after the last living specimens have disappeared.—American Botanist.

THE government is making inquiry as to what is technically known as "seedling evergreens" by the trade.

LANCASTER, N. Y.—Wm. J. Palmer of Buffalo, who is the owner of extensive greenhouses here, has purchased the Hummel property on Central avenue, near the Erie railroad. The property in question will make a desirable acquisition to Mr. Palmer's large interests here. The consideration, it is said, was about \$7,000.

Poehlmann Bros. Co., Morton Grove, Ill.

Milwaukee.

BUSINESS GOOD.

Stock is selling readily; quite a number of gladioli are making their appearance, the majority of them being of the darker shades, but of good quality. Roses are still cleaning out, lily of the valley enough to supply the demand. The first new crop carnations made their appearance last week but are rather short in stem, which is to be expected. Asters of the good grades are scarce but plenty of short and inferior grades. Shipping business is exceptionally good.

NOTES.

Fred Holton is very much disappointed that he could not attend the convention, as he had planned a good time and the rest of the boys missed him very much, as he is very good company, especially when away from home. He tries hard to see that all enjoy themselves. He could not go on account of sickness in his family. G. H. Hunkel reports that prospects for the bulb business are very good. He has already received good advance orders.

Wm. C. Zimmerman's store is completed and there is no question but what he has one of the prettiest stores in the city. He says business is very good, having a large amount of funeral orders for the deceased wife of Mr. Gutsch, the popular brewer of Sheboygan, which made it necessary for him to go along with his orders and take proper care of same.

A. Leidiger and wife of the Edlefsen-Leidiger Co., are planning a visit to an uncle in New York. Mr. Leidiger is looking forward to this trip as he expects to have a good time; he intends stopping at a pretty place on the Hudson and is going to take in everything worth seeing. Miss Rose Semmler, of this company, is back after a month's recreation.

J. E. Matthewson of Sheboygan, who had joined the party from this city to the convention, returned just in time to get into harness and help out with the extensive funeral orders for the funeral of Mrs. Gutsch.

Forest Home Cemetery Association is putting up concrete benches and is all through planting carnations. They only cater to the people that use the blooms to decorate the graves.

Currie Bros. Co. was busy with funeral work, having a number of good orders. This house receives the bulk of the masonic work, which keeps it going almost all the time.

Mueller & Schroeder have started to cut some new carnations and they expect to have a crop in the near future. Gus Mueller of this firm reports a good time at the convention.

A. Zender of Chicago spent a few days fishing at Pewaukee Lake with F. H. and George Holton; the latter is the man behind the gun at the Holton & Hunkel palm houses.

E. Welke and wife spent a few days in the country fishing and report a very good time. Henry Marquardt, of this firm, spent a week calling on out-of-town trade.

E. Eberhardt and Wm. Nero of Cedarburg stopped over on their return from the meeting of the State Horticultural Society.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great *Araucaria* Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Excelsa Glauca*, are in favor more than ever this year.

This is our 25th anniversary since we began importing *Araucarias*. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is **10,000**, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in *Araucarias* and *Azaleas*. The trade is well informed that for many years past I go personally to Belgium to protect and select for my customers the best of *Araucarias*, *Azaleas*, *Palms*, etc., that cash can buy there. Empty houses don't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4-5-6 tiers 2-3-4-5 years old, 35c, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.

KALAMAZOO, MICH.—The entire potato crop of southern Michigan, amounting to more than 1,000,000 bushels, and valued at more than \$1,000,000, is a total loss, according to reports at markets here. Farmers, dealers and crop experts are responsible for the above statement, and say the crop was killed by heat.

Chrysanthemums

AND

Aster Seeds

Elmer D. Smith & Co., ADRIAN, MICH.

Chicago Notes.

Mrs. J. F. Lang, 2008 Melrose street, is enjoying a steady retail and wholesale trade. G. F. Haecker has had charge of the greenhouses since the death of Mr. Lang, which occurred about three months ago. Mr. Haecker is an experienced grower and was formerly in the employ of C. Penshorn, 1243 W. Sixty-first street. A specialty is made of bedding plants in the spring. We saw here a fine stock of Boston ferns and rubber plants. The residence and greenhouses were lately rebuilt and everything about the premises is in first-class condition.

J. C. Craig, 175 Wabash avenue, is receiving his share of wedding work, having three orders for August 20 and two for August 21. Word received from Joe Craig was to the effect that he and his party had reached San Francisco, and were enjoying every mile of their long outing.

At J. A. Budlong's we noted elegant Jardine roses this week, also grand Kaiserins. All the popular roses, in fact, are coming in large numbers but the demand keeps good and cleans them up well. Chrysanthemum Golden Glow is also coming in quantity.

Briggs House Florists (Argison & Papatony), 57 Fifth avenue, are enjoying a good summer trade. Andrew Pappas is assisting Mr. Argison at the store on Fifth avenue and Mr. Papatony has charge of the store in the Masonic Temple.

A. Mangel, formerly of Spokane, Wash., is now landscape gardener at the Alexian Brothers' hospital, Racine and Belden avenues. P. Drowysus has charge of the greenhouse and expects to begin propagating in the near future.

Pittsburg.

STOCK SCARCE.

This writing leaves the market quite lively. Funeral work is very plentiful and stock scarce. Asters, lilies and white roses are much sought for, and the market is bare of these. Everything is cleaning up except pink roses which are a little slow. If the weather had been any way favorable stock would be plentiful. The early crop of asters was almost a failure. Gladioli were also affected and at the present time good stock cannot be had.

NOTES.

Geo. Oles, Youngstown, O., is branching out from the flower business a little. He has bought a large chicken farm and is pushing the chicks during the dull season and flowers in the winter.

J. W. Dudley, Parkersburg, W. Va., made the trip to Rochester convention overland in his touring car and reports a fine trip.

Mrs. E. A. Williams, Penn avenue, is cutting some of the finest asters seen in this market.

Misses Forbes and Donahey, Wheeling, W. Va., are taking a rest at a quiet summer resort on Lake Superior.

PEONIES

Place your orders now for

"QUALITY" CHRISTMAS SWEET PEAS.

AT the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST AND SEPTEMBER.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cents, ¼ lb. 75 cents, ½ lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cts., ¼ lb. 4 cts., ½ lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Florence Denzer. Pure white. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Le Marquis. This is the same color as Princess of Wales violet; has very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Helen M. Gould. White, open flower; standard lilac, marbled. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. Alex. Wallace. Lavender. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Geo. Lewis. Large, pure white wavy flower. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. W. W. Smalley. Satiny pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Hannan. Deep rose-pink of a very pleasing shade; medium flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. P. J. Dolansky. Daybreak pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Chas. H. Totty. Sky-blue; late. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Zvolanek. Blue, variegated; good for variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Wallacea. Very fine lavender, a grand florists' variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Watchung. Pure white. Oz. 20 cts., ¼ lb. 60 cts., ½ lb. \$1.00, lb. \$1.75.

Wm. J. Stewart. Blue self. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

All other varieties of winter and summer flowering Sweet Peas supplied. Write for quotations upon large or small quantities.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

Carnations

F. DORNER & SONS CO.
La Fayette, Ind.

Glen Cove, N. Y.

The Nassau County Horticultural Society held its monthly meeting at Pembroke Hall, August 10. It was aster night, and a grand display of those beautiful flowers was on hand.—Winners were: Society's prize: Best 12 White, J. McDonald; Best 12, Pink and Best 12 any color, I. Trepass, also winner of Matz special prize for best 24 White. Mr. Trepass certainly knows more than most in the culture of asters; he had magnificent blooms on exhibition. Honorable mention to A. Golon for Sutton branching asters, I. Dunnbrosky for collection of asters, vase of aster, purity, onions and egg plants, F. Petioccia for sweet peas and cucumber. Next meeting will be fruit night, prizes will be given to three best melons, best six peaches and best six apples. O. E. A.

HENRY A. DREER, Inc., 714 Chestnut St., Philadelphia, Pa.

Washington.

The trade here, in common with other cities, is feeling the summer dullness, but as this is an annual occurrence there is no worrying over it. Some very good American Beauty and Killarney roses are on the market but nearly all roses are short. They can be used in funeral work and as that is the main feature of the trade at present, there is but little inconvenience on account of stock. At a number of the retail stores advantage is being taken of the dullness to give the interior a thorough redecorating. The growers seem to be in good shape for the coming season, with roses and carnations looking well on the benches. The outdoor crop of asters is generally poor this year; the best we have seen were grown under glass.

NOTES.

In writing of the local growers it is only justice to state that in the past 10 years a number of them have made great progress in both the extent and equipment of their ranges and the quality of stock grown. This is all the more creditable to them when it is stated that the soil and climate of the District of Columbia is less favorable for floriculture than some other parts of the country.

Doubtless those who are regular attendants at the conventions of the Society of American Florists, missed this year the genial personalities of Wm. F. and Adolphus Gude. Wm. F. Gude, a former president of the society, had the misfortune to have one of his hands injured recently while operating his automobile. Though the hurt was not serious it has been painful. Adolphus Gude missed the train that carried the local delegation and as he could not travel with the boys he concluded to forego the trip. This firm has in the past two years added greatly to its glass area, having now a total of about 160,000 square feet, with a very large area in roses and carnations. Ferns and a great variety of other foliage stock are also grown. Recently they have taken up the culture of gardenias.

FIELD-GROWN

Dorothy Gordon Carnation

NOW READY

Strong, Clean, Stocky Plants,

\$12 per 100; \$100 per 1000

JOSEPH HEACOCK CO., Wyncote, Pa.

Alexander B. Garden, whose range is in the Anacostia section, continues to make great improvements. He is preparing to erect a large forcing house before cold weather sets in. He has his whole range equipped with concrete benches and has been greatly pleased with results. He is now cutting a good quality of roses for this early in the season and has a fine stock of carnations and chrysanthemums coming on. Harry Roby, his salesman, notwithstanding dull times, has been quite busy of late. A feature of the Garden range is the fine quality of Adiantum hybridum grown for cutting.

Albert F. Esch, a member of an old family of florists, located two years ago at 60-64 O street, N. W. He opened a store and erected 5,000 square feet of glass. Since that time he has been very successful and is now erecting two more houses that will bring his glass area up to 10,000 feet. He is preparing to force 50,000 bulbs. All his surplus stock is handled by the Washington Florists' Exchange of which J. Louis Loose is president and Albert Schnell manager. The exchange has the support of a number of the responsible men in the trade of this city and is branching out.

M. J. McCabe, who bought out the business of C. Schellhorn, is showing a good variety of stock. Albert Bay-

liss, formerly with J. Louis Loose, is now his rose grower. Mr. Schellhorn since his retirement has been taking rest and vacation and with his wife is now in Europe. Other European tourists from this city are J. H. Small and wife and Miss Marie Gude, daughter of Adolphus Gude, who is one of a party of graduates from a young ladies' college of Baltimore who are traveling with their teachers.

Marche & Co. at Fourteenth and H streets, N. W., have a very handsome aquatic and rustic display in their show window. It is artistically arranged on a background of rockwork. In the pond there is always a choice collection of water lilies and other aquatics.

Mr. Crawford of Robert Kift's store, Philadelphia, has been visiting his son-in-law, Frank Sly of the Center Market. G. Milton Thomas and Frank Sly are now partners in the retail business and conduct two stands in the market.

John Robertson is now well settled in his new store, 2010 P street, N. W. It is in a fine locality, near Dupont and Sheridan circles and Mr. Robertson will doubtless be as successful there as he has been in other locations.

Edward L. Bowers is now manager of the Pennock-Meehan store at 1212 New York avenue.

OCONOMOWOC, WIS.—The feature of the opening session of the summer meeting of the State Horticultural Society here August 17, was an address by C. B. Whitnall, city treasurer of Milwaukee, with "Back to the Land" as his subject. Mr. Whitnall spoke of the value of gardening, both on private property and in public parks and school grounds. He urged the value of shade trees in consideration of public health and the beautifying of property. During the afternoon a garden-er's session was held. Addresses were given by E. H. Milnes, Oconomowoc, and Ernest Gozenbach, Sheboygan.

King Iron Frame Greenhouses

"Ask the Man Who Has One."

2 Houses 35 x 300 Feet.

GERMANTOWN, PA., Jan. 29th, 1910.

Dear Sirs:—

The two 300-foot houses you built last summer, at Roslyn Heights, are thoroughly satisfactory. They are light, strong, and rigid. Mr. Clarence Upton, who manages the place, is enthusiastic about your houses.

Yours very truly,

(Signed.) JOHN WELSH YOUNG.

Send for Bulletin No. 35, which describes the King Iron Frame Construction.

KING CONSTRUCTION CO., North Tonawanda, N. Y.

Greenhouse Construction

BY PROF. L. R. TAFT.

It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 210 pages and 118 illustrations. PRICE, \$1.50

Greenhouse Management

By the same author. Covers the subject completely. 382 pages. PRICE, \$1.50.

STAKES.

Cane Stakes. Standard grade 6 to 8 feet, per 100, 85c; 500 for \$3; \$5.50 for 1,000.

Pipe stems about 6 feet, per 100, 60c; per 1,000, \$5. Vaughan's Seed Store, Chicago.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

EVERYBODY'S PAINT BOOK (Gardner).—The author has given in this book easily understood instructions for painting anything from a board fence to a fine room and so well is it illustrated that almost every tool a painter needs is shown and described. The perusal of this book will save much money to those who have a bent for this kind of work. It contains 180 pages. \$1.

THE ALLIED TRADES

Week's Steam Coal News.

Chicago.—With the rout in disorder of the forces of International President T. L. Lewis from the Indianapolis conference and the apparent supremacy of President Walker of the Illinois division of the miners' union in matters pertaining to coal mining in this state, the outlook for higher figures for steam coal is enhanced considerably. While it was confidently expected that the infusion of the personality of former leader John Mitchell into the controversy would tend to hasten the final opening of all the mines that are now idle in this state, this expectation did not materialize, but, on the contrary, reports emanating in the Indiana metropolis point to the feeling that John Mitchell and International President Lewis are far from working amicably. Charges and counter charges were thick and fast during the heat of the arguments. Reckless extravagance of the funds of the miners' treasury in years past was brought to light. These bickerings did not conduce to create a sentiment of good feeling and no headway was made up to the closing hours of the conference last week.

The early part of this week delegates to the convention were jubilant over the unqualified indorsement of the Illinois coal strike on the basis of the Peoria demands and the defeat of T. L. Lewis and the proposed compromise settlement. As a result of the action of the convention the Illinois strike will be continued until every operator in the state has signed contracts granting the original demands of the strikers. Both the operators and the strikers are preparing for a long contest, and it is predicted that consumers of steam coal will face increased prices before snow flies. The principal demands of the Peoria convention are, in addition to a raise of 5.55 per cent in wages, that the coal operators shall pay the wages of the shot firers, a differential of three cents a ton mine run in Franklin and Williamson counties, and a two cents differential in the "long wall" mines in northern Illinois. Coal operators insist that they "never have paid the shot firers' wages and never will." They object seriously to the differentials demanded, but virtually have agreed to the raise of 5.55 per cent some time ago.

Persistent rumors in Chicago indicate that a few of the larger operators, seeing no hope in continuing the fight with the miners, have about made up

 CHICAGO.

their minds to open their mines irrespective of what the majority of the other operators do. To substantiate their position they point out that the time is now at hand where they must have coal to cover their contracts entered into months ago.

Great Lakes Coal Shipments.

Shipments of soft coal for June, 1910, and the six months ending June 30, 1910, were 2,806,963 and 5,913,177 gross tons, respectively; these were also the largest on record for the periods named. Over 90 per cent of the season's shipments proceeded from Lake Erie ports, mainly from Toledo, Cleveland, Ashtabula and Ashland, and only about 10 per cent from Lake Michigan ports. About 56 per cent of coal receipts during the present season are credited to Duluth-Superior and Milwaukee, though considerable quantities found their way also to smaller Lake Michigan and Lake Superior ports such as Manitowoc, Green Bay, Escanaba, Ashland and Marquette. Receipts at Chicago during the season were larger than during previous years, totalling 187,284 gross tons for the six months of the present year. The shipments of hard coal for the month

and season ending in June, 628,026 and 1,567,789 net tons, mainly from Buffalo and Erie, were also larger than for the preceding years. About one-half of the hard coal received is credited to Duluth-Superior and Milwaukee; considerable quantities of this class of fuel are also taken by Chicago.

E. J. McQUADE, of the sales department of F. G. Hartwell Co., 1855 Peoples Gas building, Chicago, was absent from his desk this week, enjoying a vacation.

A. J. SCHOENECKE, president Illinois Heater & Mfg. Co., 35 Dearborn street, Chicago, makers of "Illinois" self watering flower boxes, was in attendance at the Rochester convention in the interest of his product; sales have been very brisk lately.

GEO. B. LIMBERT & Co., 557 Fulton street, Chicago, have in preparation a handsome and comprehensive catalogue of wrought iron pipe and pipe fittings, valves, and other steam pipe and water heating supplies, which will be mailed to the trade upon request, free of charge, as soon as it comes off the press. Mr. Limbert reports inquiries and business good.

A. A. Lavaque, the affable representative in Chicago of the Pittsburgh Plate Glass Co., is seen almost any day amongst the glass buyers; he reports business in extra good shape, sales keeping up to the producing point. Very little glass is in sight.

DEVORE & RAYNOLDS Co., 176 Randolph street, Chicago, advise that they are in good shape now to take care of orders for greenhouse white paint; they also put on the market green paint for preserving wire work. Prices will be furnished florists and the trade for the asking.

THE Illinois Malleable Iron Co., 1801-1825 Diversey boulevard, Chicago, through its advertising representative, J. R. Steneck, reports an extra good demand from greenhousemen and nurserymen for its line of pipe fittings and boilers. This company issues a very complete and instructive catalogue explaining goods put on the market used by greenhouse and allied trades, which will be mailed upon request, free of charge.

Newport, R. I.

Mrs. James B. Haggin gave one of the most elaborate and varied entertainments of the season at Arleigh, her summer home in Bellevue avenue, August 18. It consisted of a dinner and dancing, and the guests numbered 100. The floral decorations were a feature, 18,000 lilies and 4,000 American Beauty roses being used. Upon entering the villa, the guests passed between trees of American Beauty roses and were received by Mrs. Haggin in the drawing room, where there was a profusion of American Beauties

Cattle Manure in Bags Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

THE J. T. STEARNS LUMBER CO.,
NEPONSET, BOSTON, MASS.

Birmingham, Ala.

Hugh Seales has returned from the greenhouses after a busy time doing a good deal of remodeling. Everything now is in fine order. David Hope, formerly grower for J. L. Parker has charge now and is demonstrating his ability as a grower.

Fred Johansen, who is at the head of the Birmingham Landscape and Nursery Co., reports business good. He has charge of the landscape department and Ernest Kohleberg has charge of the greenhouses and nursery.

J. W. Luther of Ensley, who does a landscape as well as a flower business, is taking things easy now and using his auto for joy rides. There is considerable rivalry in speed between between him and Geo. Luffman.

John Lambert, formerly manager for J. L. Parker, has gone to the Amzi-Godden Seed Co., Geo. Curry, formerly with the latter firm, having opened for himself at First avenue and Twenty-first street.

The florists are going on their usual picnic this year at the invitation of the Amzi-Godden Seed Co., through G. B. McVay, its president, who has promised them a good time.

Hugh Seales has been very busy of late, the wet season having delayed planting. A. J. Koenig has finished but J. L. Parker has more to do.

John Colmant has had a very successful season and has a large force of men working at grading and preparing for next year.

Miss Lottie Elliott, saleslady at J. L. Parker's, has gone to Texas for her health. All wish her a speedy recovery.

Wm. Skews has added one new greenhouse to his place and has everything in first rate condition.

N. D. Summerfield reports a fine business and his place, as always, is in good condition.

Miss Lottie Black has opened up a cut flower store at Five Points.

Ragner Bros. have added two new greenhouses this season.

FROM THE FRENCH TRADE PAPERS.

New English roses of 1910, introduced by Wm. Paul & Son, comprise: Alice Cory-Wright (Hybrid tea).—Flowers of a pretty deep pink color, much resembling Mme. Caroline Testout, but differing in their larger size and greater doubleness. Vigorous and free. Elsie (Hybrid Wichuraiana).—Tender flesh pink, center a little deeper; perfect form and very lasting; a good acquisition among climbing roses. Juliet (Hybrid briar).—Very pretty novelty blooming in autumn as well as summer. Interior of rose a fine red changing to pink as it opens, outside old gold; the flowers are very large and exquisitely fragrant. It has been much admired at the shows. Portia (Hybrid tea).—The flowers are large, double, of a fine pink at the base of the petals, center of rose yellow. Fine for pot culture and exhibition.

The international rose meeting at Bagatelle, opened by the city of Paris June 18, was largely attended by rose growers from all countries. The jury was to examine the roses introduced in 1909, already noted in that year, and to judge them definitely after the two years of comparative culture, also the roses presented in 1910, for a first classification. None of the roses of 1909 was considered worthy of the Bagatelle gold medal, but certificates were awarded to the most remarkable in the following order:

Commander Jules Gravereaux (Hybrid remontant).—Cross of Frau Carl Druschki and Liberty. Strong, straight branches, thorns medium. Foliage fine deep green, stem strong and stiff. Flower very large, semi-double, velvety fiery red, lightly shaded maroon on the inside. The broad petals are deeply and irregularly toothed, which give the flower a peculiar appearance. Received a silver medal from the Association Lyonnaise in 1908, certificate of merit and gold medal at the Lyons exposition in 1908.

Seventy-four new roses of 1910 were offered, some of which particularly attracted the jury, and which will be definitely judged in 1911. This rose meeting is becoming a great international event in horticulture and its originators, Mm. Forestier and Graveureaux, received general felicitations. Our compatriot, E. G. Hill, and Peter Lambert have both been honored by the nomination of Chevalier du merite agricole by the French minister of agriculture.

Rose Viscountess Enfield. (Pernetiana).—Visitors to the Paris Bagatelle are entranced by the magnificent bloom of this new rose of 1910; its vigorous shoots produce long buds which open into large double, globular blooms of curious coloring, coppery old rose with yellowish blotches, the outer petals blotched carmine red, and some streakings of yellow showing in the heart of the flower. It is a chance seedling of Soleil d'Or.

Treat your plants for parasites one day each week, the same day, until it becomes a habit, says M. Ad. Van den Heede in the Moniteur d'Horticulture, and we shall hear less of their ravages! How simple to dust flowers of sulphur over the garden while the dew is on, to spray with a one per cent solution of essence of tobacco once a week!

Molly Sharman Crawford (Tea). Dickson.—Strong and branching bush, flowering fully, very large, double-white flowers of perfect form, with high center, with the outer petals recurved. For outdoor or pot culture.

Mademoiselle Marie Mascuerand. (Hybrid tea). Bernaix.—Vigorous, erect plant, with bright green foliage, long, stiff stems carry very large, quite dou-

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.
 $\frac{3}{4}$ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

Send for catalogue and list of growers that are using this boiler.

ble flowers of flesh-white; form an elongated cup.

A double-flowered gloxinia illustrated in the Revue Horticole of June 1 has the corolla well doubled, the flower having some resemblance to a double petunia. This is the first time even a small percentage of seed has given double flowers and it is expected that the strain will be established in the near future.

Gaston Bonnier, professor of botany at the Sorbonne, has published his "Simple Method of Naming Flowers," (in French) comprising 372 photographs in colors and 2,715 in black, as a convenient means for persons without knowledge of botany to identify flowers.

Laciniate flowered cosmos, is a new variety of this neglected annual, which, even if it blooms late, compensates by blooming freely and long. The new mammoth strains, among them Lady Lenox, shade from white to purplish rose and make the autumn gay.

Rose Lady Alice Stanley (Hybrid tea).—Flowers pale flesh color inside, reverse of petals coral red.

Talk Your Heating Troubles Over With Our Trouble Man

HE can help you out. Heating troubles are his hobby, he thrives on them. If your boiler's draft is slow, tell it to him—if circulation in the coils is sleepy, tell it to him—he'll know how to wake it up. If you are burning too much coal for the amount of heat returns, tell it to him; he will give you a solution. Are you thinking of "changing your system"? Talk about it with him, get your advice now when you need it, not after the mistakes have been made.

Address your letter to
The Trouble Man,

Hitchings & Co.

THIS HALF

shows you the three times back and forth Burnham Fire Travel that actually is three times. By three times, we mean three times in each half of the boiler—actually a six times travel, you see.

Its this wonderful travel that sifts out practically all the heat from the gases, making hot coils and a cool chimney.

And This Half

shows that deep fire pot with its thick bed of coals and the deep waterways directly over the hottest part. It is the space between these waterways that makes the cross fire channels running from side to side of the fire chamber. It is these channels that lead to the side flue opening. It is these flue openings that prevent the burning gases from rushing to an outlet at rear of boiler making only the rear sections really efficient. **Every Burnham Section is equally efficient.** Get the word **equally**, fixed in your mind. The Burnham is a greenhouse boiler made for greenhouse work. Send for catalog.

British Awards for Japanese Gardens.

On Thursday, June 30, the president and council of the Royal Horticultural society visited the Japan-British exhibition for the purpose of inspecting the Japanese gardens and the horticultural exhibits, says the Gardeners' Magazine. As the result of their visit they awarded silver cups as follows: To Keijiro Ozawa, of Tokyo, for the design of the "Garden of Peace" and the "Garden of the Floating Islands;" to Hannosuke Izawa, for the construction of these gardens; to the Tokyo Yen for the design and construction of two miniature gardens; to the Yokohama Nursery Co. for a collection of dwarf trees in pots, and for a dwarf specimen of *Thuia obtusa aurea*, 125 years old; to S. Hayashi, Kioto, for a pair of bronze garden lamps; to Senker Agawa, Kioto, for an imitation dwarf pine used in ceremonies; to Nippon Yusen Kaisha, for a garden of artificial flowers, and to the Girls' technical school, Tokyo, for an arrangement of artificial flowers.

Overcome By Flowers.

The fainting of two choir singers at a big wedding recently, because of the overpowering odor of the masses of flowers used in the decorations of the church, was far from being an extreme case of the exhalation of blossoms acting as an acute poison. It is not the only instance of this sort. Some time ago an actress was asphyxiated by the perfume of 3,000 California violets; say 30 times the number a woman would have in a corsage bouquet. Choir singers of experience recognize the danger that lurks in great masses of blossoms, although they think lightly of it in a large church edifice. They have been known, however, to decline to sing in a room where all the flowers were concentrated in a comparatively small space. In a large church a few hundred gardenias can cause actual distress to the supersensitive. The equally powerful, but much less agreeable, odor of narcissus is just as trying. None of these three flowers should be placed in a sickroom, and it is well to go slow with violets and Easter lilies. Roses and carnations are less objectionable; but making the sickroom a "perfect bower of flowers" is bad for a patient.

Medical science offers few interesting examples of fatal asphyxiation by the perfume of flowers. There is at least one notable case in literature. Zola allows one of his heroines to commit suicide in precisely this fashion, and it may be accepted as technically correct. A born photographer of human life, Zola was not likely to picture such a scene as the passing of Albine in "La Faute de l'Abbe Mouret" without being sure of his basis of fact. The abbe, it will be recalled, goes back to the church to seek pardon for his lapse into wrongdoing. While he pacifies his soul in the deepening twilight, Albine wanders in the forest, and as she leaves it the perfumes rising from her garden on the evening air put the notion into her head that the flowers she loves shall bring her death. She fills her bedroom with roses and other fragrant blossoms. Then, after shutting the room tight and stuffing all the cracks in the door and windows with mints, balsam, balm, and vervain, she covers her bed with tuberose and hyacinths, heaping four chairs which she ranges beside it with poppies, heliotrope, marigolds, and four-o'clocks. She masses violets on a table by her pillow, lilies go on another in like profusion, and the sofa is lost under a burden of red and white pinks and wall flowers. Over all, right and left,

she flings the roses, and then lies down to die on her hyacinths and tuberose. In the morning they find Albine dead.

Selika in "L'Africaine" commits suicide in the same way. When she sees Vasco da Gama sailing off to Portugal, she lies down under a manchineel tree and lets the poisonous exhalations of its blossoms soothe her unto death. The geography of the last two acts of "L'Africaine" is a bit uncertain; but, assuming that it was Madagascar, what was a new world tree doing there in those days? Nor does the upas tree, whose very name, *Antiaris toxicaria*, suggests its deadliness to those who linger long beneath its flowered branches, flourish there; that belongs in Java.

On the whole, it looks as if poetic license has been taken with the royal poinciana, which is a native of Madagascar and has the gorgeousness of bloom pictured in the last act of "L'Africaine."

Another operatic heroine, she of the title role of "Lakme," dies of flower poison; but it was from eating, with suicidal intent, the flowers of a species of datura, a sort of Indian cousin to the American jimson weed.

Desirable as it may be, though, to die a "beautiful death," trying to leave life by the flower route is a good deal of a gamble. Idiosyncrasy, as physicians admit, has a not unimportant bearing on toxicology, and it would be somewhat embarrassing for the would-be suicide to go to the expense of buying thousands of gardenias and arranging them in death-dealing fashion, only to discover that what was another's poison had no more than a mild, asphyxiating effect.—Thaddeus S. Dayton in Sunday Magazine.

VAUGHAN'S SEED STORE
Chicago or New York

Nashville.

Business has held up remarkably well the entire summer until within the past two weeks which have been somewhat dull. The supply of flowers has been fair, though some carnations and roses have been shipped in. Gladioli are about the only flowers grown outside this season. There has been entirely too much rain for the field grown asters, but very fine stock has been grown under glass; really the finest ever grown in this section.

All growers are holding back the winter stock of roses, but for a short while Geny Bros. have allowed some of their White Killarney and Killarney to come on and they were very fine.

THE STANDARD VENTILATING MACHINERY

HALF HOUR CHAPTERS FOR FLOWER GROWERS

Early Chrysanthemums.

The advent of the extra precocious varieties of chrysanthemum has led to many growers planting them as a catch crop in summer, following them with violets or other winter crops. It is easy to get them cleared off in time for violets, sweet peas or mignonette, and thus the benches are made use of for two or three of the summer months when otherwise they would be useless. But in order to reap the full benefit of the system no time must be lost when the chrysanthemums are cut, but they must be cleared off right away and preparations made for the succeeding crops. If violets are to be planted new soil will have to be brought in and the same applies to mignonette, but for the sweet peas possibly by the addition of some new soil the old can be fixed over to carry the crops. It will, of course, be necessary to look out for sufficient stock plants of the chrysanthemums for next season's supply and the plants must be either flatted up or planted out on a bench. Almost any kind of treatment does for them now, but toward the spring the plants for stock will have to be brought into a good light position in order to get suitable wood for propagating. If placed in pots they can be moved around as becomes necessary and this is usually the best thing to do with these very early kinds.

Poinsettias for Cutting.

There is usually some demand for cut poinsettias in every store at Christmas and the retailer who has some glass should devote a bench or a part of a bench, according to his demand, to this plant. The old stock plants from which the cuttings for pot plants have been taken are quite good enough to plant up for cutting from if young stock is scarce. They should not be disturbed directly after cutting but when they have started to grow freely again some of the old soil should be shaken off the roots, the strongest roots cut back a little and the plants set out firmly on a bench already pre-

pared. The soil need not be extra rich as feeding at the surface may take place later, but it should be firmed well when planting to induce a hard and short jointed growth. The plants are sure to be tall enough before flowering. Plant about one foot apart and take up from two to three shoots from each. After planting shade lightly for a few days and spray frequently but do not water the roots much until they begin to run freely in the new soil. Remove the shading and keep plenty of air on night and day when the plants become well established.

Hardy Plants.

The drought of the past few weeks in the middle west has been very trying for the grower of hardy herbaceous plants for cutting from. The hot sun takes the color out of the flowers and shrivels the growth in many cases, while it is usually impossible to either shade or water sufficiently to keep the plants in good condition. All that can be done in most cases is to keep the surface soil moving so as to form a layer of dry soil that prevents the loss of moisture or to lay on a mulch of half decayed manure to keep the sun out of the soil. In most cases this latter will be useless until we get rain in sufficient quantity to moisten the soil well, but when it is moist the mulch can be put on and will prevent the moisture escaping. Young seedling stock of pyrethrums, daisies, asters, delphiniums, coreopsis and other kinds require the greatest care, for unless they make a free growth during late summer and early autumn the plants are small and weak for planting out in spring. A thorough soaking of water when it can be done will do wonders for this stock and this, too, can be mulched after the soil is moistened. Seed can be sown now of campanulas, Shasta daisies, pyrethrums, sweet williams, wallflowers, Alyssum saxatile, candytuft, centaurea and others and will make nice stock for protecting over winter and planting out in spring.

Antirrhinums.

Young seedling or cutting stock of these plants in preparation for planting out next month must not be neglected. If the plants have been standing close together in a pit or frame they should be given a new stand and picked over, also topped if they show a disposition to run up unduly. Should they be getting potbound and the benches are liable to be delayed then the question of giving them a shift into larger pots should be considered. We do not like to do this if it can possibly be avoided, for not only does this cause extra work and expense in the potting, but they are more trouble to handle and plant out later. But it is wrong to allow them to become hard in the pots as they do not start well after planting out. If neither plan is feasible it may be worth while to turn the plants out of the pots and lay them in flats with a little loose soil around them as advised for maidenhair ferns. The roots will escape and form a "wig" in the loose soil that gives them a fine start when planted out quite different to that obtained by planting potbound stock.

Violets.

The scorching heat of the past few weeks has certainly given violet growers their troubles, whether growers of single varieties in the field or of the double kinds on the Marie Louise order. Respecting the latter varieties, the old idea of growing them in the sun and giving hardly any shading has given way to the more sensible and natural plan of shading heavily while the plants are making their growth, whether under glass or in the open. The violet is never found at its best in hot, dry places; it naturally delights in a cool and somewhat shaded position, while during most of the summer, its growth is shaded by other vegetation. This is the kind of atmosphere that growers should endeavor to keep up around their plants and by the admission of plenty of air at all times to so consolidate the growth that the crowns will be full of fine, strong flower buds in the fall. Where the young stock has been planted at half distance, or where the plants are still on the propagating benches lose no time in getting them into their flowering positions. When the plants are taken out in the case of double planting let the holes be filled at once with clean new soil made firm. The watering is an important point now. The plants are growing freely and need plenty of moisture at the roots, but the grower should be careful not to allow the border to become sodden. If possible so regulate the amount of water given that the plants are looking for it every day or two. Heavy soakings that render the soil wet for a week are wrong no matter what the votaries of "thorough" watering may say. It is necessary to be always on the watch for side shoots and pull them off in order to throw the entire strength of the plant into the center crowns. Should slugs or snails appear sprinkle a little dry soot and lime around the plants and lay traps of bran, lettuce leaves or pieces of cut potato, but do not feed the plants as yet.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Can It Be Done.

ED. AMERICAN FLORIST:—

In your issue of August 6, page 51, a correspondent asks "Can it be done?" We say "No, not for long." For a man who sells below a living profit to kill his brother florist is only building a gallows to hang himself. Such a man should be tarred and feathered and this would be too good for him. Yet there is room in the world for us all. Frederickton, N. B. J. B.

Handling Funeral Orders.

There are many rush days outside of holidays when orders keep coming in so fast and the list grows at such a rate that it seems doubtful whether the stock will hold out or deliveries be made on time. This is often the case

W. L. Rock, Kansas City, Mo.

Treas. Florists' Telegraph Delivery Association.

when work is for funerals, the ordering of which is often left to the last minute. This is the time when the makeup galax, magnolia or boxwood wreaths help out wonderfully. With an assortment of sizes of these on hand, quite a pretentious piece can be got up in a very short time, by the addition of roses, lilies, asters or any of the flowers in season. A few cycas leaves will add considerably to some pieces and in many cases a bow of ribbon will give a finish and help out a scarcity of flowers. All this is but the work of a few minutes and has a great advantage over the close set pieces which take so many flowers and consume so much valuable time in their arrangement. When the orders begin to mount up, talk wreaths and clusters; you want all the orders you can get and you prefer those that are easiest to make and most profitable. Cycas leaves are also a staple and a good stock of assorted sizes should always be on hand. The prepared imported stock is frowned down on by some dealers but it is used in large quantities and in many cases is more showy and satisfactory than the fresh cut cycas. It is well,

however, to have a pair or two of these in stock as they are always more or less in demand and will always command a good price.

Wheat sheaves are another staple that should be ready to show at all times. A good sized sheaf nicely made and trimmed with choice flowers makes a very appropriate emblem for an old person, just a few flowers, each one perfect and generally all of one kind, such as half a dozen lilies or a few rather full blown roses. If the flowers are white and a purple ribbon is used, as is best for an aged person, then a few purple flowers at the ribbon, to match it, are necessary.

Asters are now to be had in all shades in quantity and are very popular for sprays. Quite a good deal of taste and skill can be shown in the arrangement of asters. They have fairly stout stems and as a rule very pretty clusters may be tied without their being wired, but for large single or double sprays they are handled and can be placed better when wired, a rather dense bunch being lightened up considerably by pulling or bending the stems, so that many of the flowers are given prominence that would otherwise be hidden. In arranging the cluster it is not necessary to bind in every flower as added; let the bunch grow until it has attained some size, a good strong handful, then several wraps enough to hold them firmly. If it is to be a large spray and is becoming unwieldy let it lay on the counter or bench and add to it there, binding without lifting. In this way the flowers are not disarranged. Care must be taken, however, that sufficient backing has been added to stiffen so that it can be handled safely. An extra large arrangement is better made in two parts, into what is called a double spray. These are placed together, the stems bound firmly, and a number of extra flowers and green added as a large bow of ribbon is attached to give it the finishing touch. A pair of cycas leaves, underneath each spray and projecting beyond, increase the efficiency and add considerably to the selling price.

In the arrangement of flowers many seem to want every flower to have the same prominence. Bunches of this kind look too much as if they were made in a mould. A beautiful bouquet must be in some respects like a fine portrait or photograph, full of light and shadow, some points made prominent, others kept in the background. This is one of the most difficult things for the beginner to learn and only comes with practice and observation. In arranging flowers in a vase get the ends of the stems together and place them in; give them a shake so they do not lay too close together, add a spray or two of green and you can hardly improve on this or get as good results in any other way. Aster clusters of one color are given character by the addition, just where the ribbon is tied, of a spot of another color or a dozen or so of valley, a few flowers of *Lilium album* or perhaps a few sprays of white clematis. To all of these there should be attached a trifle of narrow ribbon the same color as the flower. Where the card is pinned on the ribbon a sprig or two of lily of the valley and maidenhair tied with baby ribbon makes an attractive finish. K.

TRADE EXHIBITION AT THE ROCHESTER CONVENTION.

Giving Partial Views of the Exhibits of the King Construction Co., Benjamin Hammond, Lord & Burnham Co., E. A. Beaven, John Lewis Childs Morehead Mfg. Co., B. Hammond Tracy Hitchings & Co., S. S. Pennock-Meehan Co., W. J. Boas & Co., M. Rice & Co., Kitts Mfg. Co., Stumpp & Walter Co., Geo. M. Garland Co., Wilson Hoyt Co., Storrs & Harrison Co., John C. Moninger Co. and Henry F. Michell Co.

Convention Echoes.

Friday was the day for which all the boys were waiting and the way they turned out fully taxed the capacity of the rolling stock of the electric road to Manitou. The grand rush for the refreshment booths when the cars arrived at Manitou fairly took the waiters off their feet and they had hard work to keep some of the eager and hungry ones from invading their working room, but there was plenty for all and everybody was well served. The brand of Rochester brew was excellent and in constant demand.

The baseball game was a great burlesque and would have made a headliner as a vaudeville attraction. In playing ability Will Graham was almost the whole show. His bowling experience stood in good stead and his two home runs were the features of the game. The Rochester boys must have neglected batting practice for if the balls had been even larger they would not have hit them. As one spectator expressed it, "They couldn't hit a balloon."

The fat man's race did not go to the fattest man. The turn around the flower pots was difficult to negotiate; the winner had the inside and got so far ahead after making the turn that he stopped and looked around to find where the rest were. W. A. Manda, who occupied the outside position, took a circle almost large enough to land him in South Orange, N. J.

The presentation speech of Ex-President Hill to President Pierson was very much enjoyed by all and delivered in a very happy manner notwithstanding the interruptions and imputations of prevarication which were very pleasantly passed over. President Pierson's acceptance was as happy as the presentation.

The Baltimore delegation was full of enthusiasm and were carefully noting what "to do" and what to "don't." From remarks overheard the ladies who attend next year will be tendered plenty of attraction and have an opportunity to appreciate southern courtesy and southern chivalry.

It was baseball night at Ontario Beach, but it was a question whether the national game enthusiasts outnumbered the florists at Rochester's Coney Island for but few of the cars in the roller coaster and other attractions but contained their quota of wearers of the florists' buttons.

The programme of sports contained many contests unknown to the visitors but all the mystery was soon solved and the home boys found many worthy competitors in their guests and the latter succeeded in carrying away a fair proportion of the prizes.

J. B. Deamud of Chicago was a grand success as self-appointed starter in the pipe race, with the result, which he no doubt desired to accomplish, of mixing things up generally. It took the committee several minutes to straighten things out.

Many faces were missed from the convention Thursday, but were again to be seen Friday. Upon inquiry, it was found that the trip to Niagara and return was too great an attraction to be missed.

"Meet me at National Flower Show, Boston, March 27-April 1, 1911," was

the bye-word of the boys from the Hub, and the inscription on the large blue buttons which they so freely distributed.

The Boston boys were glad to meet their old fellow members in the persons of Larry Cotter and Bob Berry who received many a hearty handshake.

The card party of the Chicago delegation was not seriously disconcerted by the smoker being cut off at Toledo. The game was continued on a baggage truck at the Toledo depot while the contestants waited for the buffet car of the second section.

The fireworks were greatly enjoyed by those who stopped to witness them, but after the three previous strenuous evenings many were so tired that they did not stay to see the pyrotechnical display.

Miss Margaret Vesey, Fort Wayne, Ind.
Second Vice-President Ladies' S. A. F.

The committee on excursions is to be congratulated upon the successful manner in which every detail was carried out.

The bowling contest was a "howling" success in the strictest sense of the word.

The ladies' race had its usual amusing features. E. A. W.

Great International Show in London, 1912.

It has been decided to hold a great international horticultural show in London. It will open May 22, 1912, and continue for eight days. The king has consented to act as patron and the undertaking is being actively supported by large numbers of wealthy English people interested in gardening. Nothing of the kind has been held in London since 1866, and after so long an interval it is confidently expected that the show will result in a great success. The site will occupy about 20 acres favorably situated in the west of the metropolis. Amateurs, gardeners and nurserymen of all countries are invited to take part. The schedule of prizes is in course of preparation and will be issued as soon as possible. The secretary is Ed. White, 7 Victoria street London, S. W., to whom all inquiries for further details should be addressed P.

THE CARNATION.

The Carnation Year Book.

Most of the special societies for floriculture in England issue an annual and the latest is that published by the Perpetual Flowering Carnation Society, bearing the above title. For a first attempt it is a very creditable publication. Portraits of the president, Lord Howard de Walden, the chairman, J. S. Brunton, and others are given. The literary matter is interesting and varied. P.

Lifting and Planting.

The planting season is at its height now. Most carnation growers are busy getting in their plants, making preparations or watching and bestowing extra care on those already in. A few essential points to bear in mind to meet the difficult problems connected with this work may now be in order. Make sure that the benches are in good condition, also allow for ample drainage. Half-inch spaces between the boards at the bottom of the benches are not any too wide; these will close up considerably after the soil has been in some time and the steady watering has caused the boards to swell. Thorough cleanliness is also a very important point. Clean out from underneath the benches any rubbish and particularly pieces of old rotten wood which if left laying around is one of the best breeding places for wood-lice or sow-bugs.

Whitewash the inside of the benches with good fresh lime and repair any part of the house and renew any glass so that the newly planted plants can be given the right amount of air and there will not be any danger from flooding of the soil in the benches from heavy rains. The question of soil is an important point and requires considerable study. Enough lasting nourishment has to be put into it to sustain the plants for a long period, at the same time not too much so as to cause an abnormal growth before the roots of the plants have a fair chance to properly assimilate its elements. Soil heavily charged with an over abundance of green cattle manure, coupled with the necessary watering and damp atmosphere that has to be given to the freshly planted stock, will cause stem rot among the plants very quickly. The point, therefore, is to allow for a live soil but not one heavily charged with humus.

The question of lifting the plants in the field has been gone over so many times in these columns that it seems superfluous to refer to it here, yet for the beginner this is one of the most important features. Care should be exercised to save intact all the roots possible, also to guard against drying out during the interval between digging and planting. Shading of plants directly after planting is an absolute necessity for them to take a quick hold of the soil and for this purpose there is nothing better than just plain mud and water thrown on the glass. It can be easily put on again if washed off by rain before the plants have a good hold of the soil. It can also be removed quickly when the time comes. In setting the plants pay particular attention to the spreading out of the roots. This has much to do with the

FRANK BANNING'S GLADIOLUS NIAGARA AT THE ROCHESTER CONVENTION.

plants' well being in after growth.

Water each plant directly at planting time so that the water works well down to the roots; then allow for the soil to dry out again before repeating. Continual light syringing of the plants two or three times a day to keep them plump should also be followed up to hasten root action, but guard against unnecessary wetting of the surface of the soil. Watering and syringing should be two distinct and different operations. Guard against draughts both from open ventilators and doors. Just after planting we find it a good plan during the heat of the day if the wind is blowing to carry a little less ventilation and open up wider at night-fall when there is not any danger from storms. As soon as the plants take root hold remove a little of the shading, also keep the surface of the soil open by continually working it.

C. W. JOHNSON.

Carnations in the South.

If carnations are not housed by now no delay must be allowed in getting this done. The rainy spell we are just passing through, and which has lasted almost two months, has been far from ideal for plants in the field. It has been well nigh impossible to keep down the grass and weeds and the plants have made a growth too soft and rapid for their own future good. Still every cloud has its silver lining and conditions would have been much worse if the sun had been as strong as usual. The plants may be a little weak owing to the continued cloudy weather but are better that way than in the condition I have seen them after heavy rains followed by bright, strong sun. Great care will have to be exercised in the lifting to save the roots as much as possible and see that the houses have a good, heavy shade, also. A clay wash is as good as anything for this purpose.

Have the soil in the houses in good shape for planting, neither too wet nor too dry, and let little or no time elapse between lifting and planting. The job of planting should not be hurried, a little extra time taken to spread

the roots instead of crowding them into a ball being time well spent. Some growers after planting give the beds a thorough soaking and others again just water at the base of each plant. Both are good if well carried out, but in the condition the plants are this year we prefer the latter method. We find it well to leave all the top ventilators open day and night, but keep the side ventilators and doors closed in the daytime while the plants are being established. After sundown everything may be thrown wide open. The plants will require spraying a few times a day probably, but don't overdo it as this makes fine conditions for stem rot to develop. With a heavy shade less spraying will suffice.

The plan of some northern growers using little or no shade and depending on frequent spraying and dampening down of the houses to bring the plants through will not work out down here.

The sun is altogether too powerful. After a week or 10 days the plants should have begun to make new roots when the shade can be gradually reduced and soon all the ventilation possible given. Just a word of warning, which should be altogether unnecessary, but in too many cases unfortunately is not: Have the houses thoroughly clean before planting and weeds and rubbish of all kinds (and this includes soil that may have fallen through the cracks when emptying) entirely removed from under the benches. We never look for much on top when underneath the benches are in a filthy condition. WM. LEAR.

Carnations for Christmas.

ED. AMERICAN FLORIST:—

How should I proceed to have a crop of carnations for Christmas? Should they be planted by a certain time or does it depend upon disbudding and pinching back?

C. U.

The present is a good time to plant carnations for winter use and the plants, if properly looked after, should be in full crop for Christmas. Disbudding is a detail of culture that has to be kept up right along whenever the plants start to flower, but probably little in the way of pinching will be necessary if the plants have been properly prepared in the field.

G.

Red Spider in Field Carnations.

ED. AMERICAN FLORIST:—

What is the best remedy for red spider in field carnations?

C. U.

We believe there is no better remedy for red spider anywhere, inside or out, than clear, cold water, vigorously applied with the hose. Preventive measures in the field are a good supply of water to the roots, frequent cultivation and the constant suppression of weeds which act as breeding places for the insects. Spraying with tobacco water, lye-sulphur solutions and various insecticides, are often recommended, but they are far more expensive and more troublesome than the use of water and clean cultivation.

G.

EICHHOLZ'S CARNATION CHRISTMAS CHEER AT THE ROCHESTER CONVENTION

CHRYSANTHEMUMS

Calvat's Chrysanthemums.

We understand that Ernest Calvat's large collection of chrysanthemums will, owing to his recent death, be placed under the care of M. Remy, a well known grower of Grenoble, who will look after them in the interest of the widow. P.

Seasonable Work.

Taking the buds is one of the most important items of the chrysanthemum grower's work at this time. Plants that have received the right attention as regards keeping the side shoots and early buds taken out on time are now fast setting their main buds. Those on the early varieties should be well advanced by this time and any that are not already taken must be attended to as quickly as they are large enough to handle safely to allow for the blooms to mature at their proper season. The early varieties to be a success must be on time at their flowering season. If they are late enough to run over into the season of the second earliest which are much larger in size and better in finish they suffer considerably in comparison. Polly Rose, Glory of Pacific and the other Pacific sports should have the buds taken as fast as they appear. Pacific Supreme, Gloria and Robt. Halliday are budding up quite prominently and in a few days the pink and white Ivory Miss Alice Byron, Nellie Pockett, Cheltonii and Mrs. H. W. Buckbee will be ready to take. Timothy Eaton, Yellow Eaton, Col. D. Appleton, Golden Eagle, Maud Dean, Dr. Enguehard and most of the mid-season varieties will be ready about September 1 or a few days later.

The late varieties will be two or three weeks before the buds are ready, but in the meantime the work of taking out the side shoots and properly supporting the plants must be followed up closely; also keep the soil at the roots in an open, friable condition. The new beginner together with many an older hand is often puzzled with the bud-taking process. Taking the bud as it is termed means the selection or leaving the bud to mature into the flower, and it is well to bear in mind that the early bud produces a fuller though shorter and more narrow petaled bloom and of much lighter color than the later buds, so that a pink variety will have a very much deeper and generally better color from a late bud than from an early bud but at the expense of the size of bloom. The red and bronze varieties are almost without exception better from late than early buds.

The fact of the plants setting the buds means that the wood is ripening up, consequently a little variation in the treatment is necessary. Less syringing and a little less water at the roots should now be the order. Water and syringe during the forenoon so that a dry atmosphere is insured before nightfall. The ripening of the wood will cause the plant to send out numerous suckers at its base, also side shoots wherever it has a chance. These should be carefully looked after and removed at every opportunity before they sap the

strength away from the plant. Give all the air possible at this time but be careful of draughts. Also keep the insecticide sprayer going continually so that there is not the slightest chance for the aphids to get down into the newly formed buds. Any plants that still need to be supported should be taken care of right away to get it done in time for the stems to straighten out before the petals begin to show.

The specimen exhibition plants need every encouragement from now on to show time. Give ample ventilation, water well every time the plants require it and give a weak application of liquid manure twice a week from now. This will give size to the plant and blooms. Watch for red spider on the underside of the leaves, also continue the spraying with insecticides as with the benched stock. Support any of the branches of the plants that

Benjamin Hammond.

need it and make preparations for the final tying and staking. Pick off any yellow or dead leaves on both the pot grown specimen plants and the plants in the benches. Grasshoppers are very troublesome just now and the only way to get rid of them is to catch them by hand and destroy them and occasionally a few hairy caterpillars make their appearance on the underside of the leaves. These can easily be removed. Cutworms are also sometimes bothersome by chewing out the top of the plant. These pests work by night but can usually be found by scratching away a little of the soil at the base of the plant.

C. W. JOHNSON.

Color Chart.

The disadvantage of the "Repertoire de Couleurs," published by the French Chrysanthemum Society, is its size and the loose leaves, thus rendering it difficult for handling in the garden and greenhouse. At the forthcoming congress of the society the question of a pocket edition is to be considered. P.

THE ROSE.

Prepare for Cool Nights.

Usually around the first of September the nights begin to grow cooler and through the eastern and middle states, according to the locality, the weather is often such that a little firing becomes necessary. So by all means have the boilers in readiness at any time from now on, so that a fire can be started at a moment's notice. There is one great advantage in having the rose houses heated by steam: and that is the ease in which mildew can be kept down by the use of sulphur painted on the pipes; the fumes quickly fill the houses and very often we are able to take advantage of a cool, rainy day to start a fire for the sake of the sulphur fumes, which will do more good towards curing or preventing a dose of mildew than by using sulphur in any other way. It is a hard matter to get the good results from sulphur by painting hot water pipes—unless the hot water is under pressure; therefore, if one has any serious trouble resulting from mildew it would pay to install a small steam boiler and run a one-inch pipe in each rose house for sulphuring purposes.

Perhaps it may be noticed when cultivating the early planted stock at this time that the roots are at, or very near, the surface of the soil. Very frequently this occurs between the periods of cultivating and these tender little feeders should not be disturbed. If this should be the case the soil can be rubbed over with the hands and a very light top dressing of some old well-rotted manure can be applied very lightly, barely covering the soil. This will keep the soil from baking and will prevent the accumulation of a green scum on the surface. Keep an eye on the plants most susceptible to "black spot" and keep the plants well tied and the walks and surroundings dry. Also use plenty of air slaked lime sprinkled around. If the plants show a few black spots do not make the very common mistake of withholding the water too suddenly, which would give the plants a greater check. Very often a dose of black spot is brought on from irregular watering. Letting the plants become too dry and then soaking them will cause them to black spot quicker than anything else. Give the Beauties plenty of air and dry surroundings, also plenty of water, and keep the green fly in check by using the nicotine liquids diluted according to directions, applying it with a spray pump with Bordeaux nozzle. A tank holding several gallons of water with spraying device attached does not cost very much and for destroying green fly it will be found very economical and at the same time the insects can be destroyed without closing the ventilators or without the slightest injury to the tenderest shoots. Fumigating can be started when it becomes cool enough to close the houses.

As the days grow short and the evenings become cooler one must have a care in reference to syringing the Beauties. Every other day during the cool spells will be often enough to syringe if the foliage is at all dense, but

when syringing is done give it to them thoroughly and early in the morning. A few flowers can be allowed to come here and there when the plants of the young stock are exceptionally strong. They must also be kept clean and carefully tied. Keep on disbudding the small plants till they catch up to the others.

E.

Bride Rose Plants Injured.

ED. AMERICAN FLORIST:—

I am sending you a Bride rose plant, one of a batch of 400 that were benched about June 10. They were somewhat mildewed when received from the wholesaler and were potted for about six weeks before benching. I dusted them with sulphur and the mildew is almost gone. The plants have been watered individually till about a week ago. Have given air on both sides of roof in day and one side at night. Have syringed once every bright day, and tried to give enough water without overdoing it. There are about a dozen affected like the sample. The house is a three-quarter span with raised benches and runs east and west. There is a very light shade on the south. Ventilators, hinged at the ridge, are about $2\frac{1}{2} \times 3\frac{1}{2}$ feet and placed alternately. Temperature sometimes goes over 100° . Any advice as to the treatment of the roses will be much appreciated.

R. S.

The plant sent was simply a dried up dead scrap with a little soil when it arrived here and it was quite impossible to give any idea as to what caused the injury from such a specimen. When young stock is mildewed at the start it stands a very poor chance in the race and many growers—if the attack is at all severe—would not run the risk of planting such stock but would obtain clean plants. If "R. S." only loses a dozen out of a batch of 400 he must consider himself fortunate and the best thing to do is to pull the diseased plants out and plant fresh, clean ones. We cannot find space in answer to a query to go into the whole matter of rose culture as the season's work so far has been fully treated on in the rose department and "R. S." should look this up in back numbers. "Plant nothing but clean, healthy stock," is an axiom that all successful growers know the value of. The man who starts out with mildewed plants is handicapped from the beginning.

G.

The Call of the Garden.

The cultivation of flowers and vegetables is becoming a leading feature in the life of all Londoners, at all events, of the working classes of London. Unemployed workmen have taken to cultivating all the vacant plots; artisans who have finished their day's work hurry home to enjoy their own little garden; clerks and business men do the same, and we even hear that at Plaistow, the girls of the neighborhood are devoting their Saturday afternoons and some of their evenings to little plots, eight feet square, which seem to be available in one of the streets there. London is without doubt the "garden city" of the kingdom. Even in the Strand we have a vast wild rock garden, now covered in all parts with a great variety of British and exotic flowering

plants. Doubtless most of the seeds came from the nosebags of the neighboring cab-horses.—Journal of Horticulture.

dendrobis and cypripediums about which more later. Many of the Trianaes have flowered upon the imported pseudobulbs and there are others now

HYBRID AMARYLLIS, MARTINIUE.

Amaryllis Formosissima X A. vittata Raised by Luther Burbank.

Orchids at Chas. Bond's, Naperville, Ill.

We have always confidence in the outcome of a business venture when a man understands his work, goes into it heart and soul as if he meant it and has a good partner to help him out. This is the case with Charles Bond, who last April started in orchid growing for the Chicago market at Naperville, Ill., a pretty little town about 20 miles from the western metropolis. Mr. Bond has had a wide experience in orchid growing, being the son of a famous English orchid grower, T. W. Bond, and having grown them in England, France, Germany and in this country. He certainly is a worker, as may be seen by the elegant condition of the plants, while Mrs. Bond is a most charming partner, just as interested in the success of the undertaking as he is. This is the combination at Naperville, and unless we are considerably out in our reckoning, it is going to be a great success.

There are at present two span roofed houses, 25x100 feet, filled with orchids and already Mr. Bond has visions of a larger range in which he will grow a larger collection. Coming to the plants there are, approximately, 2,500 Cattleya Trianae, 2,000 C. labiata, 1,500 C. Mossiae and a smaller number of C. Schroderae, C. Bowringiana and a few choice hybrid forms in large established plants. There are also some

flowering, but this seems to make little difference to the young growths, which are coming away in elegant shape. The flowers already cut have not been, of course, of first class quality. This could not be expected when the fact is considered that they were forming on the voyage home and at the expense of the stored up nutriment in the bulb. But they have been good enough to sell well and to make Vaughan & Sperry, the wholesalers of 60 Wabash avenue, Chicago, to whom Mr. Bond ships all his flowers, anxious for more. They have done more than this; they have shown that the plants have been collected in the right locality and are of the best strain of this popular species, some very fine color varieties as well as an albino having flowered already.

The plants are grown mostly in 6-inch pots, well drained and about two inches of osmunda fiber placed very firmly with the dibber. In this solid compost the plants root strongly and well and specimens only potted a few weeks are already rooted well all through. But what interests the grower most particularly is the great number of excellent growths pushing up all over the plants, six, seven and eight on each. C. Schroderae was doing remarkably well and there will be quite a number of flowering growths on this next spring. There will also be many Trianaes that will flower

again this winter, while the labiatus are already showing the double sheaths characteristic of this popular species. Cleanliness, fresh air and abundance of atmospheric moisture form Mr. Bond's formula for orchid growing, and that he is right is abundantly proved by the condition of his plants.

Among the dendrobiums we noted some healthy looking stock of *D. infundibulum*, a species in the way of *D. formosum* but with longer stems and producing more flowers to the stem. *D. formosum* is throwing up fine shoots and also flowering on the imported bulbs. But it is doubtful if any of these black haired dendrobies will ever be a success under cultivation for long, the cutting away of the stems with the flowers being very weakening. *D. bigibbum*, an Australasian species not unlike *D. Phalenopsis*, is doing well and there are also a few choice yellow cypripedium in signe, cœlogynes and some new hybrid forms. But it is to the cattleyas that Mr. Bond looks for his chief demand—he is far too old a hand to try and make money out of a botanical collection.

FLORISTS' FERNS.

Cultural Notes.

Late summer is quite a busy season for those who grow florists' ferns in quantity, from the fact that at that period much of the moving from flats to pots is done in preparation for the fall trade. Strong growing species, such as most of the pteris group, do not require so much time in order to make salable plants as the various aspidiums or lastreas and consequently the latter kinds should be among the first to be potted. *Aspidium Tsussimense* and *A. aristatum variegatum* are both among the most satisfactory plants for fern pans. *Aspidium Sieboldii* is another of strong and distinct character, and much endurance in the dwelling, but all three of these ferns are somewhat slow-growing in the early stages. In fact it will frequently be found that these ferns are nearly a year from sowing until they reach a usable size, whereas some of the pterises will reach a useful size in about half that time.

Aspidium Tsussimense is probably the hardest of florists' ferns in common use, it being frequently found in presentable condition in a fernery after all the other ferns in the pan are dead, and it really seems a pity that so good a fern should be so often seen in the fern pans that are sold by Brooklyn department stores at 29 cents apiece. But if the growers are satisfied to fill the pans in question at such a price that they may be retailed at 29 cents, it is their own affair; still one would not expect to grow suddenly wealthy at such rates. But it must be admitted that a great many small ferns may be grown in quite a small space, and if the succession of crops is well followed up, so that the bench space is well occupied, there may be a reasonable profit in the operation.

But to return to the question of potting and growing the ferns, rather than to the prices at which they should be sold, it may be said that potting off seedling ferns from the seed pans or

flats in which they have been growing up to this time, is a tedious operation, for the young plants have to be separated from each other with some care and then potted so that the crowns are not buried too deeply in the soil. The potting should be fairly firm, and the young plants promptly watered in and protected from the wind until they have time to recover from the root disturbance to which they have been subjected. In potting off such stock in quantity it is well to arrange that the work will be well balanced, by having some careful boys to separate the small clumps of seedlings ready for the potters, the latter being experienced in their part of the work, and able to keep the plants well worked up on the potting bench, so that there shall be no accumulation of plants with their roots exposed to the air, and a sufficient number of helpers to remove, set away, and water in, the young plants as rapidly as the potters fill their flats. Large quantities of this class of stock are grown in frames during the summer very satisfactorily, the pots being set on fine ashes and the plants protected from the weather by being covered with sash, the latter being shaded with whitewash or whiting and oil.

Under such conditions the frames need plenty of ventilation, and this is usually secured by building a light framework about one foot above the sides of the frame, upon which the sash are laid. If the plants are put out in the frame at once after potting, less ventilation and some care in watering will be needed for overwatering is likely to sour the soil, and too little will stunt the growth of the plants, and also encourage an attack of thrips. But once get the young ferns established and rooting freely, and they can stand a lot of water, and also an abundance of fresh air both day and night. The frame grown crop should, of course, be used up first, for they should all be out of the way before the possibility of sharp frost, it being no small job to empty a lot of frames of 2 or 3-inch ferns when there is danger of frost, besides the question of finding space for them in the greenhouses at that period.

Ferns of larger growth, for example, the Boston fern and some of its numerous relations, may also be handled under the frame system, and will make

a nice stocky growth in the frame, provided that they are given plenty of light and air, and also that plentiful watering is not neglected. This larger stock is more under control if the pots are plunged in ashes or some other cool material, and there is also less danger of their suffering from dryness when thus protected. Well rooted Boston ferns will also enjoy a mulching with well-rotted stable manure, the latter having been turned over times enough to allow the excess of ammonia to escape. Fresh manure may injure the young fronds of the ferns, but a mulching with old manure will be thoroughly enjoyed by these plants, for they are by no means so fastidious in regard to manure as we of the older school once thought them.

W. H. TAPLIN.

Nephrolepis Marshalli.

A beautiful sport of *Nephrolepis Amerpohli* has appeared in England, having been exhibited by the well known firm of H. B. May & Sons of Edmonton, before the Royal Horticultural Society and awarded a first class certificate. In describing it, the *Gardeners' Magazine* calls it the most beautiful of all the nephrolepis and says it is bound to become popular in private gardens even if it does not prove a good market fern. Its wide fronds are very finely divided and plumed so that each frond looks like a piece of the most exquisite moss.

Juvenile Ferns.

Among the important questions we all are called upon at times to answer, according to a correspondent of the *Fern Bulletin*, is the oft recurring one, "Whom does the baby look like?" and at no time is this question more perplexing than when the infant under discussion is a fern, for often it bears so slight a resemblance to its parents that only an intimate friend of the family, familiar with its characteristics, would dream of the relationship between them.

One of my first experiences with these deceptive juveniles was with the maidenhair. This was the one fern that I had always felt perfectly sure of for there seemed no possibility of ever mistaking it for anything else, so when in a cool, shady ravine I found some small ferns resembling maidenhair but with the rachis undivided, I immedi-

NEW YORK AUTOMOBILE PARTY.

J. A. Evans, Richmond, Ind., Bob. Schultz, Madison, N. J., A. Pierson and M. Henshaw: Leaving W. Twenty-eighth Street, New York, August 14, a. m., Arriving in Rochester, at Seneca Hotel, August 16, a. m.

ately jumped to the conclusion that it was the rarer Venus hair instead of that of a common maid.

To be sure, my trusted authority (Clute) questioned the finding of this fern as far north as New York and this was not only New York but central New York at that, but might not I be the happy discoverer of a new station? But as specimen after specimen was revealed to my searching glance the conclusion forced itself upon my reluctant mind that such abundance in a place so easily accessible could hardly have been overlooked by botanists and that these were, after all, only the youthful progeny of the beautiful but common *Adiantum pedatum*. Ah well! they were very charming even though no fame attended their discovery.

About the same time I found some tiny ferns with blades perhaps an inch and a half long, tapering both ways from the middle and so frail that after they were pressed their reality was only proven by their perfection. I puzzled over them for some time, comparing them with this or that, until one day it flashed over me that they, too, were babies, resembling in "build," at least, their parent, the York York fern, and now that it is impossible for me to longer evade the disappointing fact that rare ferns are not common nor readily found I find much pleasure in the tiny forms that often set me guessing their identity.

The Christmas fern (*Polystichum acrostichoides*) is one that can hardly be mistaken unless in the very earliest stages of growth, though contrary to many precedents the juvenile forms lack the grace of mature fronds; but the youthful progeny of *Athyrium filix foemina* must seem to their lady mother like the changelings of a fairy tale so little do they resemble the parent plant. But all this applies only to those ferns that are reproduced by spores.

The young plants produced by the bulblets found on the fronds of the bulbiferous bladder ferns, or from stolons, as the ostrich fern; or from rooting tips of the mature fronds as the walking fern, are much more mature from the first than sporelings and are quite like children masquerading in their mothers' gowns.

To one whose opportunities for study in the field are limited by time or strength to places easily accessible the study of these fern children is especially alluring, for long after the possibilities of a haunt have been exhausted both in species and varieties the search for these fairy changelings may continue with the confident expectation of finding at least occasionally a new form; and it is quite possible for one who has the desire and something less than eternal patience to raise them in pots of moist mold from spores, but I fancy very few of the millions of spores produced ever develop and fewer still reach maturity, for out of 46 prothalli that I started in a pot only two produced fronds and they were short-lived.

MAYNARD, MASS.—Mrs. Isadore F. Goodnow's greenhouses were torn down recently.

JOLIET, ILL.—A. C. Rott says business is fine at the store, considerable funeral work and a good deal of this for the Elks, being the leading line. The indoor carnations at the J. D. Thompson Carnation Co. are in fine order and good Enchantress, Rose Pink Enchantress, White Enchantress and Beacon are being cut. The field grown stock also looks elegant, as do the chrysanthemums, with the exception of Golden Glow, which has not done well here this season.

To Be Done Now.

IN THE GREENHOUSES.

Do not keep early forcing bulbs in the bags, but flat them up without delay.

Watch newly top-dressed rose benches and see that the bottom soil is not allowed to dry out.

Sow mignonette for pot work and cut flowers.

Pot up Boston ferns from the benches that have to be used for winter crops.

Keep the tying well in hand on the rose benches to prevent crooked stems. Be careful not to bunch the plants up too much.

Feed chrysanthemums liberally now and up to the time the color of the florets shows.

The cool nights of late August and early September give a good chance to sulphur for mildew.

No spraying is permissible in the rose houses after from 1 to 2 p. m., according to the weather.

The Late Frederick Katoll, Buffalo, N. Y.

See Last Week's Issue, Page 241.

Never leave old leaves or flowers of carnations or roses about on the benches as they are very apt to breed thrips and other injurious insects.

Sow sweet peas for winter flowering.

Keep poinsettias cool and in a good light to prevent drawing and keep the plants stocky.

Cut back the regal and show pelargoniums and insert the prunings for cuttings if short of stock.

Remove the shading on the carnation houses as soon as the plants are established.

Cuttings of *Vinca major* root freely now and make useful stock for spring bedding.

OUTDOORS.

Keep the garden tidy by removing annual plants that have passed their best.

Prepare a place for the bulb flats and also plenty of plunging material and long labels.

Remember that light frosts are due at any time after the end of August and be prepared with covering material.

Prick out seedling German and English wallflowers, *Campanula pyramidalis* and other biennials and perennials.

Repair garden walks and solidify surface before the heavy rains of autumn are due.

After the end of August no tender stock is safe outdoors and it should be removed to frames where it can be covered or to the greenhouse.

Sow pansies again and prick out the earliest ones in frames or protectors, also myosotis, *Alyssum saratile* and other spring flowering subjects.

Prepare the quarters carefully for replanting peonies.

Insert cuttings of *wiegela*, *cornus* and other deciduous flowering shrubs.

Keep the tomatoes off the ground when possible to prevent the fruit being damaged and assist its ripening.

Always leave the soil pile well rounded up at night, as in case of heavy rain the soil will be soaked and rendered unfit for use.

See that newly transplanted evergreen shrubs do not suffer from want of water.

A New Nitrous Product.

At Mulhausen, Alsace, there is being manufactured a new nitrous product for use as fertilizer, in the shape of a nitrate of aluminium, the combination of nitrogen and aluminium being obtained by a new process invented by M. Serpek. The inventor first studied the preparation of carbide of aluminium, which he obtained in the form of yellow crystals by heating a mixture of alumina and carbon in the electric furnace. This carbide, like the other carbides with which we are acquainted, has the property of fixing gaseous nitrogen and thus gives nitride of aluminium. To obtain an economical production of this latter, he does not isolate the carbide of aluminium, but after the formation of this body in the electric furnace it is at once mixed with a fresh quantity of alumina and is then treated with nitrogen gas. He thus obtains masses which contain 20 to 24 per cent of nitrogen. Under the influence of atmospheric oxygen and moisture we have ammonia given off, which is transformed by bacteria into nitrates and alumina.

The inventor is working the new process in a small factory which he installed, and has realized some interesting results during the last year. He now produces crystallized nitride of aluminium which has a high percentage of nitrogen—as much as 34 per cent. An advantage of his process is that we do not need to use pure nitrogen, which requires an expensive plant of Linde or other machines, but the gas from the producer is employed, this containing 77 per cent. of nitrogen and 23 per cent carbon monoxide with a little carbonic acid. Thus we have a very simple and rapid process for the crystallized nitride.—Scientific American.

OBITUARY.

Edward F. O'Hara.

Edward F. O'Hara, for over 20 years head gardener in charge of the George N. Norman estate at Newport, R. I., died at his residence on Fir street August 17. The funeral services were held August 20 at St. Mary's Church, a large number of his friends and former associates attending. The deceased was a native of Lancashire, England, and came to this country 27 years ago. As a gardener he was particularly successful in the transplanting of large trees, some of the fine beeches at Belair being living monuments of his skill. A widow, two daughters and a son survive him.

HARRISBURG, PA.—J. A. Kepner is adding to his greenhouses; his latest addition being 23½x168 feet.

CONVENTION SOUVENIR ALBUM.—Chas. H. Vick, who designed and edited the convention souvenir album in addition to his exacting duties as superintendent of the trade exhibition, advises us that there are a few copies left which will be mailed to members of the Society of American Florists, as far as they go, on receipt of 10 cents to cover postage. Address Chas. H. Vick, care of James Vick's Sons, Rochester, N. Y.

Stocks After Chrysanthemums.

ED. AMERICAN FLORIST:—

Would it be wise to plant stocks to follow chrysanthemums, as well as peas and snapdragons? C. U.

Certainly, if you have a demand for them and room to grow them. Stocks in winter require careful culture and a light, cool, well-ventilated house.

Monument to Ernest Calvat.

In recognition of the services rendered to horticulture by the great French chrysanthemum raiser, Ernest Calvat, it has been decided by the French National Chrysanthemum Society to start a subscription list to raise the necessary funds for the erection of a monument to his memory. Those of our readers who desire to contribute are requested to send their subscriptions to C. Harman Payne, 141 Wellmeadow Road, Catford, London, S. E., England.

Brussels Exhibition.

In connection with the Brussels international exhibition there will be held September 24-27 a large fruit show. The schedule comprises a large number of classes for fruit and vegetables with many prizes in the form of medals up to the value of \$40 each. American visitors should avail themselves of the opportunity. On October 29 in the grounds of the exhibition there will also be held a chrysanthemum show. This will be open five days. There are 135 classes and valuable prizes up to \$100 are offered. Besides chrysanthemums, orchids and other flowers will be shown.

London International Exhibition.

We understand that the International horticultural exhibition which is now being promoted will be opened May 22, 1912, and it will remain open eight days. These days will include a portion of Whitsunweek, from Whit-Monday until the following Thursday. An admirable site in the west of London, providing an area of something like 30 acres, has been secured, and it is expected that the lease will be signed at an early date. It is intended to appoint sub-committees to represent various districts in these islands for the purpose of raising subscriptions and guarantees. The question of privileges to be granted to guarantors and subscribers is now under consideration by the executive committee, and particulars will be published later.—Gardeners' Chronicle.

Looking Hence One Year.

Baltimore, Maryland, is very proud because it was selected as the next convention city of the S. A. F., as evidenced by the following item appearing recently in the Baltimore American: The selection of Baltimore for the next meeting place of the S. A. F. again shows the popularity of this city as a convention center. The coming convention of the florists will be at once unique and pretty. The convention hall will be decorated with the choicest pot plants and cut flowers, thereby adding a touch of nature and beauty. Each of the local florists and growers will have exhibits and these will not be confined entirely to plants and flowers, but will include the choicest work of the fancy basket maker and decorative manufacturers from all parts of the country. The potteries will also have exhibits of their products, which will include the various styles of receptacles for plants. Of late years great progress has been made in this industry. There will also be exhibits of paper, both waxed and

plain, as well as ribbons, fern dishes and many other things that the florist is daily called upon to supply. The date for the convention next year has not been announced, but it is believed that it will be held about this time of the year, as the florists have their dull season in August.

Twenty Years Ago.

SEPTEMBER 1890.

The Florists' Hail Association had over 2,000,000 feet of glass insured.

The Chicago delegation to the Society of American Florists' convention at Boston was delayed by a broken rail on the train by which it was traveling to the Hub.

A cut flower exchange for Boston was being talked of.

"Sober Thoughts After Boston," by the late John Thorpe, made interesting reading and showed the deep insight into things possessed by the lamented "Uncle John."

"What a beautiful odontoglossum!" "That isn't an odonto-what-you-call-it; that's an orkeed!" (A. F.)

The gladioli being grown by Haillock & Son were beginning to attract attention in England.

William Holmes, the secretary of the English National Chrysanthemum Society, died September 18.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Ansonia, Conn., September 17, 1910.—Annual dahlia exhibition, Intertown Dahlia Association, Assembly room, City Hall.

Boston, Mass., September 23-25, 1910.—Autumn exhibition of the Massachusetts Horticultural Society at Horticultural Hall, Boston. Address Wm. P. Rich, Horticultural Hall, Boston.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. Address C. P. Close, College Park, Md.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, First Regiment Armory, Michigan avenue and Sixteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Hartford, Conn., September 22-23, 1910.—Dahlia exhibition, Connecticut Horticultural Society, Unity Hall. Address Geo. W. Smith, Melrose, Conn.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall. Address Geo. W. Smith, Melrose, Conn.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. Address A. F. J. Baur, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elberon Horticultural Society. Address R. Carey, Long Branch, N. J.

Milwaukee, Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Club, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Address Jerry P. Jorgenson, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

New Bedford, Mass., September 15-17, 1910.—Annual fall exhibition of the New Bedford Horticultural Society, Odd Fellows hall. Address E. E. Pierce, New Bedford, Mass.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music hall, 115 Court street. Address Frederick H. Wirtz, 86 Nicoll street, New Haven, Conn.

New York, September 20-22, 1910.—Seventy-ninth fair of the American Institute, Berkeley Lyceum building, 19 and 21 West Forty-fourth street. Address W. A. Egelson, American Institute, New York.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

Pasadena, Calif., November 3-5, 1910.—Fall flower show. Pasadena Gardeners' Association. Maryland hotel. Address Angus McLeod, 1632 Alleen avenue, Pasadena, Calif.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition. St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Address Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition. Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Address Adin A. Nixon, Horticultural Hall, Worcester, Mass.

Meetings Next Week.

Buffalo, N. Y., September 6, 8 p. m.—Buffalo Florists' Club, Saturn hall.

Butte, Mont., September 9.—Montana Florists' Club, Columbia Gardens.

Cincinnati, O., September 10, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Dayton, O., September 5, 8 p. m.—Dayton Florists' Club, 37 East Fifth street.

Detroit, Mich., September 5, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

Grand Rapids, Mich., September 5.—Grand Rapids Florists' and Gardeners' Club, office of member.

Hartford, Conn., September 9, 8 p. m.—Connecticut Horticultural Society, County building.

Indianapolis, Ind., September 6, 3:30 p. m.—State Florists' Association of Indiana, State House.

Louisville, Ky., September 6, 8 p. m.—Kentucky Society of Florists, Third and Broadway.

Moline, Ill., September 8.—Tri-City Florists' Club, home of J. Staack.

Montreal, Que., September 5, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardian's building, 211 Sherbrooke street, west.

New Orleans, La., September 7, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., September 7.—Newport Horticultural Society.

Omaha, Neb., September 8, 8 p. m.—Omaha Florists' Club, City Hall.

Philadelphia, Pa., September 6, 8 p. m.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Spruce.

Pittsburg, Pa., September 6, 8 p. m.—Florists' and Gardeners' Club of Pittsburg, Fort Pitt hotel, Tenth street and Penn avenue.

Salt Lake City, Utah, September 6.—Salt Lake Florists' Club, Huddart Floral Co., 114 East Second South street.

Seattle, Wash., September 6.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., September 6, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

St. Louis, Mo., September 8, 2 p. m.—St. Louis Florists' Club, H. J. Weber & Sons Nursery Co.

Washington, D. C., September 6.—Florists' Club of Washington, 1214 F street, N. W.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By first-class rose grower; life's experience; Beauties or Teas; can furnish best of references; three years in present place. Address Key 195, care American Florist.

Situation Wanted—Oct. 1st, by middle-aged German; lifetime experience in greenhouse, fruit and truck gardening; can furnish best references; private or institution. GARDENER, 45 Penn Ave., Sharon, Pa.

Situation Wanted—By all-around florist; German, single; 25 years' experience in this country; first-class grower of cut flowers; carnation section preferred; best of references. Please state wages in first letter. Address Key 193, care American Florist.

Situation Wanted—On private place near large town or small city by an experienced gardener, capable of laying out grounds and doing all work pertaining to planting, growing and care of gardens; unexcelled references; parties looking for a reliable, steady man of good character and habits who knows his business, address Key 144, care American Florist.

Help Wanted—A rose grower to work in rose sections; state wages without board. COLE BROS., Peoria, Ill.

Help Wanted—Designer and decorator for high class trade; good wages to right party. IDLE HOUR NURSERIES, Macon, Ga.

Help Wanted—Two good, experienced potters; good wages and steady job for the right parties. MOSBEK GREENHOUSE COMPANY, Onarga, Ill.

Help Wanted—Two young men with knowledge of ornamental nursery stock; furnish references; steady place for right parties. VAUGHAN'S SEED STORE, Chicago.

Help Wanted—A gardener and florist to take charge of a small greenhouse and institution grounds, also vegetable garden. Address STATE PUBLIC SCHOOL, Owatonna, Minn.

Help Wanted—At once, a young man to assist me as an all-around greenhouse helper; state wages expected in first letter; also references. EDWARD TATRO, 407 East Iron Ave., Salina, Kansas.

Help Wanted—For September 1, young man to take charge of bulb growing department; steady job if handy in perennials; must be reliable and sober; near Chicago. Key 197, care American Florist.

Help Wanted—At once a good fast potter; one who has had experience in growing a general line of stock; state wages wanted; only sober, steady man need apply. STUPPY FLORAL CO., St. Joseph, Mo.

For Sale—Two second hand hot water boilers in a first-class condition; one for 6,000 and one for 6,500 lineal feet of 4 inch pipe. SUPERIOR MACHINE & BOILER WORKS, 840-850 W. Superior St., Chicago.

For Sale—Two connected greenhouses, each 24 x 100 feet, on land 150 x 350 feet; steam heat; in thriving village, on junction of two trunk railroad lines. C. A. SIMONDS, Houseman Bldg., Grand Rapids, Mich.

For Sale—Retail seed and florist store well established in city of 500,000 practically cash trade in both lines; reasonable rental, including living apartments; advantageous if buyer speaks German; terms \$1500.00, cash. Key 174, care American Florist.

For Sale or Rent—12,000 feet of glass in good repair; steam heat; cause ill health; apply THOS. ALLEN 2238 Winona Ave., Chicago.

GARDENER WANTED.

Thoroughly competent man to take charge of place in which roses, carnations, chrysanthemums, orchids, general stove and greenhouse plants and fruit are grown. There are 10 houses on the place, including conservatory and palm house, with two assistants and night watchman and other help as needed. Married man preferred, one without children or with only small family. Only men of the best habits and character considered. Address, stating wages and full particulars. Key 198, care American Florist.

CALIFORNIA

Party with \$2,000 to \$7,000 to invest can obtain a fine connection in old established and prosperous business having splendid properties.

Party must be energetic, and with some knowledge of the florist, nursery and seed trade, or having other business ability. Useless to answer unless you can prove qualifications in first letter.

Key 196, care American Florist.

WANTED

Young man with thorough ornamental nursery stock training. Splendid opening for right party. Must furnish the best of recommendation. Address

Elm City Nursery Co., New Haven, Conn.

Wanted.

A first-class florist capable of handling retail flower store. Must be good designer and decorator as well as good salesman. State age, experience salary expected and give references in first letter.

Key 194, care American Florist.

WANTED.

A seedsmen who is thoroughly versed in grass and field seeds—one who has had considerable experience in the house working on orders assisting in shipping; also must be capable of buying grass and field seeds in the country from the producer. Want a man capable of earning \$1000 per year or better.

Key 166, care American Florist.

Wanted.

Two Rose and Carnation Growers for section. Permanent positions to reliable men. Address

J. F. WILCOX, Council Bluffs, Iowa.

To Seedsmen

David S. F. Adam, for the past ten years in charge of one of the departments of J. M. Thorburn & Co., New York, has resigned his position. He and his family will enjoy a couple of weeks vacation; after which negotiations with any first-class firm requiring the services of a thoroughly qualified seedsmen will be in order. Address

Key 199, care American Florist

SECOND-HAND BOILERS

We have in stock all kinds of Fire Box, Tubular and Cast Iron Boilers, with all Fronts, etc., suitable for greenhouses, mills or factories. Write for prices.

RYAN BROTHERS, 545 W. Lake St., CHICAGO.

FOR SALE.

A well established greenhouse, ready for occupancy, fully equipped with all modern improvements, steam heat throughout, greenhouse office and 7-room residence; has five acres of ground, has all necessary out buildings city water and sewer connections; six blocks from main part of the city; a bargain for experienced florist, no competition within 40 miles; for information write

W. M. STEVENS, Clinton, Mo.

Is Now Ready for Mailing. Price \$3.00, Prepaid.

A complete alphabetical list of all American cities, with the names and addresses of all commercial horticulturists therein. A separate list, arranged alphabetically, of every commercial horticulturist in this country. These lists are keyed to indicate the special line or lines of each establishment. The book also contains special lists, as follows:

Park Superintendents,	Horticultural Societies,*	Florists' Clubs,*	Supply Concerns,
Landscape Gardeners,	Experiment Stations,*	Foreign Houses,	Judging Scales,
Trade Associations,*	Botanical Gardens,	Catalogue Firms,	Seed Growers,
Leading Cemeteries,	Postage Rates,	Express Rates,	Statistics.

*With new officers to date.

AMERICAN FLORIST CO., 324 Dearborn St., Chicago, U. S. A.

Poehlmann's Orchids

LARGEST STOCK IN THE WEST

And All the Time Getting Bigger

Beauties, Valley, Roses

American Beauty and other Roses have been so long and so well grown at our greenhouses that there is little need of our calling attention to the excellence of our stock. **We lead for quality and quantity.** White Killarney, Richmond, Killarney, My Maryland and Perle are coming in great quantities and the quality is the Poehlmann Quality and head and shoulders above everything else on the market.

Easter Lilies and Valley all the Year. Our arrangements for a perfect supply of these popular flowers all the year round have long been perfected and we can always take care of your orders.

Chrysanthemums. Our plants never looked better. We shall have a grand supply in all varieties. **Carnations** Our field stock is perfect and never looked more promising. We shall be in crop early in September. **Green Goods of every description. Everything Home Grown.**

Poehlmann Bros. Co.

Office and Salesroom,
33-35-37 RANDOLPH ST.
CHICAGO.

Long Distance Phone, Randolph 35

Chicago.

Trade during the latter part of last week was distinctly dull and although some lines of choice stock, such as orchids, valley and the best class of roses were in demand, there was a decided slump in others. Local retailers had nothing but funeral work and many of them not much of that, so their demand was limited and there was also a distinct falling off in the shipping trade to out-of-town points. Roses are improving every day with the cool night temperature to help them while asters help the scarcity of carnations. Some of the latter from stock grown indoors all summer show a great improvement over those that have come to the market recently, the ever popular and ever sought for Enchantress being certainly the finest so far, though White Enchantress and White Perfection show up fairly well. The reds as yet have little to recommend them, but will doubtless improve as the best wanes. There are more wild flowers coming to the market now, such as the snake root (liatris) and various yellow composites, than at any time during the season, but they are not much wanted, except to make a cheap window display. Orchids are still scarce.

Market conditions during the present week continue practically unchanged except that American Beauty roses are in larger supply and of better quality. Carnations are in good demand with little stock offering. Asters of good quality are arriving in large quantities. Chrysanthemum Golden Glow is offered at a few houses and moving slowly at \$1.50.

Good field-grown carnations are reported very scarce.

NOTES.

Poehlmann Bros. Co. say there is a good demand for roses. Bride and

Bridesmaid are said to be very scarce owing to the extended planting of Killarney, White Killarney and My Maryland.

W. E. Lynch, of E. H. Hunt's, returned August 29 from a two week's outing at Corey Lake, Mich. L. R. Bohannon, who accompanied him, will return later in the week.

Hoerber Bros. are cutting some very good Killarney, White Killarney, Mrs. Jardine and Richmond roses. This firm is also offering a very good grade of asters.

ORCHIDS

A SPECIALTY.

Fancy stock for Weddings and all occasions. Also full line of all Cut Flowers, Florists' Supplies, Greens, Wire Work, Etc.

Send for Quotations.

CHAS. W. McKELLAR

51 Wabash Avenue.
CHICAGO.

John Zech's ankle was injured by an automobile, August 27, and although the injury is not considered serious, Mr. Zech is confined to his home.

C. W. McKellar is receiving a fine lot of asters and a limited supply of cattleyas. A large crop of the latter will be ready in a few weeks.

Peter Reinberg is well stocked with American Beauty in long and medium sizes. A few carnations have made their appearance here.

Geo. Reinberg has a heavy cut of American Beauty roses of good quality.

Summer Flowers

**New Beauties, Kaiserin,
Rhea Reid, Pink Killarney
Maryland, White Killarney**

These are the Best Roses for hot weather. We devote a whole range of glass to their growth, and our plants are two to five years old, giving big, strong flowers.

Peter Reinberg, 35 Randolph St.,
CHICAGO.

A. Engbrecht, 2101 W. Twenty-first place, expects to occupy his new store and greenhouses in about a month. The store building, 25x60 feet, is of solid brick, with a tile floor and steel ceiling. The greenhouses, one 24x96 feet and the other 25x30 feet, are of iron and concrete; a concrete floor is also being laid in the houses. The material was purchased from the John C. Moninger Co., 902 Blackhawk street. A Furman boiler and pipes were also purchased from this company. Jos. Seidowitz, 3651 Oakdale avenue, had charge of the building of the greenhouses and the installing of the heating system. Wm. Beutchim, 2111 Fairfield avenue, did the concrete work. A cement walk of 200 running feet was also laid. New fixtures will be added and when complete it will be one of the most up-to-date buildings in that locality. The old greenhouses at present location will be torn down.

Edw. E. Pieser of Kennicott Bros. left August 29 for Black Lake, Canada, on a fishing trip. He will stop at Montreal and join his wife who has been there for some time for benefit of her health. Mike Fink will be in charge

during his absence. Mr. Fink, who visited Buffalo and other eastern cities since the convention, returned to work on Monday. He and his father spent a few days last week in Milwaukee. A new ice box 10x16 feet of Georgia pine was installed last week. It was purchased from Paul J. Daemicke, 1336 Fullerton avenue.

Mrs. J. Simpson, 3656 Ogden avenue, returned August 28, from Brady, Neb., where the past few weeks had been spent visiting relatives. Walter Eckart had charge of the store during her absence. Several new benches have been put in and a concrete floor laid in the greenhouse. A clever design in the shape of a K. C. emblem, made up of lilies, gladioli and Killarney roses, was delivered to 4341 Washington boulevard, where the funeral of J. J. McGuin was held on August 26.

J. B. Deamud returned to his Michigan farm after the convention and is now at the store again prepared for fall business. Stock is not coming in very plentiful at the store. A few roses and carnations continue to arrive. The new American Beauties do not seem to have much substance. The interior of

the store is receiving a new coat of paint.

Mrs. S. Chemielinski, 1621 W. Eighteenth street, is enjoying a good steady trade, both in cut and artificial flowers. Mr. Chemielinski is expected back from Europe, where he spent the past three months taking in Paris, Vienna and a few other large cities.

At Kyle & Foerster's the stock is coming in as far as can be expected for this time of year. They are handling a good stock of American Beauty roses; Brides are improving in stem and flower.

E. Jelik, 1805 Ashland avenue, returned last week from a trip to Wisconsin. Mr. Jelik stated that funeral work is coming in and that business has picked up considerably.

E. C. Amling is handling a good stock of chrysanthemums. Carnations are starting to come in but the quality is not very good.

Kohout & Merker, 3212 W. Twenty-second street, report trade picking up and are doing a good funeral business.

Wietor Bros. report shipping trade good and are cutting a fine grade of roses.

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

S. A. Reid, head gardener at Oakwood cemetery, returned last week from Jerome, Idaho, where he had been spending his vacation with his son Walter. Mr. Reid stopped off at Denver on his way back. The usual summer repairs have been made at the greenhouses and at present the men are busy putting in 10,000 carnation plants. The geraniums are in excellent condition. Mr. Reid stated that he had 35,000 cuttings of Madame Salleron and 50,000 cuttings of alternantheras, and that they would commence propagating at once. He has had a good quality of asters; the chrysanthemums are also in good shape. Two large beds of asters of outside stock will be used for cutting purposes. We also saw here a large bed, 60x125 feet, of castor oil plants, cannas, salvias and coleuses. A large bed of white phlox is in full bloom and in fine shape. Everything about the place is in excellent condi-

tion, owing, no doubt, to the unlimited supply of water at all times, which is secured from the chain of lakes on the premises. The old steam pumping plant will be replaced by electricity, which will do away with the smoke and thus be a great advantage over the old system. Mr. Reid has been in charge for 25 years, having taken charge in 1885, when there were but 10,000 feet of glass on the premises. At present there are 40,000 feet of glass.

L. A. Vaughan, of Vaughan & Sperry, has been moving around freely among their local growers since Fred Sperry's return to business after his vacation and is also planning an eastern trip to the violet and orchid growers in New York. The trade here in these and other choice flowers has gone ahead by leaps and bounds the past season and Mr. Vaughan is too good a business man to be caught short of stock in these items when the

season opens up. Growers shipping to this successful house do not change readily as they are treated well. Mr. Sperry is greatly improved in health by his recent trip and looks very well.

Harry A. Philpott has been in the city again this week, fresh from his tour of the east and Ontario. He was delighted at the success of the Canadian Horticultural Association's convention and is pulling hard for the Florists' Club. "Don't you belong to the club?" is his formula and those who, while living in the city, neglect the meetings are reminded of the fact that Mr. Philpott is keeping his promise of attending every possible monthly meeting, though he has to make a special journey from far off Winnipeg to do it.

More than one retailer was surprised to receive a circular last week from "Claudine," a lady florist (?) supposedly, who took orders for American

Beauties and sent silk stockings or for
violet and sent corset covers, the men
friends of the fair recipients footing
the bill in the belief that the flowers in
question would be sent to them. After
considerable hunting for "Claudine" it
was found that her circular was part
of an advertising scheme for a local
theater and the retailers breathed
freely again.

The Globe Greenhouses on West
Madison street, of which H. C. Wulle-
brandt is proprietor, were the subject
of a very complimentary writeup in
last Sunday's "Tribune" where Mr.
Wullebrandt's place is described as "a
living, growing advertisement of a
florist's business." This we know to be
perfectly correct as we have frequently
remarked what a beauty spot it is in
the somewhat unattractive surround-
ings of West Madison street. And as
showing that it pays to keep a place
attractive is amply borne out by Mr.
Wullebrandt's experience, for from
small beginnings he has worked up an
excellent trade. He is now building
two more new greenhouses, one span-
roofed structure 23x105 feet and a
lean-to half this size.

The Joliet Agricultural Society's an-
nual fair is in progress this week and
continues until September 5. Quite a
number of good prizes are given for
table decorations, wreaths, bouquets
and other designs, as well as cut flow-
ers and plants. Albert C. Rott, the
well known retailer of Joliet, is the
superintendent of this part of the fair
and will be on the lookout for friends
from the city.

The Geo. Wittbold Co., 737 Bucking-
ham place, at present is busy with
landscape work and expects the fall
decorations to begin next month. The
shipping season has just commenced.
Five teams are kept busy hauling soil
out to Lincoln park for the new addi-
tion which is being put in near the

lake. Miss Roden returned August 22
from her vacation.

Chas. Moranek is now occupying his
new store at Sawyer and Ogden ave-
nue, having taken possession August 1.
Business has been very good and at
the opening day he received an order
for a bridal bouquet of orchids and lily
of the valley. A greenhouse 25x40 feet
will be erected in the rear of the store
and will be used for show purposes.

O. P. Bassett and wife stepped off
the steamer Kaiserin Augusta Victoria
Saturday on their return from Europe
and are expected home in a few days.

E. B. Washburn and wife left last
week for northern Wisconsin, where
some time will be spent fishing at the
headwaters of the Peshigo river.

Bassett & Washburn had a rush of
business on Monday. Beauties are ar-
riving in large quantities and selling
readily with prices about the same.
Some extra fine asters are taking the
place of chrysanthemums, and sell
readily, bringing good prices.

Budlong's were among the first to
hit the market with good roses from

THE LEO NIESSEN CO., Business Hours: 7 a. m. to 6 p. m.
Wholesale Florists, 1209 Arch Street, Philadelphia, Pa.

Philadelphia.

The trade of the past week was fairly good for the dull season. Asters are now arriving in large quantities and sales of common stock are slow. A few very special sell for \$4.00 per 100, but the average market price is much lower, ranging from 50 cents to \$2.00 per 100. Good American Beauty roses wholesale for \$3.00 per dozen. There is no change in the prices of tea roses. A few dahlias are coming in but they are not yet a real factor in the market.

NOTES.

Mr. Rigley, with the Pennock-Meehan Co., has just returned from a month's vacation spent in Vermont. He will soon go to New York to take charge of the store which his firm is opening there.

Berger Bros. are receiving fine asters from the Baron de Hirsch agricultural school, Woodbine, N. J. This firm has a large and responsible patronage and is knocking the persimmons from the tall trees.

S. F. Lilly has returned from a two weeks vacation at Wildwood, N. J., which he thoroughly enjoyed. At his new location on Neole street he is much pleased with the volume of business.

Rupert Kienle, retailer of 39 South 17th street, has taken advantage of the dull season to thoroughly redecorate his store.

The Leo Niessen Co. continues to handle large quantities of the best stock seen in the market.

Work has been started on Dreer's new range at Riverton, N. J., and will be steadily pushed.

W. E. McKinick continues strong on good American Beauty roses.

John McIntyre is handling exceptionally fine asters.

Pittsburg.

STOCK PLENTIFUL.

The tension has loosened up a little and stock is coming in more plentifully excepting good asters, and they continue very scarce. Fancy lilies are in abundance. Beauties are also coming in fine and are cleaning up nicely. Early part of the week quite a number of the retailers had big funeral orders on, which kept them on the jump getting stock to take care of them. Quantities of fancy gladioli are seen, America, August, Scribe, etc. Asparagus and sprengeri is very plentiful. Some nice chrysanthemums are on the market. They are admired and that is about all.

NOTES.

W. A. Herbert, Wellsville, Ohio, was a caller in town Saturday and says business is pretty fair down his way.

Chas. Dougherty, McKeesport, one of our noted checker players and florists, is reported to be very ill.

Randolph & McClements, Baum and Beatty streets, have been very busy with funeral work.

Pittsburg Cut Flower Co. is going to move from present location to 121 Seventh street.

Edw. J. McCallum and wife are spending a couple of weeks at Chautauqua Lake.

J. B. Murdoch & Co., Van Emmans, are cutting some fine Pink Killarney.

The McCallum Co. is handling a fine line of summer beauties.

Miss Worth, McKeesport, spent a week or ten days at Erie.

J.

Cleveland.

There is a shortage in the aster and carnation crop at present. Asters, on account of the dry season, have been rather poor; a few growers who had theirs where they could water them had fairly good ones. The outside carnations also were poor and very limited in quantity on account of the drouth. A few good indoor asters and carnations are beginning to come in, but the carnations as yet have short stems. Gladioli alone seems to be abundant and of good quality. Jap lilies, both pink and white, are finding a fine market. Business is beginning to improve and all indications are for a busy season and excellent crops.

On Thursday night this city and vicinity received about .41 of an inch of much needed rain. Temperature dropped from 87° at 3 p. m. to 58° at 11 p. m.

Fred Ehrbar is still busy on his farm. At present he is erecting a granary to store his crop of oats. He is also cutting a fine lot of bulbous stock.

A. A. Hart, the Lake avenue florist, and daughter, Gertrude, will sail about September 1 for home, having spent two months in Germany and Switzerland.

Knoble Bros.' store was entered by someone on Thursday night and about \$100 taken from the safe. A former employe is suspected.

John Demas, Colonial arcade, has been on the sick list the past week.

CONCORD JUNCTION, MASS.—Leonard Cousins is now the proprietor of the largest greenhouse in this part of Massachusetts. The beds contain some 18,000 carnations.

SALT LAKE CITY, UTAH.—The exhibition of flowers and floral designs will play a prominent part in the state fair this year. Numerous local florists are contemplating the forming of competitive floral designs, and Horace S. Ensign, secretary of the State Fair Association, has received many inquiries in regard to the prizes and other particulars. The following premiums are to be offered by the fair: Best display of foliage and flowering plants, 50 in all, gold medal and \$25; sweepstakes, best collection of plants and cut flowers to be owned and raised in Utah by the exhibitor, gold medal and \$25. Diplomas will be given for other displays.

FLOWERS ARRIVING.

The weather took a great change Thursday. We were shivering here but at time of writing it is warming up. Flowers are starting to come in larger quantities. Tuberoses are very plentiful. Some good Richmonds, Killarneys, white and pink, are seen with good long stems; cooler weather causing them to show improvement. Asters are still with us and selling well. Some good color American Beauty roses are in. Schools open up September 6 and nearly all the theaters will open early in September. Most of those away on vacations will return shortly so we can soon expect the season to open up.

NOTES.

Wanted, an ugly cashier, permanent position. Apply at once. Ask for Mr. Gorly, care Grimm & Gorly, 702 Washington avenue. The above appeared in the daily papers and caused much comment and amusement. Mr. Gorly, after breaking them in, a pretty cashier turns around and gets married and he has continually to begin training a novice.

Henry G. Berning and wife have returned from the east. Henry is now busy with the opening of the store next door. The ice box will be installed and the painting and fixtures will be all in shape this week.

M. M. Ayers has a fine display of fancy asters, lilies and American Beauty roses. Miss Ayers said she could not complain, having done her share this summer.

President Geo. B. Windler is very anxious to have a large attendance at the next meeting of the Florists' Club, to be held at the H. J. Weber & Sons Nursery Co.

Arthur Waldmann is doing a nice business up at his store on Taylor and Easton. He has a fine stock of cut flowers and plants always on hand.

Wm. Winter was in town. He expects to bring in carnations within a month or so. He reports violets as looking badly and not growing.

Ed. Kelley of the Kelley Floral Co. left Saturday with his wife on a visit to Chicago. Ed. has been very busy lately and needs a vacation.

BUSINESS SLUGGISH.

There is no apparent change in the market from the sluggish condition of last week. Prices which took a sudden rise on Friday and Saturday of last week have fallen just as suddenly and the problem on the hands of the wholesaler now is, how will I get rid of my stock, instead of how much will I get for it. However, the general consensus of opinion amongst the wholesalers is that conditions are just what they usually are at this time of year, no better or no worse, and even the more pessimistic of them predict much better conditions shortly with the advent of cooler weather. Beauty roses which were rather scarce are now hard to move. The same may be said of all other stocks. There are spasmodic demands for white stock at times for funerals, this being about the only business done just now. Lilies are getting scarcer but are not bringing any prices to speak of. There is still an abundance of asters, and, although some fine stock is noted, the majority is inferior and is sold for little or nothing.

NOTES.

A new club has been formed among the Twenty-eighth street boys with Wm. Haupt as president, styled the Florists' Fishing Club. Their first fishing trip proved to be a very successful one. Chartering an auxiliary sloop yacht at Freeport, L. I., which, needless to say, was equipped with everything necessary from refreshments to bait, the party embarked for their cruise on the briny deep. After a delightful day spent at sea they returned with over 50 pounds of fish and the usual story of having lost a whopping big fish just as it was being pulled aboard. The honors went to Wm. Haupt for pulling in a four-pound sea bass. Among those present were: J. B. Nugent, Jr., wholesaler; Wm. Haupt, Twenty-eighth street; H. Riechers, with P. Smith, Twenty-eighth street, and J. Capperall, of the Boston Floral Co. This club is desirous of increasing its membership.

John A. Rassbach, Bloomfield, N. J., has returned from a month's stay in Colorado, having visited Denver, Cripple Creek and Fort Collins amongst other places. When asked as to business conditions there Mr. Rassbach stated that the florists and farmers had suffered greatly in the last three summers from drought and that this summer, along with the dry spell, they had suffered severely from a plague of grasshoppers, these pests devouring everything green in sight, there apparently being no way or means of preventing their depredations. He also says that while he enjoyed himself thoroughly there and that the country was beautiful, yet 45 minutes from Broadway was far enough away for him.

Henry L. Bantelman, the Washington Heights florist, is building an additional greenhouse 135x26 at his

Yonkers place. Mr. Bantelman has had the contract for furnishing flowers and plants at the Hotel Astor ever since it opened and states that while he has two large growing establishments, one in Yonkers, the other at Kingsbridge. He can not produce half enough to supply the hotel and his store on Amsterdam avenue.

M. A. Bowe, Herald Square, who will have to vacate his present store owing to the building being torn down, states that so far he has not definitely settled on a store yet but expects to locate in the neighborhood of his present place.

Phil Kessler will take advantage of the slack season and spend a couple of weeks at White Mountain resorts.

W. Hackland, bookkeeper for the Cut Flower Exchange, is spending two weeks on the Long Island coast.

Wm. Iler, with Edw. C. Horan, is spending a well earned vacation in the Catskill Mountains.

The Geller Supply Co. is now installed in its new store at 147 West Twenty-eighth street.

Baltimore Notes.

Mr. Perry, manager of the Florists' Exchange, is having the handsome hall over the Exchange newly painted and decorated, adding very much to the appearance of the room. This hall is now dedicated to a great variety of uses. Last week it was a center of activity of the Order of the Moose, which held its national convention in this city, and was crowded with visitors. On other occasions it is used for dances, meetings, etc. Still again, it is occupied as a music school, an eminent tone artist giving lessons in vocal development. On Saturdays it is dedicated to religious services (not by the Jews, but by the seventh day adventists). Centrally located and easily accessible, it is constantly occupied, and gives at once advertisement of the Exchange and its business and adds to the earnings of the concern.

Business last week, considering the not very auspicious conditions which exist, was fairly active, with alternating dull and busy spasms as is universally felt at this season. The weather is delightful, save for the dryness, which continues though some localities, blessed above others, have had refreshing showers. Generally the fields and gardens are greatly in need of rain; the seasonable farm operations can not be performed, and nearly all crops, such as asters and other outdoor sorts, are languishing for moisture.

John R. Freeman, of Washington, D. C., was a visitor to our city on Monday. He was on a pious mission to see his old friend and companion, Mr. Wood, at Bonnie Brae cemetery, and to pick up some stock which he needed for his place. Mr. Freeman was a Baltimorean before he went to the national capitol, and though he does not "come back" often, he is always heart-

ily welcomed by his old friends, who know and esteem him highly.

A new concern has taken over the greenhouses of Mr. Hooper on Shirley and Park Heights avenues, formerly run by George Frederick Ekas, the style of the new copartnership being Christie & Talbott. Mr. Christie has places on the old York road at Waverly and at Woodbrook, and Mr. Talbott was for many years a very much prized employe of the park department, and is a practical man.

The season of renovations and repairs is on us, and all hands are busy with paint pot and glazing tools, and if no very large building operations are in view there are a great many little betterments and additions going on.

The Rochester pilgrims are now all accounted for, the last to reach home being Mr. and Mrs. Isaac H. Moss, who returned Saturday after a long and pleasant extension of their trip to the lakes.

A. F. Faulkner, the special representative of THE AMERICAN FLORIST, was in this city last week and visited a number of the craft, his pleasant manner and fund of stories making him a very agreeable visitor.

Wm. Prince, gardener at the famous colonial place, Hampton, the country seat of the Ridgely family, is recovering his health, after a series of serious surgical operations.

Mr. Wood, superintendent of the Bonnie Brae cemetery, is very ill, his friends feeling much concerned about him.

Lehr Bros. are sending in some A No. 1 asters, grown under glass, splendid in size and color.

European Horticulture.

As to the usefulness of cannon against hailstorms, M. Andre, director of the observatory of Lyons, has carried on an investigation, covering the 20 years before the installation of the agricultural artillery posts, for comparison with the 10 years since their establishment in 1900. An unexpected result has been discovered, statistics showing that since the conscientious bombarding of hail clouds much greater storm losses have occurred than before. While M. Andre concludes that the hail-cannon are at least useless, some of the advocates of this method of protection arraign M. Andre's statistics and claim a longer trial to be necessary.

Delphinium Lamartini.—A very handsome dark-flowered variety, bold in stature and conspicuous by reason of the excellence and size individually of its blossoms. These two varieties were exhibited by Amos Perry, Hardy Plant Farms, Enfield, and each received an award of merit.

Gladiolus King Edward VII.—This is a very large-flowered variety of the Colvillei section, the blossoms being vivid scarlet, with a narrow creamy white stripe down the centre of each segment. Shown by F. Lilley, Guernsey. Award of merit.

The monthly meeting of the Inter-town Dahlia Association was held in the Arlington assembly rooms August 19. Arrangements were completed for the dahlia exhibition of the association, which will be held September 17. It is expected by the members of the association that the exhibition will exceed that of a year ago and will be larger and better in every way.

The recent dry weather affected dahlias as well as other flowering plants, and the yellows and various other troubles have made it difficult for the growers to secure first-class blooms. Dahlias are already blooming, but the best flowers are yet to come. The size and beauty of the blooms increases as the weather grows cooler and by the third week in September some splendid flowers are expected. The plants are now making strong growth and the pinching back and plucking of early buds is about over. The blooms, in most instances, will now be allowed to develop and efforts made to secure a fine crop for the exhibition. The only thing which at present gives the growers any concern is the danger of frost.

Boston.

A more cheering autumn harbinger could not have greeted the managers of the Park Street Flower Market than the interest shown in the eighteenth annual sale of stalls which occurred last Saturday. This sale, however, will now be known as the first annual sale of the Boston Flower Exchange, Inc. There were 128 stalls to be auctioned off, and the crowd was there, about 200 of them. It was announced that the annual rental of each stall would be \$25 and no premium would be accepted less than \$25. James T. Carroll was auctioneer. The bidding was very lively and went up to \$130 and held above \$100 for a good part of the sale. No previous sale has equalled this in the size of bids. Pierce Bros., Waltham, bid off six stalls; Mann Bros., Randolph, four; J. A. Budlong Son & Co., Providence, three; S. J. Reuter, Westerley, R. I., three. The following bid off two stalls each: Nelson & Johnson, Framingham; Wm. Nicholson, Framingham; W. W. Edgar, Waverly; A. Christenson, Stoneham; E. Sutermeister, Hyde Park; Montrose Greenhouses; Kidder Bros., Lincoln; T. J. Dolansky, Lynn; J. T. Butterworth, S. Framingham; John Fee, Jamaica Plain; Wm. Sims, Cliftondale; Payne Bros., Randolph; H. H. Rogers, S. Sudbury; H. F. Calder, Norwood; G. W. Hilliard, Exeter, N. H.; Wm. H. Tomlinson, Dorchester. The Boston Co-Operative Flower Market has its sale of stalls this week Saturday at 9:30.

NOTES.

J. Farquhar reports that the Massachusetts Horticultural Society has arranged to issue in a few days a list of prizes to be offered for the February show. On account of the National Flower Show to be held in March the usual spring exhibition will be omitted. The February show, however, promises to be an interesting one, prizes being offered for cyclamens, primula, Begonia Gloire de Lorraine and various flowering bulbous plants which would be too early for the national show.

T. F. McCarthy in Hawley street has been doing an unusually heavy business. His auction rooms are undergoing extensive repairs and will be ready to open September 8. His bookkeeper, Miss M. C. Smithers, has gone on a trip to South America. Mr. McCarty has bought a fast horse at St. Albans, Vermont, and with his wife and daughter is driving back to Boston.

John Farquhar is authority for saying that great enthusiasm is being manifested and large preparation made, and business coming in which insures the financial as well as horticultural success of the great show to be held in March.

The departure of Elijah A. Wood for Chicago, and his loss to this locality where he has been so well known deserves special notice. To all his friends he is "Elijah." He leaves, with his wife, this week Wednesday.

H. M. Robinson & Co., Providence street, have opened up a branch at Pine Apple, Alabama, for growing southern smilax in quantity, and will supply trade at lowest wholesale prices.

The death of W. B. Whittier, nurseryman of Framingham, occurred Sunday morning, August 28. A friend who knew him said, "A more honest man never sold a tree."

The New England Dahlia Society will hold its exhibition September 16, 17 and 18. The prospects are fine for the abundance and quality of the blooms.

Robt. Cameron of Harvard Botanic Gardens is reported as having exceptionally fine beds of zinnia elegans and petunia hybrids.

The Andover Horticultural Society held its autumn show last Saturday. Wm. J. Stewart and Patrick Donnell were judges.

WHOLESALE

Among the visitors to this city have been R. H. James, the big Bermuda bulb grower, with his wife and daughter.
W. T. HUTCHINS.

Manchester, Mass.

The annual summer flower show of the North Shore Horticultural Society opened August 24 in a large society tent pitched on the grounds of the Essex County club, not far from the clubhouse. August 24 was band concert day at the club and many people visited the show and were delighted with the many fine displays, the greater part of which came from the gardens of the more prominent members of the summer colony. The exhibition as a whole was one of the finest the society has ever held and besides the exhibits in the regular classes there were numerous specials.

Mrs. Lester Leland was one of the most successful exhibitors. She was awarded a silver cup for the best collection of gladioli, named varieties, the exhibit filling two tables. She also took first prizes for best six pots of sword ferns and best collection hollyhocks. Mrs. Leland also showed a magnificent group of foliage and flowering plants arranged in a high mound which was awarded the gold medal and was given numerous other prizes in the regular classes.

Miss Helen Hooper took a good share of the prizes and no other exhibit attracted more attention than a table of fruit, probably the finest ever shown here, which included three varieties of hothouse grapes, some of the bunches weighing five and one half pounds each, and seven varieties of greenhouse-grown melons of English varieties, besides nectarines, plums and other fruit. Miss Hooper also took first prize for the best six vases of gladioli and numerous other prizes in the smaller exhibits.

Mrs. James McMillan won a silver cup offered by George P. White for the best collection of annuals. This collection embraced over 100 varieties. There was considerable competition for dinner table decorations and several very handsome exhibits were noted. The silver cup for best decoration of eight covers was secured by Magnuson and Huyian, second prize going to Mrs.

James McMillan. Mrs. B. Hammond Tracey took third prize. Miss A. G. Thayer also entered a table. Mrs. Gardner M. Lane made a remarkably fine exhibit of dahlias, taking first prize for best display in all classes, the exhibit including some 40 varieties.

The display of hardy perennials called out considerable favorable comment, Miss A. G. Thayer taking first prize for best and largest collection, and Miss Helen Hooper second. In the zinnia classes Mrs. James McMillan had a particularly good display, taking a first in the regular classes, and Mrs. H. W. Mason second. The first prize for best collection of perennial phlox—six vases—went to Mrs. E. C. Swift. For the best collection of asters Mrs. H. S. Grew took a first and John F. Wonsion second prize. Among other prizewinners were: T. Jefferson Coolidge, Mrs. E. C. Swift, Mrs. S. Parker Bremer, Miss H. L. Fitch, T. J. Coolidge, Jr., Mrs. George Wigglesworth, Mrs. W. H. Moore, Miss P. Croll, Mrs. Philip Dexter and Mr. George R. White.

The Call of Autumn.

O, trudging, trudging through the town
By dingy doors and walls,
I dream of hedges turning brown
And hear the mystic calls,
I sense the murmur of the trees
With shadows dark and green,
Where he who is acquainted sees
The fairies dance between.

The little roads that wind and turn
And clamber up the hills,
Past where the woodbines flash and burn,
Or loiter by the rills—
They send a coaxing call to me:
To come and fare afar,
To wait for dusk's great mystic—
The blazing evening star.

And orchards with their laden boughs
Are whispering the while
Of breezes that come there to drowse—
They call me mile and mile,
The good bare fields where golden glow
Bloom all about the edge
Are calling that 'tis time to go
A-tramping through the sedge.

Ho, dusty paths and grass-grown trails,
They fain would know my feet,
And I can hear their far-off hails
Here in the city street,
The grapes are bursting-full of wine
And purpling in the sun;
They send a flavor fair and fine
That thrills the blood of one.

We also collect accounts at standard rates.

National Florists' Board of Trade, 56 Pine St. NEW YORK

Milwaukee.

Business is brisk and everything selling well. Roses shortened up considerably toward the end of the week on account of the cool weather. Short-stemmed roses especially are scarce. Gladiolus are becoming more plentiful but are selling readily; American Beauties enough to supply the demand and are very good with plenty of mediums. Asters coming in better and bringing good prices. Lilies have shortened up and only a limited amount to be had.

NOTES.

Everyone is looking forward to the picnic which will take place next Sunday, September 4. The entertainment committee is making great preparations for games and prizes. Everybody is cordially invited and a good time is anticipated.

Mitchell street florists have been kept busy with local weddings and funerals. They cater mostly to the Polish people on the south side and do a very nice business. They are at present preparing to add another house to their range.

Otto Teitbohl has commenced tearing down his greenhouses, as his lease expires December 1; he contemplates putting up some new ones outside the city limits, but has not decided upon a location at the present time.

Eddleson & Leidiger are having a new front put in their store, giving them two show windows 15 feet each, which no doubt will give their store a very fine appearance. This concern reports business very good.

Nic. Zweifel is starting to cut a few new carnations; he has planted ten benches of Bright Spot, which he expects to make cuttings from to supply a number of firms that have them on the market.

Holton & Hunkel Co. are receiving some exceptionally fine Killarney and My Maryland grown by Adam Zender of Rogers Park, Ill.

Currie Bros. Co. report business very brisk and among their large orders was one for the Gates wedding at Spooner.

Manke Bros.' new place is looking very fine, with their young plants looking strong and healthy.

William C. Zimmermann has returned from St. Louis and reports a very good time.

Visitors: Mr. Augspurger, Peoria, Ill.
G. R.**Detroit.**

The Florists' Club meeting of Monday evening, August 29, was a great success, probably due to the many extraordinary features on the programme. The meeting was held in a tent on the lawn adjoining the Breitmeyers' greenhouses on Mack avenue, where Herman Knappe is foreman, and on whose invitation the club met there. The arrangements were most unique; the interior of the tent was decorated and over the platform was hung two American flags. The installation of the newly elected officers of the club was of major importance and was conducted by Major Philip Breitmeyer, who solemnly, with the laying on of hands, inducted each of the newly elected into office and commissioned them to carry forward with greater enthusiasm and efficiency the good work for which the club was organized and of which he was the first president just 12 years ago. The officers for the ensuing year are:

George Browne, president.
Herman Knappe, vice-president.
Hugo Schroeter, secretary.
Robert Rahaley, treasurer.
Harry Pickworth, librarian.

President Browne, in his address, outlined his course officially of the club during his administration and named the following committees:

J. F. Sullivan, A. Pochelon, A. Sylvester, auditing; M. Bloy, Wm. Dilger, J. F. Sullivan, Frank Danzer, programme and essays; J. K. Stock, Louis Charvat, Robt. Rahaley, A. Sylvester, Robt. Klagge, entertainment; M. Bloy, Herman Knappe, Ed. Berd, Thos. Browne, A. J. Stahelin, exhibition.

The secretary read his annual report showing the accession of eight new

Sphagnum Moss

Dry; in burlap bales; size of bale, 16 by 16 inches by 4 feet long; average weight, about 30 pounds. Price **cash with order**:

CHAS. F. UECKE, New London, Wis

members and a total membership of 96. Elmer D. Smith, Adrian, was a visitor and showed a dozen blooms of his new early chrysanthemum, Smith's Advance, a variety resembling old Willowbrook but of greater substance and stronger foliage. Mr. Smith gave an interesting talk on his familiar subject of chrysanthemums and their cross fertilization. At the conclusion of his address a vote of thanks was given him and his new variety unanimously endorsed as a valuable acquisition. A. E. Boun, representing Armour & Co.'s fertilizer for florists, was present and promised an address at a future date on the application of commercial fertilizers under glass. By unanimous consent the club quarters were changed to 112 Farmer street, to take effect October 1 next. At the next meeting, September 19, M. Bloy will give an extended address covering his observations of the proceedings, exhibits, etc., at the S. A. F. convention, which he, with about a dozen others from here, attended. After adjournment all were marched to the potting shed, where Mr. Knappe had prepared a bounteous lunch which was much enjoyed in the honor of Mr. Knappe's forty-fourth birthday.

J. F. S.

DANVILLE, ILL.—John Willius has filed a petition in bankruptcy.

SARATOGA SPRINGS, N. Y.—John Ralph, Woodlawn avenue, and Henry Schrode, Nelson avenue, received the thanks of the board of managers of the St. Christina industrial school for their contribution of flowers to aid in making a success of a benefit sale.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

GERMAN growers report some varieties of peas a total failure.

VISITED CHICAGO.—E. J. Deal, of W. W. Johnson & Son, Boston, England.

CANADIAN conditions are said to be even worse than those of the United States pea districts.

GEO. H. DICKS, representing Cooper, Taber & Co., London, England, is due in Chicago September 5.

EINAR KNUTSON, of Hjalmar Hartmann & Co., Copenhagen, Denmark, sailed for New York August 18.

BRANDON, MAX.—The A. E. McKenzie Co. is planning to build a new seed warehouse this season at a cost of \$100,000.

HOLLAND seed growers report August 15 fine favorable weather but that some biennial vegetables such as beet, winter radish, etc., are nearly a failure.

LATEST crop reports from California indicate some shortage of beet and carrot. Most beans are good. Most other garden seeds are showing good yield with the possible exception of White Portugal onion.

BIRMINGHAM, ALA.—The Amzi-Godden Seed Co. entertained its employees, their friends and families with a picnic and barbecue at West Lake park, two miles west of Bessemer, August 20. The attendance was about 100, including some of the prominent horticulturists and truck gardeners of this district. The barbecue was one of the finest and most elegantly served ever enjoyed in this section.

NEW YORK.—I. F. Slimon has resigned his position with J. M. Thorburn & Co. and is now with Vaughan's Seed Store here. C. W. Scott is now with the Yokohama Nursery Co.—Mr. Goldenburg of Ralph M. Ward & Co. reports that owing to the enormous demand for giganteum lilies the last two years there will be a scarcity of the larger sized bulbs this season and that disastrous floods in Japan have not helped conditions any.—H. Frank Darrow has re-

turned from a trip abroad, having spent some time visiting his various connections in Europe.

Seed Warranty.

At the Lynn county court last week, Judge Mulligan gave judgment in the case of Marsters v. Whittombe, arising out of a transaction in wheat, but which, as the non-warranty clause was introduced, may have considerable interest for seedsmen.

The plaintiff, a seed merchant, claimed £13 15s. for seed wheat sold; the defendant, a farmer, counter-claimed £48, on the ground that goods sold were bad.

From the judge's summing up (which is too lengthy to give in full), we gather that the bargain, which was for five quarters of Sensation seed wheat, at 55 shillings, was purely verbal, but the plaintiff's manager sent an invoice next day by post which contained the usual non-warranty clause.

First Hyacinth Bulb Shipment of 1910 from Ollioules, France.

According to evidence defendant did not read this, but merely put it in a drawer to be paid later. The court said that it had been intended that this clause, in small print, only expressed a custom in the seed trade, but such custom did not exist in relation to farm seeds, and if it had it would have resembled a cancer rather than a custom. He considered also that defendant was not aware at all of the existence of this clause. He found that the wheat was properly

sown under favorable conditions, and only grew ten per cent, probably owing to having been killed by heating or kiln drying, and that consequently plaintiff had not fulfilled his bargain with defendant.

He said, "A merchant is, of course, justified in charging the highest price he can obtain, but he must deliver the genuine article as sold.

"As to the counter claim. The defendant is entitled to be paid for his extra work and labor in resowing. He thinks he also should be allowed something for the difference in value between a crop of ordinary spring-sown wheat and a crop of autumn-sown Sensation wheat, which might have served to renew his seed next year. But that loss is too problematical and too remote. At the same time, I must say that a farmer who buys seed at 50 per cent above the market price of ordinary wheat, though he may have no legal claim for problematic losses, might reasonably expect an enterprising and experienced grower and seller like Mr. Marsters to exercise greater diligence. There will be judgment for the plaintiff on the claim for £1 7s 6d, but without costs. There will be judgment for the defendant on the counter claim for £17 10s., with costs on Scale C."

It would appear from this that among those ignorant of the custom of the seed trade, the non-warranty clause must be definitely brought to the notice of the buyer before it can be considered as forming part of the bargain. It is evident also from the judge's remarks that he viewed the clause with very grave suspicions, and that he would be very loth under any circumstances to accept it as a full defense. — Horticultural Advertiser (English), August 17, 1910.

French Bulbs.

FIRST SHIPMENT THIS SEASON.

The illustration herewith shows the first of the shipments of hyacinth bulbs from Ollioules this year, the first invoice certified at the consular office this year being on July 1, the same date as of the first shipment in 1909. The crop is seemingly of excellent quality, and while there is always that apparent shortage of large sizes there would seem to be every reason to suppose that the shipments of the present year average better than ever before.

GIANT PANSY PLANTS

The KENILWORTH Strain

Must not be compared with the flimsy Trimar-deau. It is much larger and of good substance, the immense flowers of $3\frac{1}{2}$ to 4 inches are of perfect form, every tint and shade is produced in striking combinations and endless variations of beautiful colors and markings; it is the result of years of selection. The stock plants are selected from many thousand of plants grown for market. It is rich with shades of brown, bronze, red mahogany and numerous other light, medium or dark mixtures.

1910 Seed Now Ready.

2000 seeds 50c; 5000. \$1.00; $\frac{1}{4}$ -oz. \$1.25; 1-oz. \$5.00; 1 lb. \$50.00. Also the following colors of the Kenilworth strain: yellow, yellow-darkeye, Lord Beaconsfield Mme. Perret white darkeye, purple, black, masterpiece, red, brown, bronze, and light blue shades. Trade packets 25c, any five for \$1.00.

Rainbow is a blend of over 50 of the latest introductions of giant pansies of the most beautiful gorgeous colors; blotched, striped, veined margined, etc. With every \$1.00 worth of Kenilworth strain I will send 1000 of Rainbow free, and with other amounts in like proportion.

The Use of Commercial Fertilizers.

The Charlotte (N. C.) Observer, in its issue of April 3, published a letter from Dr. H. Q. Alexander, Mecklenburg county, president of the North Carolina farmers' union, in which he argued for a reduced consumption by the farmers of commercial fertilizers, preferring the purchase of the elements and home mixture. E. W. Thompson, district manager of the Southern Cotton Oil Co., who is one of the best posted gentlemen on the subject in the south, replies to President Alexander's argument as follows:

"President Alexander, of the farmers' union, writes about the guano trust beast, and how it 'has it in' for the farmers' union, and is refusing to sell guano to the union: I do not wish to reply to this part of the article, because, in the first place, the reader will properly attribute prejudice on the part of both sides. In the second place, no argument should be needed to show that the so-called trust would be glad to sell to any individual or organization that would make the proper business arrangement about the pay.

"I wish to argue a little on the general subject of the use of commercial fertilizers. President Alexander says it is worse than throwing money away, and mentions The Agricultural Year Book as authority, but he does not quote the language. Now, it is a fact known to the engineering profession that, in the usual manner of burning coal for producing power in the steam engine, fully 90 per cent of the heat value of the coal is lost, but the 10 per cent that is utilized moves civilization at a considerably faster gait than would the limited number of horses that are available for doing the work of the world, even though the horse utilizes and renders into useful work more than 70 per cent of the power value of his feed.

"The pertinency of this analogy lies in the fact that no farmer in this part of the country is making enough natural fertilizer for his needs. If he could or would raise enough cattle to eat all the cottonseed meal and hulls and hay that he could grow, then he could afford to laugh commercial fertilizers out of court. But under conditions as they are, can he afford to overlook the scientific aids which are presented to him by the various agricultural colleges and experiment stations?

AN EXACT SCIENCE.

"Fertilizing has come to be an exact science—so much phosphoric acid, so much ammonia and so much potash to produce a certain crop. If the farmer can continue to grow these elements in sufficient quantities for himself, well and good; but if not—and this is the real situation—is it not the part of

wisdom to buy them? This brings us, then, to the question as to just how he should buy the fertilizing elements. President Alexander says if they must be bought at all buy the various ingredients and mix them on the farm rather than buy the ready-mixed guanos, because (1) you know exactly what you are buying, (2) you can mix the ingredients in a way to suit your particular case, (3) you can save \$3 to \$6 per ton. Let us carefully consider these arguments:

"You know what you are buying by the guaranteed analysis printed on the bag and on the tag, which our careful Department of Agriculture requires on every sack. Exactly the same knowledge and guarantee goes with the mixed guanos, so there can be no possible advantage in the raw goods on this score.

"A farmer cannot be supposed to learn by reading or experience any more about the proper ingredients and their proportions than a responsible guano manufacturer, who mixes thousands of tons where any single farmer mixes 50. In order for a manufacturer to stay in business, he must please his customers and make goods that will produce results, and also he is being compelled by the Department of Agriculture to make goods up to a certain grade. There is no one to force the farmer to give his land a square deal, and hence he is at liberty to mix up anything for the land that his fancy dictates.

"Assuming that a farmer finds out exactly what ingredients and what proportions he needs, he frequently turns over the job of proportioning and mixing to a laborer, who in the nature of the case is not expert at the job. The result is that the final mixture is uncertain and irregular. Even with the greatest care, it is impossible to mix ingredients by hand so that there will be the same uniformity throughout as would be the case with machinery.

UNIFORM MIXTURE ESSENTIAL.

"Few people realize the importance of uniform mixture of fertilizer ingredients. It may be very forcibly brought out by considering the effect of the mixture on one individual cotton plant. The average cotton field contains about 10,000 plants per acre. Suppose you use 300 pounds of fertilizer per acre. (This is not enough, but it is 50 pounds more than the average for the state.) This is 4,800 ounces, say, half an ounce per plant. Each plant receives less than a tablespoonful of the mixture. It is self-evident that a farm laborer, even though of high intelligence, will not and cannot mix fertilizer ingredients in such a way that every tablespoonful of the mixture will be like every other tablespoonful. This means that one cotton stalk will receive too much phosphoric acid and not enough ammonia, another too much potash and not enough of the other elements. The inevitable result is a lower yield of cotton by this process than by the use of machine-made goods.

"The money end is, of course, the final measure. But saving money is not the whole story, else it would be better to save the whole ton, say \$30, by doing without, instead of saving President Alexander's \$3-6 by home mixing. Suppose there could be the maximum saving of \$6 per ton, or 30 cents per 100 pounds. If you use 300 pounds per acre, the saving is 90 cents

per acre. Suppose you are figuring on making a bale to the acre (and no Farmers' union man should be content with less), last season a bale of cotton with its seed was worth \$90. The saving of 90 cents in fertilizer is just one per cent. Therefore, if the farm mixer made a mistake of one per cent in weighing or mixing, the whole saving would be wiped out. It is a certainty from the start that such work cannot be done within one per cent of correct. The risk in home mixing is too great for the possible profit. If a mistake is made, it takes a year to correct it. One year of life is risked on every questionable experiment in farm fertilization."—American Fertilizer.

Providence.

A new disease which threatens the extinction of the cucumber in this state is giving the market gardeners hereabouts considerable uneasiness and has reduced the estimated crop by at least 75 per cent. The melon crop, too, has been ravaged by the same disease and is but half the normal. The ravages of the disease have become so extensive and the amount of the damage already done to the crop so great that the United States government has been appealed to and agents for the State Department of Agriculture are now making an investigation to ascertain just what the trouble is and the remedy for it. Up to the present time the epidemic has reached a stage which has caused a loss of between \$150,000 to \$200,000 to the market gardeners of the state and it is believed that this damage may be even greater before the season closes.

It is reported at the farm of the J. A. Budlong & Sons Co. at Cranston, that the loss will be about \$50,000 on this season's crops. The other market gardeners, it is stated, sustained serious losses. Melons also have fallen a victim and the melon crop of the state is this year reported as less than one-half what it should be. The total damage will, it is estimated, amount to between \$150,000 and \$200,000 in this state. J. BRINTON.

VAUGHAN'S INTERNATIONAL PANSIES.

Vaughan's International Pansy Mixture was first prepared and offered by us in 1880. We import from all the best European sources, and personally inspected the fields of French and German specialists of their finest strains. Each year has added to the quality of its flowers, the variety of its colors. We buy every year novelties of known merit to improve the mixture. This is the reason it is always complete, always the latest and always the best mixture AS WE BELIEVE. We add to all the Pansy Mixtures, which we now buy more than fifty per cent of choicest named kinds obtainable, each in rightful proportion. We thus know what it will produce. This is one of the SPECIALTIES which has established and held the reputation of Vaughan's Flower Seeds and this is one which we maintain most carefully. You are beginning right in Pansy growing when you start with Vaughan's International Mixture. Trade pkt., 50c; 1/4 oz., \$1.50; 1/2 oz., \$5.00; oz., \$10.00.

VAUGHAN'S "GIANT PANSY MIXTURE,"

Embraces besides all the separate shades and colors, five special strains not listed elsewhere, and which can only be had in this and our International mixture. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimardeau, the splendid Cassier strain. Trade pkt., 25c; 1/4 oz., 60c; oz., \$4.00; 1/2 lb., \$14.00.

Training and Qualifications of a Gardener.

Horticulture in the British Isles occupies a position second only in importance to agriculture. The census in 1901 revealed that there are about 250,000 persons employed in its several departments in this country alone. For centuries horticultural art has steadily advanced, and we have now societies concerned with gardening in most towns of importance, the Royal Horticultural Society alone, with teaching garden at Wisley, and an exhibition hall at Westminster, consisting of about 10,000 members. Horticulture, while being associated with agriculture and botany, occupies a distinct field of its own, says W. Watson in the Standard Encyclopedia of Modern Agriculture and Rural Economy. It is concerned with such subjects as the influence upon plants of temperatures, light, soils and manures, water, air and drainage; such operations as grafting, budding, layering, cutting, seed-sowing, pruning, transplanting, forcing, retarding, and storing; improvement of plants by breeding and selection; the diseases and pests of plants; the formation of gardens, and the production on commercial lines of the manifold parts of plants which are used economically by man.

From this it will be seen that a well equipped professional gardener must go through a course of training of a very varied character. Knowledge by itself is not sufficient; he must acquire skill by actual practice, and considerable experience before he can perform or control the many and varied operations that gardening entails. This training he gets as a rule by working in gardens from boyhood onwards. To qualify as a professional gardener, a boy say of 14 or 15 begins work as an apprentice or garden help. In five or six years he will be fit for the position

ALBERT M. HERR,

of journeyman, working under the supervision of more experienced gardeners. From this his progress will be towards the position of head gardener or manager. The practical side he learns in the working hours of a generally long day, while the theory and bookish side he picks up according to circumstances. Gardening therefore is learnt similarly to the ordinary trades such as carpentry, bricklaying, etc. There are at present only few recognized schools or training colleges for high class professional horticulture. It is doubtful, indeed, if such are of much value in affording that training which enables men to become skilful, practical gardeners of the calibre that is developed by the usual methods.

Generally, the professional gardener is a development from the country lad, who on leaving school finds occupation as a garden boy and owing to circumstances over which he has little control finally emerges as a professional workman. Wages in horticulture are below the standard of wages in this country for skilled workmen generally, while the hours of labor are, on the whole excessive. As a result, horticulture as a means of livelihood fails to attract

Lancaster, Pa.

the most intelligent lads; fortunately, however, many of those who by force of circumstances become professional gardeners are men of the best type, and the position occupied by British gardeners throughout the world is quite worthy of the race. Commercial horticulture offers more opportunities owing to the extent of the trade plants and garden produce of all kinds, and the best of all training schools for the young gardener is the well-managed nursery or market garden of which there has been an enormous increase during the last 25 years. Not only is the art of cultivation practiced on the most advanced and at the same time economical lines, but business habits are also learned in such establishments. As matters stand at present the best training for a gardener is to work until he is 21 in a private garden, then for two years in a good nursery or market garden, and if after this he can devote a year or two to studying horticulture in such establishments as the botanic gardens of Kew, Edinburgh, or Glasnevin, he will by that time have laid the foundation of a competent knowledge and skill in horticulture.

Cutting Down Peonies—Varieties.

ED. AMERICAN FLORIST:—

We cannot always afford to wait to learn from our own experience. Will some one please tell us what is the effect on the next year's buds of cutting peony stems so long as to leave but little foliage, say one or two small leaves? And what will be the result if that little foliage gets accidentally knocked off? Will the buds that form at the base of the flowering stems so cut be strong enough for next year's blooming? Or will the stems produced from those buds next year be only weaklings, giving a feeble flower, if any at all? Some are inclined to insist that if a plant has a reasonable amount of foliage on stems that did not bloom, then the great succulent root will so distribute the juices that the buds at the base of those denuded, and those partially denuded, stems will be all right. If this teaching is correct we can cut to the ground and humor the craze for long stems. We also would like to know if there is a good commercial peony in the Chinensis class earlier than Melanie Henry, Edu-lis Superba, or General Bertrand? Also the best variety, or varieties, later than Festiva Maxima and Whitleyi to prolong the cutting season; other than Drop White which has a short stem.

A. L. G.

There can be no possible doubt that cutting away large quantities of leaf and stem growth is decidedly weakening to peonies and the weakening process is just in comparison with the amount of growth taken. There are always a certain number of flowerless shoots and these being left when the flowering stems are cut carry on the process of sap elaboration in the leaves and return the valuable elaborated sap to the roots. The natural recuperative properties of the peony are great and even if all the growth was cut from strong plants there would still be vigor enough in them to enable them to flower more or less freely, but if it were persisted in every year the plants would be so weakened eventually that they would cease to have any value. Every healthy leaf is of assistance to the roots, so leave as many as possible consistent with supplying good stems with the flowers cut. Never, of course, cut away flowerless stems—leave them to die off naturally. Mme. Calot is an earlier peony than either of those named and some commercial growers in the middle west think highly of it. Felix Crousse would also usually come earlier but is deeper in color, a good red. It is an excellent commercial sort. La Fiancee is a large early white

and Mme. de Verneville is early, white with carmine center. Marie Lemoine is one of the latest and best of the white rose type with white center and Dorchester is a good late pink. We do not recommend the very latest varieties, however, as a paying proposition. They do not, as a rule, flower so freely as the standard kinds and the flowers of the latter usually kept as long as they are needed in cold storage.

Leaf-Shedding in Conifers.

Leaf-shedding in conifers, due to Botrytis cinerea, is the subject of a leaflet (No. 234) issued by the Board of Agriculture, and it is pointed out therein that the disease is well known both in this country and on the continent. It has been recorded as attacking the following trees: Douglas fir (Pseudotsuga Douglasi Carr), silver fir (Abies pectinata DC.), spruce (Picea excelsa Link), larch (Larix Europea DC.), wellingtonia (Sequoia gigantea Lind. and Gord.). It has also been observed on junipers, and the Scots Fir (Pinus sylvestris L.) has been infected artificially with spores obtained from a diseased larch. Young nursery stock suffers most, but the youngest shoots of very old trees are also attacked.

The first indication of disease is a yellowing of the leaves, which finally turn brown and die, but are frequently prevented from falling, being held in a tuft by a delicate web of brown cobweb-like mycelium. The affected shoots are usually variously twisted or curved downwards. When infection is due to spores conveyed by wind or insects, the uppermost shoots are most frequently attacked, whereas when infection is due to the presence of the parasite in the soil, the lower part of the stem from the ground-line for two or three inches upwards is attacked.

compact masses of mycelium, which are more or less buried in the dead tissues. Just at the time when the young pine leaves are appearing, these sclerotia produce myriads of spores, which are distributed by various agents, and infection results.

The spores are capable of directly infecting young leaves, the germ-tube piercing the epidermis, whereas the bark of a two-year-old seedling can only be entered by some wound caused by late frost, punctures of insects, and similar agencies.

PREVENTIVE MEASURES.

1.—Perfect cleanliness in the seed-bed is of primary importance. Weeds should not be hoed up and left to die on the ground in the spring, as the Botrytis grows on all kinds of dying and dead plants, and the spores pass on to the leaves of the seedlings.

2.—In one instance the fungus causing the disease was found to have spread from stable manure, which had been imperfectly buried in the soil. The projecting portions of straw were thickly covered with the botrytis.

3.—The fungus is very dependent on moisture, and only produces spores in a humid atmosphere, hence it is important that damp, low-lying situations should be avoided for nursery purposes.

4.—When the disease is present, spraying with the following solution will check its progress:

Sulphate of copper..... 11 lbs.
Carbonate of copper..... 16 lbs.
Permanganate of potash..... 1 lb.
Soft soap 3 lbs.
Rain water 100 gal.

Every part of the ground within and for some distance beyond the affected patch should be thoroughly wetted. The soft soap should be dissolved in hot water. The remaining ingredients are soluble in cold water.

5.—All diseased seedlings should be collected and burned. — Gardeners' Magazine.

Grows a Blue Rose.

The announcement a few days ago that Alfred Smith, rose specialist, of Downley, Bucks, England, had succeeded in raising a blue rose has drawn letters of inquiry and applications for the rose from all parts of the world. The applications are not only for specimen blooms and buds, but also for trees. Lady Coventry, the new blue rose, is of exceptional quality and color. Its production is the result of four or five years' experimenting. It is a cross between the well-known "Mlle. Eugene Verdier" and several other varieties. The rose, in opening, is vermillion, shaded and veined with intense blue, which predominates and extends until the ruling color is a lovely blue. The blooms are large and handsome, and require no special treatment, while the stock is exceptionally hardy. Mr. Smith has had considerable experience as a grower and exhibitor, having been awarded two medals at the inter-

Poehlmann Bros. Co., Morton Grove, Ill.**Some Interesting New Hardy Plants.**

The ever-increasing interest that is being taken in hardy plants must be regarded as, to some extent, responsible for the introduction of many new species from China, which has been steadily going on for some years past. Occasionally at the Royal Horticultural Society's exhibitions one or more of these new plants is to be seen, when it creates something akin to a sensation, after which it is not perhaps seen again for a year or two, until its fortunate owner has enough stock to put on the market. Even when a new plant is shown in quantity it is difficult to accurately gauge its utility for the garden.

Other business having taken us to the Liverpool district recently, we paid a surprise visit to the Sealand nursery of Bees, Limited, the youthful but energetic firm whose offices are situated at Mill street, Liverpool. Though a comparatively young firm, Messrs. Bees have already gained a good reputation as the introducers, through their traveler, Mr. Forrest, of several new hardy plants of unusual merit, notable among them being *Primula Littoniana* and *P. Bulleyana*. Those who visited Holland Park show this year will, no doubt, remember the first-named, the flower-spike of which reminds one more of *Orchis pyramidalis* than a *Primula*.

At Sealand, which is situated on the borders of Flintshire and not far from the River Dee, the firm has secured 200 acres of good loamy land in an open position, and although this is not all under nursery cultivation at present, it is available as such whenever required. Naturally, the new *Primulas* claimed our attention first, and we were much charmed with the way they were growing. In a cleared, open space in a small wood, where the soil is of a clayey nature, large masses of these were planted, and here *P. Bulleyana* was a beautiful sight indeed. Many of the specimens had been in this position for two years, and had formed enormous clumps, one plant that we specially noticed having seven large flower-spikes. The stems of these were nearly two feet high and each stem had four whorls or tiers of the brilliant golden orange flowers fully opened. In the declining rays of the sun, which glinted through the trees, the color of this *Primula* was magnificent. *P. Littoniana*, already referred to, was not quite open in the wood, but in another part of the nursery we saw a large batch of it with the curious cone-shaped flower-spikes partly opened, the fully expanded blossoms being lilac colored and the unopened flowers rich scarlet crimson. *Primula Beesiana* is a new one, so that much has not been heard of it yet, but we think it will prove as welcome as the two named above. It may perhaps best be described as a purple-flowered *P. Bulleyana*, having the same robust habit and tiered flower-stems as that variety. This, and also the new hybrid *P. Unique* were growing and flowering splendidly in the wood.

In the nursery we saw a vast array of new or rare beautiful hardy plants,

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great *Araucaria* Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Excelsa Glauca*, are in favor more than ever this year.

This is our 25th anniversary since we began importing *Araucarias*. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is **10,000**, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in *Araucarias* and *Azaleas*. The trade is well informed that for many years past I go personally to Belgium to protect and select for my customers the best of *Araucarias*, *Azaleas*, *Palms*, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 35c, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.

Robusta Compacta, Excelsa Glauca, 6 in. pots \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high, 4-5-6 years old, 75c, \$1.00, \$1.25, \$1.50, \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

Kentia Belmoreana, 25 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6-7 years old, 50c 75c, \$1.00, \$1.25, \$1.50 to \$2.00 each; 4-in., 25c each.

Kentia Belmoreana, 2½ to 3 in., 10c each. **Standard Bay Trees**, 1-foot tubs, 7 ft. high from bottom up, 2 x 2 crown, \$8.00 per pair.

Cyclamen Grandiflora, best strain, 4 in., 15c. **Nephrolepis (Ferns)**, Boston, Scottii, Whitmanii.

Scholzii, 4-in., 25c; 5, 5½ and 6-in., 35c, 40c and 50c.

Ferns for Dishes, big assortment, 2½-in. pots, at \$3.00 per 100.

Begonia Gloire de Lorraine, deep pink, 4-in., 25c. **Begonia Lonsdale**, pale pink, 4-in., only 25c.

Sago Palms, ready July 15, 6-7-8 in. pots, from 5 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c.

Adiantum Hyb., 2½ in. pots, 5c; 3 in., 8c; and 4-in., 12c.

Primula Obconica, best strain, 4-in., 10c; 5-in., in bloom, 15c.

Primula Chinensis, 4-in. pots \$10.00 per 100.

We have an unsurpassed strain of **Solanum Multiflorum** (Jerusalem Cherries). Can offer only a limited quantity, 3½-in. pots, strong \$5.00 per 100.

Cash with order, please. All plants must travel at purchaser's risk.

and it would require the whole of one issue of the Garden to enumerate them all. The following, however, specially appealed to us, though all are not new: *Androsace Bulleyana* is a new species from China. The flowers, which are rather small and borne in the usual clusters on stem about nine inches high, are bright scarlet. *Anemone demissa* is a fibrous-rooted species, with single white flowers and palmate foliage. *Codonopsis ovata* is a plant not well known, the pale slaty blue, bell-like flowers resembling in shape those of the smaller *campanulas*. The interior of the bells is very beautifully marked with orange. It grows rather more than a foot high. *Hypericum fragilis* is a new dwarf plant with bright yellow flowers, and somewhat resembles *H. polyphyllum*. It will doubtless prove a useful rock plant. *Campanula pulloides* reminds us of *C. pulla*, the plants forming neat tufts some six inches high, the foliage being almost obscured by the rich violet blossoms. *C. garganica alba*, a white form of the well-known plant, was romping away over the soil, creating quite a sheet of white and green. *Ajuga omniflorum* is a dwarf, very free-flowering member of the bugloss family, the sturdy growths being freely clothed with rich blue flowers.

The strain of *Primula* which we saw here was an exceedingly good one, and we think Messrs. Bees are fully justified in naming some of the more distinct varieties. Two that we much admired, and which were exceedingly free-flowered, were *Major Bee*, a hose-in-hose blossomed plant, the color being cream, blotched crimson. *Alpinus Bril-*

at Sealand is an exceptionally good one. At the time of our visit two long rows were creating a picture of rare beauty, the plants being about four feet high, much branched, and smothered with the large, brilliant blue flowers. We also noticed good collections of named pyrethrums and many other first-class hardy plants, all of which were in good condition. In addition to hardy plants, Messrs. Bees have a large collection of the best standard and new varieties of roses, as well as hardy ornamental-foliaged and flowering trees and shrubs. We were much interested in the way propagation is carried on at these nurseries, large cloches being used for the purpose. The propagating department resembled at first sight a section of an intensive culture garden. Apparently the system answers well, as the newly rooted plants of various kinds that we saw had a very robust and healthy appearance. We presume that visitors interested in rare hardy plants would be welcome at the Sealand nursery.—The Garden.

The Arctic Flora.

In exhibiting two recent collections of plants from Greenland and Ellesmere Land to the Torrey Botanical Club, Dr. Rydberg brought out several interesting facts relating to the flora of those ice-bound regions. There are about 150 different species of plants north of the Arctic circle and with the exception of the grasses and sedges, all of these are dicotyledons. One other monocotyledon, *Tofieldia palustris*, is found in northern Greenland. Twenty-six families of plants are represented. Nearly all the plants are perennials with low and densely tufted stems and thick rootstocks. There are probably not half a dozen annual plants in the flora, and the woody species are scarcely more numerous. Of course there are no trees but there are several shrubs or rather bushes; among them the dwarf birch (*Betula flabellifolia*), three willows (*Salix Groenlandica*, *S. anglorum* and *S. herbacea*), the crowberry (*Empetrum nigrum*), a blue-berry (*Vaccinium uliginosum microphyllum*) *Cassiope tetragona* and *Diapensia lapponica*. Most of the shrubs belong to the great heath family (*Ericaceae*) and several other members of this family extend nearly to the Arctic circle, notably marsh rosemary (*Andromeda polifolia*), Mountain heath (*Phyllodoce coerulea*), Labrador tea (*Ledum decumbens*), Lapland rice bay (*Rhododendron Lapponicum*), trailing azalea (*Chamaecistus procumbens*) and *Cassiope hypnoides*. More than three-fifths of the plants are circumpolar, that is, they are found in all lands that extend into Arctic regions.—American Botanist.

DES MOINES, IA.—Jas. S. Wilson, Jr., made an automobile trip last week to Chicago, where he is visiting friends.

'QUALITY' CHRISTMAS SWEET PEAS.

AT the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST AND SEPTEMBER.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kinks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cts., ¼ lb. 4 cts., ½ lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Florence Denzer. Pure white. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Le Marquis. This is the same color as Princess of Wales violet; has very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Helen M. Gould. White, open flower; standard lilac. marbled. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. Alex. Wallace. Lavender. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Geo. Lewis. Large, pure white wavy flower. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

Mrs. W. W. Smalley. Satiny pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Hannan. Deep rose-pink of a very pleasing shade; medium flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. P. J. Dolansky. Daybreak pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Chas. H. Totty. Sky-blue; late. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Mrs. Zvolanek. Blue, variegated; good for variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Wallacea. Very fine lavender, a grand florists' variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.

Watchung. Pure white. Oz. 20 cts., ¼ lb. 60 cts., ½ lb. \$1.00, lb. \$1.75.

Wm. J. Stewart. Blue self. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

All other varieties of winter and summer flowering Sweet Peas supplied. Write for quotations upon large or small quantities.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

Where Comeliness is Not Wanted.

"Cashier—an ugly cashier; permanent position; apply at once."—Florist. The startling advertisement above appeared among the "Wants" in St. Louis papers, and it is probable one of the few cases on record where personal unattractiveness was listed as being one of the desired qualifications among candidates. Too many wedding bells for previous cashiers is the reason for the attempt on the part of the firm to get an "ugly" cashier. It is not desired to have one who is "ugly" in temper or who would become "ugly" when aggravated. The short word applies solely to the woman's outward appearance and her disposition may be as fine as possible. Five cashiers, formerly in the employ of this concern, not ugly, have

Heacock's Palms Are The Best All-'Round Decorative Plants Your Trade Can Buy

THERE still remain several weeks of "out-door" weather in which your customers will want to keep their verandas and lawns attractively decorated, but the time is not far away when the will want plants to brighten up the inside of the house.

This affords a splendid opportunity for you to sell more Palms—there is no better all-round plant for indoors and out, winter and summer, than a good Palm. Our Palms are grown so that they are really the best you can get. They are profitable for you to handle, assure satisfaction to your trade, and make it easier for you to sell, not only more Palms, but more of other things as well.

Our Palms are clean, well grown, attractive stock; the kind you'll be glad to handle if you're not already carrying them. We've had a busy season, but there is still an excellent stock to select from. Look over the list and let us know your wants NOW.

Railway Station: JENKINTOWN

Lilies for the Home Garden.

Portion of a paper read before the Massachusetts Horticultural Society by E. S. Miller, Wading River, N. Y., March 12, 1910.

The lily has been given us in song and story for 3,000 years. Solomon sang of its grace and loveliness. Other writers in the Old and New Testaments have mentioned its beauty. Poets have sung of its worth and loveliness down to the present time. We have this mythological account of its origin: "Jupiter wished to make his boy Hercules (born of a mortal) one of the gods; so he snatched him from the bosom of his early mother, Alcmena, and bore him to the breast of the godlike Juno. The milk is spilled from the full-mouthed boy as he traverses the sky (making the milky way), and what drops below stars and clouds and touches earth, stains the ground with lilies."

The identity of the different species is wrapt in obscurity. While *Lilium Chalcedonicum*, the scarlet martagon, covers the plains of Syria, and *L. candidum*, the annunciation lily, grows abundantly in these regions, it is generally conceded that the lily of the field, mentioned centuries later, was the anemone. Notwithstanding the early obscurity of the species referred to in the Bible we find that *L. Chalcedonicum* and *L. candidum* were introduced into England prior to 1590, over 300 years ago. Gerarde in his herbal, published in 1596, speaks of *L. candidum* as an old and well-known flower, and mentions martagon lilies as being under cultivation as early as 1562. *Pyreniacum* was brought from the Pyrenees to England before this date. In this time much has been written of them, and about 150 species and varieties have been introduced to cultivation.

Parkinson in his "Paradisus or Garden of Pleasant Flowers," published in

1689, gives the lily the most prominent place, "because (as he says) the lily is the more stately flower among manie." He mentions 13: five varieties of the martagon imperial, among them the spotted martagon of Canada (our native *Canadense*); six varieties of the umbellati lilies; croceum, the golden red lily; bulbiferum, the red bulbous lily; and the remaining two he describes as white lilies. He adds: "the martagon is so common I will not lose time to bestow many lines upon it."

Kaempfer, Linnaeus, and Thunberg described several species and varieties as early as 1712. The earliest attempt to publish a monograph of the genus *Lilium* was in 1847, by Spae. He, being a skilled horticulturist and botanist, based his work on careful observations of living forms, making it by far the most complete and useful account of the genus, until DuChatre of Paris, Baker of Kew, and Max Leichtlin of Carlsruhe gave the results of their labors to the world in 1870. In 1879 Prof. Sereno Watson published his revision of "North American Lilies," a very complete work. Other workers have given the results of their labors in various publications. The finest work devoted exclusively to lilies is a monograph of the genus by Henry John Elwes, published in 1880, containing about 50 folio plates colored by hand, illustrating over 60 species with very full and accurate description, life history, classification, geographical distribution, habitats, culture, etc.

Very little literature is found in American publications previous to 1870. Since that time the horticultural press has given us notes and articles on the subject, but mostly on forcing lilies, and quotations from foreign publications. If, however, the amateur looks

to foreign publications for notes and cultural directions, he finds they are not suited to his needs in this climate. As for instance telling us to grow *Lilium tenuifolium* (from seed) "in a hot-bed, at a temperature of 70°; and in pots or pans of turfy loam, peat, and leaf-mould with the addition of one-sixth part of silver sand; also the seeds to be covered with fine soil to a depth equal to the diameter of the seed, i. e. one-eighth of an inch, and gently watered; when the plants appear to remove them to a vinery or greenhouse, where they should be placed in an airy position, kept well supplied with water, which in September should be gradually withheld and discontinued after October; the seeds to be placed so far apart that they can grow in the pots or pans as sown (an inch to suffice); in November to pot them singly in 4-inch pots or three of them in a 7-inch pot and to winter them in a cool greenhouse."

Now, if this early treatment should be practised here the chances are we would have no use for the directions for culture after September, for in our humid days in July and August the novice would find about 90 per cent of his seedlings had disappeared from damping off. Here, we sow all the lily seeds outdoors in well-prepared beds five feet wide, in rows one foot apart, covering the seed about an inch with not too fine soil. Instead of an inch apart we sow five to ten or more seeds to the inch; covering the bed thinly with excelsior at once. As soon as the plants appear, we remove the excelsior.

Neither are the dealers' catalogues, with a dozen lines of cultural directions, of much assistance. While lilies have been cultivated extensively for nearly three centuries in England very

Dreer's Araucaria Special

Exceptional values in Araucarias for Immediate Delivery.

Araucaria Excelsa (Norfolk Island Pine).

Our stock of Araucarias is very complete in all sizes. The plants are all of good value, and will be found a profitable investment to grow on for winter sales.

HENRY A. DREER, Inc., 714 Chestnut St., Philadelphia, Pa.

Little attention was paid to them here previous to 1850. When this country was colonized, Michaux, Pursh, Bart-ram, Collinson, and others collected and sent bulbs of our east-coast lilies to Europe, where they have been extensively grown since. Comparatively few varieties of lilies are grown here even today. When *L. speciosum*, *L. auratum* and their varieties were introduced they gave an impetus to lily culture. Magnificent results have been obtained in the culture of these, particularly *auratum*, in the vicinity of Boston and elsewhere.

From 1860 to 1870 the west-coast varieties were discovered and introduced. There seems to be no more interest in growing now than in the 60s or 70s. Could not this be remedied by more vigorous, aggressive work by the press and dealers? Taking up a dozen catalogues offering lilies, I find one offers 38, one 22, one 13, and the rest less than a dozen varieties, while one dealer in 1876 offered over 40 varieties, and in 1880 one firm offered 59 varieties, having them in stock. This offering only a few varieties, and the fact that the dealers tell you that they are hardy, are two causes why lilies are not more generally grown. I am speaking now of the home garden of the average flower lover. In the gardens, for instance, in the rural districts where flowers are grown, the tiger lilies are often seen, and occasionally *auratum*, *speciosum*, or *elegans*, but beyond this the lily family is not represented. Few people succeed with lilies outside of the varieties mentioned. Failures result from various causes such as lack of knowledge of the varieties best suited to the climate, soil, location and cultural treatment. Some people will succeed with lilies in situations where others fail. Some will succeed with one manner of treatment while others will succeed with another.

As a rule all lilies are given as hardy by the dealer and the majority are, under certain conditions, but the climate is so varied in this country that lilies that are hardy in one section may not be in another; for instance, they are able to withstand the winter in Maine, New Hampshire, and Vermont, while they will succumb on Long

Island, New Jersey, and even farther south, because the ground usually has a blanket of snow in the northern states all winter, while on Long Island and farther south the ground freezes and thaws all winter and snow rarely covers the ground for more than a week at a time, and then only three or four times during the winter. This is death to most lilies; the frequent freezing to a slight depth lifts the bulbs and pulls them off the roots the same as it does with many perennials. Iris Kaempferi often freezes out this way. *Funkia subcordata alba* we have to lift and heel in over winter. I have had seedling *tenuifolium* and sets of other lilies, where they were not covered, frozen out so they were entirely out of the soil.

Now we imitate the snow blanket by using coarse stable manure, or gladioli tops, which is our most available mulch. Particularly tender sorts we plant in frames, mulch with litter, and cover with sash or tight shutters to carry off the water. If sash are used we cover lightly with litter to keep out the sun. We never mulch until the ground freezes, to avoid giving the nice a harbor. In my early days I bought a lot of lilies, among them *L. Hansoni* at \$5 each. Thinking to do well by them, I prepared a fine border in early fall, planted them carefully at the proper distance and depth. To make sure that they would not be in-

Post Office Flower Show.—The postmaster-general and Mrs. Samuel, accompanied by Sir Matthew Nathan, secretary to the post office; J. Newlands, the controller, and J. Willshire, deputy controller, visited last week the annual exhibition of the Central Telegraph Office Amateur Gardening Association, which has 330 members. One of the large rooms at St. Martin's-le-Grand was filled with exquisite blooms, roses and sweet peas being especially fine. Features of the exhibition were a display of 100 different cacti by Mr. Doree, of Ilford, and a very fine show of foliage plants by Mr. Pincock, also of Ilford. Competition in all the sections was remarkably keen, and Mr. Samuel was warm in his commendation of the results obtained. Mrs. Samuel was presented with a floral basket by the lady supervisors.

A Blue Rose.—Alfred Smith, of Downley, near High Wycombe, who has a nursery garden in proximity to the Hughenden Manor estate, has, after much perseverance, succeeded in raising a beautifully shaded blue rose, said to be the most distinct variety yet produced. He has given it the name of Lady Coventry. Among other specimens is a new climbing rose (grown from a wild dog rose, and blended with a cultivated rose), which is remarkably prolific in bloom, pure white and deliciously scented. These roses bloom in clusters of from 40 to 60, and are appropriately named Snowdrift. This florist has also been successful with carnations, some of which bear the distinguished names of John Hampden, Lord Wendover, Sam Fay, Mary Hamilton, and Barbara Dean.

Fraud in Seeds.—At a meeting of the council of the Central and Associated chambers of agriculture on July 12, C. Bathurst, M.P., said much fraud was perpetrated in the sale of seeds. In the purchase of clover seeds people sometimes got an addition of worthless seeds which were similar in appearance. These seeds were sterilised, so as to avoid the consequences which might ensue when a mixed crop made its appearance above the ground.
